WARSAW (OCT 15) - The president of the European Bank for Reconstruction and Development (EBRD) in eastern Europe, Jacques Attali, arrived here Monday to set up the bank's activities in Poland.

He was to spend two days talking to Poland's leading politicians and economists to "establish the Polish government's needs and fix its priorities " a spokesman for Mr. Attali said.

The bank plans to begin financing projects in Poland after the institution's 42 founding nations have completed ratification of its statutes by March 1991.

The EBRD was founded earlier this year with a capital of 10 billion European currency units (about 12 billion dollars) to help the newly democratized nations of eastern Europe move from a centrally-planned to a market economy.

Mr. Attali was scheduled to meet Polish Finance Minister Leszek Balcerowicz Monday, and Prime Minister Tadeusz Mazowiecki and President Wojciech Jaruzelski on Tuesday.

#90288d0450 10/15/1990 ~French/German News Agency
ISLAMABAD (OCT 15) - A group of 44 Pakistani senators Monday attacked a as "blatant interference" a warning from a bloc of U.S. senators that deposed premier Benazir Bhutto should not be barred from upcoming elections.

In a letter to President Ghulam Ishaq Khan, quoted by the official Associated Press of Pakistan (APP), the senators said the views of the 53 U.S. senators amounted to "blatant interference" in Pakistan's internal affairs.

The historically close Pakistan-U.S. relationship is "bound to be affected if it is based on anything other than mutual respect for each other's sovereignty " the Pakistani senators said.

They were reacting to reports here that U.S. Democratic Senator Daniel Patrick Moynihan of New York and a bipartisan group of 52 more senators had jointly sent a letter to President George Bush on October 8.

In it, they expressed their concern over the August 6 dismissal of premier Benazir Bhutto's democratically elected government. Mr. Moynihan was quoted as saying: "Those who would subvert democracy in Pakistan are forewarned."

The letter warned that Pakistan-U.S. ties would take an "inevitable and severe turn for the worse" if elections were not held freely and fairly on schedule.

The Pakistani senators said the eligibility of election candidates "is not to be determined by U.S. senators but by courts established under the constitution and law of Pakistan."

They also regretted the refusal of the U.S. administration to certify to congress that Pakistan's nuclear programme was for peaceful applications. This has resulted in a blockage of U.S. aid to pakistan.

"This step is particularly regrettable because it has come at a time when Pakistan is facing threats on its borders and is under heavy pressure because of the Gulf situation," the senators said.

Under the Pakistani constitution, the indirectly elected 86-member senate enjoys immunity from dissolution. It has only two members from Ms. Bhutto's Pakistan People's Party.

The national assembly, elected on the basis of direct adult franchise, was dissolved by Mr. Ishaq Khan when he dismissed Ms. Bhutto on charges of misrule and corruption.

#90288d0540 10/15/1990 ~French/German News Agency

AMMAN (OCT 15) - Fifteen Spaniards arrived here Monday from Baghdad aboard a regularly scheduled Iraqi Airways flight following their release by Iraqi authorities, correspondents reported.

The former hostages were accompanied by leftist Spanish MP Cristina Almeida of Izquierda Unida, a coalition headed by the Spanish Communist Party and whose intervention secured their release.

The 15 were among 5,000 Western and Japanese nationals who have been held in Iraq to deter a feared attack by Western forces that were deployed in the Gulf region after the Iraqi invasion of Kuwait on August 2.

Since the invasion, 148 Spanish citizens have been allowed to leave Iraq and Kuwait.

A spokesman for the Spanish Foreign Ministry said Mrs. Almeida's delegation had no connection with the Spanish government.

"A nation cannot negotiate with someone who is holding people against their will," the spokesman said Saturday when Iraq's decision to release the 15 was announced.

ACCRA (OCT 15) - Distribution of relief food in the beleaguered Liberian capital, Monrovia, has been halted because of fighting there, according to reports here Monday.

The reports said the West African peacekeeping force was advancing rapidly against forces of the main rebel leader, Charles Taylor.

They said relief workers organized by the Belgian wing of the charity organization, Medicins Sans Frontiers, had pulled out because of heavy fighting. Local residents had also scattered in different directions.

The reports said distribution of food was halted Sunday at a major refugee camp at the university campus which last week housed about 100,000 people.

Thousands of people are starving in Liberia, where about ten months of a bloody civil war has destroyed the country's economy and infrastucture. People are also dying due to lack of medicine.

#90288d0880 10/15/1990 ~French/German News Agency

PARIS (OCT 15) - France continued to run a current account deficit in August with a shortfall of 2.3 billion francs (about 450 million dollars), against a deficit of 4.5 billion francs in July, the Economics Ministry announced here on Monday.

Those figures are seasonally corrected. In uncorrected and estimated figures, the current balance in August showed a deficit of 780 million francs,

following a shortfall of 1.8 billion francs the previous month, the ministry said.

For the first eight months of the year, the current account, seasonally corrected, is in deficit by 16.7 billion francs, compared with one of 12.1 billion for the same period last year. The gross figures for the two periods are 20.3 billion francs for this year agaist 14.3 billion for the first eight months last year.

France had a merchandise trade deficit on a balance of payments basis of 3.8 billion francs in August, and the cumulative deficit so far this year is estimated at 43.9 billion, a bit less than the 46.4-billion-franc shortfall for the first eight months last year.

#90288d1010 10/15/1990 ~French/German News Agency

STOCKHOLM (OCT 15) - Sweden enjoyed a trade surplus of 1.6 billion kronor (about 280 million dollars) in September, half of the 3.2 billion recorded for the same month last year, the Central Statistics Office here announced on Monday.

It said exports amounted to 28.8 billion kronor, and imports to 27.2 billion.

For September last year, exports were 29.9 billion kronor and imports 26.7 billion. This means that exports in September were down by four percent from a year earlier, while imports were up by two percent.

The office said that imports and exports of oil products taken together caused a decline of around 1.7 billion kronor in the September trade balance compared

to a year earlier.

For the first nine months of the year, exports totaled 250.3 billion kronor and imports to 236.6 billion, against 244.4 billion and 228.8 billion for the corresponding period last year.

#90288d1430 10/15/1990 ~French/German News Agency

STOCKHOLM (OCT 15) - Swedish auto-maker Saab Automobile AB suffered a loss of more than two billion kronor (350 million dollars) for the first eight months of the year, manager Georg Karnsund said here on Monday.

He said sales for the period amounted to 9.7 billion kronor, down almost 10 percent from the corresponding period last year. SAAB sold 65,100 vehicles in the period, against 79,400 in the same period in 1989.

The firm shed 1,500 employees during the first eight months, and now has 15,300.

#90288d1810 10/15/1990 ~French/German News Agency

NAIROBI (OCT 15) - Kenyan President Daniel arap Moi Monday ordered repatriation of Rwandan refugees in Kenya, shortly before holding talks with Rwandan President Juvenal Habyarimana at Nakuru, 160 kilometres (100 miles) west of here, the Kenyan Broadcasting Corporation (KBC) radio reported.

President Moi told a rally at Nakuru's Afraha Stadium Monday afternoon that Kenya will not harbour any refugee who is found to be engaging in destabilising his country of origin, the KBC radio said.

President Moi told the United Nations High Commission for Refugees (UNHCR) in Nairobi to repatriate or take elsewhere Rwandan refugees in Kenya, "who had engaged in unbecoming behavior in their country".

The order by the Kenyan president came shortly before President Moi was due to hold talks with President Habyarimana, who flew from here to Nakuru later in the afternoon, to brief him on the curerrent situation in Rwanda.

Major-General Habyarimana arrived here early Monday for talks with Belgian Prime Minister Wilfried Martens on ways of ending this month's fighting between rebels invading from Uganda and Rwandan government forces.

The rebels of the Rwandan Patriotic Front are mainly minority Tutsi refugees who left Rwanda at the height of tribal massacres more than three decades ago and have been serving in Ugandan President Yoweri Museveni's National Resistance Army since he came to power in January 1986.

The guerrillas invaded Rwanda on October 1 in an attempt to overthrow the majority Hutu regime of President Habyarimana.

Hutus constitute 90 percent of Rwanda's estimated 7.5 million population.

#90288d2300 10/15/1990 ~French/German News Agency

WASHINGTON (OCT 15) - The United States said Monday it did not give Syria the green light to attack the Baabda presidential palace in Lebanon Saturday, forcing the surrender of Christian military leader Michel Aoun.

State Department spokeswoman Margaret Tutwiler denied the United States had indicated to Syrian President Hafez al-Assad that in return for his help in the international effort to push Iraq out of Kuwait, Washington would ignore an offensive to force out General Aoun.

"If you are asking me 'did the United States give Syria a green light,' I would tell you absolutely not," she said. "We did not give him any lights.

"At the request of the legitimate government of Lebanon, Syrian forces were asked to help," she said. "It is longstanding United States policy that all foreign forces in Lebanon leave."

Miss Tutwiler refused to speculate on whether Saturday's action improved the chances of an independent Lebanon under Syrian-backed President Elias Hrawi.

The United States had said Saturday that "now is the time for national reconciliation and a free, independent, sovereign Lebanon, free of foreign forces and armed militias."

Gen. Aoun, staunchly anti-Syrian, had controlled the Baabda palace and defense ministry for two years when Syrian troops and units of the Lebanese Army forced him out Saturday.

He took refuge at the French Embassy in Beirut.

Miss Tutwiler said the United States had always advised Gen. Aoun to step aside. "We have never taken a position on what should happen to him after doing so," she said.

TOKYO (OCT. 16) - Japan's three long-term credit banks are considering reducing the long-term prime rate, possibly at the end of October, the Nihon Keizai Shimbun said Tuesday.

The influential Tokyo financial daily quoted banking sources as saying the the move was prompted by the steep decline of the benchmark interest-bearing bank debenture's yield in reaction to the stronger yen.

The long-term prime rate, currently 8.89 percent per year, is the lending rate that the Long-Term Credit Bank of Japan, Industrial Bank of Japan, and Japan Credit Bank offer to their major clients.

The long-term prime rate was last reduced at the end of May.

#90288d7270 10/15/1990 ~French/German News Agency

JAKARTA (OCT. 15) - Indonesia Monday announced that it has increased the October contract price of its main Minas crude for sale to Japan to 35.25 dollars a barrel.

Mines and Energy Minister Ginanjar Kartasasmita told reporters the new price represented an increase of more than seven dollars from last month's rate of 28.03 dollars.

Indonesia sets the price of its crude oil to Japan, its main client, in the middle of each month, under an agreed formula which takes into account the development in the spot markets of five Asian crudes.

Mr. Ginanjar said the Minas spot price last week hit a record high of 41 dollars before closing at 40 dollars on Friday.

Japan buys about half of Indonesia's crude exports of around 700,000 barrels per day.

Mr. Ginanjar said that although in terms of state earnings the higher oil price was good news, he was worried that the world economy would not be able to absorb oil costs of above 40 dollars.

"That's why we'd like to reiterate our appeal that industrial countries release their oil stocks to bring prices under control ahead of the winter (in the northern hemisphere)," he said.

TOKYO (OCT. 15) - Japan achieved a foreign trade surplus of 6.9 billion dollars, down 3.9 percent from the surplus in the same month last year, the Finance Ministry reported Monday.

Exports in September rose 6.1 percent to nearly 25.8 billion dollars, while

imports increased by 10.3 percent to 18.9 billion dollars.

In its trade with the United States, Japan's surplus was 4.31 billion dollars, down 9.7 percent on the September 1989 figure.

#90288d7940 10/15/1990 ~French/German News Agency
LONDON (OCT. 15) - British retail sales rose by 0.5 percent in September compared with August, provisional official figures showed on Monday.

In the year to September sales rose by 0.2 percent.

The figures represented a slight recovery from the monthly fall of two per cent in August when the annual increase was 0.1 percent.

The treasury said that the figures reflected the government's firm political response to reduced inflation.

The Confederation of British Industry (CBI) published a report on Monday saying that the policy of high-interest rates to reduce inflation had caused sales of cars to fall in September and was responsible for other weak figures in trade and retailing.

But the CBI said that the recent one-point reduction in interest rates should boost sales in coming months. CBI official Nigel Whittaker said: "As mortgage rates are reduced over the coming months, consumers will in time be left with more money in their pockets."

#90288d8160 10/15/1990 ~French/German News Agency
WELLINGTON (OCT. 15) - New Zealand's inflation rate fell dramatically according to official figures released here Monday but the ruling Labor Party's gamble in holding elections after the announcement seems unlikely to save them from defeat in a fortnight.

A public opinion poll Monday showed Labor closing on the opposition National Party but still trailing by 16 percent ahead of the October 27 polls.

Figures released by the Statistics Department put the consumer price index in the three months to September up one percent to give a five percent rate in the year.

For the 12 months to June inflation was running at 7.6 percent.

The figures showed housing costs were the biggest contributor, accounting for more than a third of the one percent increase while food was responsible for a

quarter of the rise.

Because the inflation figures were in line with market expectations the announcement had no impact on the stock exchange, interest rates or the New Zealand dollar.

In August then prime minister Geoffrey Palmer sought to time the election after the release of the inflation figures as it was known they would be good.

Monday's figures were the first annual rates which did not include a July 1989 2.5 percent increase in the goods and services tax which boosted inflation to 12.5 percent.

However, the Gulf crisis has pushed up oil prices which will inevitably have an impact on inflation. Observers here said Monday's good figures were seen more as an historical oddity than a trend for New Zealand's future.

Meanwhile, a Television New ZealandHeylen poll of 970 voters broadcast Monday showed support from decided voters for National dropping nine points to 50 percent while Labor had gained two points to 34 percent.

Pundits said National's 16 percent lead did not look so strong when the 33 percent of "don't knows" was taken into account.

The poll, taken on Saturday and compared with one two weeks ago, also showed incumbent Mike Moore with 28 percent support as the voters' preference for prime minister, up seven points, while opposition leader Jim Bolger was on 16 percent, up two points.

The poll also showed support for the Greens had increased to 10 percent, up six points, and New Labor remained steady on four percent.

Reacting to Monday's inflation rate Westpac Banking Corp. said it expected the December quarter figure to be between 1.5 and 2.0 percent -- taking annual price rises to between 5.3 and 5.8 percent.

Mr. Moore and Finance Minister David Caygill said the inflation figures compared favourably to Australia's rate of more than seven percent and Britain's rate of nearly 11 percent.

In a joint statement they said the results included some of the early effects of the oil price rise but the brunt of the increase would be felt over the next two quarters.

"Our trading partners must also pay more for their oil and this result provides New Zealand producers with a clear head start," they said.

Mr. Moore and Mr. Caygill said the one percent increase in prices in the

September quarter worked out at an annualized rate of 4.1 percent.

"Our policies are restoring this country's competitiveness, which is critical to more jobs," they said.

"It is no coincidence that New Zealand now has a lower inflation rate and lower interest rates than Australia.

"Countries which historically have very low interest rates, like Switzerland, Japan, and West Germany, also have good records of low inflation," they added.

NICOSIA (OCT. 15) - Syria will begin later this month to pump 20,000 barrels of crude oil a day to Lebanon through a section of a pipeline that originates in Kirkuk, Iraq, and ends in the Mediterranean, the Middle East Economic Survey said Monday.

The Nicosia-based newsletter said the decision was contained in a deal signed between Lebanon and Syria earlier this month.

Under the terms of the agreement, Syria will supply the north Lebanon oil refinery at the Mediterranean port city of Tripoli with 20,000 bd for the first time since 1982.

The Kirkuk-Mediterranean pipeline was shut down in 1976 following differences between Iraq and Syria over the transit dues levied on Iraqi crude oil exports from the Mediterranean terminals, said MEES.

But the pipeline was subsequently opened from 1979 until March 1982 for export from the Syrian port of Banias and Tripoli, Lebanon.

SINGAPORE (OCT. 15) - Singapore and Brunei will send two aircraft with medical and relief supplies to Amman to help refugees stranded in Jordan since the Gulf crisis broke out in early August, officials here said Monday.

A foreign ministry statement said Singapore and Brunei would jointly commission two C-130 aircraft from the Republic of Singapore Air Force (RSAF) for the relief effort to be launched Monday.

On their return, the two aircraft will be used to evacuate Sri Lankan nationals still stranded in the refugee camp in Amman since Iraq's invasion of Kuwait on August 2, the announcement added.

The statement said Singapore was deeply concerned about the "tense situation in the Gulf region and the well being and safety of foreign nationlas stranded there."

"The government of Singapore and the Government of Negara Brunei Darussalam, considering the human suffering and plight of these foreign nationals and in response to these latest appeals, have decided to jointly send two RSAF C-130s with medical and relief supplies to Amman," the statement said.

Singapore has strongly condemned Iraq's action and has given full support to the United Nations call for international sanctions against Baghdad.

LONDON (OCT. 15) - Levels of radioactivity on the big Arctic island of Novoya Zemlya, in the Soviet Union, are between 20 and 50 times the normal rate, the ecological action group Greenpeace said here.

Greenpeace, whose boat was briefly detained by the Soviet authorities in the Barents Sea on Saturday, is campaigning against Soviet nuclear testing in the region.

A Greenpeace statement on Sunday said that detectors placed on the island had found radiation levels of 50 becquerels per square centimetre. The normal level would be between one and three becquerels per square centimetre.

The organization said its vessel Greenpeace, which was towed to the Soviet Arctic port of Murmansk before being released at the weekend, was now headed towards the Norwegian port of Tromso.

JOHANNESBURG (OCT. 15) - The South African mining house Gencor is to participate in a one billion pound project to exploit a major North Sea oil reserve, Business Day newspaper reported here Monday.

Gencor has an eight percent stake in the venture, which is managed by the U.S. group Chevron and involves several large oil companies from around the world, said Bernard Smith, the chairman of Gencor's energy subsidiary, Engen.

The oilfield is the Alba field, which is east of Aberdeen off the coast of Scotland.

The oil reservoir is 1,800 metres (yards) beneath the sea bed and contains some one billion barrels of oil.

Gencor also has an eight percent interest, with the same partners, in the Kilda field, a significant gas-condensate field lying under Alba.

The project to exploit the Alba field is subject to approval from the British Energy Department.

The first part of the project will cost about 600 million pounds and is expected to produce oil by 1994.

Mr. Smith said a technical feasibility study had been completed and the venture looks viable.

TOKYO (OCT. 15) - Japan's Ushio Inc. said Monday it had bought Germany's BLV Licht und Vacuum Technik GmbH from Venture Lighting International Inc. of the United States for 19.4 million deutsche marks (12.8 million dollars).

The manufacturer of specialized lamps said the acquisition of the Munich-based lamp maker would help expand the activities of Ushio's seven sales offices and four plants abroad including supplies of local products.

Ushio, whose products are used in semiconductor and office equipment, also noted Japanese demand for BLV's expanded output of halogen and metal halide lamps.

The German company currently employs some 300 people and had sales of 20.6 million dollars last year, it said.

BANGKOK (OCT. 15) - Six university students forcibly taken to a hospital here by police after staging a demonstration demanding the resignation of Prime Minister Chatichai Choonhavan's government pledged Monday to continue their fight for democracy.

Wanchai Chupong, one of the six, told reporters at the Police Hospital where they are under psychiatric supervision that they would continue their protests until "genuine democracy" was achieved in Thailand.

"Without a democratic system, the poverty amongst the majority of the people cannot be solved," 33-year-old Mr. Wanchai said.

Seven Ramkhamhaeng University students were taken to the hospital late on Sunday after police broke up the demonstration in front of the Government House, which houses the prime minister's offices.

One student was allowed to return home late on Sunday after his family picked him up from the hospital. Five students plan to return home later on Monday while another is expected to remain in hospital for a few more days.

National Police Chief General Sawaeng Theerasawat stressed that the students were technically not under arrest but were being held under supervision for psychiatric treatment at Bangkok's Police Hospital.

Five psychiatric doctors assigned to look after the students said none showed any signs of suffering from mental problems.

MOSCOW (OCT. 15) - Soviet Foreign Minister Eduard Shevardnadze reiterated Monday Moscow's opposition to Japanese territorial claims over four islands which the Soviet Union seized at the end of World War II.

Addressing the Soviet parliament here, Mr. Shevardnadze said however that Moscow was willing to discuss joint economic development of these islands along with that of other Soviet territories.

Negotiations were currently taking place to hammer out a peace treaty with Japan, to formally end the world war hostilities, the minister said.

Soviet President Mikhail Gorbachev is expected to make an official visit to Japan next April.

Questions of border delineation were also being discussed, but "we are not examining" the possibility of returning the four Kuril islands to Japan, Mr. Shevardnadze said.

"The question is not being examined as we believe there are neither historic, nor legal grounds for claims to be made against the Soviet Union," he added.

However, the joint economic exploitation of the islands and the setting up of joint ventures was a possibility, Mr. Shevardnadze said, adding that "such questions can be examined with regard to these islands and other territories of the Soviet Union".

#90288d8550 10/15/1990 ~French/German News Agency

NICOSIA (OCT. 15) - British insistence that Iraqi leader Saddam Hussein's only choice is between leaving Kuwait willingly or at gunpoint was "arrogant", the official Iraqi news agency INA said on Monday.

It was referring to Sunday's speech in Cairo by British Foreign Secretary Douglas Hurd in which he told the Egyptian foreign ministry's diplomatic institute that "Saddam Hussein will withdraw from Kuwait. On this he has no choice. His only choice is whether to leave of his own free will or to leave at the point of a gun".

INA said that was the language of "supremacy and arrogance". Mr. Hurd was always threatening Iraq with cannons and thought he was still living at the time of the British Empire.

"He forgets the Iraqis fought his ancestors with sticks and stones and old rifles, and chased them from the country," the agency commented.

It said Iraqis were "impatient" to fight American, British or Zionist "aggressors to give them a new, unforgettable lesson".

#90288d8560 10/15/1990 ~French/German News Agency
SIDON, LEBANON (OCT. 15) - Rival Shiite factions clashed with automatic weapons near here Monday leaving a member of the Iranian-backed Hezbollah movement dead, police.

The clash pitted members of the Syrian-backed Amal militia and a Hezbollah (Party of God) fighter, police said.

A spokesman for Amal confirmed the report but it was not immediately clear what prompted the bloodshed -- the latest in the endemic feud between the rival Shiite factions.

Amal sent reinforcements to Haret Saida, an eastern suburb of this port city and set up roadblocks while the nearest Hezbollah barracks at Arba village, one kilometer (mile) away, was placed on full alert.

The clash was the first in its kind to take place in five years in the Sidon region, home of Lebanon's two largest Palestinian refugee camps where an estimated 200,000 people live.

The secular Amal militia and the fundamentalist Hezbollah have been fighting since 1988 for the control of the Shiite community -- Lebanon's largest religious group.

#90288d8640 10/15/1990 ~French/German News Agency
JERUSALEM (OCT. 15) - The Palestinian Islamic Resistance, Hamas, on Monday urged Arabs to kill Jewish "blood suckers" to avenge the Israeli police killings of 21 Palestinians last week.

Hamas, in a statement distributed in the Israeli-occupied West Bank, also urged Palestinian residents of that territory to burn cotton fields in Israel on October 20, 21 and 22 and to observe a general strike Saturday.

These measures, the statement said, were aimed at protesting the police killings of 21 Palestinians on October 8 at the Temple Mount -- an east Jerusalem site sacred to both Moslems and Jews.

"Jews are proving each day that they are blood suckers with human faces and have always sown evil and conflicts ... every Jew or (Israeli) settler is a target that we must eliminate," the Hamas statement said.

The Israeli army earlier lifted a weeklong curfew of several Palestinian refugee camps and towns in the occupied Gaza Strip but kept a blockade of Gaza City and a curfew of the occupied West Bank, military sources here said.

But the entire Gaza Strip, declared by the army a "closed military zone", was off limits to journalists, they added.

The measures were imposed after the October 8 bloodbath in which some 150 Palestinians were also shot and wounded by Israeli police.

Palestinian sources said a general strike launched after the east Jerusalem shootings would continue to affect that part of the city, as well as the Gaza Strip and the West Bank.

#90288d9190 10/15/1990 ~French/German News Agency

BEIJING (OCT. 15) - China faces a huge shortfall in food grains by the turn of the century unless it boosts production and cuts consumption, the China Daily said Monday.

China will need between 590 and 620 million tons of cereals by the year 2000 if its present population of 1.1 billion people continues to grow at the present rate, the official English-language newspaper said.

The country has set an output target of 500 million tons for the turn of the century, which Western experts believe to be unobtainable.

China is expecting a record grain crop of 422 million tons this year after a harvest 407.5 million tons in 1989.

Grain output is seen as a gauge of stability in China and the country's leaders have given priority to the agricultural sector this year.

Since 1984, consumption has increased at between 12 million and 15 million

tons each year, the newspaper said, adding that this figure could rise further as the population increased by up to 15 million people each year and the standard of living improved.

In the past few years China has imported some 10 million tons of grain annually, making it one of the world's largest buyers.

#90288d9200 10/15/1990 ~French/German News Agency

WELLINGTON (OCT 15) - The creditors, mostly Japanese, of collapsed merchant bank DFC New Zealand Ltd. were given an ultimatum Monday to accept a 2.2 billion New Zealand dollars (1.3 billion U.S) plan or face immediate winding up.

Statutory manager (receiver) Sandy Maier said in a statement here he was confident the plan would receive the required level of acceptance, at least 75 percent, by the November 16 deadline.

"If for some reason it does not, I will explore alternatives such as an immediate winding up," he said.

Set up by the government in 1964 as the Development Finance Corporation to provide development capital and advice to businesses, the DFC became a key New Zealand player in international money markets before emerging as a full-blown merchant bank in the 1980s.

In 1988 the government sold 80 percent of DFC to the National Provident Fund (NPF) and the remainder to U.S. investment firm Salomon Brothers for 111 million dollars (67 million U.S.), some 432 million dollars (263 million U.S.) below book value.

DFC suffered badly in the global stockmarket crash of 1987 and was placed in statutory management in 1989 when the accounts revealed shareholders' funds of 180 million dollars (109 million U.S.) were virtually wiped out by bad debt provisions

With Japanese banks heavy lenders the collapse created a severe political problem for Finance Minister David Caygill who insisted the government had no liability.

Under the plan, the government will pay 112 million dollars (68 million U.S.) in cash, provide currency swap transactions to hedge the DFC's currency exposure and sell to the DFC zero coupon notes to be used as collateral.

Madrid (OCT. 15) EFE - Striking truck drivers blocked several main highways and closed frontier crossings, creating massive traffic pile-ups across Spain on Monday, traffic police said.

There were reports of violence in a number of provinces where pickets slashed tires and smashed windows of vehicles belonging to drivers who did not join the week-long strike.

Truckers are demanding an increase in hauling charges to compensate for hikes in gasoline prices.

Sources at the Transport Ministry said an agreement had been reached with independent truckers Monday to raise hauling prices by 4.5 per cent. But it was still not clear if this agreement had been accepted by all the strikers.

The situation has been aggravated by French truckers who have blocked the three main border crossings into Spain in retaliation for the Spanish strike that has left drivers stranded on the French side of the frontier.

Traffic officials estimated that some 4,000 trucks, many of them foreign, were entangled in the chaos of the border blockades.

British drivers said tensions were mounting in border areas and that police were doing little to alleviate the situation.

Bill Rogers, 45, from Cornwall, said one of his tires was slashed and three others removed when he drove his truck loaded with wine and steel into a blockade Thursday.

"Many of us have no food and no money. Something is going to crack here. Riot police are doing nothing," he said.

A man, believed to be a member of a picket, was run over and injured Monday when he tried to stop a van in the province of Alava, police said.

Pickets were reported to have damaged tires in the port of La Coruna where fish was rotting in the harbour because of the blockade.

All the main roads in the northern Basque provinces were blocked to truck traffic, police said.

Food shortages were reported in parts of Navarre province because of delays in deliveries.

SAN JOSE (OCT. 15) XINHUA - HONDURAN PRESIDENT RAFAEL LEONARDO CALLEJAS HAS ANNOUNCED HONDURAS WILL ESTABLISH DIPLOMATIC RELATIONS WITH THE SOVIET UNION.

"I HOPE THAT IN A 12-MONTH PERIOD WE WILL HAVE AN EMBASSY IN MOSCOW," CALLEJAS TOLD A GROUP OF LOCAL REPORTERS, ACCORDING TO SUNDAY'S NEWSPAPERS. THE HONDURAN PRESIDENT WAS IN SAN JOSE TO ATTEND A SEMINAR ON THE FUTURE OF DEMOCRACY IN THE REGION.

CALLEJAS SAID HIS COUNTRY WISHES TO ESTABLISH NORMAL RELATIONS WITH THE SOVIET UNION BECAUSE IT IS ATTRACTED BY THE SOVIET MARKET POTENTIAL AND STATUS AS A MAJOR CONSUMER OF HONDURAN BANANAS.

"WE FEEL WE SHOULD BE PRESENT EVEN THOUGH IF IT IS SIMPLY FOR COMMERCIAL REASONS," HE SAID.

"WE SEE THE WORLD VERY PRACTICALLY, WITH VERY LITTLE IDEOLOGICAL CONFRONTATION " CALLEJAS SAID. "IN THAT SENSE, IT IS ESSENTIAL TO ESTABLISH DIPLOMATIC RELATIONS WITH ALMOST ALL THE COUNTRIES IN THE WORLD."

CALLEJAS ALSO TALKED WITH COSTA RICAN REPORTERS ABOUT DISARMAMENT IN CENTRAL AMERICA, SAYING THE REGION SHOULD BEGIN BY DEFINING THE ACCEPTABLE SIZES OF THE DIFFERENT MILITARY STRUCTURES AND BY REDUCING THE AMOUNT OF OFFENSIVE WEAPONS IN THE REGION.

HONDURAS, ACCORDING TO CALLEJAS, HAS AN ARMY OF 22,000 MEN WHILE NICARAGUA HAS AN EXPERIENCED ARMY OF 80,000 TO 90,000 MEN. A REDUCTION IN MILITARY MIGHT MUST BEGIN WITH NICARAGUA, HE ADDED, SAYING THAT COUNTRY HAS CUT ITS MILITARY BUGDET BY 10 PERCENT.

MANILA (OCT. 15) KYODO - THE PHILIPPINES POSTED A 12.5 PERCENT INFLATION RATE FROM JANUARY TO SEPTEMBER THIS YEAR BASED ON THE COUNTRY'S CONSUMER PRICE INDEX, THE GOVERNMENT'S ECONOMIC PLANNING AGENCY ANNOUNCED MONDAY.

THE NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY SAID THE INFLATION RATE DURING THE FIRST NINE MONTHS WAS 2.9 PERCENTAGE POINTS HIGHER THAN THAT DURING THE SAME PERIOD LAST YEAR.

THE AGENCY SAID INFLATION DURING THE JULY-SEPTEMBER PERIOD THIS YEAR WAS PEGGED AT 11.6 PERCENT, ALMOST EQUAL THE RATE DURING THE SAME PERIOD LAST YEAR.

THE CONSUMER PRICE INDEX IS A BASKET OF BASIC COMMODITIES AND SERVICES. THE AGENCY SAID THE INFLATION RATE DURING THE JULY-SEPTEMBER PERIOD WAS HIGHER IN METROPOLITAN MANILA, SURGING TO 16.2 PERCENT, COMPARED TO THE 10.6 PERCENT IN AREAS OUTSIDE THE METROPOLIS.

THE HIGHEST GAIN WAS RECORDED BY THE INDEX FOR FUEL, LIGHT, AND WATER AT 23.4 PERCENT, FOLLOWED BY SERVICES AT 18.7 PERCENT, AND THE HOUSING AND REPAIRS INDEX AT 13.7 PERCENT.

BANGKOK (OCT. 15) KYODO - THE THAI GOVERNMENT ON MONDAY DECIDED TO ABOLISH A

CONTROVERSIAL PRESS CONTROL LAW, A GOVERNMENT SPOKESMAN ANNOUNCED AFTER A WEEKLY CABINET MEETING.

THE GOVERNMENT DECISION WAS SEEN AS A BELATED, YET POSITIVE, RESPONSE TO A SEVEN-MONTH LONG NATIONWIDE CAMPAIGN LED BY THE REPORTERS ASSOCIATION OF THAILAND AGAINST THE LAW, KNOWN AS THE NATIONAL ADMINISTRATIVE REFORM COUNCIL'S DECREE NO.42.

THE DECREE, FIRST PROPOSED IN 1976, HAS EMPOWERED OFFICIALS TO EXERCISE EXTENSIVE CONTROL OVER THE PRESS, INCLUDING THE CLOSING DOWN OF NEWSPAPERS WITHOUT TRIAL.

THE SPOKESMAN SAID THE CABINET DECIDED TO ORDER AN EXECUTIVE DECREE TO DEFINITELY ABOLISH DECREE 42 SINCE IT WAS NO LONGER SUITABLE TO THE COUNTRY'S CONDITION.

A SPOKESMAN FOR THE REPORTERS ASSOCIATION OF THAILAND WELCOMED THE GOVERNMENT'S DECISION ON MONDAY BUT CAUTIONED THAT IT WAS NOT YET A DEFINITE VICTORY IN THEIR FIGHT, WHICH AIMS AT COMPLETE FREEDOM OF INFORMATION FOR THE PEOPLE.

HE SAID THE GOVERNMENT HAS YET TO WITHDRAW FROM THE NEXT PARLIAMENT SESSION ITS DRAFT NEW PRESS BILL, WHICH CONTAINS SIMILAR UNDEMOCRATIC MEASURES TO DECREE 42, TO COMPLETELY ESTABLISH A FREE-PRESS SOCIETY.

MANILA (OCT. 15) KYODO - TOTAL NEW INVESTMENTS IN THE PHILIPPINES FROM JANUARY TO SEPTEMBER THIS YEAR AMOUNTED TO 6.28 BILLION PESOS (243.9 MILLION U.S. DOLLARS), POSTING AN INCREASE OF 22 PERCENT OVER THE CORRESPONDING PERIOD OF LAST YEAR, THE COUNTRY'S PLANNING AGENCY SAID MONDAY.

THE NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY (NEDA) SAID PAID-UP CAPITAL INVESTMENTS DURING THE JULY-SEPTEMBER QUARTER TOTALED 2.61 BILLION PESOS (101.4 MILLION DOLLARS), TWICE AS MUCH AS THAT POSTED DURING THE SECOND QUARTER THIS YEAR AND 11.3 PERCENT HIGHER THAN THE FIRST QUARTER.

NEDA SAID THAT ON A QUARTER-TO-QUARTER BASIS, NEW INVESTMENTS DURING THE THIRD QUARTER JUMPED BY 97.2 PERCENT, A TURNAROUND FROM THE NOSE DIVE OF 43.6 PERCENT DURING THE SECOND QUARTER.

INVESTMENTS DURING THE THIRD QUARTER WERE 30.6 PERCENT HIGHER, COMPARED WITH THE SAME PERIOD LAST YEAR.

DURING THE FIRST NINE MONTHS, NEDA SAID SERVICES AND MANUFACTURING SECTORS ACCOUNTED FOR 72.5 PERCENT AND 23.2 PERCENT OF TOTAL INVESTMENTS, RESPECTIVELY.

SERVICES AND MANUFACTURING SECTORS, IN TERMS OF GROWTH, POSTED THE HIGHEST MARKS OF 32.3 PERCENT AND 22.7 PERCENT.

NEDA SAID GROWTH IN AGRICULTURE, CONSTRUCTION, AND MINING SECTORS DECLINED BY 63.5 PERCENT, 38.2 PERCENT, AND 36.5 PERCENT, RESPECTIVELY.

TOKYO (OCT. 15) KYODO - SUZUKI MOTOR CORP. SAID MONDAY IT PLANS TO SIGN AN OFFICIAL JOINT-VENTURE MANUFACTURING AGREEMENT WITH A HUNGARIAN PARTNER THIS YEAR TO PRODUCE SUBCOMPACT PASSENGER CARS IN EASTERN EUROPE, AFTER FINANCIAL DETAILS ARE SETTLED BETWEEN THE INVESTORS.

SUZUKI MOTOR, AUTOKONSZERN, AND A THIRD PARTNER, C. ITOH AND CO., WILL REVIEW DETAILS OF THE AGREEMENT WHEN AN INVESTIGATION TEAM FROM INTERNATIONAL FINANCE CORP. (IFC), A WORLD BANK AFFILIATE, ARRIVES IN JAPAN THIS WEEK. THE FOUR GROUPS ARE EXPECTED TO REVIEW THE FINANCIAL DETAILS OF THE FOREIGN INVESTMENT, AMOUNTING TO ABOUT 20 BILLION YEN, BEFORE CONCLUDING A FINAL AGREEMENT IN NOVEMBER, SUZUKI OFFICIALS SAID.

BASED ON THE JANUARY UNDERSTANDING, BOTH COMPANIES WERE EXPECTED TO SIGN AN OFFICIAL JOINT-VENTURE ACCORD IN SUMMER TO START UP PRODUCTION IN HUNGARY OF SUZUKI'S SUBCOMPACT, 5-DOOR, CULTUS 1000-1300 CC MODELS IN 1992, OFFICIALS SAID.

IN ADDITION, AUTOKONSZERN WAS EXPECTED TO HAVE A 50 PERCENT EQUITY STAKE, WHILE SUZUKI, C. ITOH AND THE IFC WOULD HOLD THE REST, THEY SAID.

BUT DELAYS EVOLVING FROM A NEWLY ELECTED HUNGARIAN ADMINISTRATION, A SLOW REVIEW PROCESS BY THE IFC AND AUTOKONSZERN'S AIM TO GAIN FOREIGN CURRENCY EXCHANGE ADVANTAGES THROUGH THE VENTURE, ALMOST RUINED ANY POSSIBILITY OF A FUTURE AGREEMENT, OFFICIALS ADDED.

FINALLY, ALL PARTIES AGREED THAT AUTOKONSZERN, MADE UP OF 50 PARTICIPATING HUNGARIAN FIRMS, WOULD HAVE A 40 PERCENT INTEREST IN THE NEW COMPANY, AND SUZUKI AND ITS PARTNERS WOULD GAIN A 60 PERCENT EQUITY STAKE, OFFICIALS SAID.

MOREOVER, THE JOINT-VENTURE FIRM WILL NOT BE REQUIRED TO PAY CORPORATE TAXES TO THE HUNGARIAN GOVERNMENT, PROVIDED THE THREE PARTNERS SUPPORT AN AUTOMOBILE EXPORT DRIVE FOR THE COMPANY, OFFICIALS ADDED.

ACCORDING TO SUZUKI OFFICIALS, THE JOINT VENTURE FIRM WILL BEGIN PRODUCTION IN THE LATTER HALF OF 1992, WITH PRODUCTION CAPACITY INCREASING FROM 15,000 CARS THE FIRST YEAR TO 50,000 VEHICLES THREE YEAR LATER. LOCALLY PRODUCED COMPONENTS WILL MAKE UP 30 PERCENT OF PARTS AND EQUIPMENT THE FIRST YEAR OF PRODUCTION AND LATER BE INCREASED TO ABOUT 70 PERCENT, OFFICIALS ADDED.

#90288k0091 10/15/1990 ~Japanese News Agency
OSAKA (OCT. 15) KYODO - ISHIHARA SANGYO KAISHA LTD., JAPAN'S LARGEST AGROCHEMICAL PRODUCER, SAID MONDAY IT WILL BUY AN OHIO-BASED AGROCHEMICAL MANUFACTURER SDS ENTERPRISES FOR 300 MILLION DOLLARS.

THE PURCHASE WAS APPROVED BY THE SDS PARENT COMPANY FERMENTA OF STOCKHOLM, SWEDEN. ISHIHARA'S U.S. SUBSIDIARY WILL CONCLUDE NECESSARY PROCEDURES BY THE END OF NOVEMBER, ISHIHARA SANGYO OFFICIALS SAID.

IT IS THE LARGEST ACQUISITION BY A JAPANESE AGROCHEMICAL COMPANY IN TERMS OF THE PURCHASE PRICE.

ISHIHARA WILL PAY HALF OF THE PURCHASE PRICE FROM ITS OWN FUNDS AND THE REMAINDER WILL BE RAISED WITH LOANS FROM A GROUP OF LOCAL FINANCIAL FIRMS, THE OFFICIALS ADDED.

FERMENTA ASC, A MAJOR U.S. SUBSIDIARY OF SDS ENTERPRISES, HAS A SALES NETWORK IN MORE THAN 70 COUNTRIES AROUND THE WORLD. TOTAL ANNUAL SALES OF THE FERMENTA GROUP AMOUNTED TO 200 MILLION DOLLARS LAST YEAR, ACCORDING TO THE OFFICIALS.

ISHIHARA SANGYO PLANS TO BOOST AGROCHEMICAL SALES TO 50 BILLION YEN WITHIN A FEW YEARS, THE OFFICIALS ADDED. ITS ANNUAL SALES IN AGROCHEMICALS IN FISCAL 1989 AMOUNTED TO 16.1 BILLION YEN, ABOUT 19 PERCENT OF THE COMPANY'S TOTAL SALES.

TOKYO (OCT. 15) KYODO - CHINA'S DAQING CRUDE OIL WILL BE SOLD BASED ON MARKET PRICES RATHER THAN THROUGH NEGOTIATIONS AS IT HAS BEEN SO FAR, STARTING WITH OCTOBER SUPPLIES, UNDER AN AGREEMENT REACHED MONDAY BETWEEN CHINA AND A GROUP OF JAPANESE OIL REFINERS, INDUSTRY SOURCES SAID.

THE SOURCES SAID THE PRICE OF DAQING OIL, A MAJOR GRADE OF CHINESE CRUDE, WILL BE SET AUTOMATICALLY ON THE BASIS OF THE MONTHLY AVERAGE OF THE JAPANESE IMPORT PRICES OF TWO INDONESIAN CRUDE GRADES, SUMATRA LIGHT (MINAS) AND CINTA, AND THEIR INTERNATIONAL SPOT PRICES.

THE PRICE OF DAQING CRUDE SHIPPED TO JAPAN HAS SO FAR BEEN DETERMINED THROUGH NEGOTIATIONS IN THE FOLLOWING QUARTER.

THE SOURCES SAID THE CHINESE INITIALLY CALLED FOR THE APPLICATION OF THE NEW PRICING FORMULA RETROACTIVELY TO JULY-SEPTEMBER SHIPMENTS. BUT THE JAPANESE REJECTED THIS.

IT WAS FINALLY AGREED THAT SUPPLIES IN JULY WOULD BE PRICED AT 15.49 DOLLARS PER BARREL, THOSE IN AUGUST AT 22.50 DOLLARS AND THOSE IN SEPTEMBER AT 29.75 DOLLARS.

THIS IS THE FIRST TIME IN FOUR YEARS THAT DAQING CRUDE FOR SUPPLY TO JAPAN HAS HIT 20 DOLLARS OR ABOVE.

#90288k0100 10/15/1990 ~Japanese News Agency

TOKYO (OCT. 15) KYODO - SONY CORP. SAID MONDAY IT WILL RENAME ITS U.S. SUBSIDIARY CBS RECORDS INC., ACQUIRED IN 1988 FROM THE U.S. BROADCASTING NETWORK CBS INC., SONY MUSIC ENTERTAINMENT INC. EFFECTIVE NEXT JANUARY 1.

THE PURCHASE CONTRACT WITH CBS LIMITED SONY'S USE OF THE CBS NAME TO THREE YEARS AFTER THE JANUARY 1988 ACQUISITION, SONY OFFICIALS SAID.

SONY WILL ALSO RENAME CBS SONY GROUP, A TOKYO SUBSIDIARY, SONY MUSIC ENTERTAINMENT (JAPAN) INC., NEXT APRIL 1, THEY ADDED.

THE OFFICIALS SAID THEY HAD CONSIDERED USING THE COLUMBIA NAME FOR THE RECORDING COMPANY, BASED ON SONY'S RIGHTS TO THE NAME OF COLUMBIA PICTURES ENTERTAINMENT INC., WHICH SONY BOUGHT IN SEPTEMBER 1989.

BUT THIS IDEA WAS REJECTED IN CONSIDERATION OF THE HARSH CRITICISM IN THE U.S. OF SONY'S 3.4 BILLION DOLLAR TAKEOVER OF COLUMBIA, WITH SOME PEOPLE CHARGING THAT SONY WAS BUYING UP THE "SOUL" OF AMERICANS, THEY SAID.

ALSO, THERE IS AN UNRELATED COMPANY IN JAPAN NAMED NIPPON COLUMBIA CO., OPERATED BY SONY'S RIVAL HITACHI LTD., THEY SAID, ADDING THAT SONY'S OWN BRAND IS KNOWN WELL ENOUGH WORLD-WIDE TO STAND ON ITS OWN.

EMIRATES (UAE) TO EXTEND ITS IMPORT CONTRACT OF LIQUEFIED NATURAL GAS (LNG) AND LIQUEFIED PETROLEUM GAS (LPG) TO THE YEAR 2019 TO SECURE LONG-TERM SUPPLIES OF FUEL.

TOKYO ELECTRIC STARTED IMPORTING LNG AND LPG FROM ABU DHABI IN MAY 1977, AND IT NOW ACCOUNTS FOR 22 PERCENT OF ITS USAGE OF SUCH FUEL, ACCORDING TO COMPANY OFFICIALS.

IT HAS A 19-YEAR CONTRACT WITH THE UAE, EFFECTIVE TO THE END OF 1995, BUT IN ORDER TO SECURE A LONG-TERM AND STABLE SUPPLIER THE COMPANY DECIDED TO RENEW THE CONTRACT, THEY SAID.

THE NEW CONTRACT RUNS FROM APRIL 1994 TO THE END OF MARCH 2019. IT ALLOWS THE COMPANY TO GRADUALLY INCREASE ITS CURRENT ANNUAL IMPORT QUANTITY OF LNG FROM

2,057,000 TO 4,300,000 TONS AND OF LPG FROM 550,000 TO 700,000 TONS BY 1998, THE OFFICIALS ADDED.

AS A RESULT OF THE INCREASE, THE COMPANY'S IMPORTS FROM ABU DHABI WILL AMOUNT TO 34 PERCENT OF ITS FUEL IMPORTS, THEY ADDED.

#90288k0117 10/15/1990 ~Japanese News Agency

TOKYO (OCT. 15) KYODO - IDEMITSU OIL DEVELOPMENT CO. SAID MONDAY THAT 8,200 BARRELS PER DAY OF OIL IS GUSHING FROM AN OFFSHORE WELL IN THE NORWEGIAN PORTION OF THE NORTH SEA.

THE WELL IS IN A CONCESSION 200 KILOMETERS NORTHWEST OF BERGEN, NORWAY, WHERE A GROUP OF COMPANIES, INCLUDING THE NORWEGIAN STATE OIL COMPANY, STATOIL, ARE SEARCHING FOR PETROLEUM. IDEMITSU OIL DEVELOPMENT LAST YEAR ACQUIRED A 9.6 PERCENT INTEREST IN THE CONCESSION.

THE WELL IS NEAR SNORRE OILFIELD, WHICH HAS AN ESTIMATED 700 MILLION BARRELS OF OIL RESERVES AND WILL GO INTO COMMERCIAL PRODUCTION IN 1992.

THE CONSORTIUM EARLIER DISCOVERED TWO OTHER PROMISING OIL WELLS, IDEMITSU SAID.

BUCHAREST (OCT. 15) KYODO - ROMANIAN PRIME MINISTER PETRE ROMAN AND DEPUTY PRIME MINISTER ANTON VATASESCU SAID MONDAY THE COUNTRY WILL CUT THE OFFICIAL EXCHANGE RATE OF ITS CURRENCY, THE LEU, TO 35 LEI TO THE U.S. DOLLAR IN THE NEAR FUTURE.

THE COUNTRY WILL ALSO LIBERALIZE PRICES ON NOVEMBER 1, THEY ADDED. THE DECISIONS WERE MADE IN ACCORDANCE WITH A POLICY SHIFT TO BOOST FOREIGN INVESTMENT IN THE COUNTRY, THEY TOLD JAPANESE REPORTERS HERE WITH A JAPANESE ECONOMIC MISSION TO EASTERN EUROPE.

THE OFFICIALS ALSO CALLED ON JAPAN TO INVEST MORE IN THEIR COUNTRY, AND TO EXTEND 20 MILLION U.S. DOLLARS IN GRANTS AS QUICKLY AS POSSIBLE TO HELP ROMANIA WITH DAMAGE CAUSED BY THE IRAQI INVASION OF KUWAIT.

AT A SEOARATE TO PRESS CONFERENCE, ROMANIA PRESIDENT ION ILIESCU STRESSED THAT THE POLITICAL AND ECONOMIC LIBERALIZATION OF THE COUNTRY IS RAPIDLY PROGRESSING AND WILL NEVER BE REVERSED.

ROMANIA IS IN A SITUATION NOW SIMILAR TO JAPAN'S JUST AFTER WORLD WAR II, THE PRESIDENT SAID, STRESSING THAT ROMANIA IS HOPING FOR FURTHER ECONOMIC COOPERATION FROM JAPAN.

#90288m0001 10/15/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (OCT. 12) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

World stocks rally. ... The Nikkei adds 709 points. ... In early-afternoon trading, the FTSE is up 25 points, the dollar is mixed and the long bond yield is down to 8.92%. Crude oil is cheaper this morning with North Sea off 85 cents to $38.35 a barrel. ... In London, KODAK is up 3 7/8 and POLAROID down 2 3/8 after Kodak is ordered to pay $909 million in patent infringement damages, less than street expectations.

WHAT'S AHEAD:

The COMMERCE DEPARTMENT reports manufacturing and trade inventories and sales later today and U.S. automakers issue early September sales figures. The FEDERAL RESERVE issues industrial production and capacity utilization figures on Wednesday and COMMERCE reports on September housing starts. The CONSUMER PRICE INDEX for September is due out Thursday from the LABOR DEPARTMENT and COMMERCE issues the merchandise trade deficit the same day. ... INTEL plans to announce today in Tokyo a smaller, power-saving version of the chips that form the processing power of the new "notebook" and "palmtop" size computers. ... COMPAQ is introducing a 386 "notebook" computer today, APPLE COMPUTER is introducing three new versions of its Macintosh, with a cheaper price tag and DIGITAL EQUIPMENT is expected to unveil tomorrow a business computer using Intel 486 processors.

FROM THE BULLS:

"I think [the market] is pretty close to a bottom," says STEPHEN LEEB, editor of "Indicator Digest." He says "the market has reached extremes," and the bottom should certainly come within the next two weeks. Leeb says the market has not shown any of the "classic signs" of a bear market and he remains bullish. He says 2400 on the Dow is "one of the great buying opportunities of a generation," and describes himself as "flat-out bullish." ("Nightly Business Report", 10/12)

FROM THE BEARS:

"I expect the market to go another 10 or 20 percent lower," says ERIC SORENSEN at SALOMON BROTHERS. "There will be some rallies, but the Dow will work its way down to the 2000, 2100, 2200 -- that range. Those are buying opportunities, given the way the world looks now." CHARLES CLOUGH of MERRILL LYNCH says, "This is the first recession we've seen that has been led by the

financial sector. ... We could be looking at lows that go beyond the normal recession levels in the credit-sensitve sectors of the economy. ... If valuation parameters that have been relevant in the last 10 or 20 years still matter, the low will probably be in the 2000 to 2200 range. You might get a spoke below that." LEWIS SPERBER of SPERBER ADAMS & CO., says, "We have another couple of years to go. I'm talking 1991 on the downside, probably starting to come out of it in 1992. within the next 12 months." (NYT, 10/14)

"Today could have been the low, but at this point in time, we really don't have any firm indication that it is," says PETER GRENNAN of SHEARSON LEHMAN BROTHERS. "What the market seems to be doing at the moment is slowly going down and touching new lows." (CNN "Moneyline", 10/12)

"It essentially became a bear market this week," says FRANK CAPPIELLO, who adds that "a bear market is really defined as a 20% decline over at least two months and that is what we now have. Before, it could have been a bear reaction in a bull market." He looks for a 30% decline "but I don't think it's going to be anything like 1973-75." He looks for about six months "of bad times," based on expectations that earnings will start to turn up the middle of next year. ("Wall Street Week", 10/12)

We've had 16 bear markets in the past 90 years and the typical loss has been 27%-45%, says JAMES STACK, publisher of "InvesTech." "That would place a probable low in the 1650-2150 area on the Dow. More importantly, I think the damage in this bear market is more severe than the Dow indicates." Stack says the Value Line index hit a five-year low last week and the NASDAQ is only 5% above where it was seven years ago. (CNN "Business Morning", 10/15)

STOCK MARKET:

"What we saw [Friday] was a 'power reflex lift' from a very oversold condition and extremely negative sentiment," says A.C. MOORE, director of research at ARGUS RESEARCH CORP. "I feel the rally will carry over for the next few sessions." ("Investor's Daily", 10/14)

"It's crazy," says JONATHAN RACLIN of CHICAGO CORP. "The market is flying blind -- running back and forth on any rumors." ("USA Today", 10/15)

"What you had [Friday] in my opinion was short-covering before a weekend, based on some rumors, based on the fact that oil prices were down [and] based on the hope that we will have a budget deficit accord," says ALAN ACKERMAN of GRUNTAL & CO. "More than anything else, some people didn't want to be short over the weekend so we had a good relief rally." (CNBC "Market Wrap-Up", 10/12)

"Any bottoming that the market was trying to do has been put off," says KENNETH SPENCE of SALOMON BROTHERS. "It's got to take more time now and try and seek a new level." (FNN "Marketwrap", 10/12)

"When you look behind the Dow and get to the broader market, conditions are far worse than what the Dow shows," says JOHN DESSAUER. "But I'm a good more optimistic on the economic fundamentals. ... Back in the early 1980s, we had runaway economic growth, runaway inflation and runaway money growth. The only tool the Fed had left was to drive interest rates up to twice what they are now. This time ... since we didn't have the boom I don't think we're going to have the bust." He looks for corporate profits to pick up early in 1991. ("Wall Street Week", 10/12)

"The bad news on inflation is really a lagging indicator," says MITCHELL MEISLER of LEHMAN BROTHERS. He says as we enter a recession, both interest rates and inflation will drop. The market is "very much washed out on the downside," according to Meisler, who is selectively buying and says the risk is only 4-to-7 percent on the downside. (FNN "Marketwrap", 10/12)

"There has been some [exiting from equity funds] but not much," says MICHAEL LIPPER, president of LIPPER ANALYTICAL. "What we see is market timers moving out of so-called no-load funds into money market funds but the bulk of the assets of the [mutual fund] industry still are in funds that are sold by brokers and, for the most part, the money is staying there." (CNBC "Market Wrap- Up", 10/12)

Some analysts are saying the strength of the yen was behind last night's rebound on the Nikkei. But JEFFREY GUY of YAMAICHI SECURITIES says, "I think it was largely a technical rebound because the market has fallen for the past three days. We're seeing a considerable amount of futures related arbitrage purchases in the cash market." (CNN "Business Day", 10/15)

STOCK TIPS:

The seven "Baby Bell" regional telephone companies are featured in "Barron's" this week in an article that notes the companies' stock has risen 140% to 200% since they were spun out of AT&T nearly seven years ago. "More good times lie ahead," concludes the article. "For starters, the companies have put their financial strength to productive use and promise to reap the benefits over the foreseeable future." The seven are AMERITECH, BELL ATLANTIC, BELLSOUTH, NYNEX PACIFIC TELESIS, SOUTHWESTERN BELL and US WEST. ("Barron's", 10/15)

ALAN ACKERMAN of GRUNTAL & CO. has this advice for investors: "Stay in the easy chair, keep the sneakers off, don't be in any hurry. You have to sell on strength in this market. SOS is just stay on the sidelines. Cash is king." But for those who insist on buying stock, Ackerman says, "On weakness, I like IBM, WAL-MART, GLAXO, CENTEX, BOEING -- they're all companies with hefty cash positions, good growth potential, strong balance sheets. Those are the companies I like and feel safe with and I think you have to go with quality." (CNBC "Market Wrap-Up", 10/12)

#90288m0002 10/15/1990 ~Market Consensus Surveys
FALLS CHURCH, VA (OCT. 15) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Right now the dollar is falling and nobody cares," says ANDREW ROJEK of MERRILL LYNCH. "I think the yen will continue in the 128 resistance range with 127 as a target and the mark will be at 1.5100 in the next week or so." ROBERT HATCHER of BARCLAYS BANK PLC says: "There's no real concern being illustrated by any of the central banks. As long as the dollar's decline is controlled, the central banks don't seem inclined to intervene." (WSJ, 10/15)

The yen continued to gain strength against the dollar in overnight trading. "Fundamentally, the yen is in a very good position," says TREVOR OPELT of MMS INTERNATIONAL in Tokyo. "We have narrowing interest rate spreads between Japan and the United States which are almost favoring the yen right now. Also the economic situation here in Japan is much better than we have in the U.S." (FNN "World Market Report", 10/15)

"All in all, those latest [PPI and retail sales] data only highlight why FEDERAL RESERVE policymakers are split over the need for easier monetary policy to ease the pain of the recession versus concerns about accelerating inflation," says ROBERT McGEE, chief U.S. economist at TOKAI BANK LTD. "Eventually the dispute will be resolved in favor of preventing a more serious cumulative decline in the economy. A sustained pickup in inflation is highly unlikely with the economy about to fall off a cliff." ("Investor's Daily", 10/14)

"There may be a token easing of rates if a credible budget is put into place, but right now inflation is definitely a problem," says DOUGLAS HANDLER, senior economist at DUN & BRADSTREET. "There is no evidence domestic demand is falling off the table, although it's certainly flat. If the Fed were to ease now, it would threaten to exacerbate inflation next year." (CNBC "Market Wrap-Up", 10/12)

"It seems clear to me that the crisis in Iraq is holding up rates higher than they otherwise would be," says DAVID RESLER, chief economist at NOMURA SECURITIES INTERNATIONAL. DONALD FINE of CHASE MANHATTAN BANK says there probably will be a budget agreement that cuts the deficit by $40 billion -- but not until after the election. "But given all that has happened in the past few weeks, I am wondering if the market and the Fed reaction then will be the same as it would have been a week ago." ROBERT DiCLEMENTE of SALOMON BROTHERS writes that, "Larger issues still constrain the Fed." (NYT, 10/15)

"If you can defer buying, I think you'll see a better [bond] buying opportunity in the next month," says BRUCE KAMICH of McCARTHY, CRISANTI & MAFFEI. "If you have to be in the market, I would keep the maturities within three years ... and if you are a small investor I could keep it in a money market fund." (CNBC "Market Wrap- Up", 10/12)

Investor fears are creeping into the municipal bond market, "The Wall Street Journal" reports this morning. "You have Philadelphia seriously on the rocks, the situation in Massachusetts will curl your hair and New York's problems are beginning to catch up with everybody," says S.E. CANADAY JR., a vice president at JOHN NUVEEN & CO. "Add to that talk that the economy is heading toward a recession and you get some very nervous investors." (WSJ, 10/15)

"What's surprising to me is that bond yields haven't gone even higher than they are now," says DEBORAH ALLEN. "They've broken over 9% a few times, but haven't stayed there very long and yet we have just about every thing going wrong that could happen wrong to a bond market. discovered bonds." ("Wall Street Week" 10/12)

"The credit markets [Friday] enjoyed a rally after a week of tough sledding in which we had to auction seven- year notes for the Treasury and 30-year bonds for the RESOLUTION TRUST CORP.," says S.G. WARBURG's LAWRENCE LEUZZI. "It was a sigh of relief that we'd gotten through these auctions." (CNN "Moneyline", 10/12)

THE ECONOMY:

"Everybody's talking about the coming recession, [but] it's not coming, it's been here four quarters already and a recession is the worst possible time to raise taxes," says ALBERT SINDLINGER, head of his own economic forecasting company. "If Congress does that, it's laying the foundation for a depression." ("Barron's", 10/15)

The "USA Today" panel of investors has turned bearish on the economy. In a survey last week, 61% of the investors said a recession is under way compared to 29% who held that view three months ago. "Layoffs are in the news every day," notes panelist DAVID POWER, corporate manager of distribution for a Coca-Cola bottler in Tennessee. "All companies big and small, are belt-tightening. Even our company has just introduced an early retirement program." ("USA Today", 10/15)

"We think [unemployment] will get worse," says PETER GREENBAUM, economist at SMITH BARNEY, HARRIS UPHAM & CO. "We see it getting up around 6.5% to 7% by the middle of next year." ("Investor's Daily", 10/15)

JERRY JORDAN, economist at FIRST INTERSTATE BANCORP in Los Angeles, says Friday's wholesale price report "on the surface is a shocking number, but it greatly exaggerated the ongoing rate of inflation." He says the outlook is

closely tied to developments in the Persian Gulf. If the conflict escalates, then the September PPI report is "just the leading edge" of higher prices, he says. But if the conflict is resolved in the next couple of months, the PPI pace will slow quickly. ("Investor's Daily", 10/15)

"The economy is now sliding into a recession and under normal circumstances [producers and consumers] could expect to see some easing of prices," says LYLE GRAMLEY, chief economist for the MORTGAGE BANKERS ASSOCIATION OF AMERICA. However, he cautions that prices will continue to increase in the next three to six months, "reflecting a spillover of higher energy prices." ("Investor's Daily", 10/15)

"As far as I'm concerned, we're in a phase of a recession," says EDMUND PRATT, chairman and CEO of PFIZER INC. "There is absolutely no question that business is not as good." JACK WELCH, chairman and CEO of GENERAL ELECTRIC CO., says, "It feels like one [a recession] in some segments. Anything related to consumer durables is clearly impacted at this point." WILLIAM BUTCHER, chairman and CEO of CHASE MANHATTAN BANK, says, "I guess I would align myself with those who believe we are either in or entering a recession. As I look around the country and talk to bankers, there's no place where you're not seeing a softening of business." ("Investor's Daily", 10/15)

"The 1.1% gain [in retail sales] isn't nearly as strong in reality as the number might suggest," says CAROL STONE, economist at NOMURA SECURITIES INTERNATIONAL. "The growth was from [auto] manufacturers' incentive programs that had September expiration dates. So the rise in auto sales last month is only temporary and we expect to see a decline after that." ("Investor's Daily", 10/15)

"It was a broad array of products that experienced price gains during the month of September," says WILLIAM SULLIVAN of DEAN WITTER REYNOLDS. While food prices were down 0.9%, energy was up 13.8% and all other products were up 0.6%. "It really looks like the general cost of living could be given a substantial boost," says Sullivan. (FNN "Marketwrap", 10/12)

"The underlying rate of inflation ... is bound to creep up and be disturbingly high," says ALLEN SINAI, chief economist for BOSTON CO. ECONOMIC ADVISERS. He says higher oil prices will affect prices for chemicals, plastics and eventually all products. ("Nightly Business Report", 10/12)

Very clearly, a recession will show up in the fourth- quarter statistics," says BROWN BROTHERS HARRIMAN & CO. senior economist EDWARD CAMPBELL. "August or September will be the beginning and definitely negative numbers in the fourth quarter, and possibly negative numbers in the first quarter." ("Nightly Business Report", 10/12)

-30- 8369

#90288p4528 10/15/1990 ~PR Newswire

CONCORD, CALIF. (OCT. 15) PR NEWSWIRE - The Office Club Inc. (NASDAQ: OCLB) today reported financial results for the third quarter which ended Sept. 30, 1990.

Net sales increased to $73.3 million, an increase of 88 percent over the $39.0 million in sales for the third quarter of 1989.

The Office Club reported a net profit of $440,000, or 7 cents per share, in the third quarter of 1990, compared to a net loss of $2,113,000, or (36 cents) per share, in the third quarter of 1989.

For the nine months ended Sept. 30, 1990, Office Club has reported a net profit of $1,581,000, or 26 cents per share, compared to a loss of $2,945,000, or (50 cents) per share, during the same nine months last year. Net sales for the nine months ended Sept. 30, 1990, were $200.9 million, an increase of 102 percent over the $99.3 million in sales for the first nine months of 1989.

Third quarter 1990 results reflect strong performance from the 43 warehouse stores open at the end of the second quarter, and from the five new s stores opened in Honolulu, Hawaii, Tukwila, Wash., and three additional stores in California: in Irvine, Woodland Hills and South San Francisco. Comparable warehouse sales for the third quarter ended Sept 30 increased 21.1 percent from the prior year's period for the 20 warehouse stores opened more than one year.

"The strong sales results demonstrate the continued viability of our marketing concept," said Mark Begelman, chairman and chief executive officer of The Office Club Inc. "We have recorded our fourth straight quarter of profitability by adhering to our 'lowest price' operating formula, even as we have faced increased competition."

The Office Club Inc. sells high quality, brand name office products through a fast-growing network of retail membership warehouses in nine states (California, Oregon, Washington, Hawaii, Colorado, Texas, Nevada, New Mexico and Arizona). Business, non-profit and home office customers are offered one-stop shopping at the lowest competitive prices for office supplies, furniture, business machines, computers and related products. Telephone/fax ordering, delivery and business services are also available.

#90288p4564 10/15/1990 ~PR Newswire

FREMONT, CA (OCT. 15) PR NEWSWIRE - In a move to reach more people with Macintosh personal computers, Apple Computer Inc. today announced a suite of new low-cost Macintosh products. These new products effectively reduce the

entry price to Macintosh computing by 50 percent. Additionally, the products integrate innovative sound input capabilities that let customers quickly and easily add sound to their documents while retaining all the powerful, easy-to-use features that customers demand.

The computers were designed to reach new customers in business, government, education and the home. The newest members of the Macintosh family are the Apple Macintosh Classic, the lowest cost Macintosh; the Apple Macintosh LC, the lowest cost color Macintosh; and the Apple Macintosh IIsi, the lowest cost Macintosh II. Each computer shares the flagship characteristics of Macintosh: unsurpassed ease-of-use, built-in networking with "plug-and-go" simplicity, compatibility with thousands of innovative applications, and a solid foundation for computing today and in the future.

Recognizing the importance of lowering the cost of the entire system, Apple also introduced several low-cost peripherals that complement the new computers. Among these are new color and monochrome monitors and extras such as an expansion card that allows Apple IIe- compatible software to run on the Macintosh LC.

Apple revealed today that initial market acceptance for the new products has been strong. In fact, the company has received more initial orders for the Macintosh Classic than any other computer in the its history. Macintosh Classic

As the most affordable member of the family, the Macintosh Classic lowers the suggested retail price of Macintosh computing by more than 50 percent. Its small, all-in-one design embodies the valued features of the most popular Macintosh model ever, the Macintosh SE, while keeping the familiar transportable design. Suggested retail prices for the Classic, which uses the Motorola 68000 microprocessor, start at $999. Apple believes that the Macintosh Classic will attract many first-time computer buyers. Macintosh LC

The Macintosh LC represents a totally new modular design. The slim, elegant computer offers customers a robust, yet low-cost color system. The Macintosh LC reduces the suggested retail price of color Macintosh computing by 60 percent. The LC includes built-in support for three monitors and supports up to 256 colors, sound input, and optional Apple IIe software compatibility with more than 10,000 applications. Built around a 16-megahertz (MHz) Motorola 68020 microprocessor and offered for a suggested retail price of $2,499, the Macintosh LC is expected to be a popular choice for both newcomers to computing as well as Macintosh Plus or Macintosh SE owners looking to upgrade.
Macintosh IIsi

The Macintosh IIsi lowers the cost of Macintosh II-class computing by delivering the performance of the Macintosh IIcx for more than $2,200 less (based on suggested retail price). The capabilities of the IIsi will appeal to customers who must balance performance and affordability. Although the

lowest cost member of the Macintosh II line, the Macintosh IIsi retains the most desired features of the high-end, modular systems--high performance, most monitor options, and industry-standard NuBus expansion. The Macintosh IIsi provides built-in support for any of four different monitors and up to 256 colors or shades of gray, as well as the new sound input capability. Featuring a sleek new design and high performance derived from a 20MHz Motorola 68030 microprocessor, the Macintosh IIsi will appeal to customers who need even more responsive computers. The basic configuration of the Macintosh IIsi has a suggested retail price of $3,769.

#90288p4566 10/15/1990 ~PR Newswire

BUFFALO, NY (OCT. 15) PR NEWSWIRE - Comptek Research, Inc. (AMEX/BSE: CTK), a defense electronics company, today announced financial results for its fiscal 1991 second quarter and first six months, which ended Sept. 30, 1990. The 1991 financial results were the highest ever achieved for second quarter and first six-month periods.

Revenues for the second quarter were $12,754,000 up 14 percent from $11,201,000 in the same period last year. Net income for the quarter increased 9 percent to $369,000 from $339,000. On a per-share basis, net income increased to $0.18 from $0.16. The Sept. 30, 1990, backlog was $45.4 million, which is 13.5 percent higher than the $40 million backlog at the end of the first quarter.

During the quarter, Comptek logged approximately $18 million in contract bookings, primarily in the form of contract renewals or extensions on Navy and Air Force programs.

Six-month revenues of $24,698,000 were up 14 percent from $21,727,000 a year ago. Net income was $706,000, or $0.34 per share, during the first half. Last year at this time, the company reported earnings of $647,000, or $0.30 per share.

"This is the seventh consecutive quarter of favorable year-to-year earnings comparisons," commented Dr. John R. Cummings, Comptek's chairman. "Our business results and current prospects are consistent with management's expectations, and we remain optimistic that 1991 will be a record year. In spite of the general downturn in the defense industry, we are continuing to manage the company so that it is favorably positioned to grow."

Comptek Research, Inc., with thirteen offices and subsidiary locations in the United States, develops command, control, and intelligence systems and electronic warfare systems, primarily for the Department of Defense. Related activities include providing specialized technical services and manufacturing

precision electronics.

#90288p4577 10/15/1990 ~PR Newswire

PHOENIX, ARIZ. (OCT. 15) PR NEWSWIRE - Phelps Dodge Corporation (NYSE: PD) today reported the highest third quarter earnings in its history -- consolidated net income was $126.2 million ($3.64 per common share) for the third quarter of 1990. Net income for the nine months ended September 30, 1990, was $352.0 million ($10.14 per common share). The company reported net income of $115.4 million ($3.26 per common share) and $407.7 million ($11.29 per common share) in the corresponding periods in 1989. Per share amounts reflect average shares outstanding on a fully diluted basis for the respective periods.

Sales were $674.2 million in the 1990 third quarter and $1,999.6 million in the first nine months of 1990, compared with $646.1 million and $2,083.9 million in the corresponding 1989 periods.

During the 1990 third quarter, Phelps Dodge Mining Company recorded earnings from operations of $170.6 million, compared with $146.4 million in the third quarter of 1989. The record earnings for a third quarter were achieved in spite of somewhat higher pro- duction costs due to scheduled smelter maintenance shut downs and lower realized prices due to higher than normal concentrate sales. For the nine-month period ended September 30, 1990, Phelps Dodge Mining Company contributed earnings from operations of $463.5 million, compared with $520.4 million in the 1989 nine-month period. The New York Commodity Exchange spot price per pound of copper cathode averaged $1.28 in the third quarter and $1.19 in the first nine months of 1990, compared with $1.20 and $1.29 in the cor- responding 1989 periods.

Phelps Dodge Mining Company reported sales of $387.6 million in the 1990 third quarter, and $1,095.7 million in the first nine months of 1990; sales were

$377.0 million and $1,184.5 million in the corresponding 1989 periods.

Phelps Dodge's U.S. mine production was a record 140,200 tons of copper in the third quarter of 1990 and a record 408,700 tons in the first nine months, compared with 122,800 tons and 375,400 tons in the corresponding 1989 periods.
Phelps Dodge's copper sales from mine production were a record 146,900 tons in the 1990 third quarter and a record 419,800 tons in the first nine months, compared with 127,600 tons and 387,200 tons in the corresponding 1989 periods.

Phelps Dodge Industries recorded earnings from operations of $34.5 million in the 1990 third quarter, improved from $33.2 million in the 1989 third quarter.
The higher earnings for the 1990 third quarter were primarily a result of improved margins in the wheel and rim and foreign wire and cable businesses, and the inclusion of the results of Hudson International Conductors acquired in November 1989. This was moderated by lower sales and margins in the domestic magnet wire business and lower margins in the carbon black business. Earnings from operations for the first nine months of 1990 were $110.4 million compared with $125.0 million in the corresponding 1989 period. The lower earnings for the first nine months of 1990 were primarily a result of lower sales and reduced margins in the wheel and rim and domestic magnet wire businesses.

STAMFORD, CONN. (OCT. 15) PR NEWSWIRE - Citicorp Information Resources, Inc., announced today that ISI Systems, Inc. had agreed to pay in excess of $3.2 million dollars in settlement of CIR's outstanding lawsuit against ISI Systems. Citicorp Information Resources provides computer processing services to banks and other financial institutions. ISI Systems is an insurance processing company located in Braintree, Mass.

The lawsuit arose out of ISI Systems' alleged breach of a six-year contract for the delivery of computer services from Citicorp's Woburn, Mass. plant. Citicorp Information Resources' lawsuit alleged that ISI Systems, Inc. committed a breach of contract, as well as unfair and deceptive business practices. The allegations further related to ISI Systems' unilateral withholding of payments despite receiving what it admitted was exceptional service during a period of rapid growth.

Frank Martire, chairman of Citicorp Information Resources, stated that "Citicorp Information Resources firmly believed in the merits of its position, and we are now quite pleased to put this matter behind us with such a positive outcome."

ROCKVILLE CENTRE, N.Y. (OCT. 15) PR NEWSWIRE - Command Credit Corporation (NASDAQ: CDMD) will assist CredoBank in issuing bank credit cards to Soviet citizens, the company announced here today.

CredoBank, chartered by the U.S.S.R. State Bank (Central Bank of the Soviet Union), is the first authorized international commercial bank in the Russian Republic.

Command, a leader in the secured credit card industry, has been engaged to service and monitor the VISA, MasterCard, debit card and affinity card that CredoBank intends to offer. In essence, to serve as the bank's "back office" processing facility, from Command's European data center in Surrey, England.

Igor Lipanov, deputy director of CredoBank, concluded the agreement with

Command Credit.

The company did not reveal any dollar amount affixed to this arrangement.

"We were selected because of our proven specialty in helping banks issue credit cards, particularly in countries where there is very little, if any, means of securing credit rating reports on potential cardholders," explained William G. Lucas, Command's chairman and chief executive officer. "The Soviet Union is just such a country. Moreover, the potential market for cardholders is mind boggling."

Command Credit Corporation is an international financial services company which assists financial institutions in issuing secured and unsecured bank credit cards. The company is a service member of the American Bankers Association, a registered member service provider with MasterCard International and a registered independent sales organization with VISA.

ALEXANDRIA (OCT. 15) PR NEWSWIRE - Michael R. Losey, SPHR, has been named incoming president of the Society for Human Resource Management (SHRM), succeeding Ronald C. Pilenzo, SPHR, who retires this year.

SHRM is the world's largest professional membership organization dedicated to the advancement of human resource management. In his new role, Losey will be the chief executive officer for SHRM, overseeing all organizational, operational and strategic planning activities, according to Wanda A. Lee, SPHR SHRM's national chairman and vice president of human resources for FHP, Inc. of Fountain Valley, Calif.

"Losey's experience and expertise will be pivotal in guiding SHRM into the next century," she said.

With nearly 30 years experience in the human resource profession, Losey was most recently a vice president of human resources for the Unisys Corporation of Blue Bell, Pa. When Unisys was formed by the 1986 merger of Sperry and Burroughs Corporations, he played an integral role in establishing the organizational policy and operational framework for the new corporation.

Losey was with Sperry for 22 years prior to the merger. He began his career there as personnel manager for a small manufacturing plant, rose to vice president for personnel for the Sperry New Holland Division and eventually became corporate staff vice president for personnel relations at corporate

headquarters in New York City.

A certified senior professional in human resources (SPHR), he has been active in international human resources, in SHRM at the national level as a member of the legislative affairs committee and at the local level as a member of the SHRM Greater Valley Forge (Pa.) Personnel Association.

Losey holds both bachelor's and master's degrees of business administration in industrial relations from the University of Michigan. He and his wife, Ann, will be relocating to the Alexandria area from greater Philadelphia in the near future.

The Society for Human Resource Management, formerly the American Society for Personnel Administration, represents the interests of 70,000 human resource professionals through its network of more than 400 chapters worldwide. SHRM was a co-founder of the World Federation of Personnel Management Associations, which now represents 66 human resource organizations and more than 300,000 members, collectively.

DEARBORN, MI (OCT. 15) PR NEWSWIRE - Motorola's Microcontroller Division today announced the 68HC16 (HC16), the first 16-bit microcontroller family that is compatible with an industry standard 8-bit product line.

The central processing unit of the HC16 is based on a 16-bit implementation of Motorola's popular 68HC11 (HC11) microcontroller, making the HC16 source code compatible with the 8-bit HC11 family. The HC16 is a modular design utilizing implementation of existing modules of Motorola's 68300 family. Additionally, the HC16 is Motorola's first general purpose microcontroller to integrate control oriented digital signal processing (DSP) capability on chip.

The HC16 will be used in a variety of control applications including consumer and automotive electronics and industrial control. Chrysler Corp. today announced it is designing the HC16 into its future generation powertrain control modules.

The 68HC16Z1 (HC16Z1) is the first member of Motorola's new line of high performance 16-bit microcontrollers designed to provide customers with an upgrade path from the HC11 as well as a migration path to higher performance microcontrollers. The design takes advantage of some of the same advanced modules originally designed for other 68300 devices, such as the queued serial module (QSM) and the system integration module (SIM). Other modules include a general purpose timer (GPT), 1K bytes of standby RAM, and a 10-bit eight

channel A/D converter.

The HC16Z1 CPU has three new multiply and two additional divide instructions, new addressing modes and additional registers that allow the CPU to support high level languages and perform control oriented DSP functions. The DSP feature on-chip eliminates the need for additional DSP support devices in some applications.

The 68HC16Z1 will be available in sample quantities in second quarter 1991. Production volumes are expected in third quarter 1991 and will be priced at $25 in 1K quantities.

An HC16 evaluation system is in development and will be available first quarter 1991.

BURBANK, Calif. (OCT. 15) PR NEWSWIRE - The Walt Disney Co. (NYSE: DIS) will begin publishing its own general-interest fiction and non-fiction books in 1991 for sale in book stores under a publishing imprint yet to be named. Publishing Executive Robert Miller has been hired to lead Disney's entry into this area. Some 50 titles are planned in the first year.

The announcement was made by Charles P. Wickham, group vice president for Disney Publishing. Miller joins Disney as vice president and publisher.

Miller, 34, has been a vice president at Dell Publishing and editorial director of Delacorte Press. Earlier, he held editorial positions at Warner Books and St. Martins Press.

Managed by Disney Publishing, a unit of Disney Consumer Products, the new imprint will offer hardback and paperback books on a wide range of subjects from both known and new authors. It joins a children's publishing operation created by Disney in July. A distribution agreement covering all the new Disney books will be announced in the near future.

"Disney is an entertainment company engaged in the full spectrum of American cultural interests," Wickham said. "General-interest book publishing will be a perfect complement to many of the company's activities, including our continuing licensed publications business.

"In Bob Miller, we have a publishing executive who can direct our entry into this exciting area with editorial creativity and marketing flair," Wickham continued. "These are qualities Bob has exhibited throughout his publishing

career."

Disney's initial list of titles will be introduced in June at the American Booksellers Association convention in New York.

INDIANAPOLIS (OCT. 15) PR NEWSWIRE - Anacomp Inc. (NYSE: AAC) and The Cooper Companies Inc. (NYSE: COO) announced today that they have entered into a standstill agreement which bars Cooper from taking any further steps to acquire Anacomp through Sept. 30, 1991.

In an SEC filing earlier this year, Cooper announced that it had acquired more than 5 percent of Anacomp's common stock and that it was considering, among other alternatives, a business combination with Anacomp. Anacomp commenced a lawsuit against Cooper in Indianapolis Federal Court seeking to stop any acquisition. Under the terms of today's standstill agreement, Anacomp's lawsuit will be dismissed with prejudice, and Anacomp will pay Cooper $1.3 million of the expenses incurred in defending the action. The standstill further provides that Cooper will not initiate or participate in any proxy contests and will not take any other steps to acquire control of Anacomp during the standstill period. Anacomp may, at its option, extend the standstill period to Sept. 30, 1993.

CONTACT: Dennis Lindsey, 404-262-2667, or Nancy Vandeventer, investor relations, 317-844-9666, both of Anacomp.

CLEVELAND (OCT. 15) PR NEWSWIRE - National City Corporation (NYSE: NCC) today reported earnings for the third quarter and first nine months of 1990.

Net income for the three months ended Sept. 30, 1990 was $65 million or $1.08 per share, versus $67 million or $1.10 per share for the same quarter of 1989.

Net income for the first nine months was $197 million or $3.26 per share, compared with $195 million or $3.22 per share for the corresponding period in 1989.

For the third quarter of 1990, returns on average equity and average assets were 16.27 percent and 1.13 percent respectively. For the first nine months of 1990 these measures were 16.99 percent and 1.15 percent respectively. National City Corporation's returns remain among the best in the industry.

Nonperforming assets as of Sept. 30, 1990 were $321 million which included $230 million non-accrual loans and $91 million foreclosed real estate. Loan loss reserves at Sept. 30, 1990 were $244 million.

National City Corporation is a $23 billion bank holding company headquartered in Cleveland, Ohio. The corporation's principal banking units include National City Bank, Cleveland; BancOhio National Bank, Columbus; and First National Bank of Louisville. Other member banks include National City Bank, Akron; First National Bank and Gem Savings Association, Dayton; CommerceNational Bank, Lexington; and Ohio Citizens Bank, Toledo. National City also has 11 community banks serving cities and towns throughout Ohio, Kentucky and southern Indiana.

National City's subsidiaries and divisions offer a wide range of financial services, such as credit card, retail payment and airline ticket processing, trust and investment management, leasing, merchant and mortgage banking, venture capital, small business and community investment, and credit life insurance. These units include Franklinton Financial Services, National Processing Company, First Kentucky Trust Company, National City Trust Company, NCC Merchant Banking, National City Mortgage Co., W. Lyman Case & Company, National City Community Development Corporation, National City Life Insurance Company and NC Investments.

National City Corporation's common stock is traded on the New York Stock Exchange under the symbol "NCC."

PASADENA, Calif. (OCT. 15) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) today announced receipt of a $20 million contract from the Foodservice Group of the Borden Grocery and Specialty Products Division to provide design and installation services for a production facility in Chambersburg, Penn.

The project involves process and interior design, including all piping, utilities and instrumentation, and equipment purchasing and installation for a new 400,000-square-foot food production operation called a "hyperplant." A hyperplant is Borden's term for a state-of- the-art, highly efficient facility with low-cost production economics, for the manufacture and distribution of products for the foodservice industry.

Jacobs is already at work on two other hyperplants for Borden at locations in Jackson, Miss., and Chatsworth, Calif. Those projects, for which Jacobs is providing engineering, procurement and construction services, are expected to have a combined constructed value of $45 million, a Jacobs spokesperson said.

The Chambersburg facility will process and package individual serving products - such as jelly, dipping sauces, dessert toppings, ketchup, mustard, mayonnaise, salad dressing, cream, sugar, and pepper. In addition, the plant will produce bulk-size, oil-based items - such as mayonnaise, sauces, salad and other dressings and syrups. The products are principally consumed in restaurants, fast- food chains, hospitals, schools, and other places where food is eaten or prepared away from the home.

The facility also includes a laboratory for quality control and product development, and offices for general and administrative management staff. Initial production operations in the Chambersburg facility are scheduled to start in the second quarter of 1991.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural, construction, construction management, contract maintenance, and operations services to government and industrial clients around the world.

#90288p4597 10/15/1990 ~PR Newswire

NEW YORK (OCT. 15) PR NEWSWIRE - A subsidiary of W. R. Grace & Co. (NYSE: GRA) today confirmed the signing of a letter of understanding involving the proposed sale of Grace's interests in the ammonia fertilizer production complex in Trinidad to Norsk Hydro a.s, a Norwegian firm.

Included in the transaction are: Federation Chemicals Limited, a wholly owned subsidiary of Grace that owns and operates a 255,000 short-ton-per-year ammonia plant on Trinidad; and Grace's 49 percent share of Trinidad Nitrogen Co., Limited, a joint venture between Grace and the government of Trinidad and Tobago that operates two ammonia plants on Trinidad with a combined production capacity of 920,000 short-tons-per-year.

Completion of the transaction is subject to various conditions, including agreements with and approval by the government of Trinidad and Tobago and the lenders to Trinidad Nitrogen Co., Limited and the approval by the boards of directors of Grace and Norsk Hydro. Closing is expected to take place in December 1990.

J. P. Bolduc, president and chief operating officer of Grace, in commenting on the sale, said, "Completion of this transaction will successfully remove Grace from operating in a commodity-related, cyclical business. This action is an important phase of the company's overall restructuring strategy designed to focus on our global specialty chemicals business, as well as on Grace's specialized interests in energy, health care and other niche growth

businesses." The Trinidad facilities are the last Grace agricultural chemicals operations to be sold.

W. R. Grace & Co. is the world's largest specialty chemicals company with sales in 1989 at $6.1 billion.

RICHMOND, Va. (OCT. 15) PR NEWSWIRE - Best Products Co., Inc. announced today that The Equitable Life Assurance Society has funded its commitment to provide Best with a $30 million line of credit supplementing the company's existing short-term credit facilities.

The company also has completed the refinancing on a long-term basis of $175 million of senior subordinated bridge notes.

Agreements were signed with holders of $142 million of bridge notes extending their maturity to June 30, 1992. The remaining $33 million have been converted to senior notes with a maturity of no earlier than Jan. 31, 1994.

Jerry E. Goldress, Best's chairman and chief executive officer, said, "We are very pleased that these financings are completed. They will help position us with a strong merchandise assortment as we move into the critical Christmas season. They will also allow us to take advantage of many retailing opportunities currently being offered by our vendors, many of whom are having to contend with the impact of an unsettled retailing environment."

Leonard P. Shaykin, a managing partner of Adler & Shaykin, the major shareholder of Best, said, "We are gratified to receive this endorsement from our financial partners in this difficult environment. It reflects the stability of Best and its good future prospects."

Best, one of the nation's largest catalog showroom retailers, operates 195 Best showrooms in 27 states. The company also operates Best Jewelry, a chain of 35 fine jewelry and giftware stores, and Tele-Mail, a nationwide mail-order service.

#90288p4605 10/15/1990 ~PR Newswire

PITTSBURGH (OCT. 15) PR NEWSWIRE - Integra Financial Corp. (NASDAQ: ITGR) today announced third quarter and year-to-date earnings.

Net income was $.72 per share for the third quarter of 1990, unchanged from the third quarter of 1989, and was $17.4 million and $18.2 million for those quarters, respectively. Net income for the nine months ended Sept. 30, 1990, was $2.13 per share or $52.4 million, vs. net income of $2.10 per share or $52.9 million for the same period of 1989.

The per share amounts reflect the reduced level of average common shares outstanding at Sept. 30, 1990, vs. Sept. 30, 1989, due to the corporation's stock repurchase program. Through the first nine months of 1990, more than 750,000 Integra shares were acquired for reissuance under various employee stock plans, a dividend reinvestment plan or for other corporate purposes.

"Modestly improved earnings per share for the year have been achieved in spite of several unfavorable circumstances," according to William F. Roemer, president and chief executive officer. "Those factors, such as an uncertain economic climate, as well as our own strict standards in reviewing the performance of our commercial loan portfolio, have limited our ability to generate even higher earnings," he added.

"Integra continues to provide a prudent level of reserves against possible loan losses," Roemer said. "During the first nine months of 1990, we contributed $22.4 million to our reserve, in comparison with $18.7 million during the same period last year. The reserve now stands at $72.5 million as opposed to $56.8 million at Sept. 30, 1989. We believe our aggressive action in this area provides adequately for potential problem credits," he concluded.

When comparing third quarter 1990 earnings to those of 1989, it is necessary to adjust the 1989 earnings for the after-tax impact of $4.8 million from an excise tax refund. The refund was a result of a change in the method of calculating Pennsylvania shares tax applicable to banks, and effected an increase to net income of $.19 per share. In addition, the results of operations for the nine months ended Sept. 30, 1990, reflect the acquisition of 16 Horizon Financial, F.A., offices in May by Union National Bank, the Pittsburgh-based Integra affiliate.

Integra's total assets were $7.6 billion at the end of the third quarter compared to $6.8 billion at year-end 1989. Deposits increased to $6.5 billion, up 12.3 percent from the end of 1989. Total loans stood at $4.3 billion, up from $4.0 billion at year-end. The market value of trust assets under management by the corporation was $5.5 billion on Sept. 30, 1990, compared to $5.7 billion at year-end 1989.

The increase in assets and deposits resulted principally from the Horizon acquisition. "On Sept. 21, we successfully converted all existing Horizon accounts and systems to a standardized menu of Integra products and procedures thus completing the merger of Horizon into Union National," Roemer said.

Based on assets, Integra is the third largest financial services holding

company headquartered in Pittsburgh, the fifth-largest in Pennsylvania and ranks 70th in the United States.

Integra operates seven banks with 226 offices throughout 22 counties of western Pennsylvania, including First National Bank of Washington, First Seneca Bank, Gallatin National Bank, Keystone National Bank, McDowell National Bank, Pennbank and Union National Bank.

Earlier this year, the corporation announced its intentions to consolidate its four northern-most banks, to combine its two southwestern banks and to rename each of its banks. According to these plans, Integra will operate three banks -- one headquartered in Titusville, Pa., one in Pittsburgh, and a third in Uniontown, Pa. -- each bearing the name Integra Bank, by the end of 1991.

Other Integra subsidiaries include credit card, investment, leasing, insurance and brokerage companies.

#90288p4608 10/15/1990 ~PR Newswire

PURCHASE, NY (OCT. 15) PR NEWSWIRE - PepsiCo, Inc.'s (NYSE: PEP) third quarter net income rose 25 percent to $336.6 million and sales grew 15 percent to $4.5 billion. Earnings per share advanced 24 percent to $0.42. Excluding the impact of several previously announced unusual items (detailed at the end of the release), earnings per share rose 21 percent to $0.41.

Worldwide soft drinks had a strong quarter. Revenues rose 11 percent to $1.7 billion and operating profits jumped 16 percent to $239.3 million excluding a $6.0 million unusual charge for potentially uncollectible domestic receivables. Including the charge, reported profits of $233.3 million rose 13 percent.

In the domestic soft drink business, revenues were up 6 percent to $1.3 billion and operating profits advanced 10 percent to $199.0 million excluding the receivables charge. Reported profits of $193.0 million grew 7 percent. Margin expansion was due to pricing, favorable ingredients costs and volume leverage.

Domestic bottler case sales gained 3 percent despite a substantial reduction in the Burger King fountain business. Excluding the impact of the loss of the Burger King volume, bottler case sales advanced 5 percent. Diet Pepsi and Mountain Dew continued to lead brand growth and Brand Pepsi posted a solid gain for the quarter. Year-to-date bottler case sales growth was 4 percent.

Worldwide snack foods revenues jumped 16 percent to $1.2 billion and operating profits of $240.6 million rose 14 percent excluding a $6.0 million unusual

charge for potentially uncollectible domestic receivables. Reported profits grew 11 percent to $234.6 million.

Worldwide restaurants also had a strong quarter. Sales jumped 18 percent to $1.5 billion and operating profits hit $164.9 million, a healthy 19 percent growth, excluding an unusual charge of $17.6 million for the closure of underperforming restaurants mostly in the U.S. Reported profits were up 6 percent to $147.3 million. Excluding the store closure charge, international profits rose 32 percent and sales increased 26 percent while domestic profits and sales grew 17 percent.

Pizza Hut sales were up 21 percent to $719 million and operating profits advanced 19 percent to $74.1 million excluding a $9.0 million charge for store closures. Reported operating profits increased 5 percent to $65.1 million. Performance was spurred by additional units and a solid 5 percent comparable sales growth for domestic company-owned units and brings year-to-date comparable sales growth for domestic company-owned units to 8 percent. Margin pressure was a result of continuing high cheese and meat costs partly offset by higher pricing. This marks the 12th consecutive quarter of 5 percent or better comparable sales growth for Pizza Hut.

#90288p4609 10/15/1990 ~PR Newswire

DAYTON, OH (OCT. 15) PR NEWSWIRE - NCR Corporation (NYSE: NCR) today reported record earnings per share, worldwide revenue and orders for a third quarter.

Earnings per share increased 11 percent in the quarter to $1.36, compared with $1.23 per share for the same period last year. Net income declined 3 percent in the quarter to $91 million, versus $94 million reported for the year-ago period. During the third quarter, NCR repurchased 2.2 million common shares under its share-repurchase program. This program continued to have a favorable impact on earnings per share while negatively affecting net income.

Revenue increased 9 percent to $1,520 million, a record for a third quarter, compared to $1,390 million for the year-ago period. On a local currency basis worldwide revenue grew 4 percent over the previous year.

Orders The U.S. dollar value of worldwide orders posted a gain over the prior-year quarter and established a record for a third quarter, despite a considerable decline in orders in the United States. On a U.S. dollar basis, orders overseas achieved a record for a third quarter with substantial gains reported over the prior-year period. "Excluding the positive impact of currency changes on order backlogs in both periods," Exley said, "the U.S. dollar value of worldwide orders declined in the quarter even though international orders posted a gain. On a local currency basis, orders abroad

recorded a small gain, paced by the Pacific marketing group."

For the third consecutive quarter, the worldwide order value of self-service financial terminals achieved a record high for the quarter. Orders for personal computers also achieved a third-quarter record.

Worldwide orders, revenue and earnings per share all achieved record levels for the nine-month period. Revenue grew 5 percent to $4,390 million from the $4,168 million recorded in the prior year. Earnings per share for the nine-month period were $3.73, an increase of 10 percent over the $3.40 recorded for the same period last year. Net income of $258 million was 3 percent lower than the $265 million reported for the first nine months of 1989. Purchases of common shares totaled 6 million shares for the first nine months of the year which left nearly 10 million shares authorized for repurchase under the share-repurchase program.

NCR Corporation develops, manufactures, markets, installs and services business information processing systems for worldwide markets.

WILMINGTON, DE (OCT. 15) PR NEWSWIRE - Airgas Inc. (NYSE: ARG) today announced the acquisition of Silver State Supplies, Western Washington Welding and Advanced Welding Supplies.

All three companies are distributors of industrial gases and welding supplies. Combined annual sales are approximately $10.5 million.

Silver State Supplies Inc. has three locations in the Las Vegas, Nev., market. It will operate as part of G.S. Parsons, a large Airgas subsidiary headquartered in southern California.

Western Washington Welding is located in Satsop, Wash., and has two additional stores. It will operate as part of Cascade Airgas.

Advanced Welding Supplies located in Tampa, and Mulberry, Fla., serves central Florida and will operate as part of Florida Airgas.

Current management will continue to operate all three acquired businesses.

Airgas Inc. has acquired more than 60 distributors since March 31, 1988, with sales of approximately $215 million.

Currently the Airgas distributor network includes more than 230 locations in 29 states and Canada. Airgas Inc. is the largest independent distributor of

industrial, medical and specialty gases in the United States.

RICHMOND, VA (OCT. 15) PR NEWSWIRE - Owens & Minor (NYSE: OMI) announced today that the primary operating assets of Harbor Medical, Inc. will be sold as of year-end to Sterile Concepts, Inc. of Richmond, Virginia. Harbor Medical located in Sanford, Florida, is Owens & Minor, Inc.'s wholly-owned sterilized procedure tray subsidiary.

Also, Owens & Minor, Inc. and Sterile Concepts, Inc. jointly announced the beginning of a national five-year distribution agreement. The specific terms of the agreements were not disclosed. The impact of the two transactions on Owens & Minor, Inc.'s 1990 earnings is expected to be immaterial.

Gil Minor, III, President and CEO of Owens & Minor, Inc., said: "We are very pleased with the two agreements reached with Sterile Concepts. The assets sale will effectively close an operating that was drain on Owens & Minor, both in terms of financial and management resources. The distribution agreements solidifies our involvement and commitment to the growing sterilized surgical tray market, which was our goal from the outset when we undertook the Harbor Medical investment."

Sterile Concepts, Inc is a leader in the sterilized surgical procedure tray business. Owens & Minor, Inc. founded in 1882, is a wholesale distributor of medical and surgical supplies, pharmaceuticals and other related products.

#90288p4620 10/15/1990 ~PR Newswire

WATERTOWN, MA (OCT. 15) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM) announced today that the use of the ExciMed(tm) UV300 excimer laser for the treatment of root canals has been introduced at the American Dental Association Annual Scientific Meeting currently being held (Oct. 13-16) in Boston.

It is anticipated that the ExciMed UV300 is uniquely suited for performing root canal treatments. In a study conducted by Pinl, et al and published in Lasers in Surgery and Medicine, it was established that diseased tissue can be quickly cleaned out of the canal by the laser, thus significantly decreasing the procedural time and reducing patient trauma during this painful procedure. In addition, the study states that the excimer could also "provide effective sterilization of the canals," thereby reducing the infection risk and the possibility of re-occlusion of the canal. Liesenhoff, et al in a study published in Deutsch Zahnarztl Z, provide further evidence that with the use of the excimer laser "hard dental materials (were removed) without producing thermal changes (in the surrounding tissue)."

According to a 1989 study conducted by Theta Corporation, 20 million patients have root canals done each year and that figure is growing at a rate of 7-9 percent per year as the population ages. The average cost of a root canal is $400.

Summit will conduct its first Laserdontics physician education seminar at its Watertown corporate headquarters on Nov. 30th. This program is modeled after the company's highly successful Visions and Visionary programs which will have educated over 1,000 ophthalmologists by the end of 1990 in the use of the excimer laser for the treatment of common vision disorders. The one-day Laserdontics program will introduce the dentist to the excimer laser and its endodontic applications. Topics will include laser physics, beam tissue interaction and there will be a hands-on wet lab. Over 50 dentists have pre-registered for the first Laserdontics program. Summit is preparing an application to be filed with the U.S. Food and Drug Administration for an investigational device exemption which would enable the company to conduct clinical trials.

Eleven thousand dentists are expected to attend the American Dental Association Annual Scientific Meeting. In the United States alone, there are 5,000 endodontists performing 60 percent of all root canals.

Summit is on target for its forecasted revenue projections of $10-12 million for fiscal year 1990, ending Dec. 31. This revenue will come predominately from the sale of the ExciMed UV200 to ophthalmologists.

Summit Technology, Inc. has established a leadership position in designing, manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. Summit has received six Investigational Device Exemption approvals from the F.D.A. for clinical trials with its excimer laser systems. To date, the Summit Technology ExciMed UV200 excimer laser system has been used to treat approximately 900 patients in opthalmology clinical trials at 20 domestic and 40 international sites.

DEARBORN, MI (OCT. 15) PR NEWSWIRE - Ford Motor Company (NYSE: F) has committed more than half a billion dollars to facilities for developing and producing electronic components that will give its customers the products they want and need, Ford Chairman Harold A. Poling said here today.

Addressing the "Convergence 1990" biennial conference of the International Congress on Transportation Electronics, Poling said that even though quality and productivity improvements in the electronics industry have been impressive in recent years, he anticipates "even greater achievements" in the years ahead.

"Over the past 15 years," he said, as an example, "costs of electronic components such as diodes and transistors have decreased by 35 percent, while costs of automotive goods and services in general have more than doubled due to inflation."

To stay in the forefront of automotive electronics technology, Poling cited several areas where Ford is "aggressively investing in facilities to develop future electronic products and systems":

-- New dynamometer facilities are being built in the United States, Germany and England to prove out electronic powertrain and chassis systems in parallel with vehicle design. By the mid-1990s, Ford will have replaced, redesigned or improved virtually all of its existing powertrains in North America and Europe.

-- A renovation and expansion of Ford's Scientific Research Labs in Dearborn, Mich., will house a project to develop silicon-based sensors for meeting environmental and safety requirements.

-- A joint venture company involving Ford, Mazda and Sanyo will be established in Asia to design, develop and manufacture automotive audio products, with manufacturing facilities in Malaysia. Ford plans to use radios from the new venture primarily in vehicles produced and sold in the Asia-Pacific region.

-- A state-of-the-art plant will be built in Portugal to supply radios and other high technology audio components for Ford cars and trucks assembled in Europe.

-- Two high-tech electronic components plants have been recently dedicated: one in Spain, which builds electronic engine control modules, and the other near Philadelphia, which produces engine control modules, sensors and electronic equipment that controls braking, suspension, steering and other vehicle systems.

CONCORD, N.C. (OCT. 15) PR NEWSWIRE - First Charter Corporation (NASDAQ-NMS: FCTR), Concord, North Carolina, the holding company for First Charter National Bank, has announced unaudited results for the three and nine month periods ended September 30, 1990.

Net income for the three month period ended September 30, 1990 was $613,729 versus $420,273 for the comparable period in 1989, which represents a 46.0 percent increase. Primary and fully diluted earnings per share for the period were $.21, compared to $.14 for the same period in 1989. The increase in net income is attributable to a non recurring loss in 1989. Net income from continuing operations decreased 37.0 percent from 1989. Primary and fully diluted earnings per shared from continuing operations decreased from $.33 in 1989 to $.21 for 1990. The decrease is primarily attributable to a gain in 1989 on the sale of surplus real estate and a gain on the sale of securities which occurred in 3rd quarter of 1989.

Net income for the nine months ended September 30, 1990 was $2,084,662 versus $1,697,429 for the comparable period in 1989, for a 22.8 percent increase. Primary and fully diluted earnings per share for the period were $.71 compared to $.57 for the same period in 1989. Net income from continuing operations decreased 15.2 percent from 1989. Primary and fully diluted earnings per share from continuing operations decreased from $.83 at September 30, 1989 to $.71 at September 30, 1990.

On an annualized basis, this net income represents a return on average assets of 1.16 percent versus .98 percent and a return on average equity of 9.93 percent versus 8.31 percent.

Total assets at Septemberr 30, 1990 were $238,636,207, down 2.1 percent from September 30, 1989. Total loans decreased .7 percent to $153,225,090, while total deposits were up 8.2 percent to $201,007,069 over September 30, 1989. Total shareholders' equity was $28,560,470 at September 30, 1990 which represents a book value per share of $9.77. The decrease in total assets and loans is attributable to the sale of the mortgage subsidiary.

First Charter National Bank, the principal subsidiary of First Charter Corporation with headquarters in Concord, N.C., provided a full range of retail and commercial banking services. The Trust Department also offers a broad range of personal and employee benefit services. Markets served by the bank include Cabarrus, northern Mecklenburg and southern Rowan Counties.

The Common Stock for First Charter Corporation is traded on the NASDAQ National Market System under the symbol FCTR. NASD market makers include Dean Witter Reynolds, Inc., Inc., Interstate/Johnson Lane Corporation and Koonce Securities, Inc.

DEARBORN, MI (OCT. 15) PR NEWSWIRE - Henry A. Nickol, general manager of Vehicle Operations for Ford Motor Company's North American Automotive Operations, has been elected a vice president of the company, Chairman Harold A. Poling announced today.

Nickol has been head of the Vehicle Operations activity since it was established Sept. 1. He will continue in that position, reporting to Alex Trotman, executive vice president, North American Automotive Operations. Vehicle Operations presently consists of Body and Assembly Operations and Body Engineering.

Nickol joined Ford in 1953 as a trainee with Engineering Staff. He has held a number of senior positions in engineering management in the Product Development Group, Car Engineering, Chassis Division and Engine Division. He became engineering director, Powertrain Engineering, in 1983; general manager of Engine Division in 1984, general manager of Transmission and Chassis Division in 1986 and general manager of Powertrain Operations in 1988.

Nickol was born Feb. 20, 1932, in Detroit. He received a bachelor's degree in mechanical engineering from the University of Detroit and a master's degree in engineering mechanics from the University of Michigan. He is a member of the Scientific Research Society of America and the Society of Automotive Engineers and was elected a fellow of the Engineering Society of Detroit in 1986. He lives in Farmington Hills, Mich.

#90288p4631 10/15/1990 ~PR Newswire

IRVING, TEXAS (OCT. 15) PR NEWSWIRE -- ShowBiz Pizza Time, Inc. (NASDAQ: SHBZ) today announced that continued increases in comparable period sales in both of its operating concepts led the company to substantially increased earnings for the three and nine months ended Sept. 28, 1990.

Revenues for the third quarter of 1990 increased by 9.7 percent to $48.4 million from $44.1 million in the third quarter of 1989. Operating income of $5.4 million was generated in the third quarter of 1990 as compared to an operating loss of $597,000 incurred in the third quarter of 1989. The prior year third quarter operating loss resulted from a $4.5 million provision for asset write-offs related to the closing of 27 Monterey House restaurants.

The company reported net income for the third quarter of 1990 of $4.4 million, or $.72 per share, as compared to a net loss of $1.8 million in the third quarter of 1989. If third quarter 1989 results were adjusted to eliminate the effect of the charge related to restaurant closings, a 36.4 percent increase in operating income and a 60.3 percent increase in net income would have resulted between the two periods.

The company's improved performance during the third quarter was largely the result of a 5.2 percent increase in comparable store sales by company-owned ShowBiz and Chuck E. Cheese's restaurants and a 29.4 percent increase in comparable store sales from the company's Monterey's Tex-Mex Cafe Restaurants

between the two periods.= The company also has opened four new ShowBiz/Chuck E. Cheese's restaurants and acquired six existing restaurants which had previously been franchised or managed by the company for others in the first nine months of 1990.

Revenues for the first nine months of 1990 increased by 6.7 percent to $138.9 million from $130.1 million in the comparable period of 1989. Operating income more than tripled to $14.9 million in the first nine months of 1990 from $4.6 million in the comparable period of the prior year.

The company generated net income of $11.7 million, or $1.93 per share on a fully diluted basis, in the first nine months of 1990 as compared with $2.0 million, or $.31 per share, on a fully diluted basis in the first nine months of the prior year. If results of the first three quarters of 1989 were adjusted to eliminate the effect of the charge related to restaurant closings, an increase of 64.2 percent in operating income and an increase of 79.2 percent in net income would have resulted between the two periods.

ShowBiz operates a system of 263 ShowBiz Pizza Place and Chuck E. Cheese restaurants, of which 139 are company operated in 23 states, and 27 Mexican restaurants operating as Monterey's Tex-Mex Cafe restaurants in Texas and Oklahoma.

#90288p4634 10/15/1990 ~PR Newswire

JENKINTOWN, PA. (OCT. 15) PR NEWSWIRE - Flagship Financial Corp.'s (NASDAQ: FLGF) board of directors today declared a regular quarterly dividend of $.10 per share.

This dividend will be paid on Nov. 16, 1990, to common stockholders of record of Nov. 2, and marks the 17th consecutive dividend since the security began trading publicly in 1986.

Flagship Financial, which ranks among the 10 largest publicly traded thrifts in Pennsylvania, conducts business through its wholly owned subsidiaries First American Savings and Brandywine Savings Bank. First American currently operates 12 full-service and six "convenience" branches in Pennsylvania and New Jersey; its five New Jersey facilities are expected to be closed by year end. Brandywine Savings Bank operates nine full-service branches in Chester County, Pa. The common stock of Flagship Financial is traded on the NASDAQ National Market System under the symbol FLGF.

#90288p4635 10/15/1990 ~PR Newswire

FREEPORT, NY (OCT. 15) PR NEWSWIRE - LeaRonal, Inc., (NYSE: LRI) today reported that net income for its second quarter ended Aug. 31, 1990 was $1,915,000 or $.22 per share on sales of $34,397,000 compared to net income of $2,529,000 or $.29 per share on sales of $32,493,000 for the corresponding quarter of the prior fiscal year.

The company reported net income for the six months ended Aug. 31, 1990 of $3,982,000 or $.45 per share on sales of $70,921,000 compared to net income of $5,221,000 or $.59 per share on sales of $69,353,000 for the corresponding period ended Aug. 31, 1989.

Process sales, which are sales of proprietary chemical specialties, electronic and imaging chemicals and do not include the price of precious metals, increased 15 percent to $13,089,000 for the three months ended Aug. 31, 1990 up from $11,345,000 for the quarter ended Aug. 31, 1989. Process sales for the six month period ended Aug. 31, 1990 were $27,292,000, an increase of 17 percent from $23,374,000 for the prior year period.

Ron Ostrow, president and chief executive officer, indicated that the growth in process sales was achieved in the company's foreign markets and primarily from new product technologies. The decline in net income reflects lower margins on newly introduced products, softness in the domestic electronics industry, the impact of a $250,000 ($0.03 per share) non-recurring, non-tax deductible charge related to environmental compliance matters at one of its U.S. facilities, foreign currency exchange losses related to the company's Swiss subsidiary U.S. dollar denominated investments, and a provision to reduce the carrying value of the company's short term investments to the lower of cost or market.

LeaRonal, Inc. develops and markets a wide variety of specialty chemicals utilized in the electronics and metal finishing industries.

HOPKINTON, MA (OCT. 15) PR NEWSWIRE - Avatar Corporation announces that it will provide IBM 3270 communications support for the new Apple Macintosh LC, Macintosh Classic, and Macintosh IIsi personal computers through its MacMainFrame Series of Macintosh-to-IBM mainframe connectivity products.

The MacMainFrame Series includes Workstation and Gateway products for Macintosh computers in Coax, Token Ring, and SDLC environments and is available for all Macintosh computers, including the new Macintosh CPUs.

The MacMainFrame Series will include a new MacMainFrame card designed for the Processor Direct Slot of the Macintosh LC and will be available in the first quarter, 1991. Macintosh-to-mainframe connectivity is immediately available for the Macintosh Classic via Avatar's MacMainFrame DX and for the Macintosh IIsi via all of the MacMainFrame Workstation and Gateway products.

"Avatar has always provided IBM 3270 connectivity for each new Macintosh upon its introduction and these Macintosh computers are no exception," said Tom Bogan, president of Avatar.

"These new Macintosh CPUs give users the opportunity to combine the ease of use of the Macintosh and the power of the IBM mainframe in a variety of high performance, low price configurations.

"We see an opportunity for the Macintosh LC and Macintosh Classic to be used for IBM 3270 connectivity in remote or home office locations or in cases where entry-level Macintosh computers are the best solution. And with Avatar's MacMainFrame Series of Workstation and Gateway products, Macintosh-to-mainframe connectivity is easily accomplished."

The MacMainFrame Series includes the same easy-to-use features that are in all MacMainFrame Workstation and MacMainFrame Gateway products. The MacMainFrame Series features IBM 3278/3279 terminal emulation, 3179G/3192G host graphics emulation, 3287 printer emulation, file transfer capabilities, copy and paste, keyboard remapping, pull-down and tear-off menus, customizable color palettes, an EasyKeys macro facility and MultiFinder support.

With multiple host sessions available, users can utilize financial, word processing, graphics and electronic mail host applications at the same time and conduct file transfers in the background using any of those IBM 3270 host sessions.

MacMainFrame provides true IBM terminal emulation combining the ease of use of the Macintosh with the power of the mainframe, allowing MIS managers to easily integrate MacMainFrame into an existing or new network.

IRVINE, CA (OCT. 15) PR NEWSWIRE - I-Flow Corp. (NASDAQ: IFLO), manufacturer of a drug infusion system for the home health care market, announced today that the U.S. Food and Drug Administration has granted permission for the company to market its Multi-Drug(tm) Infusion System.

The Multi-Drug Infusion System is an ambulatory intravenous infusion system

designed to provide therapeutic delivery of drugs or other prescribed fluids, for chemotherapy, antibiotics, TPN, hydration and other applications for the treatment of such diseases as cancer and AIDS. The product can be programmed to deliver multiple drugs through separate channels at variable flow rates for ambulatory and out-patient care.

The product provides significant benefits for patients requiring treatment of multiple symptoms or diseases. Such applications as antibiotics or chemotherapy can be combined with hydration or nutritional treatments through separate infusion channels to produce a complimentary therapeutic program. The Multi-Drug Infusion System, the company's initial entry into the $6 billion home care market, is designed to meet the medical community's need for an ambulatory infusion system that can deliver multiple infusions, be programmed over a wide range of therapies and yet is easy for the nurse, technician or patient to use.

"As we near completion of the development of our new product, we are excited about its opportunities in the home care market. The ambulatory Multi-Drug Infusion System's remote programming capabilities, coupled with its unique combination of features and benefits, make it one of the most versatile and easy-to-use infusion systems available," said Donald M. Earhart, I-Flow's chief executive officer and president.

I-Flow Corp. is developing a multiple drug infusion system designed to meet the needs of the health care provider specializing in ambulatory and out-patient care.

LAKE BUENA VISTA, Fla. (OCT. 15) PR NEWSWIRE - Walt Disney Co. Chairman and CEO Michael Eisner will host more than 1,500 of the nation's top business executives at the 17th annual National Business Hall of Fame Conference, presented by Junior Achievement, April 18, 1991, at Disney's Yacht and Beach Club Resorts. The event honors the greats of American business and outstanding Junior Achievement volunteers.

Conference highlights include the induction of 1991 laureates into the National Business Hall of Fame plus a provocative session on education moderated by former CBS News President Fred Friendly.

Details of the conference were announced by Karl Flemke, president and CEO of Junior Achievement Inc. Eisner will give the conference keynote address and will be joined by entertainer Dinah Shore in hosting the day's main event - the National Business Hall of Fame dinner presenting the 1991 inductees

selected by Fortune magazine's board of editors.

"The business leaders we will honor are excellent role models, not only for our youth, but for all of us who are striving toward excellence in our chosen fields," said Eisner.

Among the 128 members of the National Business Hall of Fame are: Walt Disney, Ray Kroc, Estee Lauder, H. Ross Perot, William R. Hewlett and David Packard, John D. Rockefeller, Henry Flagler and Liz Claiborne.

WILMINGTON, DEL. (OCT. 15) PR NEWSWIRE - Edward J. Bassett, director of equity investments, was appointed vice president-Du Pont Pension Fund Investment, effective Nov. 1, it was announced today.

Bassett will succeed Keith E. Tucker, vice president-pension fund investment, who will retire Oct. 31 after 17 years of service.

Bassett, 46, joined Du Pont (NYSE: DD) in 1977 as an equity analyst in the Pension Fund Investment Department where he held various positions, before becoming equity portfolio manager in 1980, head of equity research in 1984 and director of equity investments in 1986.

He is a chartered financial analyst and a member of the Association for Investment Management and Research and the Financial Executives Institute. He also serves on the investment committee of the National Parks and Recreation Association of Washington.

Born in Philadelphia, Bassett was graduated magna cum laude from the University of Maryland in 1972 with a bachelor of science degree in economics.

Bassett and his wife, the former Mary Ann Brackin of Kelton, Pa., have two children and live in Chadds Ford, Pa.

Tucker, 57, joined Du Pont in 1973 as special assistant in the Treasurer's Department. In 1975, he was transferred to the Pension Fund Investment Department as head of fixed income investments and was named vice president-pension fund investment in 1986.

Born in New York City, Tucker was graduated from Bucknell University in 1955 with a B.S. degree in commerce and finance.

He and his wife, the former Mary Willoschat of St. Albans, N.Y., have five children and live in Newark, Del.

CLEVELAND (OCT. 15) PR NEWSWIRE - Directors of Charter One Financial, Inc. (NASDAQ/NMS: COFI), holding company for The First Federal Savings Bank, today declared a 7 percent increase in its regular quarterly dividend. The action raises the quarterly rate to $0.15 per share from $0.14 per share and increases the annualized rate to $0.60 per share.

The dividend will be payable Nov. 14, 1990 to shareholders of record Oct. 29, 1990. It is the second dividend increase this year and the fourth raise since Charter One went public in January 1988.

Charles John Koch, president and chief executive officer, said, "This further increase in dividends is warranted due to the additional positive impact on core earnings resulting from the acquisition of Broadview Savings Bank in May of this year. We are particularly pleased with the progress of the consolidation of the two companies which is now essentially complete. With a full quarter behind us, we find that the high quality loan portfolio we acquired has yielded even better results than originally expected. As a

result, we anticipate reporting record high third quarter earnings in the range of $0.72 to $0.77 per share, including gains from sales of securities amounting to approximately $0.10 per share."

Charter One Financial, Inc.'s subsidiary, The First Federal Savings Bank, operates 69 offices in Ohio, covering the greater Cleveland, Akron, Youngstown and Portsmouth markets, and Toledo, where the bank operates under the name People's Savings.

PHOENIX, ARIZ. (OCT. 15) PR NEWSWIRE - Norstan Communications, Inc. (NASDAQ: NRRD) has sold an Aspect 300R Automatic Call Distribution system (ACD) to

America West Airlines based in Phoenix, Ariz. The Aspect ACD is already in use at the AmeriWest Vacations division of the airline. This purchase marks the first sale of an Aspect ACD to a major domestic airline. Norstan has the exclusive rights to sell and support Aspect Telecommunications products in the 10 states Norstan serves.

James Wehner, the president of Norstan's Southwest Region said "We are very excited and pleased that America West Airlines chose Norstan and the Aspect ACD to upgrade and improve its reservations system at AmeriWest Vacations." Wehner went on to say, "I believe Norstan's timely commitment to service and installation were major reasons America West chose our system."

America West Airlines is the nation's 10th largest carrier and serves more than 60 cities. America West's hubs are located in Phoenix, Ariz., and Las Vegas, Nev. The company is growing at a rate of between 20 and 30 percent each year. The AmeriWest Vacations division has also experienced similar growth. America West purchased the Aspect 300R to meet the company's growing number of daily reservations calls. Results have shown that the new Aspect system has increased the efficiency of AmeriWest Vacation's reservations group since it went on line in late August.

Aspect Telecommunications (NASDAQ: ASPT) headquartered in San Jose, Calif., develops, markets and supports customer-premises, application specific telecommunications systems throughout the United States.

Norstan, Inc., based in Maple Grove, Minn., is a multi-product communications services company which sells, installs, services and supports BUSINESS telephone equipment. The company has 1,200 employees in 21 cities and 10 states and serves over 8,000 customers.

#90288p4650 10/15/1990 ~PR Newswire

MORRISTOWN, NJ (OCT. 15) PR NEWSWIRE - Barringer Resources Inc. (NASDAQ: BARR) today announced that its Barringer Instruments subsidiary has been awarded an order for its Ionscan explosive detection equipment to be utilized in a Middle East country. This represents the first order for the use of Ionscan in the detection of explosives. Discussions continue for additional orders for equipment in this region and elsewhere.

Due to the highly sensitive use of this equipment, as well as military secrecy the exact location of the equipment cannot be disclosed.

Other Ionscan equipment has been delivered to other customers for use in the detection of drugs and chemical warfare.

Stanley Binder, president of Barringer Resources, said that the Ionscan equipment can detect the presence of a wide variety of explosives containing plastiques. "It has been shown to be highly effective in the detection of plastic explosives in various tests conducted by the U.S. and Canadian governments," Binder said.

Binder also announced that the Barringer Instruments subsidiary will soon commence a $1.4 million program to apply its Ionscan (IMS) techniques to wood species sorting.

Industry, Science and Technology, Canada (ISTC), a branch of the Canadian government, and a consortium of Canadian Forest Industry Companies led by Weyerhaeuser have each agreed to fund 50 percent of the cost of the program. Work is scheduled to begin immediately upon completion of contract documentation, slated for November of this year. Forintek Canada, the Canadian Wood Products Industry National Research Institute charged with research and development initiatives, sponsored initial research to apply IMS to identify various wood species and will be a co-participant in this program.

Barringer successfully completed both laboratory and field tests at a saw mill using its Ionscan equipment, which resulted in the awarding of the present program. This program marks the entry of Barringer's Ionscan equipment into the on-line process control market.

Barringer will hold the exclusive worldwide marketing rights for this wood speciation system and has identified a substantial market for the instrumentation, including forest industry companies worldwide.

Headquartered in Morristown, Barringer Resources Inc. is a holding company with two operating entities. Barringer Laboratories, Inc. (NASDAQ: BALB), 48 percent owned, provides analytical testing services for the environmental and minerals industries. Barringer Instruments Inc. develops, manufactures and markets specialty analytical instruments for security, law enforcement, exploration and environmental monitoring applications.

PASADENA, CA (OCT. 15) PR NEWSWIRE - Avery International Corporation (NYSE, PSE: AVY) and Dennison Manufacturing Company (NYSE: DSN) announced today that both companies have agreed to give the Department of Justice through Oct. 17, 1990, to complete its review of the proposed merger and to finalize the terms of a consent decree with the companies. The companies plan to close their

merger on Oct. 18, 1990, or sooner if the Department of Justice completes its review before then.

Additionally, Charles D. Miller, chairman and chief executive officer of Avery and Nelson S. Gifford, chairman and chief executive officer of Dennison, announced the planned organizational structure of Avery Dennison Corporation, which will be effective upon consummation of the merger.

These organizational changes affect the four major operating groups where Avery and Dennison have complementary businesses, as well as the key officers who will be charged with leading those operations. The other three operating groups for Avery Dennison - Materials U.S.; Materials Europe; and Graphic and Fastening Systems - will not be affected by the merger.

As previously announced, Miller will be chairman and chief executive officer of Avery Dennison Corporation and Gifford will be vice chairman. Donald D. Belcher will assume the newly created position of senior group vice president of the new Office Products Group, responsible for the combined worldwide office products businesses of Avery Dennison. Belcher, who currently serves as group vice president of Avery's Converted Products Group, will continue to report to Philip M. Neal, executive vice president.

Reporting to Belcher will be Dennison Stationery Products Company, Dennison Monarch, Dennison Canada, Avery Commercial Products Division and K&M Company.

Also reporting to him will be Avery Dennison Stationery Products - Europe, which includes Dennison's major European subsidiaries, Doret and Cheval-Ordex, in France; Dennison Spain; Avery Myers and Avery Guidex in the United Kingdom; and Avery's office products businesses in Benelux and France.

In the primary labeling area, Anthony F. Bova, senior vice president, Dennison Systems and Packaging, will assume the newly created position of group vice president of the new Packaging and Labels Group, reporting to Neal.

Bova will be responsible for the Avery Industrial Products Division operations located in the United States. Also reporting to Bova will be the Dennison operations for Therimage, IPC/PSC, Dennison Control Print, Specialty Products and Metallized Paper. In addition, Avery Canada will become part of the Packaging and Labels Group.

CONTACT: Diane B. Dixon (media), (818) 304-2118, or Wayne H. Smith (investors) (818) 304-2001, both of Avery; or Linda J. Sadowski (investors) of Dennison, (508) 879-0525, ext. 3334.

WALTHAM, MA (OCT. 15) PR NEWSWIRE - Thermo Electron Corporation (NYSE: TMO)

today announced that its Tecomet metallurgical division has received a 3-1/2-year contract valued at a minimum of $2 million as the exclusive provider of small, high-efficiency satellite thrusters to Atlantic Research Corporation.

Under the agreement, Tecomet will supply hardware for more than 200 five-pound-class bipropellant thrusters to Atlantic Research's Liquid Propulsion Division, Niagara Falls, N.Y.

The thrusters will be used in several commercial and government communications satellite programs. Shipments are expected to begin next March and continue through 1993. The agreement also provides for additional production by Tecomet under an optional follow-on contract.

Tecomet, with operations in Wilmington and Marlborough, Mass., and Tempe, Ariz., specializes in precision and difficult-to-work metals fabrication for aerospace, defense, and medical applications. The company currently supplies Atlantic Research with hardware for thrusters ranging in size from the 2-1/2- to 600-pound classes and other auxiliary bipropellant systems.

Thermo Electron develops, manufactures and markets environmental and analytical instruments, custom-engineered and pre-packaged cogeneration systems, industrial process equipment, biomedical materials and products, and fabricated biomedical and aerospace components. The company also provides metallurgical heat treating, water quality engineering, and analytical laboratory services.

#90288p4670 10/15/1990 ~PR Newswire

COLUMBUS, OH (OCT. 15) PR NEWSWIRE - A Troy, Ohio business owner is suing Banc One Corporation (NYSE: ONE) for more than $10 million, alleging the bank participated in a fraud and forgery scheme. Dennis A. Haack has charged Columbus-based Bank One with violation of the Racketeer Influenced & Corrupt Organizations (RICO) Act of 1970.

Haack alleges that throughout 1988-89 he was victimized by Bank One's former Troy branch manager Brian Harvey, Troy resident Ferdie Murphy, Jr., and others.

The lawsuit contends that Harvey, Murphy, and other defendants forged the names of Haack and his wife, Sandra, in order to make unauthorized and illegal loans in the names of Haack and his companies, S&F Marketing, Inc. and Motion Furniture Shoppes, Inc. These loans were then used by the defendants to pay other unauthorized loans.

Haack asserts that forging his signature to make loans, then using those illegal loans to pay other unauthorized loans, was a pattern that was repeated time and again over a period of several months.

The lawsuit states that at least $170,000 was wrongfully borrowed by the defendants. Haack further claims that, as a result of this manipulation, his Bank One accounts were constantly overdrawn, leading to exorbitant bad check charges and credit problems. The lawsuit notes that the federal, state, and local tax implications Haack will face as a result of the defendants' activities have yet to be calculated.

Attorney Robert G. Palmer of the Columbus law firm McCarthy, Palmer, Volkema and Becker is representing Haack. The lawsuit was filed on Sept. 19 in United States District Court in Dayton. The case has been assigned to Judge Walter Rice. In his lawsuit, Haack asks for compensatory damages of $1.5 million; punitive damages of $10 million; three times the amount of his actual damages; attorney fees and all related costs.

#90288p4671 10/15/1990 ~PR Newswire

NEW YORK (OCT. 15) PR NEWSWIRE - A jump-strut nose gear designed to permit quicker aircraft takeoffs has been produced by Menasco Aerosystems of Fort Worth, Texas, and will be tested by the National Aeronautics and Space Administration (NASA) Ames Research Center starting in November.

The jump-strut nose gear will kick the aircraft's nose up during takeoff. This would permit takeoffs from shorter runways or from damaged runways.

The jump-strut nose gear is being installed on Ames' experimental Quiet Short-haul Research Aircraft (QSRA). "The QSRA," said Ames project manager Joe Eppel, "is designed for short takeoffs and is very stable at slow speeds. This makes it an ideal aircraft for this type of research."

About 12 flights are planned during November and December, Eppel said. The jump-strut research program is a joint effort by NASA, the Air Force and Menasco Aerosystems, a division of Coltec Industries. NASA will provide the aircraft, flight test facilities and manpower; the Air Force provided $80,000 for funding; and Menasco, a designer and manufacturer of landing gear of military and commercial aircraft, built the jump-strut.

The jump-strut looks like a standard nose wheel landing gear. Attached to the main strut is a spherical vessel pressurized with nitrogen gas. When activated, the gas is released into a pneumatic cylinder within the shock strut that pushes a piston rod attached to the nose wheel. This forces the aircraft's nose up. The jump-strut on the QSRA will be activated by a switch in the cockpit.

A 1987 study by Lockheed Aeronautical Systems Company, Burbank, Calif., investigated the QSRA jump-strut takeoff benefits and concluded the distance required for takeoff could be reduced by 10 percent to 12 percent by using a nose gear jump-strut.

"The military is concerned about being able to use partially destroyed runways. With a jump-strut, a plane can get airborne sooner, reducing the need for the entire runway," Eppel said.

Pat McDowell, director of marketing, Menasco Aerosystems, said, "We are proud to be participating in the development of a landing gear that will give our armed forces a tactical advantage in combat. Our gear also will increase the flexibility of commercial aircraft by allowing a significant increase in takeoff gross weight with normal ground roll or increasing the safety margin."

The QSRA, a modified De Havilland Buffalo, first flew July 6, 1978. The four jet engines mounted on top of the wing are insulated to keep engine noise to a minimum. The thrust of the aircraft's engines assist the wing's lift capability by deflecting the exhaust over the wing and downward. This allows

the QSRA to take off and land in very short distances.

Coltec Industries Inc., based in New York, is a privately owned manufacturing company with 1989 revenues of $1.52 billion serving aerospace, automotive and other industrial markets.

ATLANTA (OCT. 15) PR NEWSWIRE - Uptons Department Stores, a leading southeastern fashion retail chain, continues expansion in Hampton Roads with a new store opening in Pembroke Mall, Virginia Beach, Va.

Uptons' grand opening festivities on Friday, Oct. 19, and Saturday, Oct. 20, to coincide with Pembroke Mall's 24th anniversary celebration. Pembroke Mall Hampton Roads' first enclosed mall, is located at the intersection of Independence Boulevard and Virginia Beach Boulevard.

Uptons will support the two-day grand opening with free T-shirts for the first 250 visitors, live music, entertainment and a grand opening sweepstakes.

According to David Layne, president of Atlanta-based Uptons, "Our anchor store in Pembroke Mall will offer the customer 65,000 square feet of shopping excitement, filled with fashion merchandise for the entire family."

Uptons features branded and private label fashions for women, men and children as well as intimate apparel, accessories, jewelry and shoes.

Uptons entered the Hampton Roads market in November 1989 with openings in Fairfield Shopping Center, Virginia Beach, and Patrick Henry Mall, Newport News, Va. Last March Uptons opened in Chesapeake's Crossways Center, across from Greenbrier Mall.

With the opening of Pembroke Mall, Uptons has a total of 29 stores throughout the Southeast.

The new Uptons in Pembroke Mall will open at 9 a.m. on Friday, Oct. 19.

WASHINGTON (OCT. 15) PR NEWSWIRE - American Mobile Satellite Corporation today announced the appointment of Robert A. Kerstein as chief financial officer, and vice president. He will start Monday, Nov. 5.

Kerstein comes to AMSC from RK Associates, where he was the president. RK Associates is a managing consulting practice in Bellevue, Wash., focussed on start-up and high-growth companies.

Prior to that, Kerstein was a senior vice president and cellular chief financial officer for McCaw Cellular Communications, Inc. in Kirkland, Wash. There he was responsible for developing and implementing comprehensive programs that enhanced McCaw's financial and operational performance.

Prior to McCaw, Kerstein was the vice president and chief financial officer at Los Angeles Cellular Telephone Company. Prior to that, he was vice president and chief financial officer at Falcon Cable TV in Los Angeles.

"Bob's considerable background in the building and operating of communications companies makes him an ideal choice for AMSC," said Brian B. Pemberton, president and chief operating officer of AMSC. "His expertise will be invaluable to us as our operations grow." John Coker will continue as vice president and treasurer, focussing his attention on financing for the corporation.

AMSC was licensed by the Federal Communications Commission a year ago to launch and operate the mobile satellite system for the entire United States, including the continental United States, Hawaii, Alaska, Puerto Rico, the U.S. Virgin Islands, and 200 miles of coastal waters.

AMSC will begin providing mobile data services late this year via leased capacity on an existing satellite; full voice and high-speed data services will begin with the launch of AMSC's first satellite in 1993.

#90288p4677 10/15/1990 ~PR Newswire

HOUSTON (OCT. 15) PR NEWSWIRE - Compaq Computer Corporation (NYSE:CPQ) today announced the signing of key integration agreements with Microsoft Corporation (NASDAQ: MSFT), Novell, Inc. (NASDAQ: NOVL) and The Santa Cruz Operation, Inc. (SCO) to establish a more formal framework for their ongoing efforts to support multivendor PC-based solutions. The integration agreements provide for tested multivendor configurations and coordinated technical support and training for authorized resellers. Five key elements make up the agreements: Definition of certified platform configurations; testing and performance tuning of the platforms; supporting the components in the defined platforms; joint development of future products; and joint marketing.

"With the increasing pace of transition from minicomputers and mainframes to

PC-based networks, customers need high levels of support for the multivendor solutions they are considering for their computing requirements," said Michael S. Swavely, president, North America, Compaq Computer Corporation. "While these agreements are simply more formal extensions of our ongoing strategic relationships with these key systems software providers, the alliances we have announced today reinforce Compaq's commitment to our customers to provide thoroughly tested, certified configurations for high-performance multivendor solutions," he said.

The platform configurations will be defined jointly by Compaq with Microsoft, Novell and SCO and will be based on an understanding of customer needs and current and future trends in configurations and environments. The components covered will include base hardware, operating system, network operating system and key third-party components such as network interface cards and database and communications software. Integration labs will be established to develop and test each reference platform and communicate these tested configurations to authorized COMPAQ computer dealers.

All of the companies will focus a higher level of compatibility testing and performance tuning on the defined platforms. Microsoft, Novell and SCO will each jointly develop relevant new products with Compaq, share technical information and test early versions of products with Compaq. The results of the joint efforts will then be shared with dealers and customers.

Microsoft, Novell and SCO will each work with Compaq to create closer ties between their respective support organizations. This will include integration training classes, joint training of the authorized dealer technical and sales staffs, linked phone lines and procedures for the escalation and resolution of problems. The result will be enhanced support by Compaq for Microsoft, Novell and SCO products, and enhanced support of Compaq products by each of those companies.

Compaq will also work with these companies to communicate to the customer the benefits of the integration activities, conduct ongoing research on customer integration needs and participate in joint dealer and major account conferences.

"We have a long-established history with Compaq," said Steve Ballmer, senior vice president, Systems Software, Microsoft Corporation. "This comprehensive program ensures customers of a highly reliable set of connectivity solutions based upon Microsoft and Compaq systems products that are performance-tuned and well-supported," he said.

"This agreement is the natural evolution of our close working relationship with Compaq over the past four years," said Jim Bills, senior vice president, sales, Novell, Inc. "It demonstrates how industry partners, in cooperation with the dealer, are developing and supporting solutions needed by end users. This agreement formalizes our working relationship and strengthens our

commitment to provide end users with reliable network computing solutions. Novell is committed to working with Compaq and others to continue to grow this segment of the industry," he said.

"Open system customers need support to effectively configure, integrate and maintain today's multivendor solutions," said Doug Michels, Executive Vice-President & Co-founder of SCO. "These agreements will assure customers of getting the support they need to enjoy the full power and value of today's open system solutions," he said.

Compaq also plans to enter into a similar integration agreement with Banyan Systems, Inc. by the end of the year.

Compaq Computer Corporation is a world leader in the manufacture of PC systems and desktop, portable and laptop personal computers. COMPAQ products are sold in 65 countries through a network of more than 3,000 authorized COMPAQ computer dealers.

Founded in February 1982, Compaq has consistently set business and industry growth records. This year, Compaq achieved "Global Fortune 500 " status, as ranked (438) in Fortune Magazine's 1990 listing of the world's largest companies.

NOTE: COMPAQ, DESKPRO, SYSTEMPRO, Registered U.S. Patent and Trademark Office. Product names mentioned herein may be trademarks and/or registered trademarks of their respective companies.

SOUTHPORT, CONN. (OCT. 15) PR NEWSWIRE - Hunter Environmental Services, Inc. (NASDAQ-NMS: HESI), announced that the Texas Water Commission (TWC) Hearings Examiner took full jurisdiction over the permitting process for the salt dome project of Hunter Industrial Facilities, Inc. (HIFI), a majority owned subsidiary.

This ruling in favor of HIFI allows the permitting process on the salt dome project to proceed in a timely fashion. Opponents of the project had attempted to delay the proceedings claiming the TWC lacked jurisdiction in the matter and that permitting should be delayed until additional regulations on salt dome storage were promulgated.

In taking full jurisdiction the hearings examiner effectively denied opponents' motions. Having overcome this hurdle, HIFI believes final permits will be awarded in the first half of 1991. The next step in the permitting

process, which entails evidentiary hearings on the technical merits of the permit, are scheduled to begin Dec. 3, 1990.

HESI has sold its other operational businesses in order to reduce debt and provide additional working capital for the salt dome project. With the completion of these sales (including the sale of its underground storage tank testing unit) the company believes it is now adequately capitalized to complete the permitting process and begin construction on the salt dome project. Project financing of $60-$70 million will be required to complete construction of the project.

Hunter Environmental Services, Inc., is an environmental service company devoted to developing and providing environmentally safe solutions to the fundamental problems surrounding disposal of hazardous waste.

LYNN, MASS. (OCT. 15) PR NEWSWIRE - GE Aircraft Engines (GEAE) has signed a $130 million contract to power Sikorsky Black Hawk helicopters for the Republic of Korea (ROK).

The T700s will be manufactured by Korean Air under a licensed co-production agreement that provides for initial engines to be built in GE's Lynn, Mass., facility, and a phase-in of engine production in the ROK.

The engines are the latest variant of GE's highly successful, T700 series, the -701C. With 10 percent more power, this 1,940 shaft horsepower (SHP) turboshaft engine significantly improves the Black Hawk's performance in hot, high-altitude conditions.

"GEAE is very pleased to be associated with a company of Korean Air's stature " said Louis A. Bevilacqua, general manager of GEAE's T700/CT7 Turboshaft Project Department. "We are especially pleased by the ROK government's choice of the T700."

"The T700 has demonstrated unparalleled reliability and operational capability in service around the world, and this choice reaffirms our customers' confidence in our engine," said Bevilacqua.

Since entering service, the T700 has set the standards for helicopter engine reliability, ease of maintenance, and ruggedness.

Nearly 6,000 engines in the T700 and related CT7 family have been shipped worldwide. Another 2,000 are on order.

Thirty military and commercial customers in 22 countries now operate aircraft powered by these engines, including all branches of the U.S. Armed Forces. The engines have logged more than 5.8 million flight hours under the most punishing of environmental conditions, from corrosive salt-laden air to the abrasive hot sands of the desert.

WHITE PLAINS, N.Y. (OCT. 15) PR NEWSWIRE - NYNEX Information Solutions Group, through its London-based subsidiary The BIS Group, was awarded a $500,000 contract to provide London Underground -- one of the world's largest urban railways -- with a framework for developing new computer systems.

"What we're giving London Underground is a data model that will outline the types of data required to support business operations in the future," said Gordon Mackenzie, account executive, BIS Applied Systems. "It will be used in planning and controlling London Underground's strategic information systems."

A significant portion of the investment calls for new systems to improve the management of London Underground's extensive asset base of some 700,000 items including tunnels, signals, rolling-stock, 240 miles of track and 274 rail stations.

"The model is a key element of London Underground's strategy to manage its data as a corporate resource. BIS has helped define this strategy, and will play a leading role in its implementation," he continued.

BIS also won a contract with London Underground to review its information technology standards, which will also be used to develop new computer systems.

"BIS was awarded this contract after an open bid, and was successful because it was able to demonstrate its strong expertise in methods integration," said Russell Fawcett, head of Information Technology, London Underground.

NYNEX is working on other major information systems for the mass transit industry. They include a $33.5 million project for the Port Authority of New York and New Jersey for a parking revenue control system at the three metropolitan airports, and a similar system at the Dallas-Fort Worth International Airport.

London Underground Limited is a wholly owned subsidiary of London Regional Transport. Carrying more than 2.6 million passengers a day, it provides service 20 hours a day and runs 470 trains at peak times.

NYNEX Information Solutions Group, a subsidiary of NYNEX Corporation (NYSE: NYN), is a worldwide provider of application software, information technology consulting services and facilities management. Based in White Plains, the company has more than 7,000 employees in over 30 U.S. cities and 13 countries.

MURFREESBORO, TENN. (OCT. 15) PR NEWSWIRE - Pricor Incorporated (NASDAQ: PRCO) officials announced today they will report a loss for the second quarter of fiscal 1991 of approximately $.10 per share. In the second quarter of fiscal 1990, the company posted a loss of $.04 per share.

Hubert L. McCullough, chief executive officer and board chairman, said second quarter results for fiscal 1991 ended September 30, 1990 "will be lower than last year due to one-time charges associated with the closing of the Houston Reintegration Center and operating losses experienced at certain residential facilities."

According to McCullough, the closing of the Houston facility, announced August 21 and completed September 30, was a result of a reduction in inmate referrals.

William J. Ballard, chief financial officer and treasurer, said, "The Mid-Valley Youth Center and the CCS Group Homes in California performed below expectations. The company is evaluating several options to improve profitability while providing quality services."

Shiloh, the company's newest residential treatment center in Tennessee, has shown slower than expected growth in its population since opening in the second quarter. Ballard pointed out, however, that the occupancy level at the 32-bed facility had increased from 34 percent on September 1 to 63 percent on September 30.

Pricor plans to release complete second quarter results in mid-November.

#90288p4687 10/15/1990 ~PR Newswire

KING OF PRUSSIA, PA. (OCT. 15) PR NEWSWIRE - Universal Health Realty Income Trust (NYSE: UHT) announced today that the trust earned $3,278,000 or $.47 per share during the quarter ended Sept. 30, 1990.

Cash available for distribution in the quarter was $4,122,000 or $.59 per share. The third quarter dividend of $.37 per share was paid on Oct. 1, 1990.

For the nine-month period ended Sept. 30, 1990, net income per share was $1.02 and cash available for distribution per share was $1.39. For the same period in the prior year net income per share was $.89 and cash available for distribution per share was $1.24. Dividends paid per share were $1.11 for the 1990 period compared to $1.09 per share for the 1989 period.

Results for the quarter and the nine-month period include $1.4 million of cash interest payments received on a $13 million mortgage loan extended by the trust to a New Hampshire psychiatric facility. Approximately two-thirds of this amount relates to interest payments owed to the trust for the six-month period ended June 30, 1990, for which reserves had been established. While interest payments are now current on the loan and the hospital continues to generate sufficient revenues to support the mortgage obligations to the trust it is uncertain whether the trust can expect continued receipt of interest payments on a current basis due to the financial condition of the hospital's parent company. The trust said it believes that the mortgage loan is being carried at its realizable value and that a failure to receive interest currently will not adversely affect the ability of the trust to pay its regular quarterly dividend.

Universal Health Realty Income Trust, a real estate investment trust, invests in health care- and human service-related facilities including acute-care hospitals, psychiatric hospitals, substance-abuse recovery centers and rehabilitation hospitals. The trust currently owns 12 hospitals and provides mortgage financing for another hospital.

HAUPPAUGE, N.Y. (OCT. 15) PR NEWSWIRE - United-Guardian, Inc. (AMEX: UG) today reported the financial results for its second quarter ended Aug. 31, 1990. Revenue for the second quarter was up 38 percent from the first quarter, resulting in an operating profit of $125,126 compared to an operating loss of $112,019 for the first quarter of the year. Net earnings for the 2nd quarter were $72,806, or $.02 per share, compared with a loss of $352,156 (.07 per share) for the first quarter.

Alfred Globus, chairman and chief executive officer of United-Guardian, stated: "The turnaround is due to a number of factors, including the strong sales of Lubrajel, the effect of our cost-cutting measures, additional option payments from companies interested in marketing our products, and price increases instituted in June."

He further stated that he expected that the third and fourth quarters would also be profitable, with the fourth quarter producing significantly greater revenue and operating profit as a result of the anticipated initial sales of Renacidin Irrigation, the company's recently patented new drug for dissolving certain types of kidney stones.

United-Guardian is a manufacturer of pharmaceuticals, health care products, medical devices and cosmetic bases.

#90288p4703 10/15/1990 ~PR Newswire
CLEVELAND (OCT. 15) PR NEWSWIRE - The Standard Products Co. (NYSE: SPD) today reported results for the first quarter of fiscal 1991.

For the three months ended Oct. 1, sales were $153,308,000 compared to $151,036,000 in the first quarter a year ago. The company reported a net loss of $1,665,000 or 16 cents per share, compared to a profit of $1,395,000, or 14 cents per share a year ago.

Sales to the company's primary customers, North American manufacturers of cars and light trucks, increased to $94,090,000, a gain of 3 percent. Total North American carbuild rose 4 percent with all of the increase attributable to the Japanese transplants. The first quarter is normally a low volume period because of customer plant shutdowns for vacations and model changeovers.

Standard Products' North American automotive operations showed substantial improvement over last year's quarter, particularly the South Carolina plants which posted significant losses a year ago. Canadian operations have returned to normal following a ten-week strike which was settled in early September. Despite the strike, sales in Canada remained even with last year, supported by participation on the Chevrolet "Lumina" models.

Offsetting the North American automotive gains were high costs for continuing development and start-up at the company's Silent Channel subsidiary in England in preparation for the launch of the new Ford Crown Victoria and Mercury Grand Marquis models in January. Also impacting UK earnings were high operational costs for the start-up of the European Ford "Escort" model.

Sales of Oliver Rubber for the quarter were $27,912,000, a decrease of 12 percent over the fiscal 1990 quarter. Soft market conditions, higher material costs and severe competitive pressure resulted in a decline in first quarter tread rubber earnings.

At the company's Holm Industries subsidiary, sales rose 12 percent but earnings declined as the result of market conditions and the costs of integrating the Plastic/Magnetics Division of Pantasote Inc., which was acquired Sept. 1.

James S. Reid, Jr., Standard Products chairman and chief executive officer, said the period ahead will be difficult because of soft market conditions in all areas of the company's business. In addition, there are heavy start-up costs in England, which are expected to moderate in the third quarter of the fiscal year. He noted that the level of car sales in North America and Europe over the next several months will be a key factor for the company.

Cleveland-based Standard Products manufactures rubber and plastic parts for the automotive original equipment industry, rubberized track for military vehicles, and plastic and magnetic door seals for home appliances. Its Oliver Rubber subsidiary is a major producer of tread rubber for truck tire retreading.

MENTOR, OHIO (OCT. 15) PR NEWSWIRE - Fermenta AB of Stockholm, Sweden and Ishihara Sangyo Kaisha, Ltd. of Osaka, Japan announced today that they have signed a definitive agreement for Ishihara to acquire 100 percent of SDS Enterprises, Inc., a wholly-owned subsidiary of Fermenta AB for a total consideration of approximately $300 million.

SDS Enterprises, Inc. has two wholly-owned operating subsidiaries, Fermenta ASC Corporation and Ricerca, Inc. Fermenta ASC develops, manufactures, markets and sells agricultural and specialty chemicals worldwide. Headquartered in Mentor, Ohio, Fermenta ASC sells primarily to agrochemical producers and suppliers in over 70 countries. The primary manufacturing facility is located in Houston.

Ricerca, located in Concord Township, Ohio, provides research and development services on a contract basis to assist its clients in developing new products, improving existing products and in supporting the registration of agrochemical products for regulatory compliance throughout the world.

Ishihara, based in Osaka, is active in the agrochemicals area and also ranks among the world's leading titanium dioxide producers. Through its acquisition of SDS, Ishihara is continuing to expand its international agrochemical operations and worldwide research and development capability. Ishihara has

expressed its commitment to continue to support and grow the current SDS Enterprises worldwide businesses.

The acquisition will be effected through a newly formed wholly-owned Delaware subsidiary of Ishihara. The closing of the transaction is subject to customary closing conditions and regulatory approvals.

#90288p4706 10/15/1990 ~PR Newswire

KALAMAZOO, MI (OCT. 15) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) today reported that 1990 third-quarter and nine-month sales and earnings from continuing operations increased over year-earlier levels.

During the third quarter, the company reached an agreement to sell its Upjohn HealthCare Services, Inc. (UHCS) business. UHCS results are included in discontinued operations and the results of prior periods have been restated to reflect the operations of the company's continuing businesses separately from discontinued operations. Unless noted otherwise, the following results reflect the company's continuing operations.

Quarterly earnings from continuing operations of $112 million increased 11 percent on sales of $747 million, which rose 13 percent.

Primary earnings per share of 61 cents were 13 percent higher than the 54 cents per share earned in third-quarter 1989.

Earnings from continuing operations for the first nine months increased 12 percent over year-earlier levels on sales of $2.2 billion.

Third-quarter net earnings, including discontinued operations, were $106 million, or 58 cents per share, compared to $96 million, or 52 cents per share in 1989. Nine-month net earnings, including discontinued operations, were $335 million, or $1.81 per share, compared to $294 million, or $1.58 per share in the year-earlier period.

Commenting on the company's results, Chairman of the Board, President and Chief Executive Officer Theodore Cooper said, "Our third- quarter results reflect our continuing emphasis on sales growth and profitability. The sale of UHCS will allow the company to further focus its resources on its core business activities, accelerate the development of innovative human and animal health care products and enhance margins."

Operating income of $159 million was up 8 percent from the third quarter of 1989 and amounted to 21 percent of sales, compared to $148 million, or 22 percent of sales, a year ago. Cost of products sold increased to 27 percent

of sales, compared to 26 percent of sales, a year ago. Marketing and administrative costs increased to 38 percent of sales compared to 37 percent in 1989. As a percent of sales, research and development expense declined.

The growth in sales for the quarter exceeded that of operating income because of a temporary shift in product mix resulting primarily from increased agronomic seed sales and the costs associated with expansion of the U.S. sales force and product introductions in Europe.

The Upjohn Company is a worldwide, research-based provider of human health care products, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90288p4710 10/15/1990 ~PR Newswire

WILMINGTON, DEL. (OCT. 15) PR NEWSWIRE - Du Pont (NYSE: DD) will sponsor a trade fair here Nov. 7 that will bring together minority vendors specializing in information technology products and services with representatives of major manufacturing and services industries, government and the educational system.

Hyland McCarthy, manager of the minority vendor program for DuPont, said about 100 majority and minority organizations, most with headquarters or major operations in the lower Delaware Valley, have agreed to take part in the show, called InfoTech '90.

The trade fair, to be held at The Du Pont Country Club, is one of the largest of its kind in the country. Minority vendors will be given booth space to set up marketing displays and to meet with purchasing representatives from mainstream companies, all elements of the educational system, and government.

McCarthy said, "The growing pressures apparent throughout the U.S. economy are being felt most acutely in the minority business community. At the same time, it is clear that one major reason for lack of stronger economic activity among minority firms is a lack of contacts with those in the mainstream of business who are genuinely interested in doing more business with them. This trade show is designed to develop those business connections."

"For the past year Du Pont has been sponsoring trade fairs such as this one at our plants around the country," McCarthy added. "As a result, we are doing several million dollars more in business with minority firms. We chose to focus on firms specializing in information technologies for the Wilmington show for two reasons: Successful, higher-technology minority firms can have a very strong impact in the minority community because of the salaries paid and the purchases they can make from other minority vendors. And, secondly,

DuPont wants to do more business with minority firms because we have found them to be among the most responsive and innovative of our suppliers."

Purchasing representatives from each of Du Pont's functional units will attend the show.

Du Pont, which has had a formal minority vendor program since 1973, said it expects to purchase $200 million in goods and services from minority firms throughout the country this year.

CONTACT: John T. Wheeler of Du Pont, 302-774-3082

#90288p4711 10/15/1990 ~PR Newswire

BOISE, ID (OCT. 15) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) today reported a significant decline in net income for the third quarter of 1990, compared with results for the same period a year ago.

Net income for the third quarter of 1990 was $13.9 million, compared with $62.8 million for the same quarter in 1989. Fully diluted earnings per share were 27 cents in the third quarter of 1990, compared with $1.30 for the same quarter a year ago. Sales for both the third quarter of 1990 and the third quarter of 1989 were $1.1 billion.

For the first nine months of 1990, net income was $70.5 million, or $1.52 per share, compared with net income of $216.3 million, or $4.60 per share, for the first nine months of 1989. Sales for the first nine months of 1990 were $3.2 billion, compared with $3.3 billion for the same period in 1989.

John B. Fery, chairman of the board and chief executive officer, said the decline in third-quarter income resulted from a drop in operating income for all three of the company's business segments. The decline in income reflects lower prices for the company's paper and wood products, operating disruptions and costs associated with capital investment projects at two of the company's pulp and paper mills, and the effects of a slowing U.S. economy. Increased interest expense and depreciation resulting from the company's record capital investment program also contributed to the decline.

Operating income for the company's paper and paper products segment declined markedly, compared with that of the same period of 1989. The decline was due primarily to lower prices for uncoated white papers, market pulp, and linerboard. Also contributing substantially to the decline were capital investment-related operating difficulties at the company's mill in Rumford, particularly in connection with a pulp mill modernization and expansion project, and costs associated with preparations for the start-up of a new world-class paper machine in International Falls, Minnesota. Operating income in the third quarter declined moderately from that of the second quarter of

1990, as modestly improved or stabilizing prices for uncoated white papers, newsprint, and coated papers partially compensated for temporary mill operating problems.

Third-quarter operating income for the company's office products segment declined, compared with results in the third quarter of 1989, largely reflecting a drop in sales volume growth from double to single digits at a time when expense levels increased. The slower sales volume growth reflected a weaker overall U.S. economy as well as increased competition on the wholesale side of this business. The combination of these factors resulted in downward movement of prices and pressure on margins. Despite these conditions operating income in the third quarter was above that of the second quarter of 1990.

Operating income for the company's building products segment in the third quarter was down significantly, compared with that of the same quarter a year ago. The decline was largely the result of sharply lower prices for lumber, plywood, particleboard, and wood chips. Prices for wood products declined as a slowing U.S. economy cooled demand. At the same time, delivered-log costs increased, reflecting reductions in the timber available for harvest from public lands in the Pacific Northwest. Operating income in the third quarter was also below that of the second quarter of 1990, again reflecting primarily the continued downward trend in product prices.

#90288p4719 10/15/1990 ~PR Newswire

RESTON, VA (OCT. 15) PR NEWSWIRE - Systems Center, Inc. (NYSE: SMX) today announced preliminary revenues of approximately $27.5 million for the third quarter ended Sept. 30, 1990, up 68 percent from $16.4 million for the same period in 1989.

Net income decreased to approximately $500,000 (5 cents per share) compared with $1,803,000 (18 cents per share) for the third quarter last year. Final figures will reflect an additional 5 cents to 7 cents per share attributed to a gain from the divestiture of the company's DB2 relational database software business.

In making the announcement, Chairman and Chief Executive Officer Robert E. Cook stated: "Our preliminary third quarter results reflect a marked improvement from the second quarter. We continue to work through the transitional issues surrounding our second quarter acquisitions, and move forward with strategic products for high-growth markets."

Systems Center, Inc., founded in 1981, develops, markets and supports network

and systems software. The company offers over 50 products, including NET/MASTER for network and systems management; Network DataMover for data transfer among multiple operating environments; VMCENTER II for IBM's VM operating system; and AS/CENTER for IBM's AS/400.

WILSON, NC (OCT. 15) PR NEWSWIRE - BB&T Financial Corporation (NASDAQ-NMS: BBTF) achieved record earnings for both the nine months and third quarter ended September 30. For the first three quarters, net income increased by 15.8 percent, while earnings per share were up 13.9 percent. Net income for the first nine months of the year totalled $40.8 million, $1.89 per share, compared with $35.2 million, $1.66 per share, in 1989. Fully diluted earnings per share rose to $1.80 from $1.58 last year. On an annualized basis, the return on assets was 1.07 percent, compared with .94 percent in 1989, while the returns on shareholders' equity were 15.4 percent and 14.7 percent, respectively.

For the third quarter, net income was $13.4 million, an 11.5 percent increase over the $12.0 million earned last year. For the quarter, primary net income per share was $.62 and fully diluted earnings per share was $.59, compared with $.56 and $.53, respectively in 1989.

On August 20, 1990, BB&T consummated a merger with Carolina Bancorp, Inc. (NASDAQ-NMS: FFCA), parent holding company of First Federal of the Carolinas, F.A., of High Point, N.C. On September 1, 1990, BB&T completed its acquisition of First Federal Savings Bank of Pitt County, Greenville, N.C. The mergers were accounted for as poolings-of-interest, and accordingly, all financial data has been restated to include the results of the merged companies.

In releasing the earnings, John A. Allison, Chairman and Chief Executive Officer of BB&T, said, "We are experiencing the most profitable year in our history in what have been difficult times for many. We have been successful in improving net interest margins, growing noninterest revenues, and controlling expenses. Earnings which were excellent would have been even better except for nonrecurring expenses of approximately $1 million related to the thrift acquisitions.

At the end of September, BB&T had total assets of $5.37 billion, total loans of $3.47 billion and total deposits of $4.21 billion. Through its subsidiaries in North and South Carolina, BB&T operates 200 offices in 110 cities. BB&T Financial Corporation common stock is traded on the NASDAQ National Market System and is listed under the symbol BBTF.

FINDLAY, OHIO (OCT. 15) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) reported that steady product demand coupled with efficient manufacturing operations and cost controls resulted in strong sales and earnings for the third quarter ended Sept. 30.

Net income for the quarter amounted to $16.9 million ($0.41 per share) versus $14.9 million ($0.36 per share) for the same period of 1989. Net sales were a record $239.8 million compared with sales of $233.6 million a year earlier.

Net income for the nine months amounted to $47.1 million, equal to $1.14 per share, compared with income of $40.3 million, or $0.98 per share, in the same period of 1989. Sales for the nine months were $683.1 million versus $658.5 million last year.

"The company has a strong fundamental position in our industry," said Ivan W. Gorr, chairman. "Volume in both tire and engineered rubber products remained quite satisfactory during the three-month period.

"We continue to experience a steady demand for our products. Our plants are operating efficiently on good production schedules and costs remain under control allowing us to experience generally favorable operating margins.

"The Mideast crisis presents a number of uncertainties for our national economy and the world economy. However, there has been ample fuel supply and we have not seen any change in consumer driving patterns. We expect our operations to continue at sound levels in the fourth quarter and in 1991 barring any serious interruption of automobile usage in the United States."

FT. WORTH, TEXAS (OCT. 15) PR NEWSWIRE - Sunbelt Nursery Group, Inc. (AMEX: SBN) today announced that a lawsuit has been filed in Delaware Chancery Court against the company, its directors, Intermark, Inc. and Pier 1 Imports, Inc. to block the cash tender offer recently commenced by a subsidiary of Pier 1 to acquire all of the outstanding Common Stock of the company not already owned by the subsidiary.

The complaint alleges, among other things, that the $12.00 per share tender

offer price is substantially below the fair value of the company and that the tender offer is part of a plan designed to benefit Intermark and Pier 1 through the acquisition of the company at the lowest possible price at the expense of the minority stockholders. The complaint seeks, among other things, preliminary and permanent injunctions against proceeding with or closing the tender offer, compensatory and rescissory damages and costs of the action.

The company and the defendant directors believe that the lawsuit is without merit and they intend to defend it vigorously.

Sunbelt Nursery Group, Inc. is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States, with 96 stores that feature nursery stock and lawn and garden supplies. The company's common stock is traded on the American Stock Exchange under the symbol "SBN."

WASHINGTON (OCT. 15) PR NEWSWIRE - The Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced separate agreements with six mortgage banking companies to provide a total of $14.1 billion in funding for single-family home mortgages in all parts of the United States.

The agreements will provide financing for approximately 170,000 home mortgages based on the $83,000 average size of the mortgage loans Fannie Mae financed in 1989.

The largest single agreement is with Citicorp Mortgage (NYSE: CCI), St. Louis, which will originate $5 billion dollars of mortgages throughout the United States that will be sold to Fannie Mae for cash or exchanged for Mortgage-Backed Securities (MBS) issued by Fannie Mae.

Fannie Mae also will provide funding for $4 billion in mortgages originated nationwide by Norwest Mortgage, Inc., Des Moines, Iowa. This is the corporation's second multi-billion dollar agreement with Fannie Mae this year; in February, Fannie Mae agreed to invest in $2 billion in loans originated by Norwest.

Citicorp, through the offices of Citicorp Mortgage, Citibank, and Citibank, FSB, is the largest residential mortgage lender and servicer in the country. Citicorp Mortgage services nearly 700,000 loans valued at $64 billion.

Norwest Mortgage, Inc. is a wholly owned subsidiary of Norwest Corporation (NYSE: NOB), Minneapolis, a $26.7 billion diversified financial services

organization providing investments, insurance and banking through more than 1,270 offices in 47 states and internationally. Norwest Mortgage currently has more than 250 locations in 41 states.

Fireman's Fund Mortgage Corporation is one of the nation's largest mortgage bankers. The company services a $35.1 billion portfolio with 568,000 mortgage loans and originates home loans nationwide.

NCNB Mortgage is an affiliate of NCNB Corporation (NYSE: NCB), Charlotte, N.C. the seventh largest bank holding company in the country, with $63.7 billion in assets and more than 900 branches in seven states.

The Huntington Mortgage Company, a subsidiary of Huntington Bankshares Incorporated (NASDAQ-NMS: HBAN), an $11.7 billion regional bank holding company headquartered in Columbus, Ohio, has 21 branches in 11 states. The Huntington Mortgage currently services $4.6 billion in residential loans.

Dominion Bankshares Mortgage Corporation, a wholly-owned subsidiary of Dominion Bank (NASDAQ-NMS: DMBK), has offices in Virginia, Maryland, Tennessee and Washington, and originates residential mortgages throughout the Atlantic seaboard.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

#90288p4734 10/15/1990 ~PR Newswire

FORT WORTH, TX (OCT. 15) PR NEWSWIRE - Westinghouse Electric Corp. (NYSE: WX) views the planned Superconducting Super Collider (SSC) as a top technological opportunity, it was announced today.

The SSC, scheduled for operation near Waxahachie, Texas, at a cost of about $8 billion, will be the world's largest and most powerful particle accelerator. Westinghouse is competing for a Superconducting Super Collider Laboratories (SSCL) contract to produce superconducting dipole magnets for the SSC.

"The SSC magnet program complements Westinghouse's continuing superconductivity research and development and our design and production work in complex, large-scale superconducting electrical equipment," said Bruce Boswell, general manager of the corporation's collider dipole magnet division.

Westinghouse has been a leader in superconductivity since 1952 and has built more types of superconducting magnets than any other U.S. corporation. In 1962 the corporation commercialized the niobium and titanium alloy wire required for the SSC magnet coils.

SSCL administers the SSC for the U.S. Department of Energy. It is expected to select "leader" and "follower" dipole magnet manufacturers soon. The goal is to develop two manufacturers with full capability to produce the magnets. SSCL will then conduct a competition between the two firms to manufacture and test 8,150 16.5-ton magnets at a rate of 10 per day.

Boswell, who has 15 years of senior Westinghouse management experience in first-of-a-kind high technology projects, recruited specialists and experts from throughout Westinghouse for its collider dipole magnet division management team. To cover every important experience base, he drew top personnel from the corporation's Power Generation, Energy Systems and Government Operations Business units.

Initial magnet design and manufacturing planning is already underway at the corporation's Science and Technology Center and Productivity and Quality Center, both near Pittsburgh. Senior managers and technical specialists from each center make up the division's design and manufacturing team.

DANBURY, CT (OCT. 15) PR NEWSWIRE - The Linde Division of Union Carbide Industrial Gases Inc. (UCIG) today announced that it will implement action to recover increased costs for bulk liquid oxygen, nitrogen, argon, hydrogen and helium products. The recent run-up in oil prices caused by the Mideast crisis has resulted in substantial increases in the cost of serving industrial gas customers. The company noted that diesel fuel costs, for example, have already risen 30 percent.

E. G. Hotard, president of UCIG, stated, "Despite taking actions to alleviate rising costs and attempting to delay the necessity of recovering these costs from our customers, Linde sees no alternative to this action if the long-term interest of our customers are to be met. Linde will continue to do everything possible to focus our customers' needs and to ensure that we bring value to the customer-supplier relationship."

CHICAGO (OCT. 15) PR NEWSWIRE - American National Corp. today reported a net loss of $14.8 million for the third quarter of 1990, compared to net income of $19.4 million for the same period in 1989.

The loss resulted from a $60-million provision for credit losses, up from $1.8 million in the year-ago quarter. This provision was determined following an extensive review of the entire portfolio completed during the quarter and was largely related to deterioration in a number of commercial real estate credits.

Ronald J. Grayheck, president and chief executive officer, said "In view of the weakness in the commercial real estate market and our belief that the economy is not likely to improve in the near term, we concluded that the unusually large provision was appropriate."

Non-performing assets as of Sept. 30, 1990 were $161.7 million, compared to $41.9 million a year ago.

The allowance for possible credit losses, representing 2.6 percent of total loans outstanding, was $107.7 million as of Sept. 30, 1990, compared to $41.1 million a year ago.

Average loans outstanding during the third quarter grew 13 percent to $4.2 billion and average deposits grew to $4.3 billion, up 13 percent from the third quarter of 1989. Total assets as of Sept. 30, 1990 were $5.4 billion, an increase of 9 percent from a year ago.

For the first nine months of 1990, net income was $10 million, compared to $55.7 million a year ago. Return on average assets was 0.25 percent and return on average equity was 4.49 percent, compared to 1.52 percent and 26.83 percent respectively last year.

American National Corp. is a wholly owned subsidiary of First Chicago Corp. (NYSE: FNB)

#90288p4741 10/15/1990 ~PR Newswire

DEERFIELD BEACH, FLA. (OCT. 15) PR NEWSWIRE - CheckRobot Inc. (NASDAQ: CKRB) announced today that its board of directors had relieved Charles J. Beech of his duties as president and chief executive officer of the company. "The board reluctantly took this action," said Alfred W. Vitale, chairman of the board, "based upon its belief that a change in leadership at this time would be in the best interest of the company."

The executive committee of the board of directors will assume the functions of the chief executive officer of the company until a successor to Beech is hired. The company will begin a search for a successor immediately. Scott Sloan, vice president, will continue to be responsible for marketing, sales and customer relations, while Richard Honerkamp will continue as chief

financial officer.

Separately, CheckRobot also announced its financial results for its fiscal year ended May 31, 1990. The company reported a net operating loss for the year of $6,148,300, as compared to a net operating loss of $4,112,400 for the previous fiscal year. The adjusted net loss after preferred stock dividends was $6,575,500 ($0.87 per common share) for fiscal 1990 as compared to $4,579,200 ($0.75 per common share) for fiscal year 1989. Revenues for fiscal 1990 were $2,060,000, substantially exceeding the $1,165,600 in revenues during fiscal 1989. Honerkamp stated that the increased loss was due primarily to increased selling and customer service expenses, due to expanded marketing efforts, as well as increased general and administrative expense and increased research and development costs incurred in implementing manufacturing cost reductions. "The company instituted a cost-cutting program in August 1990, however," he continued, "that has reduced expenses substantially."

CheckRobot develops and markets ACM(R) automated checkout machines. The systems are designed to improve customer service and profitability for the supermarket industry. Using enhanced laser bar code scanners and a proprietary merchandise security system, the ACM allows shoppers to quickly scan and check out merchandise before paying centrally located cashiers.

#90288p4747 10/15/1990 ~PR Newswire

ATLANTA (OCT. 15) PR NEWSWIRE - The U.S. Environmental Protection Agency (EPA) has fined Southern Mills Inc. of Union City, Ga., $25,000 for the 1989

unauthorized filling of approximately 25 acres of forested wetlands and along a one-mile stretch of Spring Creek in Upson County, Ga.

In addition to the fine, Southern Mills Inc. was required to restore the filled area to its original condition.

The $25,000 penalty is one of the first to be assessed by the EPA southeastern office under a provision of the 1987 Clean Water Act, which grants EPA the authority to assess administrative penalties for violations of the act. Under this authority, EPA can assess administrative penalties of up to $125,000 for the destruction of wetlands. For more serious violations, EPA may refer cases to the U.S. Department of Justice where greater civil penalties and criminal sanctions can be sought.

Wetlands are among the most environmentally beneficial areas in the nation, and include marshes, swamps, bogs and similar areas that have developed between open water and dry land. Wetlands harbor unique soils and plants that provide food and habitat for fish and wildlife, water purification, erosion control, flood control during major storms, and recreation. Although wetland areas exist throughout the Southeast, they rapidly are being destroyed. Each year, 458,000 acres of wetlands are destroyed in the United States. EPA is particularly concerned about the unpermitted filling of bottomland hardwood wetlands in Upson County because of excessive losses due to poor timbering practices, farmland conversion and, most recently, industrial and residential development.

The EPA and the U.S. Army Corps of Engineers (COE) are working together to implement Section 404 of the Clean Water Act, which requires that a permit be obtained before filling wetland areas. EPA strongly encourages all property owners desiring to excavate or fill wetlands to contact the COE prior to beginning work. The COE office which administers the Section 404 permit program in Georgia is located in Savannah (Regulatory Division, P.O. Box 889, Savannah, GA 31402) and can be contacted at 912-944-5133.

FREMONT, MI (OCT. 15) PR NEWSWIRE - Gerber Products Company (NYSE: GEB) today announced a workforce reduction program that includes provisions for volunteers to apply for enhanced severance benefits.

"Gerber Products Company has improved its competitive position during recent years by focusing its business strategies and implementing cost reduction programs," said Curt Mairs, vice president - Human Resources. "The critical demands of the 1990s require that we continually assess our performance against peer companies and take the steps necessary to accelerate our

competitive advantage."

"Toward this objective, the company expects to eliminate approximately 60 salaried positions at our Fremont offices through a combination of voluntary and involuntary separations," Mairs said.

According to Mairs, regular severance benefits are being increased by 25 percent to help minimize the impact of the workforce reductions on affected employees and their families.

All affected employees will remain on the payroll through Dec. 31, 1990. Gerber has engaged consultants to provide career, financial and retirement counseling services for employees and, when appropriate, their spouses. All affected employees will receive group outplacement assistance.

Gerber employs nearly 1,400 workers in the company's Fremont operations.

CHICAGO (OCT. 15) PR NEWSWIRE - Norwest Mortgage, Inc., Des Moines, Iowa, and the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced an agreement to provide financing for $4 billion of new home mortgages to be originated throughout the United States.

Under the agreement, which provides for mandatory delivery of the mortgages, Norwest Mortgage will originate a wide variety of home mortgages that will be sold to Fannie Mae for cash or exchanged for Mortgage-Backed Securities (MBS) issued by Fannie Mae.

This agreement, along with another agreement signed by Norwest Mortgage and Fannie Mae earlier this year for $2 billion, will provide a total of $6 billion in new mortgage financing to communities served by Norwest throughout the United States.

John R. Hayes, senior vice president of Fannie Mae's Midwestern Regional Office located here, said: "This agreement underlines Norwest Mortgage's ongoing commitment to provide affordable mortgage financing to the more than 250 communities it serves nationwide. It is Fannie Mae's second multibillion-dollar agreement with the corporation this year, and we are pleased that Norwest Mortgage has again chosen Fannie Mae as a partner."

Norwest Mortgage President Mark Oman said, "This agreement is further evidence of our commitment to be a major source of home financing nationwide and, in partnership with Fannie Mae, we continue to make America the best-housed

country in the world."

Norwest Mortgage is a wholly owned subsidiary of Norwest Corporation (NYSE: NOB), Minneapolis, a $26.7 billion diversified financial services organization providing investments, insurance, and banking through more than 1,270 offices in 47 states and internationally. Norwest Mortgage currently has more than 250 locations in 41 states.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

PITTSBURGH (OCT. 15) PR NEWSWIRE - Mobay Corporation today announced startup of expanded aliphatic diisocyanate manufacturing capacity in Baytown, Texas. The company's annual production capacity for hexamethylene diisocyanate (HDI) and Desmodur W diisocyanate has been increased by 50 percent to 60 million pounds, it was announced today by R.L. White, senior executive vice president. Mobay is a Bayer U.S.A. company.(A)

The project is estimated to have cost $25 million. "This investment demonstrates our commitment to support the growing demand for Desmodur W and for value-added products based on HDI, such as our family of Desmodur N polyisocyanate resins," White said.

Desmodur W, commonly referred to as hydrogenated MDI, is a diisocyanate used in the manufacture of high-performance, weather-resistant coating resins and elastomers.

HDI-based Desmodur N is used as a crosslinker for durable, light-stable two-component polyurethane coatings. Both products are expected to experience continued growth for such end-use areas as automotive topcoats and heavy-duty maintenance applications.

(A) - Mobay is part of the Bayer U.S.A. group of companies. Bayer U.S.A. is the U.S. management holding company of Bayer AG, Germany, and is a diversified group of companies with businesses in chemicals, healthcare, and imaging systems.

In addition to Mobay, other major Bayer companies in the U.S. include Miles Inc., and Agfa Corporation. Bayer U.S.A. sales in 1989 were $5.4 billion, or more than 20 percent of Bayer's sales worldwide.

CONTACT: Gerd Wilcke of Mobay, (412) 777-2495.

COLUMBUS, OH (OCT. 15) PR NEWSWIRE - Banc One Corporation (NYSE: ONE) announced today that it has reached an agreement to license the BPS-CENTRAL(TM) System from GE Information Services. This EDI mainframe software will be used for payment processing. In addition, Banc One will act as a referral agent for GE's EDI network services and software.

Electronic Data Interchange (EDI) is used for paperless business-to-business information exchange and provides full audit trail. It electronically replaces hard copy documents such as purchase orders, invoices and payment by check.

GE Information Services is a global provider of network-based information services and currently provides EDI services to over 7,500 clients. The flexibility of the GE software will allow Bank One to reformat customer payment instructions and invoice details into any ACH payment format.

Bank One will also be able to combine electronic ACH information with other payments such as lockbox receipts and wire transfers and deliver the information in customer specified formats for payment receipt and remittance reporting.

This will enable Bank One to provide the widest possible range of transaction and reporting options to all business customers in Bank One markets throughout the country.

Bank One will also become a referral agent for GE's EDI-CENTRAL (TM) and EDI-PC(TM) software, and EDI-EXPRESS(SM) Service. This will allow Bank One to make available to its customers a full range of integrated EDI services, software and user support.

Bank One and GE will co-sponsor EDI educational sessions so that current and potential customers can understand how they can use these new EDI capabilities to originate and receive formatted data and/or payments.

Banc One Corporation has assets of $27.9 billion and operates 52 affiliate banking organizations with 747 offices in Indiana, Kentucky, Michigan, Ohio, Texas, and Wisconsin.

Banc One Corporation also operates several additional affiliates that engage in trust services, mortgage banking, consumer finance, equipment leasing, credit-related life insurance, investment management, data processing, discount brokerage and venture capital activities.

ATLANTA (OCT. 15) PR NEWSWIRE - Dominion Bankshares Mortgage Corporation, headquartered in McLean, Va., and the Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced an agreement to provide financing for $1 billion of single-family home mortgages.

A variety of mortgage products, including 15-year and 30-year fixed-rate loans and 7-year balloon mortgages, will be originated by Dominion Bankshares Mortgage Corporation throughout the Atlantic seaboard. The majority of the mortgages will be exchanged for Fannie Mae Mortgage-Backed Securities (MBS); the remainder will be sold to Fannie Mae for cash.

Glenn Austin, senior vice president of Fannie Mae's Southeastern Regional Office located here, said, "We are delighted that Dominion Bankshares Mortgage Corporation will be working with Fannie Mae to increase the supply of affordable mortgage financing available to the communities it serves."

John F. Karaszewski, president of Dominion Bankshares Mortgage Corporation, said, "This agreement reinforces Dominion's commitment to meet the needs of home buyers, including those with low-to-moderate incomes." Karaszewski added: "One billion dollars will move a lot of families into their own homes. We thank Fannie Mae for being our partner in this happy endeavor."

Dominion Bankshares Mortgage Corporation, a wholly owned subsidiary of Dominion Bank, has offices in Virginia, Maryland, Tennessee and Washington, D.C., and originates residential mortgages throughout the Atlantic seaboard.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

MIDLAND, MICH. (OCT. 15) PR NEWSWIRE - Gilbert A. Currie, chairman of Chemical Financial Corporation (NASDAQ-NMS: CHFC) today announced the company's third-quarter earnings.

Net income increased 15.1 percent to $3,088,000 for the third quarter of 1990, as compared with $2,682,000 for the same period last year. On a per-share basis, net income for the current quarter was $.95, or 14.5 percent over the $.83 per share earned in the third quarter of 1989. For the nine-month period ended Sept. 30, 1990, net income increased 9.1 percent to $8,510,000, or $2.62 per share, compared with $7,801,000, or $2.46 per share, for the comparable 1989 period.

Total assets of Chemical Financial Corporation at Sept. 30, 1990, were $1.267 billion, up 3.5 percent over the $1.224 billion reported one year earlier. Total deposits increased 4.4 percent and total loans increased 8.3 percent over Sept. 30, 1989, levels, reaching $1.106 billion and $575 million, respectively, at the end of the current quarter.

At Sept. 30, 1990, the company's Allowance for Loan Loss Account was $10.4 million, and represented 1.81 percent of total outstanding loans. During the nine-month period ended Sept. 30, 1990, the company provided $789,000 to the Allowance for Loan Losses, while charging $168,000 in net losses against the Allowance during the period. The company has no outstanding loans to lesser developed countries, no leveraged buyout loans, nor does it foresee any significant problems with its commercial real estate loan portfolio

Chemical Financial Corporation is one of the 10 largest bank holding companies in Michigan, and the company's 10 affiliated banks operate 73 "Chemical Bank" offices in 19 counties across the mid-section of Michigan's Lower Peninsula. CFC Data Corp., Midland, is the company's wholly owned data processing subsidiary.

The company's common shares are traded in the over-the-counter market and are quoted on the NASDAQ National Market System under the symbol CHFC.

VANCOUVER, BRITISH COLUMBIA (OCT. 15) PR NEWSWIRE - Royal Oak Resources Ltd. announced today that the closing of its Cdn. $33 million acquisition of the controlling interest in the Pamour Group of Companies from the secured creditors of Giant Resources Limited has been postponed to Oct. 24, 1990.

The debt financing portion of the acquisition price will be provided by the vendors, Westpac Banking Corp. and Bank of New Zealand, instead of the previously announced debt financing by Sharps Pixley Incorporated. Completion of the Cdn. $16 million international equity offering by the company has been rescheduled to this new closing date.

This Cdn. $19,649,120 debt is repayable over two years, with interest at prime plus 1.75 percent. Up to 23 percent of the debt is convertible at the option of the vendors into common shares of Royal Oak.

The company is entitled to prepay the debt at any time without penalty except that a fee is payable if the debt remains outstanding after Oct. 31, 1991. Prior to this date, the company intends to obtain a long term gold-based financing facility for repayment of the above debt and for project related

purposes.

#90288p4764 10/15/1990 ~PR Newswire

SAN ANTONIO, TX (OCT. 15) PR NEWSWIRE - Valero Energy Corporation (NYSE: VLO) today reported third quarter 1990 net income of $31.8 million ($.76 per common share), the highest net income ever achieved by the company in a quarter, except for the 1987 first quarter which included the gain from the formation of Valero Natural Gas Partners, L.P. Third quarter 1989 net income was $4.4 million, or $.07 per common share, assuming full dilution.

For the first nine months of 1990, Valero's net income was $61.4 million, or $1.51 per common share, compared to net income of $34.3 million, or $.80 per common share, assuming full dilution, for the first nine months of 1989.

Valero's refining and marketing segment reported record operating income for the third quarter 1990 of $51.1 million, 48 percent higher than the previous record amount reported for the 1990 second quarter. The third quarter throughput margin was more than double that of last year's third quarter primarily due to a wider margin between the price of crude oil and the price of high-sulfur atmospheric residual oil which serves as the main feedstock for Valero's refinery.

The net income contribution from Valero's equity interest in Valero Natural Gas Partners, L.P. was $7.4 million for the third quarter of 1990, compared to $2.2 million reported for the same period last year. Through subsidiaries, Valero is general partner of and has an approximate 49 percent interest in the partnership.

The increase in the partnership's net income contribution was attributable to increased operating income from natural gas liquids (NGLs) somewhat offset by a decline in operating income from pipeline operations. The partnership's NGL operations benefited significantly from substantially higher NGL margins and increased ethane production. NGL margins are determined by the spread between NGL prices and the cost of natural gas from which the liquids are extracted. NGLs compete as petrochemical feedstocks with certain refined products which have increased dramatically in price due to the Middle East crisis. At the same time, natural gas prices have declined from last year's third quarter.

Spot natural gas sales margins have remained soft throughout most of 1990 due to low gas demand. Weak demand also negatively impacted the partnership's third quarter transportation volumes which also were affected by decreased gas production from some producers which have shut in gas reserves until the price increases. The partnership's transportation fees for the 1990 third quarter were higher than those for last year's third quarter due primarily to the expiration of some discounted fee arrangements included in certain take-or-pay settlements. Natural gas prices have strengthened in October and should continue to be firm as winter approaches and demand increases.

Valero Energy is involved primarily in refining high-sulfur atmospheric residual oil into premium products, such as unleaded gasoline, through its specialized refinery in Corpus Christi, Texas and in the marketing of those products. Valero Natural Gas Partners, L.P. owns a 7,100-mile network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas throughout the U.S., provides third party gas transportation services, and owns 10 natural gas processing facilities.

NEW YORK (OCT. 15) PR NEWSWIRE - The First Australia Prime Income Fund, Inc. (AMEX: FAX), a closed-end bond fund, today declared a regular monthly dividend of 9 cents per share, payable on Nov. 16, 1990, to all shareholders of record on Nov. 5, 1990.

This dividend is consistent with the policy adopted by the fund's board of directors on Oct. 24, 1988, of declaring a regular monthly dividend of 9 cents per share, which commenced in February 1989. Qualifying U.S. taxpayers are additionally entitled to a foreign withholding tax credit on this dividend, and will be informed as to the amount at a later date.

At the time of its offering in April 1986, The First Australia Prime Income Fund was the largest-ever initial public offering on the American Stock Exchange. The fund has net assets in excess of $1 billion. The fund's policy is to invest at least 65 percent of its portfolio in Australian issuers or debt securities rated 'AA' or better. The First Australia Prime Income Fund trades on the American Stock Exchange and the Pacific Stock Exchange. The fund is advised by EquitiLink Australia Limited, the largest independent mutual fund manager in Australia. Devoting itself only to the business of fund management, the EquitiLink Group manages more than $1.6 billion on behalf of more than 240,000 investors worldwide.

WESTMONT, IL (OCT. 15) PR NEWSWIRE - Mervyn C. Phillips, chairman of the board of Growth Holding Co. (OTC), announced today that the Chicago-based company has completed the sale of 53.8 percent of the common stock of Zantek, Inc., a wholly owned subsidiary, to BBM Group, a minority investment group.

Zantek is engaged in the formulation and manufacturing of food stabilizers, extenders and seasonings which it markets to food manufacturing companies. BBM Group will purchase 107,600 shares of Zantek's outstanding common shares of 200,000 shares.

The principals in BBM Group have substantial experience in various successful businesses. Carl E. Banyard currently serves as a management consultant to small businesses in Chicago and Rockford. Banyard graduated from Yale

University and Harvard Business School. Over his career he has had operating responsibility for several manufacturing companies.

William G. Mays is president of Mays Chemical Co., a chemical distribution company based in Indianapolis. Mays is a graduate of Indiana University where he majored in chemistry. He later received his M.B.A. from Indiana University. He was formerly employed by Procter & Gamble and Cummins Engine Co.

Frank B. Brooks is president and CEO of Brooks Sausage Co. and has been an economic advisor with numerous organizations. Brooks received his B.S. in finance from Northwestern University and M.B.A. from the Keller School of Business and has received recognition for numerous civic achievements.

As a minority-controlled enterprise, Phillips indicated that BBM and Growth Holding see many new opportunities for Zantek sales growth, and the management expertise and capital brought to Zantek by BBM Group should increase profitability as well. Banyard expects to act as the full-time president and CEO of Zantek. Henry Robinson will as executive vice president of Zantek assume the responsibility for operations, research and development.

Growth Holding Co. trades over-the-counter and is listed in the Pink Sheets. Hayne, Miler & Farni of Minneapolis presently makes a market in the stock.

NEW YORK CITY (OCT. 15) PR NEWSWIRE - The Edward S. Gordon Company today announced it has brokered the largest deal for office space in downtown Manhattan so far this year for the city of New York.

Merrill L. Roth, managing director at Edward S. Gordon, identified the site and brokered a 15-year plus six month lease for 288,000 square feet of space for the city of New York at 17 Battery Place and 17 Battery Place North.

The aggregate value of the deal is $86.4 million with rent per square foot beginning at $17.50 per square foot escalating to $23 over the term of the lease. Included in the deal for the city is six months of free rent and the full cost of architectural services and new tenant installation.

Under the lease, the New York City department of personnel will consolidate their operation, currently located at four over-utilized locations, on the 10th through 22nd floors along with part of the ground floor and part of the basement of 17 Battery Place North.

They will also take part of the third floor at 17 Battery Place for a total of 250,000 square feet. The city's Department of Housing Preservation and Development will occupy the remaining 38,000 square feet on the entire fourth floor of 17 Battery Place.

Edward S. Gordon Company, Inc., provides real estate leasing, consulting, and management services to owners and tenants, public and private companies, and buyers and sellers nationwide. The New York-based firm is among the five largest full-service real estate companies in the country.

WASHINGTON (OCT. 15) PR NEWSWIRE - Airbus Industrie of North America, Inc. (AINA) and Airbus Service Company (ASCO) broke ground today at a site north of Dulles International Airport in a major expansion of the European aircraft manufacturer's presence in North America.

At a ceremony at noon today, Joe Featherston, president and chief executive officer of ASCO said, "In the past seven years Airbus Industrie's U.S. and Canada customer base has grown from one airline operating 34 Airbus Industrie airplanes to 13 carriers and leasing companies with more than 500 aircraft in operation or on order."

Airbus Industrie is forecasting a need for 12,500 new aircraft over the next 18 years. "With North America accounting for almost half the world market, we are anticipating substantial growth, and our support facilities must grow to meet that demand," Featherston said.

Today's ceremony launched construction of a 55,000 square foot aircraft spare parts and distribution center. It will house the company's product support subsidiary, Airbus Service Company. ASCO provides parts and technical support to airline customers in the U.S. and Canada.

The complex, to be completed in the spring of next year, will employee about 50 people and stock about $125 million in parts. With an additional 40,000 square foot expansion available, the facility will provide 2.16 million cubic feet of space.

AINA, a subsidiary of the European aircraft manufacturer, may also construct a new headquarters facility at the site. AINA moved from New York City in 1987 to Herndon, Va., where it currently employs 100 people.

Airbus Industrie, the world's second largest commercial aircraft producer, builds a family of airliners ranging in size from 150 to 335 seats. More than 1,600 have been ordered by 100 customers. The aircraft company has recorded 328 sales this year.

Airbus Industrie is a four-company, four-nation consortium of Europe's leading aerospace companies. Partners in the consortium are Aerospatiale of France, Deutsche Airbus of Germany, British Aerospace of Great Britain and CASA of Spain.

North American customers include American Airlines, America West Airlines, Continental, Eastern, Northwest, Pan Am, TWA, Air Canada, Canadian International and leasing companies GATX AIR, International Lease Finance Corp. and Polaris Aircraft Leasing.

The Loudoun acquisition was made through Airbus Industrie of North America-Holdings.

WHITE PLAINS, N.Y. (OCT. 15) PR NEWSWIRE - IBM (NYSE: IBM) today announced a development and license agreement with Digitalk, Inc., developers of the Smalltalk/V line of object-oriented programming environments.

IBM has licensed Digitalk's Operating System/2 (OS/2) implementation of Smalltalk/V and future Digitalk offerings for prototyping and product development.

In addition, IBM and Digitalk will enhance Digitalk's products to meet evolving customer requirements for application development that complies with Systems Application Architecture (SAA), IBM's strategic platform for common features and functions across different hardware platforms.

"This agreement with Digitalk allows IBM to accelerate its use of object-oriented programming technology," said Earl F. Wheeler, IBM senior vice president and general manager, programming systems.

"Smalltalk/V provides a solid foundation for developing Common User Access (CUA)-compliant applications in SAA cooperative processing environments. Our work with Digitalk is one step in IBM's commitment to using object-oriented programming in our products and platforms," Wheeler said.

James C. Anderson, president of Digitalk, said, "We are delighted that IBM is using Smalltalk/V in product development. Digitalk will be working closely with IBM on enhancements to Smalltalk/V, including a set of visual programming tools, increased AD/Cycle integration, and SAA compliance. The resulting products will allow our customers to deliver applications more effectively than ever before."

Smalltalk is an object-oriented programming language and development environment that developed for IBM Personal Computers. Digitalk currently markets Smalltalk/V development environments worldwide for DOS, OS/2 and the Apple Macintosh, with a Microsoft Windows 3.0 version planned.

Note: Smalltalk/V is a registered trademark of Digitalk, Inc. Operating System/2, OS/2, Systems Application Architecture, SAA and AD/Cycle are trademarks or registered trademarks of International Business Machines Corporation.

Macintosh is a registered trademark of Apple Computer, Inc. Microsoft and Microsoft Windows are trademarks of Microsoft Corporation.

#90288p4789 10/15/1990 ~PR Newswire

DEARBORN, MI (OCT. 15) PR NEWSWIRE - Future growth in transportation electronics will be significant, but only in areas where electronics enhances value in the eyes of the ultimate customer, according to Jeffrey L. Bauman, general manager of Automotive Electronics for Rockwell International Corp.'s Automotive Operations based in Troy, Mich.

"No longer are vehicle and component manufacturers looking at electronics just for the sake of having the latest technology," he said at the Rockwell exhibit at Convergence '90, the International Congress & Exposition on Transportation Electronics held here.

"Today, the industry is focusing on those key areas where electronics provides value from the end-user's perspective - where they can reduce operating costs, increase safety or convenience, and enhance reliability, for example," he said. These market forces, according to Bauman, are the driving forces behind the development efforts of Rockwell's Automotive Electronics group.

Parlaying the electronics experience gained through its worldwide industrial automation, avionics, telecommunications, defense, on-board computer management systems and satellite communications businesses, Rockwell provides a broad-based, coordinated and diverse electronics portfolio to the automotive trucking and transit industries.

"We've demonstrated our ability around the globe to produce reliable, cost-effective electronics - from integrated circuits to inertial navigation systems - but the real age of electronics is before us: implementing these and other technologies in passenger cars and commercial vehicles."

He stressed that great application potential lies in the heavy-duty trucking industry, where Rockwell is a major force - supplying some $1 billion in axles brakes, drivelines, clutches, transmissions, Tripmaster, on-board computers, and Rockwell WABCO anti-lock brakes to original equipment manufacturers (OEMs) and truck operators each year.

Rockwell Automotive also produces over five million motors annually for automotive electric windows, as well as plastic body panels for numerous car and truck makers around the world, providing a solid foundation for future vehicle electronics integration.

"Real-time satellite communications and vehicle location determination are topical today. Though many consider these to be 'new' technology, Rockwell has already generated over a billion sales dollars in the Global Positioning System (GPS) arena and has announced plans to provide a Mobile Communication Satellite System for North American truck operators," Bauman said.

BEDFORD, MASS. (OCT. 15) PR NEWSWIRE - Atex Color Imaging Systems, a unit of Atex Publishing Systems, the leading supplier of computer- aided publishing systems with installations in more than 750 newspapers worldwide, today announced the release of ColorPort, an Apple Macintosh utility program for professional color publishing users.

Announcement was made at the European trade show IFRA Expo '90 being held in Barcelona this week.

"ColorPort is designed to allow the interchange of color data between many popular desktop color applications or low-cost imaging workstation products and high-end color systems available from companies like Scitex," said Gary Moore, vice president of Atex Color Imaging Systems.

Creating Interfaces to Proprietary Environments Benefits Industry Commenting on the announcement of ColorPort, Bob Caspe, president of Leaf Systems, Natick Mass., said, "This further capability to open up interfaces to previously proprietary environments can only benefit the industry and, in our case, speed the acceptance of a new generation of picture desk products."

ColorPort is a versatile product that accepts industry standard TIFF format color images created in applications like Quark Xpress or Letraset ColorStudio and route them to a Scitex system after translation. ColorPort also accepts encapsulated PostScript files from applications like Aldus Freehand or Adobe Illustrator 88 and converts them into the appropriate line art format.

The new Atex utility operates in an on-line environment and is capable of extremely fast conversions and data transfers. Said Moore, "Users have previously had to make equipment and software investments of more than $100,000 to achieve anything approaching these capabilities. We can now bring them a demonstrably superior solution at half the cost. "We believe that this product is another giant step forward toward integrating the capabilities of the rapidly evolving color desktop packages with industrial-strength color systems," Moore added.

Moore noted that photo editors today are experimenting with the many new

applications in the marketplace in order to electronically manipulate photos before passing them off to production for final pagination.

"This gives the editor maximum control over photo quality and content while exploiting the flexibility available from desktop image processing programs," Moore said. "Furthermore, it brings closer the opportunity for fully digital management, retrieval, and storage of news photos, whether produced locally or originated by wire services." A problem, Moore pointed out, has been, "How do you deliver these desktop-enhanced photos into high-end production systems inexpensively? The answer is ColorPort, which provides an independent, inexpensive, direct link into such systems," Moore said.

#90288p4800 10/15/1990 ~PR Newswire

CHINO, Calif. (OCT. 15) PR NEWSWIRE - American Confectionery Corp. (NASDAQ: CNDY) (ACC) headquartered here, today announced that, for the fiscal year ended June 30, 1990, the company had net revenues of $19,879,648 from continuing operations, a 22 percent gain on the $16,228,323 recorded in fiscal 1989.

However, due primarily to several non-recurring factors, the company sustained a net loss in fiscal 1990 of $4,030,517, or $.77 per share. This compares with a net profit of $958,128, or $.21 per share, for the previous year.

According to American Confectionery Corp. President Steve Kircher, the company's 1990 performance was adversely affected by $1 million in compensation granted in the form of warrants and options to certain individuals acting as guarantors for letters of credit; $630,000 from manufacturing inefficiencies related to a major consolidation of operations; $1 million in selling, general and administrative expenses associated with the acquisition, operation and recently announced divestiture of the company's retail divisions; and a $1.4 million loss from these discontinued operations.

Kircher said he believed his company had now entered a period wherein a concerted focus on manufacturing and distribution, both to the divested retail stores and through mass merchandisers, of the company's sugar-free gourmet chocolate and Pacific Nut product lines, would yield "an impressive turnaround" over ACC's performance in 1990.

American Confectionery is a manufacturer and distributor of gourmet treats, including nuts, candies and chocolates.

BARCELONA (OCT. 15) PR NEWSWIRE - Atex Publishing Systems, the leading supplier of computer-aided publishing systems with installations in more than 1,000 newspapers and magazines worldwide, today announced it has signed a letter of intent to market Neasi-Weber International's ADMARC advertising management and accounts receivable system outside of the United States and Canada.

Announcement was made at the European trade show IFRA Expo '90 being held in Barcelona this week.

"The addition of ADMARC extends Atex's international advertising product portfolio to include the premier billing, accounts receivable, and MIS package available today," said Harland K. LaVigne, president, Worldwide Distribution.

"Under this agreement, Atex would act strictly as the sales agent for ADMARC in the international marketplace, except for North America," he added.

"We see this as a prime opportunity, not only for Neasi-Weber and Atex, but for the potential customer, as well, who will benefit significantly from the integration of advertising management and advertising production systems," said Dennis Neasi, chief executive officer of Neasi-Weber International.

ADMARC is a user-defined and fully integrated business management information system that links each step in the ad-publishing cycle, from order entry to accounts receivable. ADMARC handles all aspects of ad processing, from reserving advertising space, pricing the ads, and billing them correctly, to reporting on the information for business and marketing analysis.

Installed at more than 65 worldwide publishing operations --- including, in the United States, eight of the top 10 daily newspapers, 25 of the top 50 metropolitan dailies, and one-third of the top 100 magazines --- ADMARC operates in the IBM 370 and AS/400, as well as the DEC MicroVAX and VAX, and Unisys environments.

"Atex initially will be targeting English-speaking areas in its sales effort," LaVigne said. Those areas will include the United Kingdom, Australia, New Zealand, and English publications of the Pacific Rim.

Neasi-Weber will provide pre- and post-sales support, manufacturing and shipping, installation, and training.

DALLAS (OCT. 15) PR NEWSWIRE - NCNB Mortgage Corporation (NYSE: NCB), Dallas, and Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) today announced an agreement to provide financing for $1.5 billion of home mortgages.

The transaction is the largest ever done by Fannie Mae with a Texas-based lender.

A variety of mortgage products, including 15-year and 30-year fixed-rate loans and 7-year balloon mortgages, will be originated by NCNB Mortgage in Florida, Maryland, North Carolina, South Carolina, Texas, and Virginia. The company also will target a portion of the financing to low- and moderate-income buyers in those states under Fannie Mae's Community Home Buyer's Program (CHBP).

CHBP includes comprehensive buyer education and more flexible qualifications that make it easier for lower-income families to qualify for a home mortgage.

Judy Dedmon, senior vice president of Fannie Mae's Southwestern Regional Office located here, said: "This agreement demonstrates the commitment of NCNB Mortgage to provide affordable mortgage financing to the communities it serves. We are pleased they have chosen Fannie Mae as a partner."

Warren O. Dinkins, NCNB Mortgage's senior vice president, secondary marketing, said: "We at NCNB Mortgage recognized an opportunity to lock in for our mortgage customers flexibilities and advantages available today, but likely to tighten in the near future. We are proud to combine our strength as a

leading producer of residential mortgages in our six-state, retail lending territory with Fannie Mae's stability and leadership as a guarantor in the mortgage-backed securities market."

The majority of the mortgages originated under the agreement, which provides for mandatory delivery of the loans, will be exchanged for Mortgage-Backed Securities issued by Fannie Mae; the remainder will be sold to Fannie Mae for cash.

NCNB Mortgage Corporation is an affiliate of NCNB Corporation, Charlotte, N.C. the seventh largest bank holding company in the country, with $63.7 billion in assets and more than 900 branches in seven states.

Fannie Mae, the USA's Housing Partner, is a congressionally chartered, shareholder-owned company and the nation's largest investor in home mortgages.

SAN JOSE, Calif. (OCT. 15) PR NEWSWIRE - Mentor Graphics Corp. (NASDAQ: MENT) today announced that the U.S. Navy placed a $1.2 million order for Board Station(R) printed-circuit design systems and AutoTherm(TM) thermal analysis software. The tools will be used to update existing systems, and to support contract Navy programs managed at the Naval Avionics Center in Indianapolis.

"The Navy's technical specifications were very challenging to meet," said Russell F. Henke, general manager of Mentor Graphics' PCB Division. "Several vendors, including Intergraph, participated in the evaluation. Mentor Graphics won by providing the highest-performance solutions at the best price."

Board Station is a comprehensive, flexible system for printed-circuit design and analysis. The system includes an integrated set of applications from schematic capture through placement, routing and thermal analysis, to outputs to manufacturing and drawing generation. It can operate in an integrated Mentor Graphics design environment or independently, accepting netlist information from other vendors' systems.

AutoTherm is a very fast and accurate finite-element-based tool for PCB thermal analysis. It enables engineers to explore the thermal behavior of design alternatives before finalizing a physical design. Mentor Graphics provides a common set of component models for AutoTherm and Board Station, and the two systems can exchange component placement and board outline information automatically.

Mentor Graphics Corp., Beaverton, Ore., was established in 1981 to design, manufacture, market and service electronic design automation (EDA) systems.

The company is the leader in worldwide EDA sales, with revenues of $442,598,000 over the last 12 months, as restated to reflect the merger with Silicon Compiler Systems Corp. The company currently employs more than 2,500 people. In addition to its corporate offices in Beaverton, Mentor Graphics has sales and support offices in 51 locations worldwide. The company headquarters are located at 8500 S.W. Creekside Place, Beaverton, OR 97005.

CHICAGO (OCT. 15) PR NEWSWIRE - Duff & Phelps today lowered its ratings on The Travelers Corporation's (NYSE: TIC) senior debt from 'AA' (Double-A) to 'A' (Single-A), subordinated debt from 'AA-' (Double-A- Minus) to 'A-' (Single-A-Minus), and commercial paper from Duff 1+ to Duff 1. The Massachusetts Company's senior debt rating has been lowered from 'AA' (Double-A) to 'A' (Single-A). Duff & Phelps has also lowered its claims paying ability rating on The Travelers Insurance Company from 'AAA' (Triple-A) to 'AA-.' These rating actions were required due to Travelers' recent decision to increase reserves for continuing real estate and mortgage loan problems.

"The Travelers Corporation had decided to increase its loss reserve by $650 million for underperforming assets in its real estate and mortgage loan portfolio. The reserve addition was necessary as a result of worsening economic conditions in the mortgage loan and real estate markets and the resulting likelihood that non-performing real estate and mortgage loan assets will increase over the next several years," said a D&P spokesman.

The Travelers Corporation's mortgage and real estate portfolio totaled just under $17 billion on June 30, 1990. Loss reserves for underperforming real estate and mortgage loans totaled $538 million on June 30, 1990, and are expected to increase to approximately $1.1 billion with the recently announced addition. "The additional reserves will add a significant level of capacity to absorb future real estate and mortgage loan losses and Travelers' decision to reduce common stockholder dividends by $200 million annually will help cash flow.

However, the loss of income from underperforming real estate and mortgage loan assets, in conjunction with the continued capital needs to pursue core business strategies to support growth, have decreased the Travelers' financial flexibility," he continued .

GERMANTOWN, MD (OCT. 15) PR NEWSWIRE - Microlog Corporation (NASDAQ-NMS: MLOG) announced that a purchase agreement has been approved by the boards of directors of Microlog and Genesis Electronics Corporation wherein Microlog will acquire privately-held Genesis for 675,000 shares of Microlog common stock and $500,000 in cash less certain adjustments.

The acquisition is expected to be finalized before Dec. 31, 1990, subject to approval of the transaction in a California state fairness hearing and satisfaction of various conditions to closing.

California-based Genesis, founded in July 1983, manufactures and markets voice mail systems and software for small- and medium-size organizations through a large network of distributors. Sales in the fiscal year ended June 30, 1990, were in excess of $9.5 million as compared to Microlog's revenues of $15.5 million for its most recent fiscal year. In June of 1990, Genesis shipped its 4,000th voice mail system.

"The Genesis acquisition brings with it a strong, well established network of distributor relationships," commented J.G. Hartwell, chairman and CEO of Microlog. "This acquisition has the synergistic potential of expanding Microlog's distribution channel and enhancing Genesis' product line," concluded Hartwell.

"Microlog's microcomputer-based technology will allow Genesis to provide our distribution partners with a 'state-of-the-art' hardware platform to form the basis of our next generation CINDI product line. In addition, by incorporating Microlog's versatile software, our future product line will offer very comprehensive capabilities to service the growing voice processing market requirements beyond voice mail," said Gary S. Moskovitz, president and CEO of Genesis.

Microlog Corporation designs, assembles, markets, and services voice processing systems with a variety of applications. The company also provides, through its subsidiaries, Old Dominion Systems Incorporated of Maryland and Old Dominion Services, Inc., performance analysis and technical and administrative support services, primarily to a prime contractor to the U.S. Navy.

PLYMOUTH, Minn. (OCT. 15) PR NEWSWIRE - In Home Health, Inc. (NASDAQ: IHHI) announced that Raymond Roberts has been named vice president-Infusion Therapy and chief operating officer for In Home Health, Inc. effective immediately. Dr. Roberts' extensive pharmacy and management background in home infusion therapy will assist the company in adding this component to its existing base of business.

Dr. Roberts has over 10 years experience in home infusion, starting as the director of Pharmaceutical Services at Riverside Hospital in Jacksonville, Fla., later service as vice president of Support Services at Riverside Hospital. Most recently he was the corporate director of Pharmacy Services at

Kimberly Quality Care in Atlanta, Ga., and prior to that serves as the divisional director of Infusion Therapy Services in Jacksonville Beach, Fla. His experience in establishing new infusion offices in major metropolitan areas will be valuable in developing the model to be utilized throughout In Home Health's branch operations.

Dr. Roberts graduated from the University of Florida with a Doctor of Pharmacy. He is on the board of trustees of the American Pharmacy Association and a member of the coordinating committee for High Blood Pressure Education Program of the National Institute of Health in Washington, D.C.

Dr. Roberts currently lives in Jacksonville, Fla., with his wife Diane and his three children. He and his family will be relocating to the Minneapolis area in the near future.

Judy M. Figge, president and CEO, said, "We are excited to have Ray join the In Home team. His background in infusion pharmacy start ups, operations, sales, distribution and infusion reimbursement is exactly what we were looking for in this position. We feel his clinical background as a pharmacist will complement the strong nursing management currently in place."

In Home Health, Inc. provides quality home health care to people of all ages in their own homes. Home health care is currently a $12 billion industry in the United States and is expected to grow to $30 billion by the mid 1990s.

In Home Health, Inc. trades on NASDAQ/OMS: IHHI (common stock), IHHIU (1988 units), IHHIW (Class A Warrants), IHHIL (1990 units), IHHIZ (Class B Warrants) IHHIM (Class C Warrants).

NASSAU, BAHAMAS (OCT. 15) PR NEWSWIRE - British American Ins. Co. Ltd, Nassau Bahamas, announces that its has been informed that its 65 percent majority shareholder, Wilmington Trust Co. (NASDAQ-NMS: WILM), Trustee of the McMillen Trust, has obtained the approval of the Delaware Court of Chancery authorizing the Trustee to sell its 6.5 million British American shares to ITM International S.A. of Luxemburg for $40.8 million in cash and notes. The transaction is subject to a number of contingencies. It appears that the minority shareholders will not have the opportunity to sell their shares and will receive nothing from the transaction.

British American has also learned that the Trustee recently requested the Delaware Court of Chancery and was granted authority to vote the Trust's shares to remove and replace the current Directors of of British American. The Supreme Court of the Bahamas, however, has restrained the Trust from any

attempt to remove the Directors.

Since December 1987 when the Delaware Court authorized the Trustee to dispose of its 65 percent holding in British American, the Directors have persisted in efforts to convince the Trustee to engage in a transaction which would permit the minority shareholders to sell their share at the same time and on the same terms. A bidder for 100 percent of the shares was favored by the Directors but the Trustee did not request the Court to approve that bid. Instead, the Trustee requested and obtained Court approval of the ITM bid for the Trust Shares only.

On October 1, 1990 the Directors declared a dividend of $3 per share, payable to shareholders on October 12. On October 11, the Trustee sought and obtained an injunction in the Bahamas against the Directors paying the dividend. The directors will continue their efforts to have the dividend paid to all the shareholders on an equal and fair basis.

LOS ANGELES (OCT. 15) PR NEWSWIRE - Unocal Corporation (NYSE: UCL) today said that the board of directors elected Dennis P. Codon, 42, as corporate secretary, effective December 1.

Codon succeeds Robert O. Hedley, 65, who is retiring after more than 40 years with the company.

Codon is currently deputy general counsel. He joined the company in 1974 as a retail marketing representative. He held positions in the law department until being named to his current position earlier this year.

Codon has a bachelors' degree in political science from Brigham Young University and a juris doctor degree from Southwestern University School of Law. He is a member of the American and California bar associations, the executive committee of the Los Angeles County Bar Association-Corporate Tax Department Section, Maritime Law Association, American Corporate Counsel Association and the Institute for Corporate Counsel advisory committee.

Hedley joined the company in 1950 and held various positions in the auditing and accounting until he was named assistant corporate secretary in 1963. He was elected corporate secretary in 1972. He also served as trustee and secretary of the Unocal Foundation.

Hedley graduated with a bachelors' degree in business administration from the University of California, Los Angeles. He is a member of the American

Society of Corporate Secretaries and the Petroleum Investor Relations Association. He also serves as trustee of the Institute of International Education.

#90288p4845 10/15/1990 ~PR Newswire

RICHMOND, VA (OCT. 15) PR NEWSWIRE - Crestar Financial Corporation (NASDAQ-NMS: CRFC) reported $24.2 million in net income for the third quarter of 1990, compared with $26.6 million earned in the third quarter of 1989. Primary earnings per share were $0.76 compared with $0.83 in the third quarter of last year. Return on assets was 0.81 percent in the third quarter, return on equity was 12.35 percent and return on common equity was 12.74 percent.

For the first nine months, net income totaled $60.2 million compared with $76.4 million in the first nine months of 1989. Primary earnings per share were $1.87 versus the $2.42 earned in the same period last year. Results for the first nine months of this year include the impact of management's decision to strengthen Crestar's loan loss reserve by an additional $25 million during the second quarter. That decision reduced year-to-date earnings by approximately $16.4 million or $0.53 per share.

Net interest income increased 12 percent over the third quarter of 1989, reflecting a 13 percent increase in average earning assets. Earning asset growth was largely attributable to increases in investment securities and money market investments. The net interest margin for the third quarter was 4.12 percent compared with 4.25 percent in the third quarter of 1989 and reflects pressure from an industry-wide slowing in loan demand, a higher level of nonperforming assets, and strategic moves by management to improve liquidity.

Noninterest income of $41.3 million in the third quarter increased 5 percent

over the same period in 1989. Securities gains were $3.4 million higher than in the prior year's third quarter, but income from nonrecurring items was $2.9 million lower. Excluding those items, noninterest income increased 4 percent over the same period last year. Noninterest expense growth was 4 percent for the quarter and 5 percent for the first nine months of the year.

The third quarter loan loss provision was $19.7 million compared with the $10.2 million taken in the third quarter of 1989. Net charge-offs totaled $15.3 million or .79 percent of average loans compared with $10.1 million or .53 percent of average loans in the same period last year. Nonperforming assets, which consist of $116.4 million of nonperforming loans and $17.0 million of other real estate owned, rose to $133.4 million or 1.68 percent of loans and foreclosed properties from $119.1 million or 1.52 percent of loans and foreclosed properties at June 30, 1990. The allowance for loan losses was increased during the quarter to $127.7 million, which was equivalent to 1.61 percent of loans and 96 percent of nonperforming assets at September 30, 1990.

Crestar Financial Corporation is the holding company for three banks with 270 banking offices in Virginia, Maryland and the District of Columbia. Other subsidiaries provide insurance, brokerage, mortgage banking, leasing and investment advisory services. At September 30, 1990, Crestar has total assets of $12.7 billion and total deposits of $8.6 billion.

#90288p4849 10/15/1990 ~PR Newswire

HOLLAND, Mich. (OCT. 15) PR NEWSWIRE - Donnelly Corporation (AMEX: DON) today reported financial results for the first quarter of the 1991 fiscal year.

Net sales for the first quarter were $58,447,000 which represents an increase of 30.7 percent over $44,730,000 for the same period last year. Net income for the first quarter was $1,646,000, compared to a loss of ($1,347,000) during the first quarter of the 1990 fiscal year. Earnings per share for the first quarter were $.29, compared to a loss per share of ($.24) in the same quarter last year.

Performance during this quarter of fiscal 1991 represents a record first quarter for both sales and earnings.

Sales increased significantly, primarily due to the sale of new products to the automotive market. Vehicle production was up slightly (about 2.5 percent) during the quarter, compared to the same period last year. In addition, Donnelly expanded sales of automotive modular window units, "added feature mirrors" and complete exterior mirrors. The company also experienced

increased sales of coated glass products for the electronics market and information display market.

Earnings increased significantly during the first quarter as well. This was primarily due to the increased sales volumes and improved manufacturing operations.

Chairman and President J. Dwane Baumgardner, stated: "We are very pleased to report that the 1990/91 fiscal year is getting off to a strong start. Our 1989/90 fiscal year was a very difficult one because we experienced major downturns in both our automotive and coated products markets. During the past year, the company took actions to improve operations and reduce costs. Now that the business environment has improved somewhat, significant improvements are also being realized in the financial performance of the company.

"Although we have a solid start, there are uncertainties in the year ahead. Donnelly is faced with the same concerns that affect all Americans ... the threat of conflict in the Middle East, concern over rising energy costs, and the possibhility of an economic recession. Negative developments in these areas would also have a negative effect on many businesses such as ours.

"A rapidly changing environment is not new for Donnelly. We are confident in our flexibility in dealing with change and remain cautiously optimistic for the year ahead."

Donnelly has been experiencing rapid growth in a number of new automotive product areas which contributed to first-quarter performance.

Modular window units have rapidly been growing in popularity with automakers because pre-construction of individual window components (glass, trim, seals, and attachment studs) produces a product which is of higher quality, more competitively priced, and offers greater design freedom than conventional windows. Added feature mirrors are also gaining rapidly in popularity since they integrate electronic features into the interior mirror assembly (such as lights or lights and compass) which add function and improve safety for the driver.

Donnelly also recently completed a three-year, start-up program for the manufacturing of complete exterior mirror assemblies for Honda of America. These mirrors are very complex and meet some of the highest automotive quality standards in the world. This manufacturing operation is located in Grand Haven, Mich., and had been experiencing planned losses throughout most of the three-year, start-up plan. This operation is now contributing to overall corporate profitability.

Donnelly Corporation is an international company dedicated to serving customers around the world with high-quality fabricated, molded, and coated glass products for the transportation and electronics markets. The company

has been based in Holland, Mich., since 1905 and today operates from 12 separate facilities in western Michigan. In addition, Donnelly has a major manufacturing facility in Naas, Ireland, marketing liaison offices in Tokyo and in Detroit, an Advanced Technology Center in Tucson, Ariz., and a manufacturing facility (in conjunction with Asahi Glass of Japan) in Mount Pleasant, Tenn. Donnelly is also recognized as a leader in the application of participative management practices.

CINCINNATI (OCT. 15) PR NEWSWIRE - The Penn Central Corporation (NYSE: PC) announced that it is discussing with American Financial Corporation (AFC) the potential purchase by Penn Central of AFC's non-standard automobile insurance group for approximately $408 million. The group consists of Atlanta Casualty Company, Windsor Insurance Company and Stonewall Insurance Company and their respective subsidiaries.

Completion of a transaction would be subject to certain conditions, including approval by a special committee of Penn Central directors appointed to review the proposed purchase, receipt by Penn Central of an appropriate fairness opinion from an investment banking firm and any required regulatory approvals.

AFC owns 41.6 percent of Penn Central's common shares and AFC's principal shareholder, Carl H. Lindner, is chairman of the board and chief executive officer of Penn Central.

AFC's non-standard automobile insurance group had net premiums earned of $328.0 million and net income of $31.3 million for 1989. Estimated net premiums earned and net income for the first nine months of 1990 were $320 million and $25 million, respectively. The group had estimated total shareholders' equity of $207 million at Sept. 30, 1990.

Penn Central operates businesses primarily in the areas of industrial manufacturing, defense services, insurance and energy.

ST. PAUL, MN (OCT. 15) PR NEWSWIRE - Pentair, Inc. (NASDAQ: PNTA), the St. Paul-based manufacturer of industrial products and paper, today reported net income of $9.5 million, or 71 cents per fully diluted share, on net sales of $300.7 million for the three months ended Sept. 30, 1990. This represents a 19 percent gain over third quarter 1989 net income of $8.0 million, or 63 cents per fully diluted share, on net sales of $300.1 million.

In the Paper Group, sales in the premium paper markets, including recycled-fiber papers, helped boost operating income 61 percent above third quarter 1989 levels. Businesses in the Industrial Products Group maintained earnings at 1989 third quarter levels, despite softer demand in some markets.

"Pentair's performance has improved steadily since the beginning of the year," said D. Eugene Nugent, Pentair chairman and chief executive officer. "This improvement speaks well for the enhanced competitiveness of our businesses that enable them to perform satisfactorily under less- than-ideal market conditions. Though we're concerned about the obvious weakness of the national economy, we expect our businesses will be able to achieve good earnings in the months ahead."

Pentair, Inc. is a St. Paul, Minn.-based company comprised of 10 businesses which manufacture woodworking equipment, electric power tools, sporting ammunition, electrical enclosures, automotive service equipment, industrial lubrication systems, material dispensing equipment, pumps and paper.

MOUNT PROSPECT, ILL. (OCT. 15) PR NEWSWIRE - The U.S. Air Force Standard Systems Center at Gunter Air Force Base, Ala., has announced that Zenith Data Systems (ZDS) is the apparent winner of its Standard Software Requirements Contract I, which has an estimated value of $21.9 million. The Air Force plans to award this contract in early November, pending pre-award approval.

A Groupe Bull company, ZDS is expected to supply more than 300,000 software upgrades for use with desktop and laptop microcomputers that were purchased by the Air Force, Navy, Army and Defense Logistics Agency under Department of Defense (DOD) standard "requirements" contracts.

Under the terms of the new three-year contract, ZDS will provide the latest versions of 19 commercially available software packages, including MS-DOS 4.0, Microsoft Windows 3.0, Enable 4.0 and dBase 4.0.

"By offering the most up-to-date software versions, this contract will allow us to extend the effectiveness of the many personal computers in use by the DOD, including the more than 500,000 systems ZDS has supplied," said Charlie Blandford, ZDS vice president of market development, Federal Systems. "We're excited about this contract because it will allow us to maintain our longstanding relationship with the Air Force and other DOD agencies through a new requirements contract."

To assist users with software-related advice, ZDS will establish a technical support center in Montgomery, Ala., which can be accessed toll-free by customers worldwide.

ZDS is a leading manufacturer and marketer of portable and desktop microcomputers and monitors for single- and multi-user applications. With headquarters in Mount Prospect, and principal assembly operations in St. Joseph, Mich., ZDS has manufacturing and sales facilities in more than 30 countries. ZDS' Federal Systems office is in Vienna, Va., and marketing

support offices are located in Montgomery; Heidelburg, Germany; and Seoul, South Korea.

#90288p4865 10/15/1990 ~PR Newswire

DETROIT (OCT. 15) PR NEWSWIRE - Federal Screw Works (OTC: FSCR) reported net sales of $15,091,000 for the quarter ended Sept. 30, 1990, compared to net sales of $14,753,000 for the quarter ended Sept. 30, 1989. The company's earnings for the quarter ended Sept. 30, 1990, were $360,000, or $.31 per share, compared to net earnings of $545,000, or $.46 per share, for the same quarter of the prior year.

While sales were slightly higher in the quarter just ended than in the same quarter of the previous year, manufacturing activity was much lower, resulting in the reduced earnings. However, a significant reduction in inventories was accomplished. New manufacturing programs scheduled for the second half of the fiscal year should buffer the effect of a possible reduction in automobile sales.

LOWELL, ARK. (OCT. 15) PR NEWSWIRE - J. B. Hunt Transport Services, Inc. (NASDAQ-NMS: JBHT) announced today revenues and earnings for the third quarter ended Sept. 30, 1990.

Consolidated revenues for the third quarter increased 5 percent to $142.3 million, compared with $135.2 million for the corresponding period in 1989. Net earnings amounted to $8.7 million, or 37 cents per share, compared with $9.4 million or 40 cents per share for the corresponding quarter a year ago. Earnings per share are based on 23,554,823 and 23,628,543 weighted average number of common shares outstanding, respectively.

For the nine months ended Sept. 30, 1990, revenues increased 11 percent to $420.5 million from $377.2 million in the first nine months of 1989. Net earnings amounted to $23.3 million (99 cents per share) compared with $22.3 million (94 cents per share). Earnings per share for 1990 and 1989 are based on 23,614,406 and 23,614,354 weighted average number of common shares outstanding, respectively.

Third quarter results reflect price increases due to a revenue surcharge in

response to higher fuel cost resulting from the crisis in the Persian Gulf. Equipment utilization was negatively impacted by the continuing industrywide driver shortage.

#90288p4867 10/15/1990 ~PR Newswire

CAMBRIDGE, MASS. (OCT. 15) PR NEWSWIRE - Polaroid Corporation (NYSE: PRD) today reported that worldwide sales for third quarter of 1990 increased 6 percent to $463.7 million, compared with $437.7 million in the 1989 third quarter.

Net earnings for the quarter increased 5 percent to $31.3 million, compared with $29.9 million for the same period last year. After deducting dividends on preferred stock in the quarter, primary earnings per common share were 42 cents, compared with 40 cents per common share for the third quarter of the prior year.

In the 1990 third quarter, U.S. sales were down 6 percent, while international sales, aided in part by the weaker U.S. dollar, increased by 27 percent. Despite the weakening U.S. economy, strong international sales, particularly in Europe, contributed to the overall sales increase. Worldwide unit sales

of cameras, instant film, conventional film, and videotape all increased in the period compared to last year's results.

Higher unit sales for the quarter and the weakening of the U.S. dollar contributed to increased margins, but these were more than offet by substantially higher marketing expenses, resulting in a 5 percent decrease in operating profit. Profit before taxes, however, increased due to lower interest expense.

I. MacAllister Booth, president and chief executive officer of Polaroid, said, "While we continue to contain administrative overhead costs, and strive to maximize efficiency and productivity throughout the company, we remain committed to making the marketing, product development, and capital expenditures necessary to support sales and to secure our competitive position in the growing imaging marketplace of the future. Our third quarter earnings reflect these investments."

"For the full year, we continue to expect, as we indictated at the end of the second quarter, that operating profits will be flat to moderately down from last year's levels, reflecting the uncertainties of the U.S. business climate and continued investments in product development. For succeeding years, it has become clear that in light of our experiences in the marketplace together with rapidly changing economic conditions, earlier public financial predictions are no longer valid and should be disregarded," Booth stated.

Polaroid Corporation, with sales of almost $2 billion, is the worldwide leader in instant imaging. The company supplies instant photography, cameras and films, conventional films, video tapes and electronic visual communication products to family, business, and technical and industrial markets.

HOUSTON (OCT. 15) PR NEWSWIRE - Powell Industries Inc. (NASDAQ: POWL) announced today that its wholly-owned subsidiary, U.S. Turbine Corp., has signed an agreement with the Gas Turbine Division of Ishikawajima-Harima Heavy Industries Co., Ltd. of Japan to package IHI's LM1600, LM2500, LM5000 and LM6000 packages in the United States at the U.S. Turbine facility in Maineville, Ohio for North American customers. Under this arrangement, IHI continues to maintain prime contractor responsibilities for projects and U.S. Turbine will be a subcontractor. The agreement not only includes the packaging of these engines under IHI design, but will also include marketing assistance and after sales support activities by U.S. Turbine under IHI direction.

All of the innovative and original equipment design aspects of IHI packages, as well as all of the special technical and cost efficient features which set the IHI packages of General Electric LM engines apart, will be retained. U.S. Turbine brings to this arrangement its expertise in sales and technical support, factory testing, training, and experienced start-up support, all out of U.S. facilities.

This new relationship will make IHI a more comptetitive and efficient supplier of Genral Electric's aero-derivative power packages. Interested parties should contact either of the following individuals:

LOS ANGELES (OCT. 15) PR NEWSWIRE - Occidental Petroleum Corporation today announced that it had signed a production sharing agreement to explore the 674,000 acre Al-Oqlah(S2) block in the Shabwah area of the Yemen Republic. Occidental has agreed to conduct a seismic program and drill four exploratory wells during the initial two-year exploratory period.

In announcing the new contracts, Dr. Armand Hammer, chairman and chief executive officer of Occidental, said, "Occidental is fortunate to acquire a major acreage position in this developing oil basin where blocks have just recently been offered for international bid. The S2 block was our first choice. It is on trend with the giant Alif field discovered by Hunt Oil Company in 1984 and contains several promising structures."

Occidental is the operator with a 100 percent interest.

WASHINGTON (OCT. 15) PR NEWSWIRE - Consumers who travel frequently can now make long distance calls directly to their home more economically and conveniently with their own Personal 800 number, MCI Communications Corporation (NASDAQ-NMS: MCIC) today announced.

Beginning Oct. 22, MCI's Personal 800 service will allow consumers to receive calls directly to their homes for a single, low flat per-minute rate, regardless of the distance of the calls or number of calls made.

"Residential telephone users now have all of the conveniences that have long been available to businesses," according to Wayne Gattinella, MCI vice president of consumer services.

"Calling home from the road or having far away family and friends be able to call you using an 800 number makes keeping in touch easier and affordable. Calls can be made from any telephone or payphone anywhere in the country without the need for complex dialing or coins," added Gattinella.

Personal 800, offered as an enhancement to MCI's PrimeTime calling plan, allows consumers the most economical long distance calling to their homes from anywhere in the United States, Alaska and Hawaii for just $2 per month on weeknights and all weekend. All 800 calls made during plan hours are priced at PrimeTime's low rate of $6.50 per hour (10.8 cents per minute).

Personal 800 calls made during non-PrimeTime plan hours are priced at 25 cents per minute. Consumers automatically receive the PrimeTime 10 percent bonus discount, which applies to all 800 calls made during non-plan hours.

Introduced in May 1989, MCI's PrimeTime service permits consumers to use and pay for long distance service by the hour during convenient times when they most often make their calls. Plan hours are 5 p.m. to 8 a.m. weeknights, 24 hours on Saturday, and on Sundays until 5 p.m. and from 11 p.m. to 8 a.m. Monday.

For consumers who want only 800 service, MCI also offers Personal 800 service separately. Consumers can take advantage of MCI's service without having to switch their long distance carrier. Calls are priced at a flat 25 cents per minute and consumers pay a low, monthly charge of $5.

No call surcharges, installation or subscription fees will be charged for either version of the service, according to the company.

Consumers who purchase the new service will be issued an 800 number and 4-digit private security code. To place a call, consumers need only dial their 800 number, wait for a tone prompt, and enter their 4-digit code for the call to be connected.

A special toll-free customer service number, 1-800-373-7184, will be available on Oct. 22 to handle customer inquiries and services orders, according to MCI.

LOWELL, ARK. (OCT. 15) PR NEWSWIRE - J. B. Hunt Transport Services, Inc.

(NASDAQ-NMS: JBHT), today announced that the company has extended the repurchasing of its outstanding shares of common stock, $.01 par value by an additional 500,000 shares. The company had previously announced its intention to buy back an initial 500,000 shares of which approximately 450,000 shares have been obtained.

The company continues to believe that the repurchase of shares is an attractive investment and a prudent use of the company's financial resources. The company intends to hold the shares in treasury to be used for general corporate purposes, which may include acquisitions, employee stock options, and restricted stock awards.

#90288p4888 10/15/1990 ~PR Newswire

ST. PETERSBURG, FL (OCT. 15) PR NEWSWIRE - Templeton Global Income Fund, Inc. (NYSE: GIM) today issued the following manager's report:

World financial markets in September reflected the continuing uncertainty surrounding developments in the Middle East. Bond markets have responded to intensified inflationary expectations and interest rates have either remained

relatively high or are continuing to rise. Rates in Germany and Japan are being pushed up by strong economic growth and, in the case of Germany, the cost of financing reunification. Interest rates in the United States have remained in a relatively narrow range, refusing to rise appreciably despite higher inflation reports. Corporate spreads have widened in the face of mounting evidence indicating a slowdown in business activity.

Templeton Global Income Fund generally became more defensive, selling longer dated bonds in several markets. In the U.S., Resolution Trust Corp. zero coupon bonds and some longer dated corporates were sold. The Canada position increased modestly and remains predominantly short-term in maturity, where the spreads over the U.S. are the most attractive. A small position was added in the Yen.

Longer dated bonds denominated in the European Currency Unit were sold in favor of shorter dated French government bonds for a modest yield pickup. The seven year bonds in Italy were sold to buy Italian governments with a three year put as well as governments that float at a premium over treasury bills. Additional bonds were purchased in Denmark to take advantage of the very high real yields available in that market.

GIM continues to emphasize quality, with investment grade securities constituting 97 percent of the portfolio. The remaining 3 percent consists mostly of dollar pay debt of Mexico, where the principal is effectively guaranteed by the U.S. Treasury zero coupon bonds.

NORWALK, CT (OCT. 15) PR NEWSWIRE - United States Surgical Corporation (NYSE: USS) reported today that it achieved record sales and record earnings for the third quarter of 1990. Sales increased 58 percent to $134.9 million versus $85.6 million in the comparable 1989 quarter. Net income rose 67 percent to $12.4 million and net income per share rose 52 percent to $.47 per share over the comparable quarter.

For the nine months ended Sept. 30, 1990, sales rose 43 percent to $360 million versus $251.3 million in the comparable 1989 period. Net income rose 37 percent to $31.4 million or $1.23 per share, compared with $22.9 million or $.99 per share in the 1989 period, excluding the 1989 special items, net income would have been $20.6 million or $.89 per share.

Leon C. Hirsch, chairman, stated that, "Accelerating worldwide usage of USSC's core surgical stapling products, coupled with the dynamic growth of laparoscopic gallbladder surgery, has fueled record sales and earnings for the third quarter and nine month period."

United States Surgical Corporation is the world's largest manufacturer and marketer of surgical staplers.

GRAND RAPIDS, MI (OCT. 15) PR NEWSWIRE - Guardsman Products, Inc. (NYSE: GPI) today announced net income and sales for the quarter ended Sept. 30, 1990.

Net income was $367,000 or $.05 per share in the third quarter of 1990 compared to $1,997,000 or $.28 per share in 1989. Sales for the third quarter increased to $48,893,000.

Net income for the first nine months of 1990 amounted to $2,968,000 or $.41 per share and sales were $144,777,000 compared to $143,426,000 in 1989.

GUARDSMAN PRODUCTS, INC.

Quarter Ended Sept. 30	1990	1989
Sales	$ 48,893,000	$ 48,195,000
Net income	367,000	1,997,000
Per share net income (a)	$.05	$.28

Nine Months Ended Sept. 30	1990	1989
Sales	$144,777,000	$143,426,000
Net income	2,968,000	5,455,000
Per share net income (a)	$.41	$.78

(a) - Based on 7,310,494 shares for the quarter and 7,294,392 shares for the nine months in 1990; and 7,208,099 shares for the quarter and 7,059,098 shares for the nine months in 1989.

Charles E. Bennett, president and chief operating officer of Guardsman, stated that "our disappointing third-quarter results are reflective of business conditions in the industries served by our Coatings Group and weakness in the markets for the resin products which are manufactured by our Canadian subsidiary. In addition, our earnings continued to be affected by start-up costs associated with expansion into the merchant resin and Solidex businesses."

Guardsman Products, Inc. is a diversified producer of custom industrial coatings, consumer products, and packaging services.

#90288p4900 10/15/1990 ~PR Newswire

AUGUSTA, GA. (OCT. 15) PR NEWSWIRE - Bankers First Corp. (NASDAQ-NMS: BNKF) today announced the signing of a letter of intent to sell 100 percent of the common stock of Athens Federal Savings Bank to Synovus Financial Corp. (NYSE: SNV).

Under the terms of the letter agreement, the sale would be valued at approximately $34 million as of Sept. 30. The sales price will be adjusted for 100 percent of earnings retained through May 31, 1991, and thereafter, 50 percent of earnings to closing. The parties currently expect the purchase price would be approximately $36 million. Sales proceeds to Bankers First will be $20 million in cash with the balance in the form of Synovus common stock. Based on Oct. 12, closing price, Bankers First would receive approximately 1 million shares of Synovus common stock. The actual number of shares will be based on the average closing price of Synovus common stock for a 20-day measurement period preceding closing of the transaction. Under the terms of the agreement, Bankers First must convert Athens Federal to a commercial bank prior to closing.

H.M. Osteen Jr., chairman and chief executive officer of Bankers First Corp., explained the Bankers First strategy: "This sale will create a very highly capitalized institution. Our board feels that the market has always rewarded companies that have tangible capital substantially in excess of industry norms and requirements, and will continue to do so in the future. By realizing this value through the sale of Athens Federal, benefits will ultimately flow to our shareholders. This strategy will position Bankers First to meet the challenges and take advantage of the opportunities in this era of monumental change in the financial services industry."

USE OF PROCEEDS The company intends to deploy the proceeds of the sale in a number of beneficial ways to increase shareholder value, including:

-- Repurchase of up to 25 percent of Bankers First outstanding common stock;
-- Recapitalization of the company's thrift subsidiaries at capital levels in excess of federal and state requirements;
-- Use of additional resources for the reduction of non-performing assets;
-- Franchise enhancement in selected markets, including Augusta and Savannah, Ga., and Chattanooga, Tenn.

BALANCE SHEET RESTRUCTURING As a result of this transaction, the pro forma Bankers First balance sheet at Sept. 30, 1990, would be significantly restructured through:

-- An increase in tangible equity to assets from 4.3 percent to approximately 6.9 percent
-- An increase in tangible equity of approximately $5 million
-- A reduction of goodwill by more than $15 million
-- A reduction in stated equity of approximately $10 million from recognition of loss on the sale and income tax expense related to the charter conversion and capital gains taxes
-- A reduction of more than $390 million in loans and $400 million in deposits.

The sale and final definitive agreement must be approved by the boards of directors of Bankers First and Synovus and by regulatory authorities.

Bankers First Corp. is a financial services company principally serving the Augusta, Athens, Rossville (Chattanooga, Tenn.), and Savannah, Ga., markets with 36 banking offices and 34 automated teller machines. The company's common stock is traded on the NASDAQ National Market System using the symbol BNKF. The abbreviation found in most newspaper listings is "Bankers First."

#90288p4909 10/15/1990 ~PR Newswire

COLUMBUS, GA. (OCT. 15) PR NEWSWIRE - Synovus Financial Corp. (NYSE: SNV) today announced that it has signed a letter of intent to acquire Athens Federal Savings Bank ("Athens Federal"), Athens, Ga., a wholly owned subsidiary of Bankers First Corp. (NASDAQ-NMS: BNKF) ("Bankers First").

Consummation of the proposed acquisition is subject to a due diligence investigation by Synovus, the execution of a definitive purchase agreement, the prior approval of the appropriate regulatory authorities and the conversion of Athens Federal to a commercial bank. The acquisition is expected to be consummated in mid-1991.

Under terms of the letter of intent, the purchase price would be based on a formula reflecting the tangible equity of Athens Federal at closing. If the closing had occurred on Sept. 30, the purchase price would have been approximately $34 million. Because the purchase price will include 100 percent of Athens Federal's earnings retained through May 31, 1991, and 50 percent of earnings from then to closing, the parties currently expect the purchase price would be approximately $36 million. The purchase price would include $20 million in cash with the balance in the form of Synovus common stock, to which restrictions on sales in the public market would apply. Based on its recent stock price, Synovus would issue approximately 1,200,000 shares of common stock. The actual number of shares of Synovus common stock would be based on the average closing price of Synovus for a 20-day measurement period preceding the closing of the purchase. Under the terms of the letter of intent, Athens Federal will be converted to a commercial bank prior to the closing, and increase its loan loss reserve to 1 percent of loans after all identified loan losses have been charged off.

Athens Federal has total assets of $513 million and $424 million in deposits, representing a nearly 35 percent market share of deposits in Athens. Athens Federal has 11 branches, five of which are in Athens and the remainder in surrounding communities. Synovus expects to operate Athens Federal as a full service commercial bank headquartered in Athens.

James H. Blanchard, chairman of the board of Synovus, stated: "We are really excited about this announcement. Athens is a great market and Athens Federal is the dominant bank. They have an outstanding group of employees, management and directors which have produced very healthy operating results by emphasizing sound fundamentals and quality customer service. Athens Federal is a very sound bank and is expected to immediately increase Synovus' earnings per share upon completion of the acquisition."

Synovus is a $2.8 billion-asset, multi-financial services company based in Columbus, Ga. Synovus is composed of 14 Georgia, four Florida and two Alabama banking affiliates, a majority-owned, publicly traded bankcard data processing company, Total System Services Inc. (NYSE: TSS), and a broker/dealer company, Synovus Securities Inc. Synovus recently announced pending acquisitions of Citizens Federal Savings and Loan Association, Rome, Ga.; First Coast Community Bank, Fernandina Beach, Fla.; and Sea Island Bankshares Inc., Statesboro, Ga.

CLEVELAND (OCT. 15) PR NEWSWIRE - Pioneer-Standard Electronics, Inc. (NASDAQ: PIOS) today reported that net income for the second quarter ended Sept. 30 rose to $1,561,000, nearly double the $798,000 of the like period last year. Net income included a break-even contribution from the company's affiliate, Pioneer/Technologies Group, Inc., for the quarter compared with $128,000 for the same period a year ago. Primary earnings per share of 28 cents (26 cents on a fully diluted basis) compared with 15 cents per share (15 cents on a fully diluted basis) for the second quarter of last year.

For the first six months of the current fiscal year, net income amounted to a record $3,967,000, an increase of 89 percent over the $2,096,000 reported a year ago. Net income for the first half included a contribution of $317,000 from Pioneer/Technologies compared with $148,000 for the like period a year ago. Primary earnings per share were 73 cents (67 cents on a fully diluted basis) compared with 39 cents per share (39 cents on a fully diluted basis) for the first half of last year.

Sales for the quarter of $84,350,000 were 14 percent above the $74,140,000 of the prior year's second quarter. Current year first half sales were $168,249,000, 12 percent ahead of the $150,539,000 of the like period last year. Combined sales of Pioneer-Standard and its 50 percent-owned affiliate for the second quarter were $120,527,000, up 9 percent from the $110,225,000 of last year. Combined sales of the two companies for the first six months ended Sept. 30, 1990, were $246,847,000, up 12 percent from the $221,268,000 of last year. For reporting purposes, sales of Pioneer/Technologies are not consolidated with those of Pioneer-Standard.

Preston Heller Jr., chairman and chief executive officer of the Cleveland-based distributor of industrial electronics components and computer products, said that current year earnings results point to the effectiveness of cost containment "despite a significant commitment to programs to support future sales and profit growth."

Heller said year-to-date sales increases were largely attributable to gains in market share which he attributed to customer service oriented programs such as just-in-time delivery, value-added modification and customization and effective inventory pipelining.

Pioneer-Standard and its affiliate market a broad range of electronic components and computer products through 41 locations and serve most of the nation's major markets.

Sales of Pioneer-Standard Electronics and its 50 percent owned affiliate, Pioneer/Technologies Group, Inc. are not consolidated for reporting purposes. Combined sales of the two organizations are as follows for the second quarter and six months ended Sept. 30:

Combined Sales	1990	1989

#90288p4915 10/15/1990 ~PR Newswire

NEWPORT NEWS, VA. (OCT. 15) PR NEWSWIRE - The Flight International Group, Inc. announced today that it had reached settlements with three more of the lenders who last year brought suit against the company as a result of its default on some $63 million in outstanding loans.

The settlements announced today covered nearly $8.2 million in previously defaulted debt with three creditors: U.S. Concord, Atlantic Leasing and Financial Corp. and Winthrop Resources. The outcome of the negotiations cured the defaults, extended the payment terms of the loans and ended these lawsuits. These settlements bring to more than $17 million the total value of previously defaulted loans restructured by Flight International this month.

"We continue to forge ahead with our plan to restore Flight International to financial health," said J. Nelson Happy, chairman and chief executive. "To date, our program of fiscal responsibility has allowed us to bring current, restructure or pay off more than $27 million of previously defaulted debt owed to 12 lenders.

"We will continue to work with the remaining five lenders in an effort to reach settlements on the debt still in default," Happy said.

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

#90288p4918 10/15/1990 ~PR Newswire
NEWTON, MASS. (OCT. 15) PR NEWSWIRE - Greenery Rehabilitation Group, Inc. (NYSE: GRG) today announced that it completed the acquisition of the 120-bed skilled nursing center presently known as Grovecrest Nursing Home, located in Independence Township, Mich., for the previously announced purchase price of $6 million. On February 8, 1990, Greenery Group had announced that it entered into an agreement to acquire Grovecrest, but the closing was delayed until today because of required governmental approvals. Greenery Group intends to convert the facility to a regional intensive head injury rehabilitation program modeled on Greenery's Boston facility.

Greenery Group also announced today that it has entered into an agreement to acquire a 153-bed skilled nursing center in Farmington, Mich., another suburb of Detroit. This facility, which is now known as Oak Hill Care Center, is presently owned by Health and Rehabilitation Properties Trust (NYSE: HRP) and has been managed by Greenery Group since February of 1989 on behalf on HRP. The purchase price of Oak Hill is $3.4 million. The acquisition is subject to various regulatory approvals which are typical in such transactions and is expected to close on or about Dec. 31, 1990 with an effective date of Oct. 1, 1990.

Greenery Group intends to model operations of the Oak Hill facility after its Worcester, Mass. program, which provides restorative and maintenance medical services to complex care cases such as long-term head-injured and neurologically impaired persons. The Oak Hill facility is presently one of very few skilled nursing centers in Michigan licensed to provide long-term care to ventilator dependent patients and Greenery expects that this program will be expanded as part of its business plan for operations.

Greenery Rehabilitation Group, Inc. is headquartered in Newton, Mass. and provides head injury rehabilitation services and skilled nursing services to medically demanding patients in 10 other facilities located in Massachusetts, Connecticut, North Carolina, Maryland, California, Washington State and Texas.

MOUNT CLEMENS, MICH. (OCT. 15) PR NEWSWIRE - First National Bank in Macomb County announced today it has introduced two new checking accounts offering members checking and many other special services.

"The residents of Macomb County want and deserve quality financial services," said Harold Allmacher, president and CEO. "They are also very perceptive about getting the most value for their money. We think FNB's Club checking programs will give residents the best value and the most distinctive financial

services available."

"They're better than free," he said.

The FNB Club account is free when the customer maintains a $100 minimum balance -- and customers receive their first order of personalized duplicate checks absolutely free. In addition, they receive $5,000 accidental death insurance as well as unlimited check- writing privileges.

The FNB Club Plus account is an interest-bearing checking account with no minimum balance requirement, free FNB Club Plus checks, unlimited check-writing privileges, $10,000 accidental death insurance, Buyers Advantage(R), and other benefits, all for only a $5 monthly membership fee.

With Buyers Advantage, most new personal items bought using the FNB Club Plus checking account will be automatically protected from theft, loss or damage for the first 90 days. And warranties on almost any new item you buy using this checking account will be automatically extended up to an additional year.

MINNEAPOLIS (OCT. 15) PR NEWSWIRE - Kristin K. Larson has been named director of Community Relations for Pillsbury, effective immediately. She reports to Raymond R. Krause, vice president of Government and Community Affairs of Grand Metropolitan Food Sector, and succeeds Dianne Brennan, who is relocating to Seattle.

Larson will be responsible for managing the GrandMet/Pillsbury Foundation, in addition to other community relations activities.

Larson has over 10 years experience in the non-profit sector. Most recently she was general counsel and director of the Policy and Legal Division of the Minnesota Medical Association. Previously, Larson held senior positions with the Healthcare Education and Research Foundation of Community Hospitals, the

Minnesota Hospital Association, and the Minnesota Association of Homes for the Aging.

Larson has a B.A. from Hamline University, St. Paul, Minn., attended the Humphrey Institute of Public Affairs, and received a law degree from the University of Minnesota Law School, Minneapolis.

Pillsbury is part of the Food Sector of Grand Metropolitan PLC, a leading international food, drinks and retailing company with annual sales exceeding $15 billion.

LANSING, MICHIGAN (OCT. 15) PR NEWSWIRE - Consumers Power Company will hold a public meeting Oct. 24 at 10 a.m. at the Michigan Library and Historical Center, 711 West Allegan, Lansing, to discuss an Integrated Resource Plan (IRP) it recently filed with the Michigan Public Service Commission.

The IRP outlines ways Consumers Power will meet the state's future electricity needs by considering both supply options (generating or purchasing power) and demand options (encouraging people to reduce electricity requirements or shifting these requirements away from peak periods of usage. This is called load management.) The IRP incorporates traditional conservation programs and other energy-saving initiatives into the broader context of long-term utility planning.

"We're promoting an array of options aimed at wise and productive energy use," said Paul A. Elbert, Consumers Power vice president for marketing, rates and wholesale power transactions. Elbert said the options encourage super-efficient technologies for heating, cooling and lighting homes and powering industries.

"We want our program to provide choices to commercial and industrial customers to sharpen their competitiveness," Elbert said. "Development of load management and conservation methods gives the customer more choices, while encouraging the marketplace as a whole to use energy more wisely," said Elbert.

Consumers Power's IRP was developed by a task force of employees with expertise in market research, marketing and sales, conservation, energy supply planning, electric revenue requirements and rates, energy needs forecasting and financial planning.

Elbert said that for the IRP to work, it is essential that financial incentives similar to those recently adopted in other states be provided so that customers and utilities alike are encouraged to change electric usage

patterns.

"The public meeting will allow our large industrial and commercial customers and other interested individuals to comment on the IRP," Elbert said.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

FORT WORTH, TEXAS (OCT. 15) PR NEWSWIRE - VIATA Corp. today announced that it has signed a multi-year contract with Scanning Management Systems Co. to license Scanning Management's passive data collection interfaces to major models of electronic cash registers.

Integrating Scanning Management's technology into the VIATA Power Platform will expand VIATA's ability to deliver fully integrated merchant services available in a single platform. These services include credit card, direct debit and electronic check transaction processing as well as check authorization and electronic marketing.

David Mills, president of VIATA, believes the alliance will be mutually beneficial to VIATA and Scanning Management Systems. "As an operator of electronic marketing systems for retailers, we recognize that Scanning Management's experience in electronic cash register interfaces is unmatched by any other company," he said. "This expansion of VIATA's interface capability will enable our already powerful in-store processing platform to meet the

needs of retailers, regardless of the mix or age of their electronic cash registers."

Robert J. Hammer, executive vice president of Scanning Management Systems Co., agrees. "We anticipate that VIATA will be one of our largest customers in the area of electronic marketing," he said. "We look forward to a long-term and prosperous alliance between Scanning Management and VIATA."

Scanning Management Systems Co. (a division within Dataserv Inc., a BellSouth Company) develops, markets and supports supermarket management systems. The company is one of the industry leaders in the development of hardware and software that interfaces to major point-of-sale systems.

VIATA Corp. is a leading system integrator offering complete off-line and real-time transaction processing services to high volume retail and food service operations.

PHILADELPHIA (OCT. 15) PR NEWSWIRE - Comcast Corp. (NASDAQ-NMS: CMCSA) today announced that Donald R. Erickson has been appointed to the position of director of Internal Audit.

In this capacity his responsibilities will involve internal auditing matters and coordination of activities with the company's external auditors.

Prior to joining Comcast, Erickson was the manager of internal audit at SPS Technologies Inc. He was also associated with KPMG Peat Marwick for several years, holding various positions including overseas assignments.

A graduate of Pennsylvania State University with honors, and a certified public accountant, Erickson is a member of the American Institute of Certified Public Accountants, Pennsylvania Institute of Certified Public Accountants, National Association of Accountants and the Institute of Internal Auditors.

Comcast Corp. is principally engaged in the development and operation of cable communications systems. The company's consolidated and affiliated operations served more than 2.4 million subscribers at June 30, 1990. This included 784,000 subscribers associated with systems owned by Storer Communications Inc., for which Comcast provides consulting services. In addition, the company provides cellular telephone communications and sound communications services. The Class A common stock and the Class A Special common stock of Comcast Corp. are traded in the over-the-counter market and reported in the National Market System under the NASDAQ symbols CMCSA and CMCSK respectively.

DEARBORN, MI (OCT. 15) PR NEWSWIRE - Lewis C. Veraldi, 60, retired Ford Motor Company vice president of Product and Manufacturing Engineering, died Saturday night (Oct. 13) at William Beaumont Hospital in Royal Oak, Mich.

Mr. Veraldi helped make automotive history as head of Ford's "Team Taurus" program, which brought together numerous corporate groups, the hourly work force and suppliers at the outset of the program. This system was credited as one of the key ingredients in the highly successful launch of the Ford Taurus and Mercury Sable.

Mr. Veraldi joined Ford's Engineering staff in 1949 and held a number of positions in design, engineering and product development with various U.S. components before moving to Ford of Europe as vice president - Car Engineering in 1973.

He was elected a corporate vice president with responsibility for product development for Ford of Europe in 1975. Later, he held a number of assignments with Ford's North American Automotive Operations, serving successively as vice president in charge of Advanced Vehicles Development, Advanced Vehicle Engineering and Technology, Luxury and Mid-Size Car Engineering and Planning, Luxury and Large Car Engineering and Planning, and Car Programs Management. He headed the Product and Manufacturing Engineering Staff from October 1988 until his retirement Nov. 1, 1989.

Mr. Veraldi was recognized by Automotive Industries magazine as its "Man of the Year" in 1987 and received the Society of Manufacturing Engineers "Eli Whitney Productivity Award" in 1988.

Mr. Veraldi was born July 16, 1930, in Detroit. He held a bachelor's degree in mechanical engineering from Lawrence Institute of Technology.

Mr. Veraldi was a resident of Birmingham, Mich. He is survived by his wife, Irene; four daughters, Marcia, West Bloomfield, Mich.; Lisa (Mrs. Robert Lazar), Nashville, Tenn.; Carla (Mrs. Simon Wilson), Birmingham, England; and Christina, Birmingham, Mich.; two sons, William, Greensboro, N.C., and Joseph, Birmingham, Mich.; and six grandchildren.

Funeral services will be at 10 a.m. Wednesday at Holy Name Church, Birmingham. Visitation will be at the William R. Hamilton Funeral Home, Birmingham, from 6 to 8 p.m. Monday, and from 2 to 4 p.m. and 6 to 8 p.m. Tuesday.

The family has designated the Michigan Chapter of the American Diabetes Association for memorial contributions.

#90288p4935 10/15/1990 ~PR Newswire

CHICAGO (OCT. 15) PR NEWSWIRE - Northern Trust Corp. (NASDAQ: NTRS) today reported unaudited net income for the third quarter and nine months ended Sept. 30, 1990.

1990 Third Quarter Core earnings, defined as net income excluding tax benefits related to the 1987 provision for credit losses on LDC loans, totaled a record high of $29.2 million for the third quarter of 1990, up 25 percent from $23.4 million in 1989. Last year's third quarter core earnings included net nonrecurring after-tax charges of $2.7 million.

Net income for 1990 increased 15 percent to $30.4 million from $26.5 million last year. Net income in 1989 was positively impacted by $3.1 million of LDC-related tax benefits versus similar benefits of $1.2 million in 1990. Net income per common share totaled $.81 on a fully diluted basis versus $.70 in 1989. Third quarter net income resulted in a return on average assets (ROA) of 1.02 percent versus .98 percent in 1989. The return on average common equity (ROE) was 20.2 percent compared with 21.9 percent last year. Based on core earnings, the ROA was .98 percent versus .86 percent in 1989 while the ROE was 19.3 percent compared with 19.1 percent a year ago.

David W. Fox, chairman, president and chief executive officer, commenting on the third quarter stated "The strong growth in core earnings reflects record fees in our trust businesses, a gain in net interest income and increased fees from banking-related services. Northern's capital structure continues strong with significant growth in common equity, and asset quality remains good despite definite softening in certain sectors of the domestic economy."

Noninterest income, which accounted for 56 percent of total taxable equivalent revenue, increased 13 percent to $93.7 million from the prior year's $83.3 million. Trust fees, representing 74 percent of total noninterest income and 41 percent of total taxable equivalent revenue, increased 16 percent to $68.9 million from $59.3 million in 1989. The growth in trust revenues reflects increases in both individual and corporate services. Trading account profits totaled $1.7 million versus $2.0 million in 1989. Other operating income totaled $22.8 million, up 7 percent from the $21.5 million reported in 1989. Contributing to the growth in other operating income were cash management fees and stock and futures brokerage commissions. Net gains from sales of investment securities totaled $307,000 in 1990 versus $430,000 in 1989.

Net interest income on a fully taxable equivalent basis increased 6 percent to

$72.5 million from $68.7 million in 1989. The increase in net interest income resulted from a 10 percent increase in average earning assets partially offset by a decline in the net interest margin to 2.77 percent from 2.87 percent last year. The decline in the interest margin in part reflects the cost of funding a higher level of fixed assets, primarily investments in computer technology and the corporation's new operations center.

Gross charge-offs during the quarter totaled $7.9 million including $2.8 million resulting from the sale of $11.1 million of nonperforming assets. After recoveries of $2.1 million, net charge offs totaled $5.8 million, compared with $3.9 million in 1989. The provision for credit losses totaled $4.0 million in 1990, unchanged from last year. The reserve for credit losses of $148.4 million was strong at 2.53 percent of outstanding loans at Sept. 30, 1990 and covered nonperforming assets 2.28 times. Nonperforming assets at Sept. 30, 1990 totaled $64.9 million versus $55.0 million at June 30, 1990 and $46.6 million at Sept. 30, 1989.

Noninterest expenses increased 5 percent to $114.8 million from $109.7 million in 1989. Excluding 1989 nonrecurring expenses, noninterest expenses for 1990 would have been up 9 percent.

The income tax provision totaled $7.8 million in 1990, compared with $1.8 million in 1989. The current year income tax provision reflects a higher level of taxable earnings and LDC-related tax benefits of only $1.2 million versus $3.1 million last year.

1990 First Nine Months Core earnings, which exclude the effect of LDC-related tax benefits, increased 14 percent to $82.0 million from $71.9 million in 1989 which included net nonrecurring after-tax charges of $4.9 million. Including LDC-related tax benefits of $2.8 million in 1990 and $8.9 million in 1989, net income for the current year totaled $84.8 million versus $80.8 million last year. Net income per common share totaled $2.27 on a fully diluted basis, compared with $2.14 a year ago. Net income produced an ROA of .99 percent versus 1.33 percent in 1989. ROE was 19.8 percent compared with 23.3 percent last year. Based on core earnings, the ROA was .96 percent versus .9 percent in 1989 while the ROE was 19.1 percent compared with 20.5 percent for the prior year.

Noninterest income increased 12 percent to $272.0 million from $243.2 million in 1989. Trust revenues totaled $198.7 million, up 15 percent or $25.2 million from a year ago. Profits from trading account activities totaled $5.7 million compared with $6.2 million last year. Other operating income totaled $65.8 million compared with $64.0 million reported a year ago. Investment security transactions during 1990 resulted in net gains of $1.8 million compared with net losses of $542,000 in 1989. Noninterest expenses totaled $341.9 million, an increase of 7 percent over the prior year. Excluding 1989 nonrecurring expenses, noninterest expenses for 1990 would have been up 10 percent.

Net interest income on a fully taxable equivalent basis totaled $211.5 million up 4 percent from last year's $203.4 million. The provision for credit losses totaled $9.0 million, down from $12.0 million a year ago. Net charge-offs totaled $10.7 million compared with $11.9 million last year.

Total assets at Sept. 30, 1990 were $12.6 billion and averaged $11.5 billion for the first three quarters of 1990, an increase of 10 percent from the 1989 average. Loans and leases totaled $5.9 billion at Sept. 30, 1990 and averaged $5.8 billion for the first nine months, 19 percent higher than the prior year average. Common stockholders' equity (including the conversion of $52.4 million of Series B cumulative preferred stock in December 1989) amounted to $568.9 million, up 25 percent from $456.6 million at Sept. 30, 1989. For the current year, average primary capital to average assets was 6.68 percent versus 6.54 percent last year.

On Oct. 3, 1990 the corporation acquired Heritage Trust Co. in Houston, which has $280 million of trust assets under administration. After the planned merger with The Northern Trust Bank of Texas in Dallas, Heritage will provide a full range of private banking services and enhanced trust services to the Houston market.

CLEVELAND (OCT. 15) PR NEWSWIRE - Acme-Cleveland Corporation (NYSE: AMT) today announced the election of Paul J. Powers, chairman and chief executive officer of Commercial Intertech Corporation (NASDAQ: CTEK), Youngstown, Ohio, a diversified manufacturer of metal products, hydraulics and fluid purification equipment, as a director of the corporation. Powers was elected by the board of directors to the class of directors whose term expires in January 1991.

Powers has been associated with Commercial Intertech since 1982 when he joined the company as group vice president of hydraulics. In 1984, he was elected president, chief operating officer and a director and in 1987 was elected chairman of the board and chief executive officer. Before joining Commercial Intertech, Powers held various general management positions with Chrysler Corporation, American Standard, and Abex Corporation.

Residing in Canfield, Ohio, Powers holds a bachelors degree in economics from Merrimack College and a masters in business administration from George Washington University. He currently serves as a director of The Dollar Savings & Trust Company, Youngstown, Ohio. In addition, he is a director of the National Association of Manufacturers and The Youngstown Chamber of Commerce.

Acme-Cleveland Corporation manufactures and sells telecommunications products, sensor devices and controls, cutting tools, multi-spindle machine tools, quality assurance products and systems, and related parts and services.

#90288p4941 10/15/1990 ~PR Newswire

EAST HAVEN, CONN. (OCT. 15) PR NEWSWIRE - Microtech International today announced the immediate availability of five new memory and mass storage products which extend the capabilities of the Macintosh personal computer, recently introduced by Apple.

In addition to a new 3MB memory expansion module, the "Io-3," which brings total Macintosh Classic memory to four megabytes, Microtech has introduced the "Io-1," a 1MB board which can be further expanded to 1.5 megabytes (through the addition of two 256KB SIMMs) or to three megabytes (using 1MB SIMMs). Like all of the company's memory products, the new Io (TM) modules come with Microtech International's five year limited warranty.(A)

Microtech's new "Europa"(TM) internal drives for the Classic, the 20ic, 50ic and 100ic feature access times as low as 17ms and provide formatted capacities of 20.5, 50.2 and 101.1 megabytes, respectively. All of the new drives employ low profile (third or quarter height) mechanisms as required by the Macintosh Classic's internal design.

"With the addition of our new 'Io' boards and the new internal high performance hard drives, Microtech now offers more than 30 memory/mass storage expansion combinations for the Macintosh Classic," observed Karen Armstrong, Microtech International's executive vice president. "...combinations which provide the greatest possible flexibility to Macintosh Classic users in

configuring systems that fit their specific needs.

"What's more, we have taken special advantage of Microtech's long experience in the high quality memory/mass storage arena to provide products that offer exceptional price performance benefits as well. For a few more dollars the user obtains twice as much memory (4MB), 25 percent more disk space, and a hard drive that is nearly 50 percent faster," Armstrong commented.

"Personal computing is clearly not what it once was. There is an ever growing population of users whose needs are simply not going to be adequately met by a 'plain vanilla' solution. The increased memory requirements of System 7.0 is one very obvious and important consideration. But whether the Classic is employed in a corporate environment, small business, or as an 'office in the home' computer; Microtech's expansion options offer users a range of solutions they can grow with, at prices they can live with," Armstrong concluded.

The Io-1 board is priced at $179 while the Io-3 module costs $299. The Europa 20ic, 50ic, and 100ic have list prices of $409, $599, and $929, respectively, and come with a one year limited warranty.

Microtech International, Inc. is a leading manufacturer of peripherals for Macintosh computers.

BOCA RATON, FLA. (OCT. 15) PR NEWSWIRE - First Medical International, Inc. (NASDAQ: HUGE) has executed an agreement in connection with the acquisition of International Distribution Network, Inc. and its wholly owned subsidiary, Ecological Fuels, Inc., both of Boca Raton, for $177,000 in cash and securities. The acquisition is expected to generate earnings before taxes of approximately $400,000 in 1991. The announcement was made by Roberto Riva, CEO of the Boca Raton-based company with medical distribution, services and medical waste disposal interests.

International Distribution Network, Inc. has an extensive network of foreign sales agents in many countries in Central and South America, Europe and the U.S.S.R. This network will be utilized to distribute medical durable equipment, hospital equipment and medical services.

International Distribution Network's subsidiary, Ecological Fuels, Inc., has operated with distribution rights in several Central and South American countries for a fuel additive which generates substantial fleet fuel economy and reduces hydrocarbon emissions. The company is currently negotiating for increased sales of this fuel additive in these countries.

First Medical International, Inc. (formerly known as Humagen) recently completed the acquisition of Cardio Scan, Inc., a company engaged in EKG and EEG testing for physicians using the 24-hour Holter Monitor System. Also recently acquired is the Lansing, Michigan-based company, MedTex International Inc., supplier of a proprietary medical waste disposal system (MedWaste) used by physicians, dentists, laboratories, clinics and hospitals.

HOUSTON (OCT. 15) PR NEWSWIRE - Global Marine Inc. (NYSE: GLM) today reported a net loss of $7 million, or $0.06 per share, on revenues of $71 million for the third quarter, which ended Sept. 30, 1990. For the corresponding quarter in 1989, the company reported a net loss of $11 million, or $0.11 per share, on revenues of $49 million.

For the nine months ended Sept. 30, 1990, the company reported a net loss of $32 million, or $0.32 per share, on revenues of $199 million. For the comparable nine-month period of 1989, the net loss was $47 million, or $0.47 per share, on revenues of $125 million.

Commenting on the quarter's results, C. Russell Luigs, chairman, president and chief executive officer said, "Global Marine's performance continues to improve with strengthening offshore drilling markets worldwide. While the industry utilization rate remains at about 80 percent as of Sept. 30, 1990, relatively unchanged from June 30, 1990, dayrates for premium equipment continue to rise in the North Sea, West Africa, and the Gulf of Mexico. Twenty-five of the company's 27 rigs are currently under contract. Based on contracted backlog, we expect results for the fourth quarter of 1990 to be close to breakeven."

Global Marine is a major international offshore drilling contractor with interests in oil and gas exploration and production.

ARUBA, DUTCH CARIBBEAN (OCT. 15) PR NEWSWIRE - Divi Hotels N.V. (AMEX: DVH) today announced a loss for the year ended April 30, 1990 of $45,017,996, or $8 per share, compared with a loss last year of $11,455,382, or $2.13 per share.

The loss before property transactions for the year ended April 30, 1990, was $25,012,996. The increase in this loss from the prior year was due primarily

to the sale of the company's two Aruban hotels in September 1989, the effects of Hurricane Hugo in St. Maarten and St. Croix, the inability to complete construction on presold timeshare units, principally in Aruba, and a general industry slowdown throughout the Caribbean. The company also recorded a loss of $22,425,000 on the writedown of operating properties to net realizable value offset by the partial gain of $2,420,000 on the sale of the two Aruban properties.

Per-share data for the year is based on 5,627,464 weighted average number of common shares outstanding on April 30, 1990, compared with 5,384,329 weighted average number of common shares outstanding on April 30, 1989.

VANCOUVER, BRITISH COLUMBIA (OCT. 15) PR NEWSWIRE - The Loewen Group Inc. (NASDAQ: LWNGF; Toronto: LWN), of Burnaby, British Columbia, announced today that it has completed the purchase of all the shares of Paragon Family Services, Inc., of Houston, Texas, under a previously announced agreement. The cost of the share purchase was (U.S.) $65.5 million.

The completion of this agreement is a significant step in The Loewen Group's ongoing program of consolidation of well-managed funeral home operations throughout North America.

"This move represents another milestone in our corporate development," said Ray Loewen, president and CEO of The Loewen Group Inc. "It is not only a confirmation of the strength of our growth program, but is also an indication of the effectiveness of our management team, as exemplified in the disciplined approach with respect to the negotiation, due diligence and closing of the transaction. We look forward to Paragon making a significant contribution both operationally and financially."

Paragon is a well-respected funeral service company operating in the United States. It owns and operates 49 funeral homes, primarily in the south central United States, and has pending agreements to purchase another eight funeral home locations. Those purchases are included in the agreement with The Loewen Group Inc.

The geographic locations of Paragon's funeral homes complement the company's existing locations in the United States, being for the most part in regions where The Loewen Group Inc., to date, either does not operate or has not had a strong presence.

Paragon employs approximately 185 people, all of whom will remain in place.

The three senior officers of Paragon have become executives of The Loewen Group Inc. Between them, John T. Turner, Ronald R. Hamlin and F. Duane Schaefer have a combined 63 years experience in the funeral service industry.

The Loewen Group Inc. is the largest funeral service corporation in Canada and the second largest in North America. Its shares are listed on both the Toronto Stock Exchange and NASDAQ. With the inclusion of Paragon Family Services Inc., the company now owns and operates 262 funeral homes, 20 cemeteries and 11 crematoria, and employs approximately 2,000 people.

David J. Hegarty, treasurer of HRP, stated that cash flow available for distribution, rather than earnings, is often considered a better index of the performance of a real estate investment trust. In the quarter ended Sept. 30, 1990, HRP's cash flow available for distribution as dividends was 30 cents per share compared to 31 cents per share in the comparable period in 1989. A dividend of 29 cents per share was declared for both periods.

Simultaneously with announcing the earnings results, Hegarty stated that HRP had entered into an agreement to sell the Oak Hill facility to Greenery Rehabilitation Group, Inc. (NYSE: GRG) for $3.4 million. HRP acquired this facility in February 1990 for $2.704 million and has since invested between $.6 - $.7 million to fund capital improvements and to pay turn-around losses. Because some of this investment was expensed, HRP expects to report a gain on

the sale transaction of between $200,000 to $300,000. In the past few weeks HRP had several discussions regarding a sale or lease of the Oak Hill facility as the time for redemption after a foreclosure sale under Michigan law drew to a close, and the Independent Trustees of HRP determined to sell the facility when Greenery Group made a cash offer at the facility's appraised value.

The sale of Oak Hill is subject to certain regulatory approvals which are customary in sales of health care facilities and is expected to close on or about Dec. 31, 1990.

#90288p4954 10/15/1990 ~PR Newswire

AKRON, OHIO (OCT. 15) PR NEWSWIRE - Telxon Corporation (NASDAQ/NMS: TLXN) today reported net income of $4.7 million, or $.35 per share, for its second quarter of fiscal 1991 ended Sept. 30, 1990. That compares with a net loss of $4.0 million, or $.30 per share, for the same period a year ago. Income after tax and before extraordinary items for the fiscal 1991 second quarter was $3.0 million, or $.23 per share.

Revenue for the second quarter was $45.2 million, an increase of 28 percent over $35.4 million for the second quarter of fiscal 1990.

Results for the fiscal 1991 second quarter included an extraordinary after-tax gain of $1.4 million, or $.10 per share, as a result of the company's September 1990 purchases of $9 million of its subordinated convertible debentures and an extraordinary credit of $225,000, or $.02 per share, from the utilization of tax carryforwards.

For the first six months of fiscal 1991, Telxon reported net income of $8.4 million, or $.63 per share, on revenue of $85.4 million. This includes extraordinary after-tax gains of $3.5 million, or $.26 per share, as a result of the repurchase of its convertible debentures and $355,000, or $.03 per share, from the utilization of tax carryforwards. That compares with a loss of $3.4 million, or $.26 per share, on revenue of $70.7 million for the same period a year ago.

Average shares outstanding for the second quarter and first half of fiscal 1991 were 13.4 million and 13.3 million, respectively.

"We are continuing to make progress with our programs to improve profit margins and reduce costs," said Raymond D. Meyo, Telxon president and chief executive officer. "Demand for our new products is solid, and our order backlog continues to be strong.

"The company's cash position is strong, with almost $50 million at Sept. 30, 1990, despite our significant investment in the first half of the fiscal year for the repurchase of approximately $19 million face amount of convertible subordinated debentures," he said.

Meyo estimated that Telxon's revenue for the fiscal 1991 third quarter will be in excess of $42 million and earnings per share from operations will be in excess of $.20 for the quarter. He also confirmed estimates of fiscal 1991 revenue in the $170 million to $175 million range, and earnings per share from operations for the year in the $.75 to $.80 range, excluding the extraordinary gains discussed earlier.

Telxon PTCs gather, process and store on-site real-time data which is communicated to a host computer. These systems incorporate the company's proprietary operating and applications software, associated peripheral equipment and communications devices.

Telxon's executive and engineering offices are located in Akron, Ohio; it has a manufacturing facility in Houston; and customers are served by 41 sales and service offices worldwide.

AKRON, OHIO (OCT. 15) PR NEWSWIRE - Telxon Corporation (NASDAQ/NMS: TLXN) announced today that it has purchased, in open market transactions at substantial discounts, an additional aggregate of $2.9 million face amount of its 7-1/2 percent convertible subordinated debentures due 2012. The purchase was part of the bond buyback program announced Sept. 13.

In the fiscal year to date, the company has purchased a total of $21.2 million face amount of the bonds, leaving approximately $25 million face amount outstanding.

Extraordinary after-tax gains of approximately $.10 per share in the fiscal

1991 second quarter and $.26 per share in the fiscal 1991 first half were recorded as a result of the bond purchase. The company estimates an additional gain of approximately $.03 per share in the fiscal 1991 third quarter from the purchase.

The company was assisted by First Boston Corporation, New York, and McDonald & Company Securities Inc., Cleveland.

Telxon portable tele-transaction computers gather, process and store on-site, real-time data which is communicated to a host computer. These systems incorporate the company's proprietary operating and applications software, associated peripheral equipment and communications devices.

Telxon's executive and engineering offices are located in Akron, Ohio, and its manufacturing facility is in Houston. Telxon customers are served by 41 sales and service offices worldwide.

#90288p4960 10/15/1990 ~PR Newswire

OAK BROOK, Ill. (OCT. 15) PR NEWSWIRE - Federal Signal Corporation (NYSE: FSS) reported strong third quarter earnings from continuing operations of $.48 per share, 30 percent higher than 1989's third quarter, reflecting a continuation of the positive operating trends of its businesses.

Income from continuing operations of $7.4 million rose 29 percent over 1989's third quarter of $5.7 million. Sales increased 11 percent to $109.2 million in 1990's third quarter compared to $98.5 million in 1989. Incoming orders increased 4 percent while backlogs of $186.7 million at Sept. 30, 1990 were 19 percent higher than a year earlier.

Sales for the first nine months of 1990 of $328.7 million increased 11 percent over $295.7 million in the year earlier period. Income from continuing

operations of $20.5 million was 26 percent above the same period a year ago. Income per share from continuing operations of $1.33 increased 27 percent over the $1.05 reported for the first nine months of 1989. Net income per share for the first nine months of 1990 included a $.15 per share gain on the sale of Autocall during the second quarter and $.01 per share of operating income earned in the first quarter by this divested unit.

Three of the company's four operating groups achieved significant sales and earnings increases in the third quarter over the prior year.

Earnings for the Vehicle Group increased 47 percent over last year's third quarter on a 22 percent increase in sales. Operating margins, again, were significantly improved at both Emergency One and Elgin Sweeper over last year's third quarter, reflecting the increased sales and greater operating efficiencies. Both units posted sales increases of over 20 percent. Both units' new business also increased about 17 percent, excluding the effect of $5.5 million funding of the U.S. Air Force's Crash/Fire/Rescue vehicle contract in 1989's third quarter.

Sales and earnings for the Signal Group rose 11 percent and 12 percent, respectively, over 1989's third quarter. The Signal Products Division continued to achieve higher operating margins while continuing to invest in new product development. Federal APD booked several orders for large systems installations during the quarter, positioning the unit for strong earnings performance.

Sign Group sales declined 13 percent while earnings fell 70 percent. Slower commercial construction activity and a weakening general economy have resulted in lower order activity and increased price competition. Additionally, the group's earnings suffered from significantly greater than expected installation costs incurred this quarter related to a major project. This overrun resulted from the unique requirements of the installation of this sign. Despite this project's cost overrun in the third quarter, the overall profitability of the project was satisfactory due to the profits on this project recorded in the prior three quarters. While the Sign Group has continued to achieve significant operating expense reductions and will continue to do so, these efforts were more than offset by the effects of lower sales volume and nonrecurring costs related to the previously mentioned project. Management of the company anticipates that the Sign Group will continue to feel the effects of adverse market conditions through at least the balance of 1990.

The Tool Group achieved a 10 percent increase in sales and a 22 percent increase in profits this quarter over the third quarter of last year. The group benefited from a 19 percent increase in international sales while domestic sales also increased by 8 percent, somewhat more than anticipated at the end of last quarter in light of the slow to no-growth domestic industrial economy.

Josep J. Ross, chairman, president and chief executive officer, stated, "The strong performances achieved by the Signal, Vehicle and Tool groups continue to provide excellent momentum toward record sales and earnings for 1990, despite the continuing lower earnings of the Sign Group and the general slowing of the economy."

Federal Signal Corporation, is a manufacturer and a worldwide supplier of public safety, signaling and communications equipment, fire trucks, emergency and street sweeping vehicles, parking control equipment, custom on premise signage, carbide cutting tools, precision punches and related die components.

MINNEAPOLIS (OCT. 15) PR NEWSWIRE - World Satellite Network, Inc. announced today that Dennis J. Mahoney has resigned as president to pursue other interests and Jeffrey G. Maxwell became president. Mahoney was one of the founders of the company. It was with reluctance that his resignation was accepted and he will be missed within the company. Mahoney has agreed that he will not be doing business within the satellite cable industry. Mahoney will remain a director of the company.

Prior to being named president, Maxwell served as vice president of marketing for the company where he developed and enhanced the company's satellite TV programming services. The company's revenues from programming services have shown consistent growth for the past four years.

The company expects to report revenues of approximately $2,400,000 for the fiscal year ended Aug. 31, 1990, with a loss from operations. The company's revenues were generated almost exclusively from satellite programming service. The company believes that substantially all of the company's losses occured as a result of losses incurred by the company's subsidiary, All Media, Inc. Since the company believes that All Media, Inc.'s losses will be dramatically reduced.

DALLAS (OCT. 15) PR NEWSWIRE - NCNB Mortgage Corp. today more than tripled its size by completing the purchase of Fundamental Mortgage Corp.'s mortgage servicing agreements.

As previously announced, NCNB Mortgage Corp. entered into a letter of intent with Dallas-based Fundamental to purchase Fundamental's mortgage servicing agreements, which have an outstanding principal balance of up to $9.5 billion.

The acquisition gives NCNB Mortgage more than $15 billion in mortgage servicing agreements, making it one of the 15 largest mortgage companies in the nation.

NCNB Mortgage also purchased Fundamental's approximately 260-employee loan servicing facility in Louisville, Ky.

In addition, NCNB Mortgage has loan servicing centers in Charlotte, N.C., and Lubbock, Texas. Fundamental was a subsidiary of Houston-based San Jacinto Savings Association.

The acquisition of the Fundamental Mortgage assets is consistent with NCNB Mortgage's long-term strategy for growth, said Christopher T. Gilson, chairman of NCNB Mortgage.

"Today we have realized an important goal of ours, which is to expand our customer base from a regional to a national level," Gilson said. "In reaching that goal, we feel we have strengthened our ability to increase loan originations in NCNB banking markets.

"And in buying an on-going loan servicing business, we are excited about both its capabilities and the addition of its experienced employees to the NCNB team," Gilson continued.

NCNB Mortgage is an affiliate of NCNB Corp. (NYSE: NCB), the seventh-largest bank holding company in the country with more than $60 billion in assets and more than 900 branches in seven states.

CLEVELAND (OCT. 15) PR NEWSWIRE - In response to an inquiry by the New York Stock Exchange, a spokesman for NACCO Industries (NYSE: NC) stated: "The company is unaware of any corporate development or activity that would account

for the sharp decline in the price of its Class A common stock."

On Thursday, Oct. 11, 1990, the company announced that its subsidiary, Proctor-Silex, Inc., had completed a merger with Hamilton Beach Inc. NACCO Industries now owns 80 percent of the combined business.

NACCO Industries is a holding company that has three major operating subsidiaries. Hyster-Yale Materials Handling, Inc. designs, manufactures and markets forklift trucks and related service parts under the Hyster and Yale trade names. The North American Coal Corporation mines and markets lignite coal for use primarily as fuel in power generation by electric utilities. Hamilton Beach/Proctor-Silex, Inc. is a leading manufacturer of small electric appliances.

ENGLEWOOD, CO (OCT. 15) PR NEWSWIRE - U S WEST (NYSE: USW) and its partner, the Hungarian Telecommunications Co., began operating the first cellular telephone system in Eastern Europe when service was turned on in Budapest, Hungary today. The system is operational three months ahead of its scheduled start date.

Ron Sanders, who lead the operating team that cut over U S WEST's first commercial cellular system in the Twin Cities in 1984, is co-managing director of the new Hungarian system known as WesTel Radiotelefon Ltd.

In ceremonies today in Budapest, Peter Akos Bod, Hungary's minister of commerce and industry, made the first cellular telephone call on the WesTel system to Vice President Dan Quayle in Washington.

WesTel developed and will manage the system. It is a joint venture between U S WEST and the Hungarian Telecommunications Co. WesTel is initially offering service to 3,000 Budapest customers and will add capacity for another 3,000 by February 1991. Plans call for expansion to Miskoloz, the Lake Balaton region, and the main corridor highway between Budapest and Vienna, Austria through Gyor-Sopron by the end of 1993.

A variety of mobile and transportable cellular phones manufactured by Motorola and Ericsson are available for purchase in Hungary. The cellular network is a Nordic 450 system manufactured by Ericsson.

U S WEST Chairman Jack MacAllister attended the ceremonies in Budapest and said: "U S WEST is extremely proud to join the Hungarian Telecommunications

Company in taking the first major step in forging a new era in communications between East and West by providing this important complement to the nation's telecommunications system. Together we have formed a new company, WesTel, that signifies our efforts to bring Western-style technology to Eastern Europe."

The significance of this new network in Hungary is great, according to Jozsef Pete, the Hungarian co-managing director of WesTel.

"Hungary has been examining the possibility of cellular telephone service since early discussions with U S WEST in 1986," Pete explained. "The start of this service on 450 megahertz (MHz) is a milestone, putting Hungary far ahead of any other Eastern European country. It will provide immediate communications relief to several thousand residents and businesses which might otherwise wait up to 10 years for any telephone service."

Sanders added, "The marriage of U S WEST experience with the dedicated efforts of Hungarian employees allowed WesTel to begin offering service three months ahead of schedule."

The Hungarian Telecommunications Co. is responsible for landline telephone service in Hungary. It has approximately one million customers.

#90288p4984 10/15/1990 ~PR Newswire

NEW BEDFORD, MASS. (OCT. 15) PR NEWSWIRE - Aerovox Incorporated (NASDAQ: ARVX) reported third-quarter earnings of $171,000, or 3 cents per share, on sales of $11,131,0000. Earnings for the same period in 1989 were $437,000, or 9 cents per share, on sales of $15,633,000. Incoming orders during the quarter dropped 30 percent from the same period in 1989. For the first nine months, earnings were $1,247,000 vs. $2,858,000 a year ago, a decline of approximately 56 percent. During the same period, sales were $45,529,000 vs. $58,515,000 in 1989, a decline of approximately 22 percent.

Reduced demand for air conditioning units due to a cool summer in the Northeast and upper Midwest, a downturn in the fluorescent and high-intensity discharge lighting markets resulting from a lack of construction, and significantly reduced demand for microwave ovens were cited as the factors negatively impacting the company's OEM markets.

The company also reported that the first AeroMet II assembly machine, although two months late, is now on site. However, production will be delayed until year end while various material alternatives, both plastic and aluminum, are investigated to insure that the automation project achieves optimum cost reductions. Skyrocketing petroleum prices have prompted the company to consider those alternative materials.

Although business conditions are not expected to improve, increased shipments of DC Film capacitors coupled with growing sales in the now profitable filter line are expected to result in improved earnings in the fourth quarter.

Aerovox is a leading manufacturer of AC and Power DC capacitors, basic electrical components that store electrical energy and regulate the frequency, timing, and condition of electrical signals.

The company's common stock is traded in the NASDAQ National Market under the symbol "ARVX."

PONTIAC, MI (OCT. 15) PR NEWSWIRE - First Federal Bancorp, Inc. (FFB) (AMEX: FFS), the holding company for First Federal Savings Bank & Trust (FFSBT), reported a net income of $294,000, or $0.08 per share for its first quarter ended Sept. 30, 1990, compared to $39,000, or $0.01 per share for the first

quarter of the prior year.

The announcement was made by Leo D. Ottoni, president and CEO of FFB and FFSBT. FFB is traded on the American Stock Exchange under the symbol FFS.

For the first quarter of fiscal 1990, compared to the first quarter of last year, net interest income was reduced $1.1 million to $5.4 million and general and administrative expenses were also reduced $1.0 million to $6.4 million. These reductions resulted from the significant downsizing of the company during the past year.

General and administrative expenses have been reduced primarily through staff reductions, branch consolidations and a general emphasis on improved operating efficiencies.

Current quarter earnings were also aided by the reduction of goodwill expense which was $346,000 for the quarter compared to $544,000 for the same quarter last year. This reduced expense resulted from the restructuring charges which FFB incurred in the prior fiscal year, when all the remaining goodwill recorded in the acquisition of Citizens Federal Savings Bank (CFSB) in Jacksonville, Fla., was written off.

Primarily all of the current quarter earnings were from operations and FFB is continuing its focus on these operations for additional improvements.

In response to its business plan, assets of FFB were reduced to $1.2 billion at Sept. 30, 1990, from $1.3 billion at June 30, 1990, and $1.5 billion at Sept. 30, 1989. The primary asset reduction has occurred in the commercial real estate and business loan portfolio which totaled $195 million at Sept. 30 1990, compared to $307 million at Sept. 30, 1989. Total loan loss reserves on this portfolio were $15 million or 7.7 percent at quarter end.

FFSBT continued its branch streamlining during the quarter as two additional branches were consolidated, which reduces the branch network to 26.

FFSBT, headquartered in Pontiac, is the fifth-largest thrift institution in Michigan. FFSBT employs approximately 400 people. CFSB has four branches in Jacksonville.

FFSBT and CFSB are members of the Federal Home Loan Bank System. Their deposits are insured through the Federal Deposit Insurance Corporation (FDIC).

GRAND RAPIDS, MICH. (OCT. 15) PR NEWSWIRE - The board of directors of Old Kent Financial Corporation (NASDAQ-NMS: OKEN) today declared an increase in the regular quarterly dividend to $.29 per share on the corporation's common stock. The dividend is payable Dec. 15, 1990, to shareholders of record on Nov. 16, 1990.

This dividend increase is the 18th consecutive annual increase since the holding company was organized in 1972, and represents a 9.4-percent increase over the prior rate of $.26-1/2. On an annual basis, the new rate represents $1.16 per share compared to the prior rate of $1.06 per share.

Old Kent Financial Corporation is a bank holding company headquartered in Grand Rapids, with 17 affiliate banks and 185 banking offices throughout Michigan, and four banks with 12 banking offices in Illinois. Old Kent reported total assets of $8.2 billion at Sept. 30, 1990.

CLEVELAND (OCT. 15) PR NEWSWIRE - BP America announced today a grant of $31,150 to the Ohio Public Radio and Television Stations (OPRTS) for the state-wide broadcast of its Election 1990 programs, including the 1990 Ohio Gubernatorial Television Debate.

Anthony Celebrezze and George Voinovich, candidates in the upcoming election for governor, have accepted the invitation of OPRTS for a live debate on Oct. 17, 7-8 p.m., to be broadcast by public television and radio stations throughout Ohio. The format for the debate will include statements by the candidates, questions by political reporters from around the state, and direct interaction between Celebrezze and Voinovich.

"We are pleased to provide our support for this event," said James H. Ross, BP America president and chief executive officer. "We believe that the debate will be a valuable source of information for an important choice that the voters of the state will make on Nov. 6."

The hour-long special will be produced by the OPRTS Statehouse News Bureau in conjunction with the Greater Dayton Public Television at its TeleCenter in Dayton. George Zimmerman, OPRTS Statehouse News Bureau's executive producer, will moderate the debate. Additional rebroadcasts of the debate in the following week will be at the discretion of the individual television and radio stations.

"The grant to OPRTS is an extension of our involvement with public radio and television in Ohio and around the nation," said Lance C. Buhl, BP America's director, corporate contributions. "They are important community resources."

In addition to the grant for the debate, during 1990 the company will provide over $100,000 to public radio and television, including $48,000 in matching gifts generated by BP America employees.

COLUMBUS, GA. (OCT. 15) PR NEWSWIRE - The board of directors of American

Family Corp. (NYSE: AFL) announced today that it has filed a request with the Securities and Exchange Commission for an exemption from Rule 10b-6 under the Securities Exchange Act of 1934 to allow American Family Corp. to purchase its stock in the open market.

This exemption would allow American Family Corp. to purchase the company's common shares when management deems that favorable market conditions exist. Chief Executive Officer Dan Amos stated, "I believe that it is in the best interest of out stockholders and American Family to purchase shares under certain market conditions." Amos added, "We are confident that our 1990 financial results will be the best in the company's history and believe we will exceed our corporate goals in 1991."

American Family Corp. is an international holding company. Through its principal subsidiary, AFLAC, the company is one of the world's leading underwriters of supplemental health insurance. AFLAC's primary markets are the United States and Japan. The company also owns seven network-affiliated television stations and Communicorp, a printing company.

GREENSBORO, N.C. (OCT. 15) PR NEWSWIRE - The board of directors of Fieldcrest Cannon, Inc. (NYSE: FLD) today announced the election of Director James M. Fitzgibbons of Brookline, Mass., to the positions of chairman and chief executive officer. Fitzgibbons will assume his duties immediately.

Fitzgibbons is currently serving as president and chief operating officer of Amoskeag Company, in Boston, positions he will retain. Amoskeag has majority voting control of Fieldcrest Cannon, Inc. common stock. Fitzgibbons became president of Amoskeag in March 1987, after having served as executive vice president from Jan. 1, 1986 and chief operating officer from September 1986. Fitzgibbons is also chairman of the executive committee and chief executive officer of the Bangor and Aroostook Railroad Company and serves as chairman and chief executive officer of the Arthur T. Walker Estate Corporation, a privately held energy and transportation company in Western Pennsylvania.

Previously, Fitzgibbons had been president and a director of Howes Leather Company, Inc., which manufactures sole leather for the shoe industry. He is also a trustee of the Boston Company Fund, which provides a variety of investment services through a series of mutual funds, a director of Lumber Mutual Insurance Company, and a director of Barrett Resources Corporation, which is a Denver-based oil and gas exploration company.

Privately, Fitzgibbons is president of the board of trustees of Milton Academy.

The election of Fitzgibbons to chairman and chief executive officer allows Joseph B. Ely, II to take a long-planned retirement from these positions. He will remain as chairman and chief executive officer of Amoskeag and as a director of Fieldcrest Cannon, Inc. Ely is also treasurer of Dumaines, a private trust which owns majority control of Amoskeag Company common stock. He will also remain as chairman of the Bangor and Aroostook Railroad and a director of the Arthur T. Walker Estate Corporation.

Charles G. Horn, president and chief operating officer of Fieldcrest Cannon, Inc., will remain in those positions reporting to Fitzgibbons. Horn is also a director of Fieldcrest Cannon, Inc., Amoskeag Company, and Arthur T. Walker Estate Corporation.

Fieldcrest Cannon, Inc. manufactures and markets bed and bath textile products under the Fieldcrest, Cannon, St. Marys, Royal Family, Monticello, and private brand labels. Its carpet and rug division manufactures and markets high quality woven and tufted carpets under the Karastan and Bigelow brands.

#90288p5011 10/15/1990 ~PR Newswire

COLUMBIA, S.C. (OCT. 15) PR NEWSWIRE - South Carolina National Corporation (NASDAQ-NMS: SCNC) today reported net income of $17.6 million for the third quarter of 1990, an increase of 21 percent over the $14.5 million earned in the third quarter of 1989. Fully diluted earnings per share equalled $.79 for the third quarter, representing a 22 percent increase over the $.65 earned in the same quarter last year.

Net income was $46.8 million or $2.10 per fully diluted share for the first nine months of 1990, versus $44.9 million or $2.00 per fully diluted share earned during the same period of 1989. Net income for the first quarter of 1990 included a one-time addition to income of $6.1 million or $.27 per fully diluted share resulting from a change in the method of accounting for income taxes and a charge of $2.9 million or $.13 per fully diluted share resulting from a tax settlement with the Internal Revenue Service.

The Corporation also announced that the board of directors has declared a regular quarterly cash dividend of $.20 per share. The dividend is payable January 2, 1991 to shareholders of record on December 10, 1990.

Return on average assets for the third quarter of 1990 was 1.09 percent versus .98 percent in the same period last year. Return on average equity was 16.36 percent compared to 13.93 percent in the third quarter of 1989. For the

first nine months of 1990, return on average assets was .99 percent and return on average equity was 14.79 percent.

"We are pleased with our third quarter results, particularly in light of today's challenging economic environment. Our fundamental performance for the quarter was solid, with good growth in net interest income and fee income, as well as effective control of non-interest expense," said James G. Lindley, chairman and chief executive officer.

The provision for loan losses returned to a more normal level in the third quarter compared to the first half of the year and problem assets decreased slightly at the end of the third quarter compared to June 30. Mr. Lindley noted, however, that the local real estate markets and the economic outlook for the Southeast are still of concern, and the Corporation will continue to carefully monitor its loan portfolio.

South Carolina National Corporation is the parent company of South Carolina National Bank, Provident Financial Corporation, SCN Discount Brokerage Services, Inc. and SCN Capital Management Corporation.

#90288p5012 10/15/1990 ~PR Newswire

HOUSTON (OCT. 15) PR NEWSWIRE - Anadarko Petroleum Corp. (NYSE: APC) said today that recent gains in both crude oil production and average U.S. crude oil prices would substantially impact 1990 third quarter earnings scheduled for release on Oct. 25, 1990.

The company said its crude oil production gains stemmed from successful completion of a development drilling program at the High Island Block 376 Field in the Gulf of Mexico offshore Texas, and from a large increase in oil production at the Etzold waterflood (secondary recovery) project in southwest Kansas.

Anadarko Chairman and Chief Executive Officer Robert J. Allison Jr. said:

"The double leverage to both crude oil prices and volumes has more than offset the negative effects of weak markets for natural gas, which have only recently begun to improve."

Allison also said the company's third quarter 1990 financial results would be substantially higher than the 1989 third quarter based on an anticipated 20 percent gain in crude oil production and prices for the period.

Andarko also said the recent production gains could lead to a 10 percent gain

in crude oil and condensate production for the full year 1990 compared to 1989.

MINNEAPOLIS (OCT. 15) PR NEWSWIRE - Computer Network Technology Corporation (CNT) (NASDAQ: CMNT) today announced that it has entered into a master lease agreement with Comdisco, Inc. (NYSE: CDO) which calls for a $1.5 million lease line of credit. The company has utilized $1.1 million of this lease line of credit by entering into a four-year sale/leaseback of all capital equipment at its Maple Grove, Minn. headquarters. The $400,000 remaining available credit may be used for leasing additional capital equipment during the 12 month period ending September 1991.

As previously announced, Comdisco Disaster Recovery Services, Inc., a subsidiary of Comdisco, Inc., has selected Extended Channel Networking Systems from CNT for use in deployment of its high speed private data network that links backup disaster recovery sites nationwide.

Computer Network Technology Corporation develops, manufactures and markets high speed Extended Channel Networking products for the interconnection of mainframe computers, computer peripheral devices, and data base computers over unlimited distances. The company's common stock is traded on the national over-the-counter market under the NASDAQ symbol CMNT.

HOUSTON (OCT. 15) PR NEWSWIRE - WNS Inc. (the "company") today announced the completion of an exchange of $4 million of its subordinated notes for Class A Preferred Stock of the company. The exchange required the company's shareholders to approve an amendment to the company's Articles of Incorporation which authorizes the issuance of Class A Preferred Stock. The amendment was approved at the Oct. 12, 1990 annual meeting of the shareholders.

The issuance of the preferred stock marks the completion of certain transactions which reduced the company's subordinated debt. As previously announced the sale of the company's Deck the Walls division was completed June 28, 1990 and resulted in the release and discharge of $6 million of the company's subordinated notes.

WNS Inc., is a leading specialty retailer operating primarily through franchisees with 252 Wicks 'N' Sticks stores selling candles and room fragrancing and 120 Wallpapers To Go stores selling in-stock and special order wallcoverings. The company is committed to focusing its resources on the continued development of these two retail concepts.

CHARLOTTE, N.C. (OCT. 15) PR NEWSWIRE - Interstate/Johnson Lane, Inc. (NYSE: IS) announced today that it has reached an agreement in principle with First Charlotte Corporation to join the two firms' fixed income businesses. H.

Keith Brunnemer, Jr., chief executive officer of First Charlotte Corporation, will become a managing director of Interstate/Johnson Lane and will assume responsibility for the company's fixed income departments.

Parks H. Dalton, chairman and chief executive officer of Interstate/Johnson Lane, said the combination will take effect in early December.

"This is a very exciting and positive step for Interstate/Johnson Lane because by combining our two firms, we will be in an even stronger position to manage financing for state and local governments throughout the Southeast," Dalton said. "Keith is a seasoned professional with 28 years of experience in all phases of fixed income operations and will make an outstanding contribution to our firm."

Brunnemer said financing is important to state and local governments, and this area represents an important business for Interstate/Johnson Lane. "By joining forces, we will be in a better position to service this growing market. We will have the experience, manpower and distribution to underwrite and distribute these securities throughout the region," he said. "We also envision positive growth for all our other fixed income operations and look forward to utilizing our retail office network to achieve this growth."

Started in February 1977, First Charlotte Corporation is an investment banking firm specializing in fixed income securities. Located in Two First Union Center, the firm has 18 employees and capital of approximately $4.5 million. First Charlotte principals and employees will join Interstate/Johnson Lane's fixed income department, which includes municipal, U.S. government and coporate bond sales and trading, origination of investment banking services for state and local governments and municipal bond funds.

Interstate/Johnson Lane is one of the largest broker-dealer and investment banking firms located in the Southeast. With 1,150 employees, the firm has offices in North and South Carolina, Georgia, Florida, Tennessee, Virginia and New York City.

#90288p5026 10/15/1990 ~PR Newswire

IRVING, TX (OCT. 15) PR NEWSWIRE - GTE Telephone Operations today has approval to begin offering new SmartCall(SM) Services, including Calling Number Identification, to its customers in Lexington and Elizabethtown, Ky. These services give consumers greater control, security and convenience in their telephone use, and represent a new generation of custom calling. GTE received approval, effective Oct. 8, from the Kentucky Public Service Commission (PSC) to offer these new services.

The innovative SmartCall Services will allow telephone users to: see the number of the person calling; block unwanted calls; start tracing harassing calls on their own; and, automatically re-dial the last caller when they miss a call. GTE's Kentucky customers soon will receive information from the company that explains the new services and how to obtain them.

"Customers now can have more control over the use of their telephones by subscribing to these new services," said Clyta M. Dillon, senior product manager. "In our market test, we found that customers enjoyed the services by deciding who they wanted to talk to, when, and by not having to run to answer a ringing telephone."

Ten New Services

GTE's SmartCall Services include 10 new individual services and two discount packages. The individual services range from $2 to $10 per month. The packages are $13.25 per month for the nine-feature package, and $8.75 for the four-feature package.

In approving GTE's tariff, the Kentucky PSC required GTE to provide per-call blocking at no monthly charge. Named "Cancel Calling Number Delivery," this feature allows customers to prevent their telephone numbers from being seen by someone with Calling Number ID -- a service that lets people see who is calling, using a display device attached to the telephone. When Cancel Calling Number Delivery is activated before a call, "PRIVATE NUMBER"(see note) appears on the display unit instead of the telephone number.

In addition, GTE received permission to offer its Protected Number Service -- another unique option for customers to prevent their current telephone number from being seen on Calling Number ID devices.

Choices for Consumers Concerned About Privacy

"We recognize the concerns expressed by the commission in providing an option for those requesting the ability to cancel number display," Dillon said. "By providing Cancel Calling Number Delivery upon request, only those who find it sufficiently important will make the request. We also offer our Protected Number Service to address customer concerns about Calling Number ID."

GTE is the first telephone company in the nation to offer Protected Number Service and two other services: Special Call Waiting, which identifies certain callers who can always get through while a person is on the phone, and Special Call Acceptance, which allows only special calls to get through.

GTE plans to offer these services to more Kentucky communities next year, and plans to expand SmartCall Services to other GTE operating territories nationwide in the next five years.

#90288p5029 10/15/1990 ~PR Newswire

HOPEWELL JUNCTION, N.Y. (OCT. 15) PR NEWSWIRE - Mark Ritter, chairman of Robert-Mark, Inc., (AMEX: RMK) announced today that its net loss for the second quarter ended Aug. 31, 1990 was $594,000 versus $424,000 in the second quarter ended Aug. 31, 1989. The net loss per share was $.13 loss per share in the 1990 second quarter versus $.09 loss per share in the prior year second quarter.

The net loss for the six months ended Aug. 31, 1990 decreased 29 percent to $766,000 or $.17 loss per share from $1,086,000 or $.24 loss per share for the six months ended Aug. 31, 1989.

Total revenues decreased 37 percent to $972,000 during the 1990 second quarter from $1,539,000 in the 1989 second quarter. The company's revenues declined due to the continued impact of a recession in the Northeast which has produced uncertainty in the marketplace and negatively impacted business growth and spending plans. Further, the company believes that high interest rate levels uncertain world events, and concerns over tax rate increases have caused some buyers to postpone or cancel buying decisions.

Total expenses for the 1990 second quarter were $1,523,000 or $780,000 lower than the 1989 second quarter expense of $2,303,000. The decrease primarily resulted from the implementation of an overall cost control program including a reduction of support personnel, consolidation of office space, as well as the reduction of certain volume related costs in the mortgage banking and resale divisions.

Ritter stated that "it is uncertain how large the current impact of a recession will be on the northeast economy or on the company. As a result, the company will continue to enforce its strict cost control programs and attempt to maximize its revenues in light of the current sluggish economic market."

#90288p5030 10/15/1990 ~PR Newswire

COLUMBUS, OHIO (OCT. 15) PR NEWSWIRE - American Electric Power (NYSE: AEP) today reported third quarter earnings of $129,078,000, a decrease of 20.7 percent from the $162,803,000 earned in 1989. Earnings per share for the quarter were 70 cents, a decrease of 14 cents or 16.7 percent from the 84

cents earned in 1989.

For the 12 months ended Sept. 30, earnings decreased 8 percent to $563,280,000 from $612,188,000, and earnings per share decreased 18 cents to $2.98 from $3.16 for the same period a year earlier.

Earnings per share for the current three-month and 12-month periods reflect a decrease in the average number of shares outstanding from a recently completed common stock repurchase plan, which reduced the shares outstanding by 9,000,000 shares.

Operating revenues for the third quarter were $1.333 billion, an increase of 2.7 percent from $1.297 billion in 1989. For the 12 months, revenues were $5.274 billion, an increase of 5.7 percent from $4.990 billion reported a year ago. The revenue increases for both periods reflect increased levels of relatively less profitable wholesale sales to unaffiliated utilities.

W.S. White, Jr., AEP chairman and chief executive officer, said that although revenues increased in both comparative periods, earnings and earnings per share declined in the 12-month period primarily as a result of (a) the commercial operation of a subsidiary's new generating unit in December 1989, the cost of which is not yet fully reflected in revenues, (b) the negative effect on retail sales of unseasonably mild winter weather in the first quarter of 1990 and a cooler summer in 1990, and (c) the recordation in the third quarter by Ohio Power Company, a subsidiary, of a $31 million pre-tax provision for estimated fuel cost losses due to the establishment of a cap on affiliated coal prices in its Ohio retail jurisdiction.

American Electric Power is the parent holding company of eight operating electric utilities providing service to 7 million people in Ohio, Indiana, Michigan, Kentucky, Virginia, West Virginia and Tennessee.

DALLAS (OCT. 15) PR NEWSWIRE - J.C. Penney Co. Inc. announced today the public offering of $250 million of 10 percent notes due Oct. 15, 1997 at par, to yield 10 percent.

The notes may not be redeemed prior to their maturity on Oct. 15, 1997. The company will use the net proceeds from the offering for general corporate purposes. Pending any specified application, the net proceeds may be initially invested in short-term marketable securities or applied to the reduction of short-term indebtedness.

The company is a major retailer and the dominant portion of its business consists of providing merchandise and services to consumers through stores, including catalog operations. The company markets predominantly family apparel, shoes, jewelry, accessories and home furnishings.

The First Boston Corp. is the sole underwriter offering the notes.

DETROIT (OCT. 15) PR NEWSWIRE - Cadillac Motor Car reported strong sales for the opening 10-day period of the 1991 model year. The luxury car leader posted sales of 8,751 units for the first 10 days of October -- up more than 38 percent -- compared to the same period last year when 6,205 units were sold.

Sales gains were posted across all models with De Ville/Fleetwood sales leading the way with a 46.5-percent hike. Sales of the two models were 5,999 units compared to 4,096 during the initial period in 1990.

Eldorado and Brougham sales were also up significantly, 31.7 percent and 25.8 percent, respectively, compared to the same period last year.

"This strong sales report certainly is encouraging at the start of a new model year," according to John O. Grettenberger, Cadillac general manager and General Motors vice president. "Coupled with our recent winning of the Malcolm Baldrige National Quality Award, this demonstrates strong consumer confidence in Cadillac's commitment to quality and customer satisfaction."

WAYNE, PA (OCT. 15) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) announced today that it has entered into an agreement in principle to acquire National Computer Systems Disaster Recovery Services (DRS), the disaster recovery division of Minneapolis-based National Computer Systems Inc. (NASDAQ: NLCS) (NCS).

In addition to acquiring DRS, NCS and SunGard would engage in an exclusive joint marketing effort for the sale of disaster recovery services to NCS's Financial Systems customers, and NCS would continue to provide software application support to NCS Financial Systems customers in the event of a disaster. The proposed transaction, which is scheduled to close in the fourth quarter of 1990, is subject to approval of the board of directors of each company and to execution of a definitive agreement.

DRS provides comprehensive disaster recovery services for users of DEC and Prime computers. DRS provides hotsite and coldsite backup facilities to customers throughout the United States. The facilities and employees of DRS would remain in Atlanta and would represent SunGard Recovery Services' fifth hotsite location, in addition to SunGard's existing IBM hotsite facilities in Philadelphia, Chicago and San Diego and its Unisys hotsite in suburban Philadelphia.

SunGard Data Systems is the pioneer and a leading provider of comprehensive computer center disaster recovery services. SunGard also is the only large specialized provider of proprietary investment support systems to the financial services industry. Its common stock is reported on the NASDAQ National Market Systems under the symbol SNDT.

Terms of the proposed transaction were not announced. SunGard representatives stated that the acquisition is not expected to materially affect the company's financial results for 1990.

WHITE PLAINS, N.Y. (OCT. 15) PR NEWSWIRE - Eastchester Financial Corporation (NASDAQ: ECFC) said today that it will increase its loan loss reserve by $6.4 million for the third quarter, resulting in a loss for the third quarter ended Sept. 30, 1990.

The company stated that this will bring the reserve to $9.1 million representing 2.7 percent of its loan portfolio and other real estate owned. The $6.4 million increase is the direct result of the further deterioration of

the real estate market in its market area.

Eastchester had previously announced on Oct. 8, 1990, a new agreement with North Fork Bancorporation providing for the acquisition of Eastchester. That announcement stated that Eastchester planned to make a substantial addition to its loan loss reserve and that the new agreement with North Fork reflected these plans. Easthchester does not expect that the increase announced today will have an adverse effect on the proposed acquisition of Eastchester by North Fork.

NEW HAVEN, Conn. (OCT. 15) PR NEWSWIRE - Cognitive Systems, Inc. (NASDAQ: CSAI) today announced financial results for the company's third fiscal quarter ended Aug. 31, 1990. During that period, operating revenue was $602,000 vs. $817,000 for the fiscal quarter ended Aug. 31, 1989.

Operating expenses were $1.1 million for the fiscal quarter ended Aug. 31, 1990, as compared to $939,000 for the corresponding period of 1989. The company's loss for its third fiscal quarter was $505,000, or $.19 per share, as compared to a gain of $308,000, or $.11 per share, during the corresponding quarter of fiscal year 1989. During the third quarter of fiscal 1989, the company recognized approximately $430,000 in non-recurring income related to the settlement of all outstanding claims against the company arising from unauthorized speculative securities transactions by its former chief financial officer. Reimbursable expenses to subcontractors related to the company's contract with Defense Advanced Research Projects Agency in the amount of $267,000 had the effect of increasing both revenues and expenses during the third quarter of fiscal 1990 by the same amount.

"Several important customers modified their plans for incorporation and use of CSI applications, resulting in sharply lower revenues for the quarter," said Steve Mott, president and chief executive officer. "The company had adjusted expenses going forward in order to return to profitability as soon as possible."

Cognitive Systems, Inc. specializes in building software applications that process natural language text automatically and data base processing tools that provide easy, intelligent access to information.

PHILADELPHIA (OCT. 15) PR NEWSWIRE - Conston Corp. (AMEX: KCS) today announced the results of operations for its second quarter, ended Sept. 1, 1990.

Conston, a specialty retailer of women's clothing and accessories, focuses on large size women's apparel. Since June 22, Conston has operated as a debtor-in-possession under Chapter 11 of the Federal Bankruptcy Act.

Net sales of Conston for the 26 weeks ended Sept. 1, 1990, decreased 25 percent to $65,495,000 from the comparative period in 1989, primarily due to the inadequate merchandise levels because of the interruption of shipments from suppliers, along with the closing of approximately 100 stores since its filing for bankruptcy protection. The net loss during that period increased from $2,602,000 ($.34 per share) during 1989 to $19,053,000 ($2.51 per share) in 1990 due to a $20 million reserve for restructuring costs charged during the first quarter.

For the 13 weeks ended Sept. 1, 1990, Conston's net sales decreased 38 percent to $26,967,000 from the comparative period in 1989. However, due to a revised restructuring reserve, Conston reflected a net profit of $1,045,000 ($.14 per share) for that 13-week period in 1990, as compared to a net loss of $2,407,000 ($.32 per share) during the comparable 13 weeks period in 1989.

Ira Quint, president of Conston, was quick to point out that "...these results for the past 13 weeks are not indicative of what can be expected in future quarters or for the next fiscal year. We are working very hard to cut Conston's costs, to keep its expenses to a minimum and to turn the corner. We have started to make some progress but we have a long way to go."

#90288p5065 10/15/1990 ~PR Newswire

MOLINE, Ill. (OCT. 15) PR NEWSWIRE -- Deere & Company (NYSE: DE) today announced that it is making some adjustments to its scheduled 1991 fiscal year production of agricultural machinery in response to lower retail production of agricultural machinery in response to lower retail sales during August and September.

Deere & Company Chairman and Chief Executive Officer Hans W. Becherer said, "Compared with last year, industry retail sales of large tractors were down 34 percent in September following a 5 percent decline in August, and retail sales of grain combines have also slowed."

To avoid a potential build-up of excess inventory while at the same time minimizing workforce reductions, the company plans to implement a combination of schedule reductions and one- or two-week shutdowns at some of its agricultural factories. The company indicated that similar adjustments had already been made or planned for its industrial equipment and lawn and grounds care lines in reaction to general economic conditions.

"While one can never be certain as to what is causing a change in business conditions, the gap in the U.S. government farm program resulting from stalled budget legislation and the effects of the Middle East crisis are both major and untimely concerns for farmers," Becherer said. "The company believes at this time that the slowdown in farm equipment sales is a reaction to prevailing uncertainty as most agricultural fundamentals remain favorable. The effect of weather conditions which caused late planting and, therefore, a late harvest has also delayed normal, seasonal buying patterns.

"Previously disclosed adjustments to production of our non- agricultural lines along with decreasing agricultural equipment volumes and lower results in Europe are expected to result in lower sales and earnings in the fourth quarter of 1990 compared with last year's final quarter," Becherer said. "However, we still expect to report record earnings for all of fiscal year 1990. Much of the planned shutdowns in our businesses will occur early in our next fiscal year beginning Nov. 1, adversely affecting first-quarter 1991 results. However, this should facilitate more efficient operations during the rest of the year."

#90288p5073 10/15/1990 ~PR Newswire

ARLINGTON, Va. (OCT. 15) PR NEWSWIRE - USAir today filed a motion with the U.S. Bankruptcy Court for permission to terminate its USAir Express agreement with CCAir (NASDAQ-NMS: CCAR), citing CCAir's poor operational reliability which, USAir charged, is causing confusion and harm to the flying public and mid-sized/smaller communities.

USAir said CCAir's growing inability to meet its required 96 percent completion standard causes difficulties for USAir Express passengers who "depend on reliable air commuter service in the region and use Charlotte as a connecting gateway to the national air transportation network."

USAir said flight cancellations have increased dramatically on the CCAir system over the past three months. According to USAir, during July and August 1990, CCAir's flight completion rate was approximately 94 percent and during September it dropped to 88.7 percent. These figures do not include weather cancellations -- only those caused by maintenance, operational deficiencies, and decisions over which CCAir had control.

Under its contract with all nine of its USAir Express operators, USAir has the right to cancel the affiliation with 10 days notice if a carrier fails to complete at least 96 percent of its scheduled flights in any given month.

USAir emphasized that CCAir in October removed, without prior notice, 20 flights from its published schedules, causing severe inconvenience to passengers and to USAir, which had to re-book passengers or make refunds. By the terms of the agreement, CCAir must provide 60 days notice for flight cancellations.

CCAir more recently notified USAir that additional flight cancellations will occur in November -- sharply reducing flight levels in many cities. Cancellations are not evenly distributed, according to USAir, disrupting service to some smaller cities more than others.

A basic premise of the service agreement is that the routes of CCAir and USAir link to form an integrated system of public transportation. When these scheduled linkages are interrupted due to flight cancellations, the traveling public suffers, USAir said.

USAir also noted that because CCAir flies under the USAir Express logo, the public identifies CCAir with USAir and other regional carriers using the USAir Express logo. The poor flight completion ratios have continued to harm the public's perception of USAir, despite the fact that CCAir is an independently operated firm, said USAir.

USAir Express service is provided nationwide by five independent companies

(including CCAir) and four wholly owned subsidiaries of USAir Group (NYSE: U). USAir said the same operating rules and procedures, as well as revenue sharing arrangements, apply to all, whether non-owned or owned.

USAir is preparing a contingency plan for replacement USAir Express service, which would be implemented after the bankruptcy court approves termination of the agreement.

DALLAS (OCT. 15) PR NEWSWIRE - Dallas-based Publishers Equipment Corp. today announced a recapitalization of its Motter Corp. subsidiary located in York, Pa. and Rockford, Ill. Koenig & Bauer AG, ("K&B") Wurzburg, Germany, the parent company of Koenig & Bauer-Albert, and a major shareholder of both Publishers Equipment Corp. and Motter Corp., has increased its ownership percentage in Motter Corp. in a transaction that includes $3 million cash and a liabilities reduction to the renamed KBA-Motter Corp. While KBA-Motter Corp. will remain an operating unit of Publishers Equipment Corp., K&B will acquire a 62 percent equity position.

In announcing the recapitalization, Evans Kostas, president of Publishers Equipment Corp. and KBA-Motter Corp., said the transaction significantly enhances the corporation's ability to compete worldwide while increasing its financial strength. "We will be able to offer the broadest arrary of offset, flexo, and gravure equipment to both publishers and printers, particularly in association with K&B, a world leader hl our industry."

Joining the announcement, Dr. Hans Bolza-Schunemann, president of K&B, said he has great confidence in KBA-Motter Corp.'s abilities to competitively serve its market with combined U.S. and German technologies in products manufactured in the States.

Publishers Equipment Corp., a Dallas-based public company, specializes in the design, manufacture, and marketing of web-fed presses and associated auxiliary equipment through its subsidiaries King Press Corp., Solna Web AB and Solna Web Inc.

#90288p5088 10/15/1990 ~PR Newswire

TORONTO (OCT. 15) PR NEWSWIRE - Abitibi-Price (NYSE: ABY) today reported a loss of $0.7 million, or 2 cents per common share, for its third quarter, which compares with earnings of $13.6 million, or 18 cents per share, in the

same quarter of 1989. Sales in the quarter were $757 million, compared with $816 million in 1989.

Sales and earnings were unfavorably affected by a strike, beginning Sept. 10, that closed six of the company's newsprint mills and a coated papers mill. An agreement with the Canadian Paperworkers Union was ratified in early October and is comparable to the settlement reached with other eastern Canadian forest product companies. Subsequently, the struck mills started up the week of Oct. 9.

For the first three quarters of 1990, the company reported a loss of $15.7 million, or 25 cents per common share, compared with earnings of $68.7 million or 92 cents per share, in 1989. Sales for the nine months were $2.3 billion, compared with $2.5 billion in the previous year.

Year-to-date results include an unusual charge of $42.6 million, consisting of the cost of the company's restructuring program. Without this charge, the first nine months of the year would have shown net earnings of $10.8 million, or 13 cents per common share.

"The labor disruption, soft markets for many of our products, the write-off of restructuring costs and the higher value of the Canadian dollar against the U.S. dollar are all contributing to make 1990 a difficult year," said Bernd K. Koken, chairman and chief executive officer. "These events were partially offset as we began to realize the benefits of our restructuring efforts and the June 1st newsprint price increase." A further price increase of $35 per ton has been announced for Jan. 1, 1991.

Newsprint markets tightened during the quarter as a significant portion of North American capacity was affected by strikes. Most printing paper markets remain soft, with the exception of directory and supercalendered grades.

The Paper Group also continued to build for the future. "The successful startup of the newsprint mill at Claiborne, Ala., and the addition of recycled newsprint production at Augusta, Ga., are very representative of the company's skill in implementing new projects on budget and on schedule," stated Koken.

In the Diversified Group, operating profit before unusual items continued to improve both for the year and the quarter despite soft markets. Building Products operating profit declined from last year.

Abitibi-Price, an integrated forest products company with headquarters in Toronto, is a producer of newsprint, uncoated groundwood papers, coated papers and building products and is a converter and distributor of papers and other information-related products.

#90288p5090 10/15/1990 ~PR Newswire

NEW CASTLE, Pa. (OCT. 15) PR NEWSWIRE - John W. Sant, Chairman and chief executive officer of First Western Bancorp Inc. (NASDAQ: FWBI), today reported that net income for the nine months ended Sept. 30, 1990, was $4,182,000 or $2.15 per share, up 5.9 percent over last year's nine month total earnings of $3,947,000 or $2.03 per share.

For the third quarter ended Sept. 30, 1990, net income was $1,280,000 or $0.66 per share, a 4.0 percent decrease from last year's third quarter ended Sept. 30, 1989, net income of $1,333,000 or $0.69 per share. Net income for the third quarter of 1990 was down 12.6 percent from the three month period ended June 30, 1990, when net income was $1,465,000 or $0.75 per share.

First Western's total assets as of Sept 30, 1990, were $582,826,000, an increase of 3.5 percent over Sept. 30, 1989, total assets of $563,296,000. Over the last 12 months, deposits are up 3.9 percent to $518,045,000, while net loans have increased 12.7 percent to $387,849,000. Shareholders' equity has increased 9.1 percent from $40,002,000 at Sept. 30, 1989, to $43,645,000 at Sept. 30, 1990. Book value per share at Sept. 30, 1990, was $22.44, as compared to $21.02 at Dec. 31, 1989.

First Western's third quarter net income was down in comparison to last year's third quarter net income primarily due to an increase in the provision for possible loan losses from $270,000 in the third quarter of 1989 to $770,000 in the comparable period this year, resulting in an increase in the allowance for possible loan losses from 1.09 percent of net loans outstanding at June 30, 1990, to 1.24 percent at Sept. 30, 1990. This increase was determined to be prudent by management in light of a slowing national and regional economy and its possible effect on First Western's loan portfolio. For the nine months ended Sept. 30, 1990, the total provision for possible loan losses was $1,285,000 as compared to $780,000 for nine months ended Sept. 30, 1989. Net income increased for the first nine months of 1990 over the comparable period in 1989, despite the increased provision for possible loan losses, primarily due to a 7.6 percent increase in net interest income, and a 17.0 percent increase in total other income, somewhat offset by a moderate 4.3 percent increase in total other expenses and a 32.5 percent increase in income tax expense. For the three month period ended Sept. 30, 1990, as compared to the three months ended Sept. 30, 1989, net interest income was up 8.8 percent, while total other income was up 13.0 percent. Total other expenses were only up 1.5 percent and income tax expense grew by 18.2 percent.

At First Western's Oct. 15, 1990, board of directors meeting, a cash dividend of $0.275 per share on 1,944,642 shares of common stock issued and outstanding was declared, with a record date of Oct. 30, 1990, and a payable date of Nov. 6, 1990. Total dividends year-to-date through Sept. 30, 1990, are up 8.5

percent primarily as a result of the increase in the quarterly cash dividend last quarter.

First Western Bancorp Inc., headquartered in New Castle, Pa., is the parent of First National Bank of Western Pennsylvania and Beaver Trust Co., with 18 offices in Lawrence, Beaver, Butler and Allegheny counties.

#90288p5094 10/15/1990 ~PR Newswire

COSTA MESA, Calif. (OCT. 15) PR NEWSWIRE - Parker Automotive Corp. (NASDAQ: PKRA) today announced that it has completed the second stage of a $2 million private placement in which Cruttenden & Co., of Newport Beach, Calif., served as adviser to the company.

On approximately, Sept. 1, 1990, the company offered unregistered shares of its common stock for sale to professional investment firms with a goal of raising $2 million in new equity. As of Oct. 9, 1990 (the close of the offering), the placement had raised $5.3 million in new equity, representing a 265 percent oversubscription by the investment community.

"We are extremely gratified at the overwhelming success of this offering, considering market conditions," said Michael E. Parker, chief executive officer of Parker Automotive Corp. "To oversubscribe an offering by this magnitude during one of the worst bear markets in recent memory indicates to us that the investment community recognizes both the tremendous achievements of the company during this fiscal year, and the bright prospects for Parker Automotive and its CarbonClean products in the future," continued Parker. Proceeds from the placement will be used to continue the expansion of the company's operations.

Simultaneously, Parker Automotive announced that revenues for the six month period ended Aug. 31, 1990, were $7,745,400, compared to revenues of $1,580,900 for the corresponding period in 1989. Revenues for the three month period ended Aug. 31, 1990, were $3,614,000, compared to revenues of $1,301,900 for the corresponding period in 1989. Earnings for the three month period ended Aug. 21, 1990, were $205,800 ($.02 per share), compared to a loss of $48,000 ($.01 per share) for the corresponding period in 1989.

Earnings in the second quarter were adversely affected by postponement of a major shipment of the company's CarbonClean products to Saudi Arabia due to the Iraqi invasion of Kuwait. The Saudi shipment has subsequently been made and will be reflected in the company's third quarter results.

The patented CarbonClean product line cleans fuel system contaminants from

internal combustion engines, resulting in drastically reduced exhaust emissions, restored fuel economy and engine performance. CarbonClean has been tested and approved by numerous independent agencies worldwide, and is currently distributed in more than 60 nations.

"Demand for our products is growing," stated Parker. "Export markets are continuing to expand, and domestic sales are increasing monthly. We feel that the recent surge in gasoline and diesel fuel prices has been a significant contributing factor to increased demand, and also, the mounting worldwide concern with reducing vehicular exhaust emissions. As CarbonClean has proven to increase fuel economy 3 percent or more while reducing noxious emissions up to 95 percent, we expect that the demand will continue to grow," continued Parker.

Parker Automotive is headquartered in Costa Mesa. Manufacturing facilities are in Fountain Valley, Calif., and sales offices are maintained worldwide.

#90288p5095 10/15/1990 ~PR Newswire

HOUSTON (OCT. 15) PR NEWSWIRE - Reading & Bates Corp. (NYSE: RB) announced today that it has proposed a major recapitalization plan to its senior creditors after extensive discussions with a negotiating committee representing those creditors.

The proposed recapitalization plan, if implemented, would result in the elimination of approximately $267.2 million of senior debt and lease obligations and cancellation of a contingent debt obligation of $50 million issued to certain senior creditors in the company's 1989 debt restructuring in exchange for the issuance to those senior creditors of approximately 183 million shares of the company's common equity. The $267.2 million of obligations to be eliminated is based on principal and interest expected to be outstanding at Dec. 31, 1990. The remaining senior debt and lease obligations issued in the 1989 restructuring would be exchanged for senior secured notes and lease obligations in an aggregate principal amount not to exceed $89.6 million at Dec. 31, 1990.

The company's outstanding common equity now consists ofapproximately 13.9 million shares of common stock and approximately 23.9 million shares of Class B common stock, including 22.6 million Class B shares issued to the senior creditor group as part of a debt restructuring undertaken by the company in 1989. The Class B common stock is non- voting and is convertible into an equivalent number of shares of common stock. The recapitalization would increase the percentage of the company's outstanding common equity owned by the senior creditor group from approximately 59.8 percent to approximately 89.4 percent.

The recapitalization plan also contemplates that the company may elect to have a rights offering pursuant to which the non-creditor holders of the company's common stock, as of a record date to be established later, would be given the right to purchase one quarter of one share for each share of common stock owned at a purchase price of $2.05 per share. If fully exercised, the rights offering would result in approximately 3.8 million additional shares of the company's common stock being issued in exchange for approximately $7.8 million in proceeds to the company.

The plan also contemplates a new stock option plan under which the company's management would be granted options on approximately 9.2 million shares of the company's common stock.

D. Keith McIntosh, chairman of the board and CEO of Reading & Bates, said that the company intends to seek agreement with all of its senior creditors and to finalize documentation to accomplish the recapitalization as soon as possible. The recapitalization plan would also be subject to the approval of the company's stockholders at a special meeting currently anticipated to be held on Dec. 28, 1990.

As a contingency, if requisite agreement of the company's senior creditors cannot be obtained, the recapitalization plan contemplates that under certain circumstances the company would seek to implement the plan as a "prepackaged" Chapter 11 plan of reorganization in bankruptcy court. The "prepackaged" plan contemplates that the company's creditors, other than the senior creditors involved in the 1989 debt restructuring, would remain unimpaired. The company expects that it would enter bankruptcy only if the proposed recapitalization plan could not otherwise be accomplished.

McIntosh indicated that the company faces serious cash flow problems arising from certain accrued interest obligations due Dec. 31, 1990 and continuing with quarterly principal repayments that commence in March 1991. Based upon current projections these cash obligations cannot be met, and the company could be in default of such obligations as early as the end of December 1990. The proposed recapitalization plan would solve these problems and substantially improve the company's capital structure.

McIntosh further stated that "the successful completion of this proposed recapitalization would enable Reading & Bates to survive and participate in the future growth of the offshore contract drilling industry."

Reading & Bates Corporation, a New York Stock Exchange listed company, engages in offshore drilling throughout the world and provides engineering services and equipment for water treatment systems.

HOUSTON (OCT. 15) PR NEWSWIRE - Kelley Oil Corp. (NASDAQ: KOIL) ("Kelley Oil"), managing general partner of Kelley Partners 1990 Development Drilling Program, a Texas limited partnership (the "partnership"), announced today the completion of a public offering for 9,828,659 units of limited partner and general partner interests in the partnership. The units were offered on a preemptive basis to depositary unitholders of Kelley Oil & Gas Partners Ltd. (AMEX: KLY) ("Kelley Partners") at a price of $3 per unit for an offering amount of $29,485,977, which will be combined with the general partners' contribution of $1,215,792, for a total of $30,701,769. The units were subscribed approximately 26 percent by depository unitholders of Kelley Partners, an additional six percent by officers and directors of Kelley Oil and the balance by Kelley Oil.

Tucker Anthony Inc. and Eppler, Guerin & Turner, Inc. acted as selected agents along with various other selling agents for the offering.

The partnership was formed to conduct development drilling activities on properties of Kelley Partners, located primarily in Louisiana, and is the fourth development drilling program sponsored by Kelley Oil for this purpose. The partnership will conduct development operations in conjunction with Kelley Partners, which will also have a 20 percent reversionary interest in the partnership's development activities.

Kelley Oil, an independent oil and gas producer, serves as the managing general partner of Kelley Partners, in which it owns interests aggregating 6.56 percent. It also serves as managing general partner of Kelley Partners 1988 and 1989 Development Drilling Programs and owns interests of 48.11 percent and 44.32 percent, respectively, in these publicly held programs. Interests in the initial 1987 development drilling program were acquired by Kelley Partners in an exchange offer completed in February 1990.

MIAMI (OCT. 15) PR NEWSWIRE - DWG Corp. (AMEX: DWG) today announced in a mailing to its shareholders the final results of its Annual Meeting of Shareholders held on Oct. 12, 1990. A copy of that mailing follows:

Our Shareholders: DWG Corporation held its Annual Meeting of Shareholders on Friday, Oct. 12, 1990. At the meeting, approximately 91 percent of the outstanding shares of DWG entitled to vote were present in person or by proxy. Of the shares represented at the meeting over 96 percent voted for the

nominees for directors of your Board of Directors, with each nominee receiving over 22,750,000 votes. Also, the Company's new Management Incentive Plan was approved by a large majority, with less than 5 percent voting against. Finally in the ratification of the selection of auditors over 98 percent of the votes were in favor of ratification of the selection of Arthur Andersen & Co.

In connection with the meeting, certain shareholders gave notices purporting to request that voting on the election of directors be cumulative. The Company was advised by Ohio counsel that such notices did not conform with the requirements of the Ohio General Corporation Law or the Company's Code of Regulations for cumulative voting and the Inspectors of Election found that cumulative voting was not in effect. Nevertheless, shareholders who wished to vote cumulatively were offered the opportunity at the meeting to submit a cumulative voting ballot in addition to any regular ballot or proxy they were entitled to vote. The overwhelming majority of the votes cast on a cumulative basis were invalid because they were not executed by shareholders who were entitled to vote. Nevertheless, even if all such votes had been valid and cumulative voting had been in effect, there were insufficient votes even to elect a single director and the results of the election would have been unchanged.

On behalf of your Board of Directors and Management I again want to thank shareholders for the overwhelming support evidenced by their vote at such meeting.

#90288p5108 10/15/1990 ~PR Newswire

AUSTIN, Texas (OCT. 15) PR NEWSWIRE - Communications Transmission Inc. (NASDAQ: CTIA) announced today that the third quarter of 1990 (ended September 30) resulted in a net loss of $3.6 million or 35 cents per common share. Revenues, including $15.2 million from an early termination contract settlement with ITT, totaled $112.3 million. The net loss compares with a prior year net loss of $14.9 million ($1.43 per common share) on revenues of $96.6 million. As reported previously, earlier this year CTI elected to change its fiscal year to a calendar year basis.

The total net loss for the first nine months of 1990 was $30.2 million or $2.90 per common share on revenues of $305.5 million (including $15.2 million from the ITT contract settlement) compared to a net loss of $25.5 million or $2.44 per common share on revenues of $303.0 million for the first nine months of 1989.

CTI's results for both periods include 100 percent of the net loss reported by its approximately 64 percent owned (on a fully diluted basis) subsidiary, ALC Communications Corp. (ALC).

The positive results of achieving the successfully completed financial restructuring in June 1990 began to be seen during the third quarter. ALC revenues from billable minutes increased by 7 percent over the prior year's third quarter and ALC reported its first quarterly operating income ($634,000) since the second quarter of 1989. ALC also reported that traffic on its long-distance network grew for the third consecutive quarter. Meanwhile, CTI's two unconsolidated 50 percent owned fiber optic networks in Texas and Michigan each continue to show favorable revenue and operating income growth.

FOREST CITY, IOWA (OCT. 15) PR NEWSWIRE - Winnebago Industries Inc., today reported revenues of $85,883,000 for the fourth quarter of fiscal 1990 ended Aug. 25, 1990. Revenues for the same period of fiscal 1989 were $89,528,000.

A net loss of $3,835,000, equal to 15 cents a share, was recorded for the fourth quarter of fiscal 1990, compared with a net loss of $11,276,000, equal to 46 cents a share, for the same period one year ago.

For fiscal 1990, the company reported a net loss of $17,835,000, equal to 72 cents a share, compared with a loss of $4,675,000, equal to 19 cents a share last year. Revenues totaled $335,098,000, versus revenues of $437,500,000 for fiscal 1989.

According to Winnebago Chief Operating Officer Fred Dohrmann, ''Results of the fourth quarter reflect losses at the company's Cycle Sat subsidiary and the Commercial Vehicle Division, offset in part by an operating income from the company's recreation vehicle segment. Additionally, impacting the fourth quarter was an Internal Revenue Service audit settlement which had an unfavorable net impact of $2,300,000.''

Revenues for fiscal 1990 were affected by lower motor home sales volume, as well as a shift to lower priced units. While the sales of traditional motor homes were somewhat softer in fiscal 1990, the company has been able to substantially increase sales volume of the Winnebago Warrior and Itasca Spirit micro-mini motor homes, a growing segment of the RV industry. ''Between January and July, 1990, Winnebago Industries has been able to increase market share, garnering more than 60 percent of all micro-mini retail sales,'' Dohrmann said.

Results for fiscal 1990 were adversely impacted by lower sales volumes of recreational vehicles, operating losses at the company's Cycle-Sat subsidiary and the commercial vehicle division.

HOUSTON (OCT. 15) PR NEWSWIRE - Pool Energy Services Co. (NASDAQ: PESC) announced today the completion of the sale of its Oiltools operations to Antah Risjad Ltd., a company controlled by investors located in Malaysia and Indonesia. The sale price was approximately $25.5 million, of which $21.5 million was paid in cash at closing with the remainder to be paid in six months. Approximately $3 million of the proceeds were used to retire debt, leaving Pool virtually debt free. Jim Jongebloed, president of Pool, stated that this sale provided the company an excellent opportunity to improve its liquidity and to concentrate its attention on its core business: providing drilling and workover services in the United States and overseas.

The Oiltools companies which were sold engage principally in selling and renting oilfield equipment exclusively outside the United States.

Pool Energy Services Co. common stock is traded on NASDAQ under the symbol PESC.

#90288p5115 10/15/1990 ~PR Newswire

SAN DIEGO (OCT. 15) PR NEWSWIRE - First National Corp. (AMEX: FN), parent

company of First National Bank reported record 1990 third quarter earnings of $1,812,000, an increase of 26 percent over earnings of $1,442,000 for the third quarter ending in 1989.

Fully diluted earnings per share were 55 cents which compared favorably to 1989 third quarter fully diluted earnings of 43 cents per share in 1989. For the overall nine-month period, net earnings increased 21 percent from $3,887,000 in 1989 to $4,706,000 in 1990. Nine-month fully diluted earnings per share were $1.41 in 1990, an increase of $1.18 in 1989.

Malin Burnham, chairman of First National Corp. said, "Although we are disappointed in the recent performance of the company's common stock price, we are confident that our continued impressive performance will eventually result in a realistic market price."

As of Sept. 30, 1990, total assets reached $595,735,000, compared to $521,740,000 at this same time last year, a 14 percent increase. Loans were up 13 percent to $391,561,000 and deposits rose 12 percent to $537,120,000 at the end of third quarter 1990.

Net interest income, on a fully tax equivalent basis, increased by 22 percent in the third quarter of 1990 over 1989 because of a 9 percent increase in average earning assets and to the increase in net interest margin which grew to 7.08 percent from 6.35 percent. The margin increased significantly because of the growth of average demand deposits which went up by 45 percent.

Other operating income increased 56 percent in the third quarter of 1990 over 1989 because of the increase in the bank's mortgage loan servicing portfolio which grew from $1.8 billion at Sept. 30, 1989 to $3.7 billion at Sept. 30, 1990.

Non-interest expense increased 29 percent in the third quarter of 1990 over 1989. Increases were primarily in the salaries and benefits area with the addition of loan servicing personnel for the mortgage banking operation. Client service expense also increased which is directly attributable to the increase in demand deposits.

The provision for loan losses increased 35 percent in the third quarter of 1990 over 1989, which brought the allowance for loan losses to loans to 1.24 percent. The ratio of net charge-offs to average loans for the 1990 third quarter was .53 percent, bringing the nine-month ratio to .32 percent (annualized).

Non-performing assets were $3,958,000 on Sept. 30, 1990. These assets represent 1.01 percent of total loans and other real estate owned vs. .57 percent a year ago and .68 percent at June 30, 1990. "Although we are not happy with this increase," said Mike West, president and chief executive officer, "it primarily represents just one larger credit that was recently

placed in this status. Because we're a business bank making larger commercial loans, the impact of one or two credits being placed in this status does increase our ratios." West continued, "However, we feel our current level of non-performers should not be a source of concern for investors, especially since the allowance for loan losses to non- performing loans was 123 percent at Sept. 30, 1990. Also, there was no other real estate owned."

First National Bank currently has six banking offices in San Diego County, one in Riverside County and a loan production office in Bakersfield, Calif. It plans to open its seventh banking office in San Diego's Golden Triangle area late in the fourth quarter.

MOSCOW (OCT 15) - THE SOVIET UNION WILL DO ALL IT CAN TO MAKE THE BEST POSSIBLE USE OF THE POTENTIAL FOR EXPANDING MUTUALLY ADVANTAGEOUS COOPERATION WITH CHILE, SOVIET FOREIGN MINISTRY'S LATIN AMERICAN DEPARTMENT DEPUTY HEAD YAN BURLIAI TOLD A BRIEFING HERE TODAY.

ASKED WHAT IMPORTANCE MOSCOW ATTACHES TO THE DEVELOPMENT OF CULTURAL AND OTHER TIES BETWEEN THE SOVIET UNION AND CHILE, THE SPOKESMAN SAID THAT CHILE WAS ONE OF LATIN AMERICA'S MOST IMPORTANT COUNTRIES.

RECALLING THAT RELATIONS BETWEEN THE TWO COUNTRIES WERE RESUMED THIS YEAR AFTER A DEMOCRATIC GOVERNMENT HEADED BY PRESIDENT PATRICIO EILVIN TOOK OFFICE, BURLIAI SAID "WE SPOKE IN FAVOUR OF EXPANDING RELATIONS BETWEEN OUR COUNTRIES IN ALL SPHERES. WE BELIEVE THAT DESPITE THE GREAT DISTANCE BETWEEN THE TWO COUNTRIES, THERE EXISTS GREAT POTENTIAL FOR MUTUALLY ADVANTAGEOUS COOPERATION IN THE INTERESTS OF THE PEOPLES OF THE TWO COUNTRIES. WE SHALL MAKE EVERY EFFORT TO REALISE THIS POTENTIAL MOST EFFECTIVELY".

A BRAZILIAN JOURNALIST ASKED ABOUT SOVIET RELATIONS WITH CUBA. THE SPOKESMAN NOTED THAT THEY WERE DEVELOPING ON THE BASIS OF THE PRINCIPLES LAID DOWN IN THE TREATY OF FRIENDSHIP AND COOPERATION, SIGNED BY PRESIDENT MIKHAIL GORBACHEV AND CUBAN LEADER FIDEL CASTRO LAST YEAR.

"THESE PRINCIPLES ENVISAGE MUTUALLY ADVANTAGEOUS COOPERATION, POLITICAL DIALOGUE AND INTERACTION IN THE WORLD ARENA," THE SPOKESMAN SAID.

"WE FAVOUR ACTIVE DEVELOPMENT OF NEW FORMS OF COOPERATION AND BELIEVE THAT THE ESTABLISHMENT OF DIRECT CONTACTS BETWEEN SOVIET AND CUBAN ENTERPRISES CAN RESULT IN A CONSIDERABLE INCREASE OF TRADE AND COOPERATION BETWEEN THE TWO COUNTRIES".

BURLIAI POINTED TO THE NOTABLE ROLE PLAYED BY CUBA IN INTERNATIONAL RELATIONS.

"ELECTED TO THE U.N. SECURITY COUNCIL, CUBA DEMONSTRATES THE CONSTRUCTIVE CHARACTER OF ITS FOREIGN POLICY. WE MAINTAIN INTERACTION WITH CUBAN COMRADES CONCERNING ALL PROBLEMS OF IMPORTANCE FOR THE PEOPLES OF THE WORLD AND WILL SEEK TO FURTHER DEVELOP THIS INTERACTION".

MOSCOW (OCT 15) TASS - PRESIDENT MIKHAIL GORBACHEV TODAY RECEIVED A GROUP OF VISITING CANADIAN AND U.S. BUSINESSMEN.

THE MEETING WAS HELD IN AN ATMOSPHERE OF "WELL-WISHING, MUTUAL UNDERSTANDING AND SINCERE INTEREST".

THE BUSINESSMEN INCLUDED ALBERT REICHMANN, PRESIDENT OF THE OLYMPIA AND YORK COMPANY, AND THE HEADS OF PENSION FUNDS OF MAJOR NORTH AMERICAN CORPORATIONS -- P. ALDRICH, R. BURNS, T. CROFT, R. CAVANO, W. DECK, D. DUTSON, B. EAGLE, S. HUDSON-WILSON, M. PALMER, H. OCHOA-BRILLEMBURG, R. OLSON, AND K. PATTERSON.

THE PENSION FUNDS ALONE CONTROL A TOTAL OF THREE THOUSAND BILLION DOLLARS.

AT THE BUSINESSMEN'S REQUEST, GORBACHEV COMMENTED ON MAJOR PROBLEMS FACING PERESTROIKA AND SPOKE ABOUT PRINCIPLES OF ECONOMIC STABILISATION AND THE TRANSITION TO A MARKET ECONOMY, AND PROSPECTS FOR THE COUNTRY'S REORGANISATION.

SPECIFICALLY, HE SPOKE ABOUT THE NEED TO COMBINE "ALL- IMPORTANT CRITERIA OF THE COUNTRY'S ORGANIC PARTICIPATION IN WORLD DEVELOPMENT AND A THOROUGH ACCOUNT OF ITS HISTORICAL PECULIARITY AND PECULIARITIES OF SOCIETY".

THE SIDES DISCUSSED POSSIBILITIES FOR ECONOMIC COOPERATION IN THE NEW CONDITIONS, WHICH INCLUDE LEGAL GUARANTEES FOR THE ACTIVITY OF FOREIGN INVESTORS AND BUSINESSMEN, ACCEPTED THROUGHOUT THE WORLD.

THE BUSINESSMEN EXPRESSED THEIR READINESS TO ESTABLISH MUTUALLY ADVANTAGEOUS TIES WITH AND RENDER CONSULTATIVE AND OTHER SERVICES TO SOVIET ORGANISATIONS.

#90288u0089 10/15/1990 ~United Press International
MOSCOW (OCT. 15) UPI - Worshipers crowded into famed St. Basil's Cathedral to celebrate the first religious service in Red Square in 70 years.

The multicolored, onion-domed St. Basil's, even more of a symbol of Russia than the Kremlin, had been empty of religious congregations since 1918 when it was made into a historical museum.

But in the new religious freedom of perestroika, authorities consented to allow Russian Orthodox believers to hold services periodically in the 16th

century cathdedral.

Worshippers Saturday night crowded into the dazzling landmark while others stood outside in cobble-stoned Red Square.

Then Sunday morning as bells chimed, Patriarch Aleksii II, the head of the Russian Orthodox Church, led a procession of Moscow clergy around the church in Red Square.

Inside, the patriarch then celebrated the Orthodox holiday of Intercession, marking a vision by believers of the Virgin Mary who spread her cover over the Christians fighting a battle to save Constantinople in the 10th century.

Called St. Basil's because one of its side altars contains the relics of the saint, the shrine is also known as the Intercession Cathedral.

St. Basil's was ordered built in 1555 by Czar Ivan the Terrible, who was so dazzled by structure that legend says the autocrat had the eyes of the two architects, Barma and Postnik, gouged out lest they produce anything more majestic.

Altered and burned down many times, St. Basil's has had a dramatic history. Napoleon, who invaded Moscow in 1812, ordered the cathedral burned down but the plans were not carried out. Instead Muscovites burned down their entire city to force Napoleon from the capital.

On taking power in November 1917, the communists closed thousands of churches and eventually converted St. Basil's into a state historical museum.

Rumors circulated in the late 1940s that dictator Josef Stalin was going to dynamite the church in the same way that he razed Christ the Savior Cathedral, destroying what was Moscow's second most beautiful shrine. Today, it is the site of Moscow's large outdoor swimming pool.

Believers who got wind of Stalin's plans laid down in front of St. Basil's to prevent the dynamite charges from being set off.

A group of believers has asked the government to give back the cathedral to the church. So far, secular authorities have consented to periodic religious services.

As part of the religious reawakening in the country, believers are also collecting money to rebuild the Christ the Saviour Cathedral razed by Stalin.

A freedom of conscience law passed last month allows the church to set up its own schools and to engage in charity work. It also guarantees separation of church and state, and ends the state funding of atheist propaganda.

#90288u0093 10/15/1990 ~United Press International
(OCT. 15) UPI - Less than a week ago it was announced that composer-conductor Leonard Bernstein was retiring from the concert stage for health reasons. On Sunday night, he died at his home in Manhattan... with his doctor and son at his bedside. A private funeral is planned. Bernstein was the first American-born musician to become music director of a major American symphony, the New York Philharmonic Orchestra. He remained active as its director laureate for more than two decades after his retirement in 1969.

Two Las Vegas Strip hotel-casinos were aired out and operations have resumed after 107 gamblers and tourists were overcome by an apparent release of sewer gas Sunday. Hospital officials say most of the people were treated and released. Health officials say a sewer line problem was reported east of the Strip earlier and may have been related to the later incidents at the resorts.

NO one was injured Sunday night in the crash of a Marine Corps helicopter in Glen Ellyn, Illinois... west of Chicago. A White House spokesman says the accident occurred as the chopper was practicing for the arrival of President Bush on Tuesday. The spokesman says the crash will NOT affect the president's campaign appearance on behalf of Republican gubernatorial candidate Jim Edgar.

#90288u0095 10/15/1990 ~United Press International
LAHORE, PAKISTAN (OCT. 15) UPI - President Ghulam Ishaq Khan acted legally last August when he sacked Prime Minister Benazir Bhutto and her Cabinet and dissolved the National Assembly, Pakistan's high court ruled.

''The presidential order dissolving the National Assembly and directing that the prime minister and the Cabinet shall cease to hold office forthwith was validly passed,'' the court said Sunday in its ruling from the northeastern city of Lahore.

Ishaq Khan dismissed Bhutto's 20-month-old administration Aug. 6 on grounds of corruption, nepotism and of failing to control law and order. He appointed opposition leader Ghulam Mustafa Jatoi as interim prime minister until elections Oct. 24.

Bhutto's Pakistan Peoples Party challenged the order as unconstitutional in the high courts in Lahore and in the southern city of Karachi. The Karachi court has not announced its decision.

''We find that the president was justified in forming the opinion that the government of the federation could not be carried on in accordance with the provisions of the constitution and that an appeal to the electorate was necessary,'' the Lahore court said.

The PPP is expected to appeal the decision in the supreme court but the ruling is a setback to her hopes of returning to power in next week's elections.

Bhutto already faces charges of official misconduct before special disqualification courts that were set up by Ishaq Khan in what many believe was an attempt to bar her from the elections.

Bhutto denies the charges, but if found guilty she could be barred from politics for seven years.

Last week, authorities arrested her husband, businessman Asif Ali Zardari, on charges of kidnapping and extortion. Zardari, a PPP candidate for the National Assembly, was remanded to custody until Oct. 24.

#90288u0102 10/15/1990 ~United Press International

ADDIS ABABA, ETHIOPIA (OCT. 15) UPI - Ethiopian government troops have won a series of convincing victories against northern rebels in recent weeks, President Mengistu Haile Mariam said in remarks reported by The Ethiopian Herald.

''The enemy was dealt a crushing blow by by the revolutionary armed forces and was forced to flee in disarray and humiliation,'' Mengistu said in the newspaper Sunday, confirming reports that government troops and planes were inflicting heavy casualties on Eritrean rebels.

The Eritrean People's Liberation Front has fought a fierce 29-year war aimed at winning back independence for coastal Eritrea, which was self-governed under an Ethiopian federation from 1952 to 1962.

The rebels made significant gains in February when they captured the vital Red Sea port of Massawa, 470 miles north of Addis Ababa, cutting off sea and road supplies to about 300,000 government soldiers 40 miles inland at Asmara.

Western diplomats who visited the area earlier this year said fighting and casualties had not been seen on such a scale since World War I. Hundreds of thousands are thought to have died in all-out, heavily mechanized battles.

Massawa is the only port in northern Ethiopia, and with it rebels held the key to feeding about 4 1/2 million people threatened with famine this year in Ethiopia this year.

Government troops, who still control the road out of Massawa, launched a major offensive in August to try to dislodge the EPLF.

Mengistu said the rebels tried to overstretch their armies by deploying

soldiers on multiple fronts, in collusion with the country's other rebel force the Tigray People's Liberation Front, a hardline Marxist organization from central Ethiopia.

But the tactic failed, Mengistu told the Herald, the country's English language daily.

An EPLF spokesman said last week that government claims of victories were false.

#90288u0140 10/15/1990 ~United Press International

(OCT. 15) UPI - The world music scene has lost a legend. Leonard Bernstein... as revered in Hollywood and on Broadway as he was in New York's Philharmonic Hall... is dead at the age of 72. The versatile composer, conductor, pianist, author and educator died Sunday evening at his Manhattan home. The cause of death was sudden cardiac arrest caused by lung failure. Only last week, Bernstein announced he was retiring from public performance because of ill health.

President Bush apparently is NOT the only leader whose popularity, according to newspaper polls, is suffering because of the Persian Gulf crisis. A survey released Monday in Japan's leading business newspaper finds Prime Minister Toshiki Kaifu's popularity dropped five percentage points this month- mainly because of his slow response to the gulf crisis. It took Kaifu more than a month to put together a four-BILLION-dollar aid package for the international forces opposing Iraq, and for the Gulf states hurt by the economic sanctions.

Consumers in New York state pay two-and-a-half times more for electricity than those in Washington state. That's just one of the differences in American energy costs found by a University of Illinois study released Sunday. The

highest electric rates in the nation are in Alaska... followed by New York, New Jersey, New Hampshire and Connecticut. Electricity is cheapest in the water- or coal-rich western states of Washington, Idaho, Montana, Oregon and Wyoming.

-30- 1631

#90288u0143 10/15/1990 ~United Press International

(OCT. 15) UPI - A Kawkawlin, Michigan, woman is NOT about to walk away from the 10- Million dollars she and her husband thought they won last week. On Friday, McDonald's announced Thelma Bellows as a big winner in its ''McMillions'' contest. Then a few hours later, the company said Bellows had been disqualified because her daughter is a McDonald's employee. Bellows says she and her husband may sue to challenge the decision because the daughter NO longer lives at home.

Talk-show host Joan Rivers- better known for dodging brickbats- was handed a bouquet by fashion designer Mr. Blackwell, who thinks she's the best-dressed television personality. Rivers also gets the vote for ''Best-Dressed Daytime Hostess'' in Blackwell's list of the best- and worst-dressed stars Other winners- ''Knots Landing's'' Nicollete Sheridan and ''thirtysomething's'' Ken Olin. Losers include Oprah Winfrey, Heather Locklear and Bill Cosby.

#90288u0168 10/15/1990 ~United Press International

(OCT. 15) UPI - The Chicago Blackhawks have played four seasons of hockey since the last time they beat the Calgary Flames, and Sunday Chicago came up short again.

This time it took two third-period goals by Gary Suter and Joel Otto and a controversial call by referee Dan Marouelli for the Flames to rally past the Blackhawks for a 3-1 victory. Chicago now has an 0-11-2 record against Calgary dating back to Feb. 23, 1986, when the Blackhawks beat the Flames at Chicago Stadium.

Chicago goaltender Ed Belfour, undefeated in four starts going into the game, tried to stop the Flames singlehandedly. Belfour stoned Calgary until the third period, playing especially well during the first half of the game when the Blackhawks were outshot 16-4.

Early in the game Doug Gilmour walked right in on Belfour and shot from point-blank range. Belfour made a brilliant save, then covered the rebound just before Joe Nieuwendyk could swoop in for the kill.

Chris Chelios gave the Blackhawks a 1-0 lead at 2:26 of the third period with a power-play goal. Jeremy Roenick carried the puck in and shoveled a backhander that goaltender Rick Wamsley blocked, but Chelios pounced on the

rebound and poked it through for his second goal of the season.

''We didn't generate much offense for much of the game,'' Blackhawks Coach Mike Keenan said.

''We had some momentum gained to that point.''

That momentum shifted when Suter's first of the year tied the score at 4:57. Suter's goal came on a power play when he connected on a low slap shot from the blue line that Belfour apparently never saw.

''That was a big goal because we got ourselves back in right away,'' Flames Coach Doug Risebrough said.

Otto then put the Flames ahead at 8:59, banging in a rebound from the slot after Belfour stopped Jamie Macoun's slap shot. The goal was Otto's first this season.

Chicago's Wayne Presley appeared to tie the score with 8:26 left, but Marouelli disallowed it because the Calgary net was knocked off its moorings. A new rule would have allowed the goal if the referee ruled the defensive team knocked the net off deliberately.

''I suppose they judged Chicago knocked the net off the mooring,'' Keenan said. ''If that's the case, then it shouldn't have counted. If Calgary knocked it off, then it should have counted. I'm not exactly sure of his interpretation.''

Paul Ranheim of the Flames closed out the scoring with empty-net goal with a second left.

Elsewhere in the NHL, Vancouver edged Edmonton 5-4 in overtime; and Los Angeles beat St. Louis 4-1.

-- AROUND THE NHL --

Canucks 5, Oilers 4, OT

At Vancouver, Petri Skriko snapped home a rebound from the edge of the crease at 1:32 of overtime to lift the Canucks. Dave Capuano and Dan Quinn each scored a goal and added two assists to pace the Canucks, while Esa Tikkanen had a hat trick for the Oilers.

Kings 4, Blues 1

At Inglewood, Calif., Tomas Sandstrom deflected in a power-play goal with 3:44 left in the second period to snap a tie and Luc Robitaille scored his 200th career goal. Bob Kudelski and Dave Taylor also scored for Los Angeles. Geoff

Courtnall scored for St. Louis. Kings goalie Kelly Hrudey made 42 saves.

#90288u0202 10/15/1990 ~United Press International
WASHINGTON (OCT. 15) UPI - Saudi Arabia has discovered vast new deposits of high-quality crude oil in previously unexplored areas that may boost the Persian Gulf nation's official reserves by 20 percent, it was reported Monday.

The Washington Post said the exploration program that led to discovery of the new reserves in central Saudi Arabia began more than one year before Iraq's Aug. 2 invasion of Kuwait.

Saudi officials are willing to speak about the new finds, despite the gulf crisis, because they hope to send a signal to the nervous world oil market that the long-term outlook for supplies of Persian Gulf oil is good, the Post reported.

The new reserves, providing the early indications prove true, reportedly would allow Saudi Arabia to pump crude at its present rate or better far into 22nd century.

Senior officials in the state-owned Saudi Aramco oil company told the newpaper that the discovery was significant, and that the firm has also drilled succcessful wells in the trackless ''empty quarters'' of southeastern Saudi Arabia that currently are not being tapped because they are too far from any pipeline.

Saudi Aramco officials would not disclose details of the extent of the new find, saying they wanted to make certain of the size of the reserves before attempting to publicly quantify them.

Some oil economists in the United States downplayed the significance of the findings, telling the newspaper Saudi Arabia already has 257.5 billion barrels of proven reserves. That figure is 2.5 times as much as Iraq, the next biggest oil producer, and 10 times the reserves of the United States.

Oil economists told the Post the finding was akin to finding more water in the ocean.

But word of the newly discovered reserves spread quickly to Japan, where stock prices on the widely watched Nikkei average shot up more than 3 percent Monday buoyed both by a stronger yen and the report from Saudi Arabia.

Buying was spread across the board, with utilities benefiting particularly from the report of newly discovered oil.

(OCT. 15) UPI - Around the world... around the clock... news from United Press International. .

Composer-conductor Leonard Bernstein died last night at his New York home days after retiring from public performances because of ill health. Bernstein was one of the world's most sought-after orchestra conductors. He introduced a generation of Americans to classical music with his televised ''Young People's Concerts.''

Iraqi President Saddam Hussein met in Baghdad yesterday with P-L-O chief Yasser Arafat to discuss linking the Persian Gulf crisis with the conflict in the Israeli-occupied territories. Most Arab leaders reject tying Iraq's August 2nd invasion of Kuwait with the 42-year-old Palestinian problem.

Saddam got a sharp warning from British Foreign Secretary Douglas Hurd. During a visit to Cairo, Egypt, yesterday, Hurd said the Iraqi leader may either leave Kuwait voluntarily or- as Hurd put it- ''at the point of a gun.'' Hurd also rejected linking the gulf crisis to the Israel-Palestinian conflict.

The Israeli cabinet has voted aginst co-operating with a U-N team investigating the deaths last Monday of at least 20 Palestinians in Jerusalem's Old City. Israel's foreign minister says recognizing the U-N team would raise questions about Israeli sovereignty over Jerusalem. The decision means Israel will NOT provide information to the three-member U-N commission.

The Nobel Committee, appointed by Norway's lawmakers to award the Nobel Peace Prize, is keeping silent about a possible winner. The winner will be named today. Norway's news media picked Soviet leader Gorbachev as a favorite. There is speculation the independent Nobel committee will withhold the prize this year due to the Persian Gulf conflict.

BANGKOK, THAILAND (OCT. 15) UPI - Residents of coastal Thailand were warned Monday to watch for tidal waves created by a serious earthquake under the Indian Ocean.

Samit Thammasarot, director of the Thai Meteorological Department, said a quake measuring 6.5 on the open-ended Richter scale occurred Monday in the Indian Ocean about 750 miles From the Thai coast.

''As a result of the tremor, there may be tidal waves measuring 1 to 2 meters high arriving at the western coast of Thailand .. today,'' he said.

There were no immediate reports of any unusual waves hitting the coast.

The U.S. Geological Survey's National Earthquake Information Center in Golden, Colo., said its preliminary measurement of the quake's magnitude was 6.6 on the Richter scale.

It placed the center of the temblor, which struck at 9:36 p.m. EDT Sunday, at 600 miles off the coast of Sumatra and 850 miles west of Singapore. U.S.G.S. spokeswoman Rebecca Phipps in Reston, Va., said the quake occurred in a remote area far from land and said no damage or casualties were expected.

#90288u0252 10/15/1990 ~United Press International

MOSCOW (OCT. 15) UPI - Soviet President Mikhail Gorbachev missed a deadline Monday to present a compromise economic reform plan, further delaying

consideration of the blueprint by Parliament.

Gorbachev and other officials have been struggling to come up with an acceptable overall plan for the transition to a free market economy since September, when two radically different proposals were put forward.

The last time the issue of economic reform came up in Parliament, deputies ordered Gorbachev to present a compromise plan Oct. 15.

But at the meeting of the Parliament Monday, Supreme Soviet Chairman Anatoly Lukyanov announced that the economic plan was not on the agenda for the day. Deputies instead were to listen to a report from Foreign Minister Eduard Shevardnadze and the first reading of a bill on regulation of foreign currency transactions.

On Saturday, Gorbachev met with the heads of most of the 15 Soviet republics to discuss a draft economic transition plan. The local leaders endorsed the plan in principle, but ''made many suggestions for improvement,'' the official Tass news agency said.

The independent Interfax news service said its parliamentary correspondent had been told Gorbachev had not yet signed the draft economic plan, but that it might be signed later Monday.

Lukyanov told Parliament the plan may be discussed in parliamentary committees Tuesday. Debate in Parliament could begin Thursday with a vote possible Saturday, he said.

#90288u0311 10/15/1990 ~United Press International

SEOUL, SOUTH KOREA (OCT. 15) UPI - Main opposition leader Kim Dae Jung, on the eighth day of a hunger strike to promote a series of political demands, was moved to a hospital Monday because of declining health.

Kim will be under close medical attention at Severance Hospital in Seoul, where he will continue his protest against the government, aides said.

Kim started fasting Sept. 8, demanding that President Roh Tae-woo drop a plan to switch to a parliamentary cabinet form of government through constitutional amendment, that he implement promised local autonomy without delay, and that he keep the military out of politics.

Kim, 65, had been staging the hunger strike at the headquarters of his Party for Peace and Democracy. He moved to the hospital after his doctors and top members of his party advised him to do so, the aides said.

He has lost 9.5 pounds since he began the fast and his blood pressure has been

gradually falling, the aides said. He was so weak that he had to be carried on a stretcher to the ambulance that took him to the hospital, according to the aides.

Kim, who unsuccessfully opposed Roh in the December 1987 race for the presidency, wants to have another shot at the office under the current presidential system. He believes local self-rule, when implemented, will bolster support for his party.

#90288u0480 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - Compaq Computer Corp. planned to introduce Monday a new laptop computer that uses aerospace and defense industry technology to make it the ''world's highest performance'' notebook personal computer.

Compaq said its Compaq LTE 386s/20 has a 60-megabyte, 3/4-inch high fixed disk drive, credit-card size memory cards and miniature power supply that allow its 8 1/2-inch by 11-inch by 2 1/4-inch size.

The new computer is small enough to carry in a briefcase, but as powerful as many desktop computers, Compaq said.

The Compaq LTE 386s/20 weighs 7 1/2 pounds with the battery.

''PC users can now carry the power and functionality of a 386SX computer anywhere, anytime,'' said Mike Swavley, president of Compaq's North America division.

Houston-based Compaq said the new 20-megahertz, 386SX processor-based notebook is the first computer to use a printed circuit board technology called Regal Flex ''in a revolutionary new way.''

Regal Flex originally was developed by Teledyne Electro-Mechanisms for aerospace and defense industry applications such as cruise missle guidance systems and stealth fighter instrument panels.

Compaq used Regal Flex to create a single, central circuit board for the Compaq LTE 386s/20 that starts as an 8-inch by 11-inch sheet, snaps apart at key points and folds into a compact, multiplaned part that ends up 4 3/4 inches by 6 inches by 1 1/2 inches.

Also with the design, all standard board connectors are eliminated except cable connectors for a 1.44-megabyte diskette drive and fixed disk drive. The only other standard cables in the system are integral to self-contained sub-assemblies such as the keyboard and display, Compaq said.

Regal Flex initially was developed to save space and weight and ensure greater

reliability of circuit boards by eliminating separate, detachable cables in favor of flexible interconnections.

''In the compact space the Compaq LTE 386s/20 board occupies, Compaq engineers were able to incorporate 20 integrated circuits, 10 Compaq- designed application specific integrated circuits and a remarkable number of components '' the company said.

The 3/4-inch high, 2 1/2-inch fixed disk drive in the new computer is the first drive of its size - about the same as a deck of playing cards - in a 60-megabyte capacity, or able to hold 30,000 typewritten pages, Compaq said.

''This device, despite its small size, matches the performance of drives available in desktop PCs with its less than 19-second millisecond access time '' the company said.

The drive also is available in a 30-megabyte capacity.

The computer has optional 1- and 4-megabyte memory cards that can be used to expand the memory to 10 megabytes.

Compaq said the power supply in the Compaq LTE 386s/20 is about the size of a large pack of chewing gum, but is 90 percent efficient with 10 percent of its energy dissipated as heat.

The suggested retail price for the 60-megabyte model is $6,999, while the 30-megabyte version is $6,499. The suggested resale price of an available desktop expansion base is $1,499.

Both products are to begin shipping this month to authorized Compaq dealers worldwide, the company said.

#90288u0502 10/15/1990 ~United Press International

(OCT. 15) UPI - Famed composer, conducter and pianist Leonard Bernstein died

last night at his New York City home just days after he gave up public performances because of ill health. He was 72. Bernstein was the first American-born music director of a major U-S symphony orchestra, the New York Philharmonic. He took over the baton at the Philharmonic in 1959, conducting more concerts with that orchestra than any maestro in its history.

The Washington Post says Saudi Arabia has discovered vast new deposits of high-quality crude oil in areas previously UNexplored. The oil-find may boost Saudi oil reserves by 20 percent. The newspaper says Saudi officials willingly discussed the new find, hoping to show a nervous world oil market the long-term outlook is good for Persian Gulf oil.

Britain's Foreign Office says ex-pop star Cat Stevens appealed for release by Iraq of four British Moslems who are expected to return to London today. Officials say the men were on a pilgrimage to Islamic holy sites in Iraq when Iraq invaded Kuwait August 2nd. Stevens... who converted to Islam and changed his name to Yusuf Islam... was in Baghdad to appeal for the release of Westerners and urge a peaceful end to the Persian Gulf crisis.

News reports from Japan indicate Tokyo's government has decided sending troops to help U-N-backed peacekeeping efforts is constitutional. The Japanese government plans to introduce a bill tomorrow reflecting the new stand. The reports say that if Japanese lawmakers agree, Japanese troops may assume non-combat duties with multi-national forces in the Persian Gulf. The Japanese Foreign Ministry refused to comment on the reports.

NO one was injured when a Marine helicopter crashed last night in Illinois while practicing for the arrival of President Bush. White House spokesman Douglas Davidson says a foreign object was sucked into the rotor or engine of the chopper on landing at the College of DuPage, near Chicago. Bush is scheduled to appear tomorrow on behalf of Republican gubernatorial candidate Jim Edgar.

#90288u0529 10/15/1990 ~United Press International

(OCT. 15) UPI - Stock prices on the Tokyo Stock Exchange surged more than 3 percent in thin trading Monday boosted by a stronger Japanese yen and reports of a vast new oil field.

The closely watched Nikkei Average of 225 selected shares, which eased 195.47 points Friday, climbed 719.04 points - or 3.2 percent - to 23,109.20.

The broader-based Tokyo Stock Exchange Price Index, a measure of all shares traded on the exchange, jumped 42.64 points to 1,706.33. TOPIX had fallen 7.99 points Friday.

Volume crept up as an estimated 350 million shares changed hands, compared with 323 million shares Friday.

Adnaces overpowered declines 798 to 178, while 98 issues remained unchnaged.

Analysts said the swift rise of the Japanese yen against the U.S. dollar eased interest-rate worries and sparked the first stock rally in four trading sessions.

On the Tokyo Foreign Exchange, the dollar fell 1.15 yen to 128.15 yen.

A stronger yen has taken some pressure off Japanese prices, helping the bond market to recover, analysts said.

The dollar has plunged 7 percent against the yen in the last two weeks.

The market was further bolstered by news reports that Saudi Arabia had discovered a vast new oil field that would increase its reserves by 20 percent said Judith Rawnsley, an analyst with Baring Securities.

Buying was spread across the board, with utilities benefiting particularly from the report of newly discovered oil.

Elsewhere in Asia, stocks on the Hong Kong Stock Exchange were stagnant as investors displayed caution due to uncertain market conditions.

The benchmark Hang Seng Index, which gained 30.85 points Friday, added 1.12 points to 2,916.38.

Among the narrower indexes, properties dropped 12.12 points, financials added 5.41, industrials gained 3.71 and utilities rose 1.08 point.

Volume totaled an estimated 597 million shares, down from the 657 million shares changing hands Friday.

''The market was really quiet because of all the uncertainties,'' said Albert Leung of Chin Tung Investments.

''Not only the Gulf situation, but for Hong Kong there has been an impasse between Beijing and the Hong Kong government about a proposed bridge to be built here.''

In Singapore, stocks closed higher on the Singapore Stock Exchange bolstered by the rebound in Tokyo and selective bargain hunting.

The Straits Times Industrial Index, which gained 14.87 points Friday, added another 4.16 points to 1,098.43. The broader-based All Singapore Index rose 1.32 points to 306.40.

An estimated 19.5 million shares changed hands, compared with 35.7 million shares Friday.

Analysts said the market's grossly oversold position led to technical rebound which started last Friday after four straight days of losses, and continued Monday.

Investors were bargain hunting throughout the day on selected blue chips which had fallen to attractive levels, analysts said.

Late afternoon profit-taking, however, eroded some of the gains.

On the trading floor, Development Bank of Singapore paced the advancing issues followed by Genting Berhad and Fraser and Neave ordinary shares.

Singapore Fodder led the declining issues followed by Haw Par and Jurong Shipyard.

In Bangkok, stocks closed higher in moderate trading on the Thailand Stock Exchange.

The Securities Exchange of Thailand Index, which eased 2.06 points Friday, rebounded 10.38 points to 652.75.

An estimated 1.4 billion shares changed hands, compared with 1.2 billion shares Friday.

Advances outpaced declines 114 to 25 with the best-performing stocks in the banking, commerce and finance sectors.

Kitti Kerati-Thamkul, a vice president of Mithai Europartners Finance and Securities Co., Ltd. said speculation ''that Iraq would withdraw troops from Kuwait and improvements on world stock markets caused prices to move up in the last hour of the session.''

Elsewhere around the region, in Manila, stocks closed slightly lower in light trading on the Manila Stock Exchange.

The Manila Composite Stock Index of 25 selected issues slipped 7.73 points to 537.45.

In Taipei, stocks closed sharply higher as investors extended their winning streak to three straight on the Taiwan Stock Exchange.

The Taiwan Weighted Index, which rose 35.20 points Saturday, climbed another 32.75 points to 2,688.6.

In Seoul, stocks closed sharply higher in active trading on the Korean Stock Exchange as local investors boosted the Korean Composite Stock Index 19.44 points to 646.39.

In Australia, stocks closed lower in active trading on the Sydney Sharemarket despite a 1 percent cut in the official lending rate by the Australian Reserve Bank.

The All Ordinaries Index, which fell 15.0 points Friday, lost 4.8 points to 1,321.4.

An estimated 60.1 million shares chnaged hands, compared with 81.2 million shares Friday.

Analysts expressed disappointment with the market's performance, which opened sharply higher following a decision by Australian's Central Bank to ease monetary policy and reduce domestic interest rates by a percentage point.

On the trading floor, News Corp. slipped 36 cents to $5.18.

Elsewhere, Elders IXL slipped 2 cents to $1.21, WMC slipped 1 cent to $4.09, Santos lost 17 cents to $4.77.

HOUSTON (OCT. 15) UPI - Domestic and offshore drilling in the Gulf of Mexico both declined last week, industry monitors reported.

Baker Hughes Inc. reported 1,056 rotary rigs working in the United States last

week, compared with 1,064 the prior week and 981 the same week a year ago.

Three fewer rigs were working in the Gulf of Mexico, Offshore Data Services Inc. reported Sunday. The change dropped the utilization rate to 65.1 percent, with 138 rigs working out of a fleet of 212.

Activity was unchanged in European waters, where the utilization rate remained a strong 94.2 percent last week, with 130 rigs working out of a fleet of 138.

The decrease in gulf activity lowered worldwide activity by an equal amount, causing the total utilization rate to dip slightly to 81.6 percent, with 547 rigs working out of a fleet of 670.

Other relevant rig counts included Louisiana, 147 last week, 142 the week before and 139 the same week a year ago; New Mexico, 63, 61 and 45; Oklahoma, 128, 130 and 135; Texas, 357, 360 and 291; and Canada, 131, 113 and 126.

#90288u0651 10/15/1990 ~United Press International

(OCT. 15) UPI - Soviet President Mikhail Sergeyevich Gorbachev, the career Communist and architect of revolutionary change that helped end the Cold War, was honored with the Nobel Peace Prize just as he faces perhaps the gravest domestic problems of his career.

The Soviet economy is in worse shape than any time since World War II and citizens are increasingly clamoring for long-awaited material results from perestroika, his campaign of political and economic reform.

Separatist movements in the Baltics and to a lesser extent in the rest of the 15 Soviet republics have forced a rethinking of what kind of union the Soviet Union is. Local leaders are demanding - and in some cases attempting to seize - much of the power previously held by the Communist central government.

But without Gorbachev's reforms, discussions of the economic problems would never have been so frank and declarations of sovereignty by the republics would have been unthinkable.

Gorbachev's ''new thinking,'' the removal of ideology from foreign affairs and the willingness to allow the breakup of the Soviet empire, have led to an end to the Cold War and a new Europe.

''To deny a nation the freedom of choice, regardless of the pretext or the verbal guise in which it is cloaked, is to upset the unstable balance that has been achieved at this point,'' Gorbachev said in a landmark speech to the United Nations Dec. 7, 1988. ''Freedom of choice is a universal principle. It knows no exceptions.''

But his willingness to let former East Bloc satellites to go their own way did not extend to his own rebellious republics. He declared illegal the declarations of independence by Lithuania, Latvia and Estonia and imposed an economic blockade on the Lithuanians, although the two sides have begun to talk about their future relations.

Separatist movements have spread from the Baltic states to the republics of

Azerbaijan and Armenia, and Soviet citizens clamor for material results from his campaign of political and economic reform known as perestroika.

As such, inside the Soviet Union, Gorbachev's star is fading along with the Communist Party. Polls show his popularity below such rivals as the maverick Boris Yeltsin, who gained a formidable power base when he was elected effective president of the huge Russian republic earlier this year.

From the Chernobyl nuclear disaster in 1986, when his policies of glasnost first began to gather support, through the December 1988 Armenian earthquake, when those policies allowed Moscow to reach out to the world for help, Gorbachev has embraced the affection of people from Berlin to Washington as no Soviet leader before him.

New York cabbies watched in awe as he stopped his motorcade and cheerfully raised his arms under the Coca-Cola sign in Times Square during his historic, Western-style trip to the United States in 1988. East German students hammering at the Berlin Wall in November 1989 raised his picture amid chants of ''Gorby! Gorby!''

But at home in the Soviet Union, domestic policies have threatened the president's future.

Meat, produce, sugar, other staples and household items are scarce and the maverick, give-'em-what-they-want politics of rivals like Boris Yeltsin are growing in their appeal to Soviet citizens. Freedom is important but for the average Soviet, it appears that a full stomach is more so.

Since his selection as Communist Party chairman March 11, 1985, Gorbachev has pioneered gestures of peace and cooperation with the West that have sparked speculation on when the Soviet Union again will be an acknowledged ally of the United States.

His negotiations with Presidents Bush and Reagan have led to substantial troop and weapons cuts in both East and West blocs. The Soviet Union's withdrawal from Afghanistan in 1989 removed the last major hurdle from thawing relations with the West.

Gorbachev has maintained a steadfast belief in communism and holds that the democratic shifts inside the Soviet Union and in Moscow's foreign policies are not threats to communism, but means of transforming an outdated communist system in need of fixing.

#90288u0678 10/15/1990 ~United Press International

(OCT. 15) UPI - Soviet President Mikhail Gorbachev is now a Nobel Peace Prize winner. Norway's Nobel Committee cited Gorbachev for what it describes as

''his leading role in the world peace process.'' The panel said it wanted to ''honor Gorbachev for his many and decisive contributions'' to historic changes taking place between East and West.

Egyptian authorities report an American was among dozens of suspects held in the machine-gun slaying of Egypt's Parliament Speaker. Sources indicate dozens of men, including an Egyptian-born American, were nabbed at Cairo airport last night trying to leave Egypt. Security police say the assassination was the work of a well-organized terrorist group.

German Chancellor Kohl used his popularity in uniting the two Germanys to push the Christian Democratic Union and its Bavarian ally to victory in state elections. Officials results show the C-D-U won four of five former East German states in elections yesterday. The C-D-U's allied party in Bavaria retained an absolute majority.

South Africa police report an apparent new outbreak of factional unrest near Johannesburg. Police say seven blacks were killed and two others were wounded in fighting at a workers' compound. Officials say it was the worst clash near Johannesburg since last month, when a gang of blacks massacred commuters on a black passenger train, killing 26 people.

Police in a Los Angeles suburb have arrested a woman dressed in camouflage fatigues and her 11-year-old son dressed in female clothing in the slaying of the woman's mother. Police say the 78-year-old victim called the police and said she had been stabbed. A sheriff's deputy says while the woman was on the phone with police, ''deputies also heard gunshots.'' The victim was found dead in the house, where she had been stabbed and shot several times.

#90288u0696 10/15/1990 ~United Press International

BOSTON (OCT. 15) UPI - The manager of the New Kids on the Block denies he gave part ownership of the successful singing group to a convicted loan shark and reputed mobster in exchange for a $50,000 loan.

Maurice Starr said in Monday's Boston Herald the claim by a Brookline businessman is ''ludicrous,'' and said that ''everything I did was legitimate.''

Starr was responding to a federal bankruptcy suit in which Jeffrey Furst claimed that his business partner, James Martorano, loaned the money to Starr for a 25 percent interest in the youthful singing group.

The allegations were reported this weekend by WCVB-TV Channel 5.

Martorano, 48, has served time for being an accessory to murder, loansharking and fixing horse races. He was released from jail four years ago.

Martorano has been identified by law enforcement officials as a reputed mobster with ties to Howard Winter, reputed head of the Winter Hill Gang in Somerville.

Starr admitted he met Martorano ''once or twice'' at social events but never turned over any ownership in the New Kids to him.

Starr said he borrowed $175,000 from Furst to open a recording studio, but paid it back within a year at about 30 percent interest. He said he took out the mortgage with Furst because Furst came up with the money faster than the banks he applied at, even though Furst's rates were twice as high as the banks.

That mortage, Starr said, had nothing to do with the New Kids.

''He claims he gave me the money for the New Kids but that was not the deal,'' said Starr. ''The deal was, you don't pay us, you lose your house.''

''I'm trying to run a good clean business and this guy is trying to destroy me but I'm not going to let him do it,'' Starr said.

The allegations come at a time when the squeaky-clean image of the New Kids is taking a bath.

Two months ago a man claimed he was attacked by a New Kid body guard at a Quincy bar, and on Sept. 2 a Harvard student charged that he was attacked by group member Donnie Wahlberg on an airliner because he declined to give Wahlberg his seat.

#90288u0771 10/15/1990 ~United Press International

(OCT. 15) UPI - Soviet President Mikhail Gorbachev has won the Nobel Peace Prize. The Nobel Committee in Oslo, Norway, said Gorbachev instilled trust in international relations. It gave him credit for slowing the arms race and replacing confrontation with negotiation. President Bush sent congratulations to Gorbachev... describing him as a ''courageous force for peaceful change in the world.''

Japan has reportedly changed its stance on sending troops to the Persian Gulf. Today's report in a Japanese daily says Tokyo's administration has concluded that attaching soldiers to U-N-backed peacekeeping forces IS constitutional. The report says the government plans to introduce a bill tomorrow reflecting its new position.

The Israeli cabinet has voted NOT to cooperate with a U-N investigation of the killing of some 20 Palestinians in Jerusalem last week. The cabinet argues that the U-N does NOT intervene in more severe events in other countries. Israeli Foreign Minister David Levy says the U-N probe would challenge Israeli sovereignty over East Jerusalem. Levy says the United States ''made a mistake'' in backing the U-N action.

Just days after his retirement... American music giant Leonard Bernstein is dead. His doctor said the 72-year-old Bernstein died of cardiac arrest last night at home in Manhattan. As a composer and conductor... Bernstein drew inspiration from jazz and Jewish and Christian liturgy... as well as more conventional sources. Bernstein culminated his career early this year by conducting Beethoven's Ninth Symphony at the Berlin Wall.

OSLO, NORWAY (OCT. 15) UPI - The following is a list of winners of the Nobel Peace Prize. No Nobel prizes were awarded in 1940, 1941 and 1942.

1990 Mikhail Gorbachev, Soviet Union
1989 The 14th Dalai Lama (Tenzin Gyatso), Tibet
1988 United Nations Peacekeeping Forces
1987 Oscar Arias Sanchez, Costa Rica
1986 Elie Wiesel, USA
1985 International Physicians for the Prevention of Nuclear War
1984 Desmond Tutu, South Africa
1983 Lech Walesa, Poland
1982 Alva Myrdal, Sweden; Alfonso Garcia Robles, Mexico
1981 Office of the U.N. High Commissioner for Refugees, Geneva
1980 Adolfo Perez Esquivel, Argentina
1979 Mother Teresa, India
1978 Menachem Begin, Israel; Anwar Sadat, Egypt
1977 Amnesty International
1976 Mairead Corrigan, United Kingdom; Betty Williams, United Kingdom
1975 Andrei Sakharov, Soviet Union
1974 Sean MacBride, Ireland; Eisaku Sato, Japan
1973 Henry A. Kissinger, USA; Le Duc Tho, Vietnam - declined the prize
1972 No award
1971 Willy Brandt, West Germany
1970 Norman Borlaug, USA
1969 International Labor Organization, Geneva
1968 Rene Cassin, France
1967 No award
1966 No award
1965 U.N. Children's Fund (UNICEF)
1964 Martin Luther King, USA
1963 International Committee of the Red Cross, Geneva; League of Red Cross Societies, Geneva
1962 Linus Pauling, USA
1961 Dag Hammarskjold, Sweden
1960 Albert Luthuli, South Africa
1959 Philip Noel-Baker, United Kingdom
1958 Georges Pire, Belgium
1957 Lester Bowles Pearson, California
1956 No award
1955 No award
1954 Office of the U.N. High Commissioner for Refugees, Geneva
1953 George Catlett Marshall, USA
1952 Albert Schweitzer, France/Germany
1951 Leon Jounhaux, France
1950 Ralph Bunche, USA
1949 John Boyd Orr, United Kingdom
1948 Not awarded
1947 The Friends Service Council, United Kingdom; The American Friends Service Committee, USA
1946 Emily Green Balch, USA; John Raleigh. R. Mott, USA

1945 Cordell Hull, USA
1944 International Red Cross
1943 No award
1939 No award
1938 Nansen International Office for Refugees, Switzerland
1937 Lord Cecil of Chelwood, England
1936 Carlos de S. Lamas, Argentina
1935 Karl von Ossietzky, Germany
1934 Arthur Henderson, England
1933 Sir Norman Angell, England
1932 No award
1931 Jane Addams and Nicholas M. Butler, U.S.
1930 Lars O.J. Soderblom, Sweden
1929 Frank B. Kellogg, U.S.
1928 No award
1927 Fredinand Buisson, France, and Ludwig Quidde, Germany
1926 Aristide Briand, France, and Gustav Stresemann, Germany
1925 Sir Austen Chamberlain, England, and Charles G. Dawes, U.S.
1924 No award
1923 No award
1922 Fridtjof Nansen, Norway
1921 Karl H. Branting, Sweden, and Christian L. Lange, Norway
1920 Leon Bourgeois, France
1919 Woodrow Wilson, U.S.
1918 No award
1917 International Red Cross
1916 No award
1915 No award
1913 Henri La Fontaine, Belgium
1912 Elihu Root, U.S.
1911 Tobias M.C. Asser, Holland, and Alfred H. Fried, Austria
1910 International Permanent Bureau for Peace, Switzerland
1909 Auguste M.F. Beernaert, Belgium, and Baron Paul H.B.B. d'Estournelles de Constant de Rebecque, France
1908 Klas P. Arnoldson, Sweden, and Frederik Bajer, Denmark
1907 Ernesto T. Moneta, Italy, and Louis Renault, France
1906 Theodore Roosevelt, U.S.
1905 Bertha von Suttner, Austria
1904 Institute for International Rights, Belgium
1903 Sir William R. Cremer, England
1902 Elie Ducommun and Albert Gobat, Switzerland
1901 Henri Dunant, Switzerland; Frederick Passy, France.

#90288u0793 10/15/1990 ~United Press International

MOSCOW (OCT. 15) UPI - Soviet officials welcomed the announcement that Mikhail Gorbachev won the Nobel Peace Prize Monday as a well-deserved honor, but some said the award would give little respite from domestic troubles.

The announcement Gorbachev won was made in the Soviet parliament, called the Supreme Soviet, at the end of its morning session - or nearly 90 minutes after the announcement in Oslo. Deputies greeted the news with brief applause.

''We have just received a message that the Norwegian ambassador came to the Kremlin and announced that Mikhail Sergeyevich (Gorbachev) has received the Nobel Peace Prize,'' Supreme Soviet Chairman Anatoly Lukyanov told the deputies.

Foreign Minister Eduard Shevardnadze, who had been reporting to Parliament Monday morning on foreign policy, said the award was ''an honor for the entire world society.''

''I want to congratulate our president for this great event,'' Shevardnadze said. ''This is a very great honor and personal achievement for Mikhail

Sergeyevich, for the establishment of a new political order on our planet, the formulation of a new political course in the Soviet Union and the formulation of new relations between governments, peoples of Europe and the whole world.''

Shevardnadze recalled the late Andrei Sakharov was the last Soviet to win the peace prize, and praised the former dissident for being at the vanguard of the process of democratization in the country.

Roy Medvedev, another former dissident rehabilitated by Gorbachev and now a member of the Supreme Soviet, said the award was well-deserved.

''No one else in the past year has realized such success in the politics of peace as Gorbachev,'' Medvedev said.

But Alexei Yemelyanov, another deputy, echoed the feelings of many in the Soviet Union by tempering his praise for Gorbachev's foreign policy achievements with criticism of his handling of domestic problems.

''This is the only sphere where Gorbachev's activities have produced positive results, where there has been new thinking,'' Yemelyanov said. ''We have become a bit more civilized and more humane. And the world has noticed and responded.''

Gorbachev has been criticized for hesitating in implementing the transition to a market economy, and earlier in Monday's Parliament session yet another delay was announce for presentation of a final economic reform plan.

The Soviet president also faces independence movements in most of the 15 Soviet republics, and the government is struggling with a way to develop a new union treaty that would keep the Soviet Union together.

Alexander Kovalenko, the former spokesman at the Chernobyl nuclear power plant appointed to deal with the world news media after the initial stonewalling on the 1986 accident, said Gorbachev would have problems translating his popularity abroad into success at home.

''I consider that he deserved the Nobel Peace Prize on the world scale because of the correct positions he took about war and peace,'' Kovalenko said. ''But now his problem is keeping war from breaking out within the Soviet Union.

''In achieving peace on the world scale, he could lose his own country and an internal war could break out.''

WASHINGTON (OCT. 15) UPI - U.S. business inventories increased 0.5 percent in August while sales advanced 2.1 percent during the month, the Commerce Department announced Monday.

In July, inventories climbed 0.7 percent and sales dipped 0.4 percent, according to the data compiled by the department's Census Bureau.

Inventories totaled $806.48 billion in August vs. $802.15 billion in July and sales totaled $551.86 billion in August vs. $540.37 billion in July, adjusted for seasonal factors.

The Commerce Department also said in its monthly report the inventory-to-sales ratio, which tracks product delivery time, slipped to 1.46 in August from 1.48 in July.

Retailers' inventories scored the biggest gain in August, a 1.3 percent jump, hinting perhaps that consumers were more conservative with their money following Iraq's invasion of Kuwait early in the month.

Manufacturers' inventories, meanwhile, were up 0.2 percent in August, and wholesalers inventories edged up 0.3 percent during the month, the department reported.

On the sales side, manufacturers posted the biggest increase in sales during the month, a nearly 3.4 percent advance.

Retailers sales, meanwhile, were off 0.4 percent in August, again apparently out of consumer concern over the state of world affairs. But wholesalers reported a 2.6 percent increase in sales for the month.

From August 1989 to August 1990, total business inventories increased more than 1.9 percent while total sales during the 12-month period were ahead more than 3.8 percent, the Commerce Department said.

In August 1989, the inventory-to-sales ratio was 1.49.

WASHINGTON (OCT. 15) UPI - The Supreme Court Monday refused to disturb a military court conviction of a serviceman infected with the AIDS virus on aggravated assault charges for trying to engage in homosexual activity without using a condom or informing his partner of his condition.

The court rejected arguments by former Air Force Sgt. Nathaniel Johnson Jr., who contended the military code of justice under which he was convicted denied him fair notice that his conduct may be considered illegal.

While Johnson said he knew he could be court-martialed for engaging in homosexual activity, he said was never told he could also be charged with aggravated assault because he had tested positive for the Human Immunodeficiency Virus, which causes AIDS.

In Februrary 1988, Johnson was convicted at a court-martial at McChord Air Force Base, Wash., of attempted anal sodomy, oral sodomy and aggravated assault. He was sentenced to 10 years in prison.

The Air Force Court of Military Review dismissed the attempted anal sodomy charge as multiplicious with the aggravated assault charge, reducing the prison sentence to six years.

Johnson tested positive for HIV in 1987 and spent one month at the Wilford Hall Medical Center at Lackland Air Force Base in San Antonio, Texas, for testing, evaluation and counseling. He was given instructions on safe sex methods, which included using condoms during intercourse and informing any partners of his condition.

While Johnson was being treated the Air Force implemented a revised policy that an HIV infected soldier be told by his immediate commander to follow safe sex guidelines or face disciplinary action.

Johnson claims he was never informed of the new policy.

Johnson was charged with assault after an incident that December in which he and a 17-year-old male student engaged in homosexual activity.

Johnson was convicted of performing oral sex on the teenager and attempting to perform anal sex before being rebuffed. No penetration occurred and an Air Force medical expert testified at his court-martial that the activity was unlikely to have spread the AIDS virus.

Johnson testified he was wearing a condom, but the 17-year-old disagreed and said Johnson never told him about his HIV infection.

Johnson claimed he did not know his actions could be deemed aggravated assault under Article 128 of the Uniform Code of Military Justice.

That article states in part that the accused could be convicted if it is proved that a person ''attempted to do, offered to do, or did bodily harm to a certain person.''

Johnson contended he should not be held liable for a particular offense if the

legal definition of the crime is too vague and unclear for him to understand.

Johnson's attorney, in asking the high court to review the case, wrote: ''Although ... Article 128 is not challenged here as unconstitutionally vague on its face, when the 'means' of the attempted bodily harm is the possible transmission of a virus, such as HIV, Article 128 become unintelligible regarding the conduct it seeks to proscribe.''

The federal government asked the court not to hear the case and let the military court's decision stand.

JOHANNESBURG, SOUTH AFRICA (OCT. 15) UPI - South Africa abolished one of its main apartheid laws segregating public facilities such as toilets and swimming pools Monday, but towns under right-wing control vowed to use loopholes in the law to keep their areas white.

The 37-year-old Separate Amenities Act, a mainstay of apartheid legislation expired at midnight under the first major reformist measure introduced by President Frederik de Klerk, who has pledged to repeal all racist laws.

The South African Chamber of Business welcomed the end of the amenities act ''as an important step towards creating a free and open society,'' and the African National Congress urged its black supporters to begin using the facilities previously denied them.

The Afrikaner-led ruling National Party adopted the act in 1953 in the wake of a defiance campaign launched by then youthful black leader Nelson Mandela and after several court ruling declared if public amenities were segregated, they must at least be equal.

The new apartheid law effectively circumvented the court decisions by specifically stating separate amenities did not have to be equal.

Former white opposition member of parliament, Helen Suzman, recalled Monday in an interview with the Johannesburg Star how she walked out of parliament in 1953 during a reading of the bill. She said she was delighted over its scrapping.

''It would have been bad enough if they (the amenities) were equal, but it was worse that they were separate and not equal,'' Suzman said.

The 102 local authorities controlled by the right-wing Conservative Party in the populous northern Transvaal region have vowed to resist the abolition of

the act by taking advantage of loopholes in recently introduced provincial guidelines.

The town of Springs, east of Johannesburg, has closed its swimming pool rather than admit blacks.

Sasolburg, to the west, will restrict its pools to ''season-ticket'' holders and only residents of the whites-only town can obtain such tickets. The town of Witbank, in the eastern Transvaal province, will levy a $7.80 deposit on library books for non-residents.

Planning and Provincial Affairs Minister Hernus Kriel warned town council members they may face costly ''losing battles'' in court if they try to defeat the spirit of the legislation repealing the act and impose new restrictions on the use of public amenities.

The Conservative Party has condemned all de Klerk's racial reform initiatives, including his call for full blown power-sharing talks with the ANC and other black organizations next year on a post-apartheid constitution.

The abolition of the Amenities Act represents a major psychological reform by the National Party, but is unlikely to produce dramatic changes in most major urban areas where public amenities have been desegregated over recent years.

In fact, other apartheid pillars remain firmly in place that limit the practical effect of the abolition of the Separate Amenities Act, including the Group Areas Act, which segregates residential areas.

But de Klerk has pledged each will be abolished in time.

The Group Areas Act is expected to be abolished or radically adjusted in the new parliamentary session next year, along with the Land Act, which reserves more than 80 percent of the country's land for whites.

However, de Klerk has said the fate of the contentious Population Registration Act, which classifies all South Africans on the basis of skin color, will not be decided by parliament and will be put on the agenda of formal power-sharing negotiations.

#90288u0868 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court Monday refused to become involved in the case of police officers who claim their constitutional rights were violated when they were ordered not to wear earrings while off duty.

Officers Marvin Rathert and Gary Zybak contend their rights were violated when in December 1986, they were ordered by the chief of police in their small

Illinois town not to wear ear studs either while working or off duty.

A federal district court upheld the order, finding that while the Village of Peotone's police manual did not specifically mention the wearing of earrings by off-duty male officers, the chief was within his rights in protecting the morale of the force.

The 7th U.S. Circuit Court of Appeals agreed, noting that in the Village of Peotone, a community of less than 5,000 in a rural area south of Chicago, off-duty police officers are easily recognizable in the community and that Rathert and Zybak ''caused an adverse impact on police discipline'' by wearing the ear studs.

Rathert and Zybak contended their First Amendment right to freedom of association and 14th Amendment right to due process were violated by the order.

In asking for high court review, attorneys for Rathert and Zybak said the appeals court's adoption of a ''small community'' standard is wrong.

''Under the 7th Circuit's viewpoint, if Peotone's police structure (or) citizens were against plaid Bermuda shorts, black 'concert' T- shirts, Air Jordan gym shoes, bright pink or green baseball caps, etc., then a police officer's wearing of any of these 'objectionable' items of personal apparel would subject him or her to a reprimand,'' they wrote.

They also argued that while the Supreme Court has said a police department can regulate the length of an officer's hair, an earring is different because it can be taken off and left at home when an officer is on duty.

#90288u0873 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court Monday let stand a ruling that federal law prohibits states from prosecuting airlines for false and deceptive advertising.

The case stems from a decision of the 5th U.S. Circuit Court of Appeals, which in April upheld an injunction barring 34 states from enforcing their own false advertising laws against 14 specific airlines.

The court determined that federal law, specifically the Airline Deregulation Act of 1978 that excludes states from regulating the rates of airlines, also bars them from prosecuting airlines for violating state statutes against false advertising.

Before 1978, states and the federal government shared responsibility over

consumer protection. But the airlines claim the deregulation act, meant to encourage competition, placed that responsibility solely in the hands of the federal government through what is now the Department of Transportation.

The deregulation act says states cannot enforce laws ''relating to rates, routes, or services of any air carrier.''

But the states contend that should not preclude prosecution for fraud. A brief to the high court by eight states claims ''deceptive advertising is not a 'route, rate, or service' of the airlines.''

The court refused to hear the issue in a pair of cases brought by the attorneys general of Texas and California.

The case has its origin in September 1987, when the National Association of Attorneys General proposed guidelines including the possibility of uniform state rules to govern air fare advertising.

The Federal Trade Commission opposed adoption of the rules, warning they could have the unintended effect of stifling price competition. Regardless, three months later the NAAG adopted the guidelines.

In November 1988 the attorneys general of Texas and four other states notified Trans World Airlines, Continental Airlines and British Airways that their advertising allegedly violated those states' false advertising laws.

In January 1989, the three airlines asked a federal judge in Texas to rule that such enforcement of state statutes would violate federal law. The attorneys general of 33 other states asked the court to deny the airlines' motion, but it granted an injunction ordering Texas not to enforce its deceptive advertising laws as they relate to the three airlines.

The court later broadened that ban to include the other 33 states, and placed 11 other airlines under its protection.

The 5th U.S. Circuit Court of Appeals upheld the lower court's action, writing that state deceptive advertising laws are ''expressly preempted by federal law when applied to fare advertising by interstate and international airlines.'' In June, the lower court issued a permanent injunction against the states. The appeals court has yet to review the ruling.

The states argued that Congress never intended the Airline Deregulation Act to usurp the power of states to protect their consumers. They also claimed the district court did not have the jurisdiction to include the 33 states besides Texas in its injunction.

#90288u0876 10/15/1990 ~United Press International
CORAOPOLIS, Pa. (OCT. 15) UPI - USX Corp., the nation's largest steelmaker, opened contract talks Monday with the United Steelworkers union.

USX Corp., with profits of $212 million in the second quarter, is on record that it does not intend to follow other contracts recently negotiated in the steel industry, labeled as too generous by USX Chairman Charles Corry.

But the USW is looking at a pattern of sweetened contracts in the industry, particularly one reached with Bethlehem Steel last year, as its guiding light.

The two sides have set a target date of Nov. 10 to reach a new contract. The current agreement, reached after a bitter six-month strike in 1986 and 1987, expires Feb. 1. It covers 18,000 USX steel and mining workers in Pennsylvania, Ohio, Indiana, Illinois, Minnesota, Alabama and California.

Last October, the USW asked USX to renegotiate its existing labor agreement. Union president Lynn Williams argued the basic labor agreement should be renegotiated to restore benefits cut after settlement of the nation's longest domestic steel strike. USX could afford the restoration in light of improved earnings, Williams said.

Corry countered by saying increased competition made such a renegotiation imprudent.

During an August news conference, Corry said the basis for negotiations must be USX's need for a labor contract that keeps it competitive.

''I think we need some new wisdom ... on both sides,'' he said at the time. ''I don't think the past should be a benchmark on where we start or how we come out.''

But past performance and pattern bargain is exactly what the USW has in mind, said Andrew ''Lefty'' Palm, director of the union's District 15 and chief negotiator in recent talks with Wheeling-Pittsburgh Steel Corp.

''Our goal is to negotiate a 'pattern-plus' agreement for our members at USX '' Palm said Oct. 4, in announcing the early talks. ''Steelworkers at USX continue to lag behind the other major producers and we are seeking compensation for this.''

The USW-Bethlehem Steel accord of June 1989 restored wages to 1982 levels plus wage increases of $1 an hour in 1991 and 50 cents an hour in 1992.

Talks will be held at the Airport Hilton, west of Pittsburgh near Coraopolis.

#90288u0882 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court Monday let stand a finding that a Wyoming law permitting environmental inspections of businesses without a search warrant is unconstitutional.

The 10th U.S. Circuit Court of Appeals had ruled the warrantless inspection of a Wyoming gas station by a member of the state's Department of Environmental Quality violated the Fourth Amendment protection against unreasonable searches and seizures.

The Wyoming attorney general's office had warned that if the appeals court ruling stood it could harm enforcement of environmental regulations nationwide.

''Both federal and state governments have recognized the need to conduct environmental inspections without search warrants,'' the state attorney general's office said in asking the high court to review the case.

''If the 10th Circuit opinion is allowed to stand, the constitutionality of those statutes would be challenged. This, under at least some circumstances, would be a disaster for environmental enforcement in the United States.''

But the V-1 Oil Co., which brought the initial suit against the Wyoming Environmental Quality Council, said the constitutionality of warrantless searches should be decided on a ''case-by-case basis.''

''The government's need (or desire) to make discretionary inspections, randomly and without constraint, should not be permitted to overwhelm the citizen's right to a prior judicial inquiry and approval before an administrative inspection occurs,'' an attorney for V-1 Oil Co. said in its arguments to the high court.

The appeals court found that the Wyoming law allowing warrantless searches in environmental protection cases violates the Fourth Amendment because it fails to provide a ''constitutionally adequate substitute for a warrant,'' such as a regular pattern of conducting inspections or a limit on inspections to certain businesses.

The Wyoming law applies to every business in the state and allows inspections to be completely at random.

The case arose from the April 1988 inspection of V-1 Oil's self- service gasoline station in Lander, Wyo., by state environmental supervisor Steven Gerber.

Gerber, who said there was reason to believe the gas station was polluting the ground water, obtained a soil sample from the property despite the objection of station workers. Gerber, who had sought the advice of a government attorney cited state law permitting such warrantless searches in environmental cases.

A federal district court upheld the search, but the appeals court reversed.

The appeals court ruled, however, that Gerber could not face a civil rights lawsuit because of the good faith ''qualified immunity'' of a state employee carrying out what was believed to be proper statute.

Wyoming asked the high court to reverse the appeals court ruling. V-1 also appealed to the high court on the grounds that Gerber was not entitled to qualified immunity. The court took neither case.

NEW YORK (OCT. 15) UPI - Latest metal market prices as quoted Monday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 81.50-83.50 c- lb.

Antimony, domestic, refined in alloy, $2.00 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 133.00-143.10 c-lb.

Lead, common, U.S. primary producers 42.00-43.00 c-lb.; U.S. non- primary (secondary) producers 48.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $225.00-$250.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $102.00-$107.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $418.50-$459.00; dealer- approx., $420.00-$460.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $108.00-$113.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 293.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 80.00-82.00 c-lb.

#90288u0913 10/15/1990 ~United Press International
(OCT. 15) UPI - President Bush has sent congratulations on behalf of the American people to Soviet President Mikhail Gorbachev on his 1990 Nobel Peace Prize. Bush praised the Soviet leader for bringing about historical changes, both political and economic, in the Soviet Union and Eastern Europe. The president's statement says that because of Gorbachev, East-West relations- quote- ''hold greater promise for peace and world stability today than at any time in the last 45 years.'' .

In making the award today, the Nobel committee cited Gorbachev for his leading role in the dramatic chances that may help usher in an era of world peace. Gorbachev was credited with allowing Eastern European countries to in most cases peacefully topple their communist governments. Gorbachev told the official Tass news agency that he was proud and touched by the recognition. And he told Norwegian Radio he will come to Oslo December 10th to accept the prize.

Philippines defense chief Fidel Ramos today rejected proposals by Communist guerrillas to end their 21-year insurgency. The political arm of the 19-thousand-member New People's Army yesterday called for the removal of U-S military bases in the island nation... a five-year moratorium on payment of the country's 26-BILLION-dollar foreign debt... and a genuine program of land reform. The rebels offer peace talks in return.

The U-S Geological Survey has taken preliminary measurements on a serious earthquake under the Indian Ocean, some 750 miles from the coast of Thailand. The scientists at Golden, Colorado, report the quake measured six-point-six on the open-ended Richter scale. It was far enough out in the ocean that there are NO reports of damage or injury although coastal areas in Thailand are warned of the possibility of higher than normal tides.

A state of emergency remains in effect today for an area of Brazil 120 miles

southwest of Rio de Janeiro that was hit by flash floods and mudslides during the weekend. Heavy rains pounded the area and authorities report at least 17 people died. Several thousand were left homeless.

The race for governor of California is heating up in in the final weeks of the campaign with polls showing the two candidates NOT that far apart. Republican Senator Pete Wilson holds a 47 percent to 42 percent lead over Democratic challenger Dianne Feinstein, the former mayor of San Francisco. Seven percent are undecided with four percent supporting other candidates.

#90288u0941 10/15/1990 ~United Press International

CAMBRIDGE, MA (OCT. 15) UPI - Soviet President Mikhail Gorbachev ''laughed'' five years ago when it was suggested he would someday win the Nobel Peace Prize, the co-president of the group that won the medal in 1985 said Monday.

Dr. Bernard Lown, co-president of the International Physicians for the Prevention of Nuclear War, recalled the meeting he and his Soviet counterpart, Dr. Evgueni Chazov, had with Gorbachev in the Kremlin soon after they had accepted the award on behalf of the doctors' group.

''On December 18, 1985, we met with Gorbachev for about three hours at the Kremlin. After some discussion of the issues concerning our group, he asked me if I had a gold medal. I said yes, and he asked if he could see it,'' Lown said.

Lown said he took the medal from his pocket and handed it to Gorbachev.

''He looked at it like a little boy fascinated with a toy. He said this is the first time he had seen such a thing.''

Lown said he suggested that Gorbachev would probably get the Nobel Peace Prize himself for his arms reduction initiatives.

''I said this will be yours, and he laughed, but didn't say anything.''

Lown said he has met with Gorbachev four or five times since then and is ''profoundly impressed with him.'' He said he was particularly impressed that the Soviet leader ''listens patiently and takes notes.''

The physicians' group headed by Lown and Chazov has more than 150,000 members in 49 nations. It won the 1985 Nobel Peace Prize for its efforts to inform the public about the medical and environmental dangers of nuclear war.

#90288u0985 10/15/1990 ~United Press International

CHICAGO (OCT. 15) UPI - Excellent harvest weather during the weekend and the prospect of favorable conditions until at least midweek pressured corn and soybean futures Monday on the Chicago Board of Trade.

Midmorning prices were lower across the board, except for a slight rally in soybean oil.

Farmers made good progress with the corn and soybean harvest during the weekend, although the weekly crop updates are expected to show the pace continued behind normal.

Country movement of new-crop corn and beans was light across the major production area, and that pattern is not expected to change unless there is an increase in prices.

Scattered protection around the Midwest contributed to the early weakness.

Wheat made contract lows in fairly active trading. The continued lack of export sales and the weakness on the rest of the floor weighed on wheat futures.

Interior and Gulf basis levels were mostly lower.

The midmorning prices:

Corn Dec 2.27 3/4 off 2 1/2; Mar 2.37 1/2 off 2 1/4; May 2.43 1/2 off 1 3/4.

Soybeans Nov 6.15 3/4 off 4 3/4; Jan 6.30 3/4 off 4 1/2; Mar 6.43 1/4 off 4 1/2; May 6.53 1/2 off 3 1/2.

Wheat Dec 2.65 off 1 1/2; Mar 2.79 off 1 1/2; May 2.86 off 2 1/4.

Oats Dec 1.19 off 1/4; Mar 1.29 1/4 off 1/4; May 1.36 off 3/4.

-30- 1443

#90288u0990 10/15/1990 ~United Press International

BUDAPEST, HUNGARY (OCT. 15) UPI - Voters dealt a major setback to governing coalition parties in local elections seen as a referendum on the performance of Hungary's new non-communist government, unofficial results showed Monday.

Six months after the communists lost power, Hungarians voted for mayors and town councils Sunday for the second time in as many weeks because voter turnout in the initial round Sept. 30 was too low in most districts to be declared valid.

The elections were seen as a first referendum on the performance of the coalition government led by the Democratic Forum, which won the most votes in the national elections in the spring, Hungary's first democratic polls in more than four decades.

The balloting also was regarded as crucial in removing lower-level communist bureaucrats from local administrations.

With about 99 percent of the votes counted Monday, the three-party coalition appeared to have lost substantial ground to two allied opposition parties, the liberal-progressive Alliance of Free Democrats and the Young Democrats, whose members are under age 35.

The two opposition parties together won more than 40 percent of the local mandates in smaller towns and nearly 53 percent of the local assembly seats in Budapest. By contrast, the ruling coalition won 28.8 percent of the mandates in smaller districts and 32.3 percent of the Budapest assembly seats.

Independent candidates scored heavily in many mayoral races in smaller towns and cities.

The government's popularity began to decline after the spring elections, in part because of the coalition's cautious approach to introducing economic reforms. Rising prices and worsening living standards added to the general discontent, as many Hungarians expected the new government to find a quick solution for the country's economic and social ills.

#90288u0994 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - U.S. business inventories increased 0.5 percent in August while sales advanced 2.1 percent during the month, the Commerce Department announced Monday.

Huge inventories are usually a sign of hard times ahead, but businesses seem to be keeping their stockpiles of unsold goods under control.

''We are not heading toward a major inventory correction that would lead the economy into recession,'' said Norman Robertson, chief economist at Mellon Bank in Pittsburgh. ''Business are better able to keep a firm hand on their inventories.''

In July, inventories climbed 0.7 percent and sales dipped 0.4 percent,

according to the data compiled by the department's Census Bureau.

Inventories totaled $806.48 billion in August vs. $802.15 billion in July and sales totaled $551.86 billion in August vs. $540.37 billion in July, adjusted for seasonal factors.

The Commerce Department also said in its monthly report the inventory-to-sales ratio, which tracks product delivery time, slipped to 1.46 in August from 1.48 in July.

Retailers' inventories scored the biggest gain in August, a 1.3 percent jump, hinting perhaps that consumers were more conservative with their money following Iraq's invasion of oil-rich Kuwait early in the month.

''Consumers are becoming cautious about spending,'' said Cynthia Latta, an economist at DRI/McGraw Hill in Lexington, Mass. ''By the time they fill up their gas tanks to go to the mall, they don't have enough money to spend at the mall.''

But Robertson said, in his opinion, ''Consumer spending has held up well in the face of the oil well shock and what has been a very significant loss of jobs. We have not seen any major retrechment in consumer demand.''

Manufacturers' inventories, meanwhile, were up 0.2 percent in August, and wholesalers inventories edged up 0.3 percent during the month, the department reported.

On the sales side, manufacturers posted the biggest increase in sales during the month, a nearly 3.4 percent advance.

Retailers sales, meanwhile, were off 0.4 percent in August, again apparently out of consumer concern over the state of world affairs. But wholesalers reported a 2.6 percent increase in sales for the month.

From August 1989 to August 1990, total business inventories increased more than 1.9 percent while total sales during the 12-month period were ahead more than 3.8 percent, the Commerce Department said.

In August 1989, the inventory-to-sales ratio was 1.49.

#90288u1011 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court ruled Monday that states covered by the Voting Rights Act must receive federal approval before creating new judgeships.

The court unanimously affirmed the decision of a federal district court that a quarter century after passage of the Voting Rights Act, the state of Georgia is required to obtain federal government approval before creating new seats for judges. The requirement is to guard against racial discrimination.

The state had asked the high court to find its methods of choosing judges did not require federal oversight or violate the law. It called Section 5 of the

Voting Rights Act of 1964 the ''most extreme intrusion into state authority of any statute enacted by Congress.''

''The undisputed evidence shows that there has been no discrimination in either the election or the appointment of superior court judges in the state of Georgia,'' wrote the state.

Superior court judges in Georgia - those sitting on most trial courts - are elected at-large by voters within a given judicial circuit. Between 1965 and 1988, the state created 77 new judgeships and five new circuits, which changed boundaries of some election districts. It did not obtain federal approval.

The Supreme Court in 1986 ruled that changes in the manner and election of state judges can require preclearance of the Justice Department under Section 5 of the Voting Rights Act. Georgia claimed it never changed the manner in which it chose its judges and so was not affected by the ruling.

Georgia filled 10 more judge's positions from 1986 to 1988 without seeking preclearance.

But in June 1988 Georgia submitted those changes along with changes from the previous two decades for federal review. The U.S. attorney general approved some changes but ordered the state to provide additional information on 48 judgeships dating back to 1964 and two of the five new circuits.

At the same time, a group of black citizens backed by the American Civil Liberties Union filed suit against the state seeking to bar it from implementing any judgeship created without federal preclearance.

On Dec. 1, 1989, a three-judge federal district court panel ruled addition of the judgeships was covered under the Civil Rights Act and that Georgia illegally added 48 such positions between 1964 and 1988 by failing to get federal clearance.

The court gave the state 30 days to comply with the federal government's request for more information and ordered Georgia not to create any further judgeships without federal preclearance, but left the 48 judgeships in place.

The state then provided the Attorney General with information on the 48 judgeships and submitted 10 additional judgeships for preclearance.

On April 25 the Justice Department objected to all 58 judgeships, claiming the state failed to prove that adding them had ''neither a discriminatory purpose nor a disciminatory effect.''

The federal district court, however, modified its order May 29, allowing the state to fill vacancies in judgeships by appointment until a new electoral policy can be implemented.

The black residents asked the Supreme Court to rule that the May 29 modification was too lenient and send the case back to the district court for an ''appropriate and effective remedy'' that could include vacating a number of judge's seats. But the high court simply upheld the lower court's ruling.

The ACLU pointed out that while Georgia's population is nearly 27 percent black, all 45 judicial circuits from which superior court judges are elected have a majority white population, and only five of the current 135 superior court judges are black.

But Georgia said that as of Dec. 21, 1989, there had been nine judicial elections pitting black and white candidates and seven had been won by blacks.

#90288u1013 10/15/1990 ~United Press International

GENEVA (OCT. 15) UPI - Taking specific aim at European Community export subsidies, the United States presented a formal proposal Monday for sharp reductions in barriers to freer world trade in agricultural products.

Uruguay Round officials said the U.S. proposal as expected called for 75 percent reductions over 10 years in internal farm support paid to American farmers based on 1986-1988 figures, and in import barriers.

Washington called for a 90 percent cut in export subsidies as practiced by the EC, also involving a 10-year schedule and using 1987 as the base year.

U.S. officials including President Bush have warned that a Uruguay Round agreement must include deep cuts in trade-distorting agricultural protectionism.

The U.S. proposal was presented on the Oct. 15 deadline to the General Agreement on Tariffs and Trade, which provides the framework for the Uruguay Round trade liberalization negotiations scheduled to end by Dec. 7.

A package agreement is threatened by sharp differences over farm trade between Washington and Europe, with the EC missing the deadline for agricultural proposals.

The 12 EC members were still bickering among themselves Monday concerning a suggested 30 percent reduction in subsidies based on the year 1986.

That figure has been repeatedly rejected in advance as inadequate and unacceptable by the United States as well as the Cairns Group - other major

farming nations including Australia, Argentina, Brazil and Canada.

U.S. officials have also said they doubt that a compromise could be reached because Washington already has stepped back from its original position that farm supports and export subsidies should be eliminated altogether.

France and Germany in particular among EC members have said the big cuts proposed by the United States would bankrupt as many as seven out of 10 European farmers.

U.S. negotiators have told other participants Washington does not seek an end to all domestic farm sector support but only that which gives farmers an unfair export advantage or otherwise distorts free competition.

#90288u1043 10/15/1990 ~United Press International

NAIROBI, KENYA (OCT. 15) UPI - Belgian Prime Minister Wilfried Martens and two of his senior Cabinet ministers flew to Kenya Monday in a surprise effort to end two weeks of civil war in the tiny east African country of Rwanda.

President Juvenal Habyarimana of Rwanda told Martens his country is to raise the question of its two-week-old war at the U.N. Security Council.

''The Rwandan delegation communicated its intention to appraise the U.N. Security Council as soon as possible of the situation prevailing in the region '' a joint communique said.

Martens, who flew suddenly to Nairobi after a rebel invasion of the little east African country intensified this weekend, pledged to put the '' meeting.

His delegation said it would step up ''bilateral consultations'' on the issue of regional border integrity, the French language communique added, an apparent reference to Rwandan allegations of lax border control by Uganda, from where several thousand rebels launched their Sep. 30 invasion.

Talks continued late Monday, attended by Belgian Foreign Minister Mark Eyskens Defense Minister Guy Coeme and Rwandan Foreign Minister Casimir Bizimungu.

Habyarimana, meanwhile, met Kenyan President Daniel Arap Moi, who ordered the screening of Rwandan refugees in his country and the expulsion of those not registered with the United Nations High Commission for Refugees.

Western diplomats said attempts to find a solution to the war would likely also resume Wednesday in ''another regional country.''

The diplomats, who declined identification, noted that taking the civil war in

Rwanda to the U.N. implied Habyarimana believes Rwanda to be the victim of aggression by another country and not just at war with itself, since the Security Council does not involve itself in internal disputes.

Belgian Ambassador Christine Funes-Noppen was due to fly to the Ugandan capital Kampala Tuesday, the diplomats said.

MANILA, Philippines (OCT. 15) UPI - China said Monday it was ''deeply concerned'' over moves in the Philippine Congress to pass a bill seeking to encourage the inflow of investments from Taiwan.

A spokesman for the Chinese embassy said a diplomatic note was sent to the Philippine department of foreign affairs, pointing out that the the bill, if enacted into law, would ''seriously violate'' Philippine commitment to uphold a ''one-China policy.''

''Recently, some people in the Philippine Congress have urged Congress to discuss and pass as soon as possible the bill by making statements, writing articles, or filing resolutions,'' said Chinese embassy spokesman Gou Baocheng. ''The Chinese embassy is deeply concerned with this development.''

The bill, long pending in Congress, grants incentives to Taiwanese investors in a bid to invite investments to Manila, which is burdened by a $26 billion foreign debt and badly needing foreign capital to generate employment.

Beijing has recalled its ambassador to Manila, and a Philippine official said this was an indication of China's displeasure. Philippine Vice-president Salvador Laurel, Cabinet members and lawmakers have met with Taiwanese officials in Taipei.

The official, who asked not to be named, said Beijing will ask President Corazon Aquino to veto the trade bill, if it is approved in the House of Representatives.

Foreign affairs officials have drafted a compromise corporation legislation which provides protection for investments of nationals of countries without diplomatic relations with the Philippines but Taiwanese officials have said they want no less than the bill pending in Congress.

The Chinese embassy statement accused Taiwan of ''taking advantage of the economic difficulties confronted by the Philippines'' and resorting to ''all means and tricks to exert influence and pressure'' on Manila.

#90288u1071 10/15/1990 ~United Press International

(OCT. 15) UPI - President Bush has sent a message to Soviet President Mikhail Gorbachev congratulating him on winning the 1990 Nobel Peace Prize. The honor was given to Gorbachev for what was called his ''leading role'' for world peace and for supporting the dramatic changes that have swept communist nations of Eastern Europe. .

In Moscow, the Soviet parliament welcomed the announcement with brief applause. A former dissident rehabilitated by Gorbachev and now a member of the Supreme Soviet said the prize was well-deserved. He said- ''NO one else in the past year has realized such success in the politics of peace as Gorbachev.''

The U-S Supreme Court has rejected arguments by a former Air Force Sergeant convicted of aggravated assault for alleged homosexual acivity. Nathaniel Johnson said he knew he could be court-martialed, but did NOT realize he could also be charged with assault because he tested positive for the AIDS virus. .

In other action, the high court today upheld a ban on state prosecution of airlines. The justices let stand an appeals court ruling that federal law prohibits states from prosecuting airlines for false and deceptive advertising. The Airline Deregulation Act of 1978 says states canNOT enforce laws ''relating to rates, routes, or services of any air carrier.''

Egypt is calling on Israel to cooperate with a U-N investigation into the slayings last week of at least 20 Palestinians in Jerusalem. Israel is refusing to meet with a U-N mission. Egypt is the only Arab nation to sign a peace treaty with Israel and it has condemned the killings.

South Africa today abolished one of its main apartheid laws segregating public facilities. The 37-year-old Separate Amenities Act expired at midnight under the first major reformist measure introduced by President Frederik de Klerk. The South African leader has pledged to repeal all racist laws. .

But the move is NOT going over too well with some South Africans. Towns under right-wing control are vowing to use loopholes in the law segregating toilets, swimming pools and other facilities to keep some areas all-white. Government officials, however, warn the towns may face costly ''losing battles'' in court if they resist abolition of the act.

Iraq says it woN'T compromise over its occupation of Kuwait. Baghdad Radio quotes the Iraqi information minister as saying that war in the Persian Gulf continues to be imminent, but that Iraq woN'T ''fire the first shot.'' The official also dismissed a British warning that Iraqi troops must leave Kuwait voluntarily or be forced out at gunpoint. .

In another development, the Washington Post quotes diplomatic sources in Baghdad as saying Iraq took down its air defense radar system to prevent U-S

forces from monitoring it and securing information on how to jam it. The Post also says Iraq asked the Bush administration to maintain ongoing military consultations to prevent a war-causing accident, but that the United States NEVER responded.

The manager of the New Kids on the Block pop singing group calls charges of alleged mob ties ''ludicrous.'' Maurice Starr responded to the allegations in the Boston Herald today. The Herald story claimed he gave a convicted loan shark part ownership in the group in exchange for a 50-thousand-dollar loan.

#90288u1072 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - Twelve major automobile manufacturers have agreed to pay refunds to New York car owners that could reach as much as $100 million under the state's ''lemon law,'' state Attorney General Robert Abrams reported Monday.

The settlement comes after more than four years of litigation and will provide refunds for New Yorkers who purchased or leased new cars after Aug. 2, 1986, and who have had to pay for warranty-type repairs to their vehicles, Abrams said.

The state's lemon law requires manufacturers and their dealers to make repairs under their warranty, at no charge to the consumer, for a period of two years or 18,000 miles, whichever comes first.

The automakers involved are Chrysler, Ford, General Motors, Honda, Hyundai, Isuzu, Mazda, Mitsubishi, Nissan, Subaru, Toyota and Volvo. Each company also agreed to pay the state $10,000 in costs.

''This historic settlement with the nation's automakers is a final vindication of the New York lemon law and a major victory for consumer,'' Abrams said.

''Auto manufacturers who wish to do business in New York can now devote less of their time and energy to litigation and more of their resources toward production of dependable cars,'' he said.

Under the terms of the settlement, all of the automakers, except for Ford, must advertise the terms of the refund throughout the state for a six-week period.

In order for a car owner to be eligible for a refund, several conditions must be met:

-The car or light truck must have been originally purchased or leased in New York on or after Aug. 2, 1986.

-The repair must have been made after the manufacturer's basic warranty expired, but before the earlier of 24 months or 18,000 miles. The repair otherwise would have been covered under the manufacturer's warranty, with the exception of the time-milage limitation.

-The repair must have been performed by a dealer authorized by the manufacturer.

-The manufacturer must receive the documented claim form no later than 130 days from the date of the first advertisement. The address from which consumer can obtain a claim form will be released with 30 days, Abrams said.

He said his office will be the final arbiter of any disputes between automakers and consumers.

In addition, General Motors and Chrysler will have to reimburse all New York consumers who paid up to a $100 deductible for a powertrain repair within the earlier of the first 18,000 miles or two years.

Under the agreement, General Motors and Chrysler also will have to pay back all deductibles paid by consumers since Sept. 1, 1983, the effective date of the original lemon law in New York.

Ford changed its warranty policy in New York in March 1987 after a state court decided in an action brought by Abrams that Ford violated the lemon law by charging a deductible for powertrain repairs with the first 18,000 miles or two years.

The decision and an order by an appellate court that directed Ford to refund all deductibles were affirmed the the state's Court of Appeals last November.

Ford has agreed to review all further claims filed for deductible refunds and to post signs in all Ford dealerships and service centers regarding the availability of refunds for other warranty repairs, Abrams said.

He said the carmakers entered into the refund agreement without admitting any wrongdoing.

#90288u1088 10/15/1990 ~United Press International

LONDON (OCT. 15) UPI - The ''fifth man'' of the notorious Cambridge Spy Ring that fed classified information to Moscow is a retired British official named John Cairncross, who now lives in the south of France, The Times reported Monday.

Oleg Gordievsky, the highest-ranking KGB officer to defect to Britain, told the newspaper that Cairncross ''provided tons of documents'' to the Kremlin.

Gordievsky said Cairncross was a master-spy of similar stature to the other members of the ring; Kim Philby, Guy Burgess, Donald MacLean - who all fled to the Soviet Union - and Anthony Blunt.

The identity of the fifth man has remained a mystery, leading to several theories of who was the unknown member of the ring, which was recruited during the 1950s among disaffected leftist students of Cambridge University.

The Times said Cairncross served ''in influential positions in government departments, in signals intelligence and MI-6,'' Britain's supersecret spying organization.

Christopher Andrew, an historian who collaborated with Gordievsky to write a book about the KGB, said Cairncross may have informed Moscow about British and American plans to build an atomic bomb in 1940 when he became private secretary to Lord Hankey, who chaired a committe involved in the nuclear project.

Gordievsky defected to the West in 1985 after serving as an MI-6 double agent for 11 years, and he said KGB chiefs spoke in ''awe and admiration'' of Cairncross's achievements over a 15-year-long career of espionage.

''You could just as well name Cairncross as the second or third man,'' said Gordievsky, who served as KGB station chief in London.

The Times sent two reporters to the southern French village of St. Antonin-du-Var to try and meet Cairncross, but said there were no signs of life at his modest one-story villa, which was protected by guard dogs and a wire fence.

#90288u1090 10/15/1990 ~United Press International

GENEVA (OCT. 15) UPI - Tuberculosis cases and deaths are rising sharply because of the spread of the virus that causes AIDS, the World Health Organization said Monday.

Annual deaths from tuberculosis total around 3 million, with 8 million new cases every year - despite the fact that the cost of preventing and curing the lung disease is inexpensive, the U.N. health agency said.

Asia accounts for 1.8 million TB deaths, sub-Sahara Africa for 656, 000, and Latin America for 220,000, WHO said.

''In the industrialized countries, there are 42,000 TB deaths each year, mostly among the elderly, ethnic minorities and migrants,'' it said.

''After decades of declining rates of tuberculosis, progress against this

killer has come to an abrupt halt in some developed countries,'' WHO said. ''For example, the number of cases in the United States declined for 32 consecutive years until 1984 but is now on the increase.''

WHO said a main reason for the resurgence of TB - a bacterial lung disease transmitted by coughing and sneezing - is the spread of HIV infection because the AIDS-causing virus weakens the body's immune system.

About 3 million people with HIV infection also have TB - 2.4 million of them in sub-Saharan Africa - and numbers are rising, it said.

''TB is becoming a parallel epidemic,'' the agency said. ''WHO estimates that 15-20 million people will be infected with HIV by the end of the century. Because of the mirror nature of the two diseases, WHO expects TB cases and deaths to rise sharply, especially in Africa, Latin America and southeast Asia.''

The organization said new drugs can cure a person with TB in six months at a cost of $30 to $50 per patient, and preventive vaccine is inexpensive as well.

''Our biggest problem is implementing the drug therapy and getting all infants vaccinated,'' WHO director general Hiroshi Nakajima said in a comment on the report.

''The missing ingredients are money, a sense of urgency and an adequate medical infrastructure in the poorest countries, he said, noting that TB accounts for an estimated 26 percent of avoidable deaths in the developing world.

-30- 2364

#90288u1096 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - Tuberculosis is resurging after decades of decline, killing nearly 3 million people worldwide annually and threatening to claim even more unless quick action is taken, health officials warned Monday.

The World Health Oranization reported progress against TB, a contagious diseases of the lungs and other organs, has ''come to an abrupt halt'' in some industrial countries, like the United States. Furthermore, the number of reported TB cases have almost doubled in some east and central African nations over the last four to five years, WHO said.

Currently, about 8 million people annually develop new cases of TB. About 20 million people worldwide have active cases of TB, and another 1.7 billion are TB carriers.

TB is caused by airborne bacteria, called mycobacterium tuberculosis, which are coughed up by an infected person and inhaled by the healthy. The bacteria

settle in the lungs, where the immune system attacks them, forming abscesses. From there, the bacteria can seep into the blood stream and attack other organs.

The initial TB infection may be so slight that a healthy person may have no symptoms. Yet the bacteria remain in the body, dormant, until years later when the immune system is weakened by old age or disease.

''Countries with the highest rates of HIV (AIDS virus) infection and high numbers of TB carriers are recording explosive rates of TB,'' said Dr. Arata Kochi of WHO, explaining that people whose immune systems are crippled by the AIDS virus are more susceptible to TB.

WHO estimates about one-third of the estimated 8 million to 10 million people infected with HIV worldwide are also infected with the bacteria that causes TB.

''It is becoming a parallel epidemic and it is this trend that has public health officials worried,'' said Dr. Hiroshi Nakajima, WHO's director general.

The dual-infection problem appears worst in parts of Africa, where an estimated 2.4 million people are infected with both HIV and TB. About 300,000 people in Latin America are thought to be similarly infected; 200,000 in Asia and 150,000 in the United States and other industrial nations.

In developed nations, most TB deaths occur among the elderly, ethnic minorities and immigrants.

''Our biggest problem is implementing drug therapy and getting all infants vaccinated against TB,'' Nakajima said. ''The missing ingredients are money, a sense of urgency and an adequate medical infrastructure in the poorest countries.''

The only currently available vaccine for tuberculosis works best in newborns. Several other vaccines, however, are under development.

TB can be effectively treated by a series of antibiotics that specifically attack and destroy turberculosis bacteria. The treatment is a long one, with the patient taking medicine orally every day from six months to a year. Cost of drug therapy, which is best given while the patient is in a hospital, is about $250 per patient.

#90288u1101 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - Political leaders worldwide prefer to buy bullets instead of bread and that is the leading obstacle to ending poverty and hunger both in the United States and abroad, a religious lobbying group said Monday.

And, while full-scale war has not yet erupted in the Persian Gulf standoff, the money poured into the confrontation is already claiming the lives of innocents - an escalating number of lives lost through hunger, malnutrition and preventable diseases.

''Millions of casualties have already fallen as the result of the ongoing military build-up in the Middle East,'' said the Rev. Arthur Simon, president of Bread for the World, the grass-roots Christian anti- hunger lobby.

''The billions we have spent to arm developing countries now haunt us, especially since that money could have been used to meet the world's nutritional needs.''

Simon made his comments in releasing a report, ''Hunger 1990,'' issued on the eve of the observance of World Food Day by the United Nations' Food and Angriculture Organization.

According to the 134-page report, prepared by the group's Institute on Hunger and Development, more than half a billion of the world's people are chronically hungry, with as many as 500 million more vulnerable to periods of hunger each year.

At the same time, despite the easing of the Cold War, the arms race continues to accelerate rapidly, especially in the Third World, where the share of world military spending increased from 7 percent to 19 percent between 1960 and 1987.

The report said, for example, one M-1 tank costs $2.5 million, roughly equivalent to the total annual earnings of a community of 25,000 people in Ethiopia.

''Worldwide military spending is now estimated at $1 trillion, with the United States spending nearly one-third of that amount,'' the report said.

That may help explain why after seven years of continuous economic growth, the United States is unable to make a significant dent in either the numbers of

poor people or the nation's overall poverty rate, currently 12.8 percent.

Even more alarming in the United States, those who are poor appear to be falling deeper into poverty, according to the Center on Budget and Policy Priorities, with 38 percent of the 32.5 million poor people having incomes that are less than one-half - $4,943 for a family of three - of the poverty line.

The poverty gap - the amount of money needed to raise the income of the poor to the poverty line - was $54.3 billion in 1989.

Worldwide, according to the Bread for the World analysis, the situation is even more desperate.

Wars have caused extensive hunger, disrupted food porduction and distribution, created tens of thousands of new refugees and led to environmental degradation worldwide in recent years. Among the affected areas are Afghanistan, Cambodia, East Timor, Lebanon, the Philippines, Sri Lanka, Vietnam, Angola, Ethiopia, Eritrea, Liberia, Mozambique, Somalia, Sudan, Uganda, Colombia, El Salvador, Peru, and, most recently, Iraq and Kuwait.

''Armed conflicts, which during the past decade killed almost three times as many civilians as soldiers, also leave in their wake dislocated people, disrupted economies, poverty and famine,'' the report said.

''War-related famine affects at least 20 million people in southern and northeastern Africa,'' it added.

But the report also suggested the end of the Cold War could provide some new opportunities for a drive to end global hunger as the superpowers scale down their competition in the Third World and seek negotiated settlements in several regional conflicts.

#90288u1104 10/15/1990 ~United Press International

(OCT. 15) UPI - World oil prices plunged nearly $2 a barrel in early trading Monday as talk of a compromise turned traders' expectations away from war toward a peaceful solution of the Persian Gulf crisis.

On the New York Mercantile Exchange, the benchmark West Texas Intermediate for November delivery plummeted $1.84 at midday from Friday's close to $37.85 a barrel, after being down as much as $2.24 a barrel.

Over the weekend, the Soviet Novosti news agency reportedly quoted a senior Kremlin official, who visited Baghdad, as saying Iraqi leaders are considering a plan to withdraw from the oil-rich emirate.

Novosti was reported as saying Iraq wanted to keep strips of disputed border territory in Kuwait, including an oil field, and strategic Kuwaiti islands in the northern Persian Gulf.

Palestine Liberation Organization leader Yasser Arafat, who met with Iraqi President Saddam Hussein Sunday, was quoted as saying after the meeting that he thought Iraq is in a ''conciliatory mood'' but gave no further details.

Iraq denied Monday, however, it is willing to compromise over its occupation of Kuwait. ''I believe war in the (Persian) gulf continues to be imminent, but Iraq will not fire the first shot,'' Baghdad Radio quoted Iraqi Information Minister Latif Nassif Jassim as saying.

Nevertheless, the oil markets focused Monday on a peaceful rather than a violent solution to the crisis.

''The thought process is going heavily diplomatic. Iraq is making overtures and not beating the war drums. The perception of the marketplace is turning toward a diplomatic solution. It's had a war psychology,'' said Don Morton of PaineWebber Inc., Andover, Mass.

''There's a lack of any hostile statements and the market's gotten heavier and heavier as we trade at these (near $40 a barrel) prices,'' said Joe Miller of Shearson Lehman Hutton's International Energy Desk in New York.

''There's a feeling that Saddam Hussein is looking for a way out,'' Miller said.

''The market needs some war news - I call it radio war news - The lack of it is going to bring in profit taking. Unless we have (war news), it's difficult to sustain prices at $40 a barrel because there's plenty of crude and products around,'' said Nauman Barakat, vice president of Merrill Lynch Futures Inc.

Morton said there's also a technical aspect to the market - as the prices move downward they trigger technical sell orders, adding downward momentum.

Barakat placed the market's next firm technical support level around $34 a barrel, the low closing price of recent weeks.

On the Merc, unleaded gasoline for November delivery had fallen 2.53 cents af midday to 94.6 cents a gallon, while November home heating oil dropped 3.31 cents from Friday to $1.0205 a gallon.

On the European spot market, where crude is bought and sold for cash, Britain's widely traded North Sea Brent, the price leader sinced the Gulf crisis began, had lost $1.50 to $38 a barrel.

United Arab Emirates' Dubai light - the key OPEC crude from the Middle East

shipped mainly to the Far East - was down $1.30 to $33.35 a barrel.

On the U.S. Gulf Coast spot market, prompt delivery WTI crude declined $1.70 to $37.90 a barrel.

In Jakarta, Indonesia hiked the price of its oil exports by $7 to $35.25 a barrel in October, reflecting a tighter world market caused by the Persian Gulf crisis, Mines and Energy Ginandjar Kartasasmita announced Monday.

#90288u1105 10/15/1990 ~United Press International

DHAKA, Bangladesh (OCT. 15) UPI - A dawn-to-noon general strike was observed in Bangladesh Monday at the call of the All-Party Student's Council to protest the killing of three students and the government's closure of Dhaka University.

The strike was peaceful, barring a few stray incidents in which three vehicles were burned by protesters, a Dhaka police spokesman said.

All shops in the city remained closed Monday and vehicular traffic was sparse during the general strike.

The government Saturday night closed Dhaka University and all other educational institutions in the capital, saying such a move would save life and property following days of political turmoil in which eight people, including three students, died in police firing on anti- government protesters.

Mainstream opposition political parties have called for a countrywide, half-day general strike Tuesday to protest price hikes and to press the demand for resignation of President Hussain Muhammad Ershad's government.

Meanwhile, the Dhaka University teachers association has condemned the closing of the school, saying the government has violated the autonomy of the university. The group demanded steps to resume normal educational activities.

#90288u1116 10/15/1990 ~United Press International

JEDDAH, SAUDI ARABIA (OCT. 15) UPI - Pro-democracy Kuwaiti refugees, helping to chart a course for their nation once it is reclaimed from Iraq, won a bigger role in their post-liberation government Monday.

Adoption of the goal-stating communique and remarks by Kuwait's crown prince, Sheik Saad Al-Sabah, were the final events of a historic three- day meeting.

Mubarak Aldowailah, a leader in the Kuwaiti democracy movement, said Saad agreed to create a committee to expand the involvement of Kuwaitis in daily government affairs.

Irrespective of its inclusion in the final document, the revelation marked a milestone for the movement for greater democracy in the emirate. It followed a promise by Saad to restore the parliamentary form of government created under the 1962 Constituion but suspended 24 years later.

Sources on the communique-drafting panel were uncertain if the final document would mention the committee or a demand for repartitions.

Saad's agreement to the requests brought unity to the conference, whose communique rejected Iraq's Aug. 2 invasion of Kuwait, thanked Saad for agreeing to return democracy to the country and promised a greater emphasis on the liberties and philosphies espoused by Islamic teaching.

And Saad, at a closed meeting with the 1,200 delegates, pledged to demand reparations from Iraq and promised not to surrender any territory to Iraqi President Sadaam Hussien.

The move for greater democracy seemed not to pose a threat to the unity of the session or the unity of Kuwaiti exiles.

Meanwhile, Kuwaiti Oil Minister Rasheed Salim Alameery said there could be no negotiations with Iraq over disputes about oil production until Iraq withdrew from Kuwait.

The emirate has conceded it was exceeding its production quota until just before the invasion, when it cut back from as much as 2 million barrels a day to 1.5 million to help shore up the price before the invasion. Talks were in progress about the oil dispute, which Iraq argued damaged its economy, severely damaged by the Iran-Iraq war.

Alameery also said Kuwaiti production at the moment is about 90,000 barrels a day and it is being used to satisfy domestic needs for producing power, desalinization of water and for fuel. Oil sources at the conference estimate Kuwait is losing $1.5 billion a month in oil revenues, and one source said a war and damage to the oil fields and refineries would take months and hundreds of millions of dollars to repair.

He also rejected as ''''a false claim'' Iraq's contention that Kuwait was stealing oil from a northern oil field. Alameery said Kuwait was drawing just 2 percent of its daily production from the field and that the Kuwaiti wells were well within the border.

The conference was a revelation for Saudis, who for the first time got a taste of democracy when the opening speeches were broadcast live on state television.

One Saudi journalist, who asked for anonymity in fear of a possible jail term, said Saudi newspapers were taking advantage of the crisis to push at the edges

of press freedom in the desert kingdom. He dismissed as ''letting off steam'' meetings called by members of the royal family with intellectuals to discuss democracy.

''We can even discuss politics on the telephone right now,'' he marveled.

The session, which started Saturday and included Kuwaitis from business, labor academia and government, was closely watched in the Arab world for the directions it took. Many believe the freedoms won by the Kuwaitis eventually will spread to other Persian Gulf states.

#90288u1130 10/15/1990 ~United Press International

BONN, GERMANY (OCT. 15) UPI - Germany's interior minister, shot twice in an attack by a disturbed drug addict, was in serious condition Monday after undergoing a second operation.

Wolfgang Schaeuble, who was shot Friday, was awake and alert after the procedure ordered because of complications involving his nervous system, but the minister required an artificial breathing device, doctors said.

''The neurological disturbances that have appeared since the beginning have not improved,'' said Wolfgang Gerok, the head of the Freiburg University Clinic.''The general condition of Minister Schaeuble is very serious.''

Gerok said that neurological damage resulting from a gunshot wound to the spinal cord is causing temporary paralysis and serious disruptions to Schaeuble's motor functions. Doctors do not know if permanent neurological damage can be prevented.

A gunman, said by police to be a drug addict suffering from mental disorders, shot Schaueble after an electoral rally in southern Germany, injuring the minister in the jaw and chest.

A third shot wounded a security officer who had thrown himself in front of the interior minister.

Police arrested the gunman, who claimed that he felt ''persecuted by the state.''

As interior minister, Schaeuble is responsible for ''anti-terrorism'' and played a major role in negotiating details of German unification. He is one of Chancellor Helmut Kohl's top aides.

#90288u1138 10/15/1990 ~United Press International

LONDON (OCT. 15) UPI - Officials presented to Parliament Monday a finetuned version of London's bid to instill public confidence in Hong Kong by granting 50,000 families British nationality and the right to abandon the colony before China takes over in 1997.

The plan however had few changes beyond its main structure set out in the British Nationality (Hong Kong) Act, which was passed on June 14 after debate in the lower house by members who opposed the idea of any large-scale Chinese immigration to Britain.

The government of Prime Minister Margaret Thatcher believes giving the right of abode in Britain to 50,000 leading families will bolster confidence and help stem an outflow of skilled personnel that is undermining the colony.

But critics say the scheme will only provides an escape route for the privileged and does little to inspire trust in communist authorities in Beijing - whose assurances they will allow Hong Kong's capitalist lifestyle to continue have been greeted with skepticism since the bloody June 1989 crackdown of the Chinese pro-democracy movement in Beijing.

Colonial officials will assess who is eligible for British passports through an elaborate points system, and the governor has been given greater flexibility as the final arbiter on who gets the coveted travel documents.

The draft order of the plan laid before Parliament included provisions for those who had shown individual merits, such as bravery or gallantry, and service to a company or firm that has a close connection with Britain.

It estimated about 43,000 places would be awarded within two years, and the remainder would be chosen nearer to the 1997 expiration of the colony's lease.

The order will be debated in a few weeks, and pending its virtual certain approval, the first passports could be granted by spring 1991.

#90288u1162 10/15/1990 ~United Press International

PEORIA, IL (OCT. 15) UPI - The budget battle has come home for House Republican Leader Robert Michel, whose house was hit by spray-painting vandals.

The vandals painted the messages ''Cut Taxes, Deficit'' and ''Repeal - Stolen Pay Raise'' on the front porch of Michel's fashionable two- story home Sunday and a large dollar sign was drawn on the front door.

''It's one thing to disagree with public officials on the issue but it's another to destroy personal property,'' Michel's chief aide, Ray LaHood, said Monday. ''It belies belief in this day and age. Obviously, there's a few kooks and people on the fringe who feel they have to damage personal property.''

In an earlier graffiti incident in February, the messages ''Pay Raise Thief'' and ''Cong. Thief Drunk'' focused on the congressional pay raise issue and an automobile accident Michel had in California where the congressman had been drinking. Authorities said alcohol was not a factor in the crash.

LaHood said he thinks the same person was responsible for both attacks but no one has been arrested.

Michel was in Washington during the weekend and no one was in his Peoria home.LaHood said Michel did not have to pay for taking the spray paint off the home since it was covered in his homeowner's insurance policy.

#90288u1169 10/15/1990 ~United Press International

LONDON (OCT. 15) UPI - Stock prices closed slightly higher in light trading Monday on the London International Stock Exchange.

Stocks also rose in Frankfurt, Paris, Zurich and Madrid.

The London blue-chip Financial Times 100-stock index, which slipped 1.8 points Friday, added 1.5 points to 2,101.9. The narrower top 30 industrial average gained 5.4 points to 1,647.4.

Volume amounted to around 367 million shares compared with 375 million shares changing hands Friday.

Analysts said an early rally, which sent the FT-SE 100 up more than 20 points, collapsed shortly before the close when Wall Street started the session by losing 25 points.

Stocks were also hurt by Midland Bank's announcement it was cutting its main office staff 25 percent and selling its headquarters in a leaseback agreement.

On the economic front, the Central Statistical Office reported Britain's retail sales volume rose a provisional 0.5 percent in September from August and was up 0.2 percent from September 1989.

Market forecasts for September called for a rise of about 0.8 percent on the month.

Among the most widely traded stocks, a takeover bid by Burmah Castrol, the lubricants, fuels and chemicals group, for Foseco PLC, the specialty chemicals company sent Burmah plunging and Foseco surging.

Burmah tumbled 78 cents to $8.64 and Foseco, surged $1.79 to $5.32 after Burmah announced it had purchased 8 percent of Foseco PLC for an estimated

$464 million.

News International, the Rupert Murdoch company which publishes The Times of London and The Sun, lost 17 cents to $2.19 amid worries over the company's debts.

Standard Telephones and Cables gained 29 cents to $5.41 after the company confirmed that it was considering take-over options.

Among some of the international issues, Glaxo, the pharmaceutical group, and Imperial Chemical Industries both gained along with other internationals as the pound slipped on global foreign currency markets.

Analysts noted the stocks rose as the pound slipped, which should lift their profits expectations since they have large overseas earnings.

Glaxo added 17 cents to $14.51 and ICI gained 8 cents to $15.74.

Stock prices also closed higher in light trading on the Frankfurt Stock Exchange as investors showed optimism over the results of the weekend's local elections.

The closely watched German Stock Index, which gained 31.32 points Friday, closed up 19.19 points or 1.3 percent to 1,479.89.

Analysts said stocks moved higher from the opening following the strong showing by the Conservative Christian Democratic Union Party in four of the five new German states in Sunday's local state elections.

Elsewhere in Europe, stocks closed slightly higher in light trading in Paris, Zurich and Madrid.

On the Paris bourse, stocks ended slightly higher boosted in part, analysts said, to a small rally in French bond prices.

In Zurich, the Swiss Market Index added 9.3 points to 1,454.1 while in Madrid the General Index added 1.81 points to 218.03.

#90288u1177 10/15/1990 ~United Press International

AMRITSAR, INDIA (OCT. 15) UPI - Sikhs seeking independence in the state of Punjab killed at least 24 people during the weekend, including nine felled in a shootout with militants at a farmhouse, police said Monday.

Just before dawn Monday about 12 militants stormed the farmhouse of Nirmal Singh in Dhual Kalan, a village in the outskirts of the Sikh holy city of Amritsar, 250 miles northwest of New Delhi, police said.

They and village residents said militants killed Singh and eight other inmates in the ensuing shootout. The attackers snatched their victims weapons as they fled the village after the gunfight, shouting pro-independence slogans.

Authorities were unable to say why the farmhouse was attacked.

Some villagers said militants attacked Singh because he was an alleged smuggler and an illicit liquor vendor, while others said the attack was aimed to seize Singh's weapons, which included two powerful assault rifles.

Militants ambushed a security patrol on a routine duty in the Amritsar district Sunday night, killing all four of them, police said.

Sikh militants carried out several attacks across the state between Sunday evening and Monday noon, killing at least 11 people, police said, giving few details.

Such violence has been near-daily occurrence in Punjab, rocked since 1983 by the separatist campaign for a theocratic state to be called ''Khalistan,'' or ''Land of the Pure.''

More than 10,000 people have died in the separatist-related violence.

Sikh militants claim that members of their faith need a separate state to escape alleged discrimination practiced against them by the Hindu-dominated central government.

Sikhs make up 2 percent of India's 830 million people, who are mostly Hindus.

#90288u1184 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - A private funeral service was being planned Monday for composer-conductor Leonard Bernstein as friends and associates paid him tribute as one of the greatest musicians of his time and the first ''global musician.''

''Leonard Bernstein created a new category of American hero - the artist,'' said fellow composer William Schuman, former president of Lincoln Center for the Performing Arts.

''The affection with which he was held by his countryman and the world community transcends his specific accomplishments, which were many.''

Bernstein, 72, died Sunday at his West Side Manhattan apartment of cardiac arrest caused by lung failure only a few days after retiring as a conductor because of ill health. He had been a heavy smoker for years and suffered from

emphysema complicated by a pleural tumor.

The maestro's spokesman, Margaret Carson, said Bernstein's children were arranging a private service ''probably for sometime this week.'' She said plans for a later public memorial service were under discussion.

Bernstein's son, Alexander, and his physician, Dr. Kevin Cahill, were with him when he died.

He also is survived by two daughters, Nina and Mrs. Jamie Thomas, mother of his two grandchildren, his 92-year-old mother, Jennie Bernstein of Brookline, Mass., a sister, Shirley, of New York, and a brother, Burton, of Bridgewater, Conn. Bernstein's wife, actress Felicia Montealegre, died in 1978.

One of Bernstein's proteges and closest friends, conductor Michael Tilson Thomas, said in Miami, Fla., that he had been with Bernstein last Friday in New York and found him ''very concerned about disappointing his audiences by retiring from the podium.''

''He said he wanted to marshal all his remaining energy toward composing more music that would give his public pleasure.''

Thomas, principal conductor of the London Symphony Orchestra and artistic director of the New World Symphony of Miami, said that ''in some ways, Bernstein was the first global musician, someone very special for us as Americans because he was the first to step out into the arena of world music as an equal and even more than an equal.

''He came from America but he comprehended completely all the music of the world and was determined to make all the people in the world make music together. He was one of the greatest music figures of this century, a big and complex personality who loved life and was very generous with his time.''

Recalling that Bernstein burst upon the musical world in 1943 as a pinch-hit conductor of the New York Philharmonic at Carnegie Hall, the hall's executive director, Judith Arrons, said, ''All of us at Carnegie mourn the loss of one of the greatest musicians of our time, a man whose whole musical career was intertwined with the hall.''

Zubin Mehta, conductor of the New York Philharmonic, called Bernstein ''the great communicator.''

''This role, which began with the legendary Young People's Concerts on television in the 1960s is now all-encompassing,'' Mehta said. ''Literally hundreds of recordings and video releases will make him a household name with music lovers everywhere for generations to come.''

Bernstein's unofficial biographer, Joan Peyser, also noted his ''magnificent

legacy'' of four Broadway hit shows, recordings for Columbia and Deutsche Grammaphon, and videos such as his recent appearances with the Vienna Philharmonic that continue to be released.

''I think he put American music on the world map, disseminating American composers in the 1940s and 1950s in Europe,'' Peyser said. ''It would have taken a lot longer if he hadn't been there to do it.''

Bernstein was one the nation's most multi-faceted personalities, garnering acclaim as a composer of symphonic works and musical comedies, including ''West Side Story,'' veteran conductor of the New York and Israel Philharmonics, concert pianist, author and educator. He introduced a generation of American children to classical music by way of television.

The culmination of Bernstein's career, both as a musician and political activist who became involved in many ''causes,'' came early this year when he conducted German symphony orchestras in Beethoven's symbolic Ninth Symphony closing with the ''Ode to Joy'' on both sides of the Berlin Wall within weeks after it had been ruptured. He changed the words to ''Ode to Freedom.''

In commenting on Bernstein's greatness, Schuman recalled that composer Aaron Copeland, a father figure and mentor to Bernstein, once said music is one of the glories of mankind.

"Then surely Leonard Bernstein is one of the glories of music," Schuman said.

#90288u1207 10/15/1990 ~United Press International

NEWTON, Iowa (OCT. 15) UPI - All production and some support operations at Maytag Company's manufacturing facilities in Newton will be suspended the week of Oct. 22 through Oct. 26, company officials said Monday.

Officials said inventories had built up recently before the reduction of some production levels could take effect. A company spokesman said the short-term correction is needed to adjust present inventories to expected sales.

The vast majority of the approximately 2,000 Maytag production employees affected will receive unemployment compensation and Supplemental Unemployment Benefit payments during the layoff period.

Production at the company's Newton facilities will be resumed Oct. 29.

The company makes electrical household appliances.

-30- 955

#90288u1212 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - Property and casualty insurers Aetna, AIG, Hartford, Liberty Mutual and USF&G are at risk of collapsing in a deep recession and triggering a crisis on the scale of the savings and loan bailout a consumer group charged Monday.

A Public Citizen study of 20 of the nation's largest insurers failed the five companies on a series of ''solvency tests'' addressing long- term and short-term standards such as loss reserves, liquidity and junk bond holdings.

The industry disputed the findings.

''We regard the accusations by Public Citizen as preposterous,'' said Joyce Willis, director of public relations at the ITT-Hartford Insurance Group in Hartford, Conn. ''It is obvious to us that they've used highly questionable judgments to further their federal legislative agenda.''

But the study warned that ''a combination of low premium volume, high claims, and weak return on investments - all of which occur during an insurance cycle downturn - could spell potential financial trouble for these companies.''

''Two companies, USF&G and Fireman's Fund, exhibited all three of the long term business practices that together Public Citizen consider most indicative of long-term financial ill health,'' the study added.

Fireman's Fund was not included on the list, however, because it is being acquired by Allianz, the German insurance group, according to the consumer organization founded by lawyer Ralph Nader.

''The failure of just one insurance giant would overwhelm the state funds designed to protect policyholders,'' said Joan Claybrook, president of Public Citizen. ''The result could be another taxpayer bailout on the model of the savings and loan industry.''

The study cited mismanagement, overburdened and underfunded state regulatory systems, and insurance cycles aggravated by the McCarran- Ferguson Act, which exempts insurers from antitrust laws, as being at the root of the problem for property and casualty insurers.

''Solvency problems generally do not arise because premium levels are inadequate,'' the study said. ''Many companies operate efficiently and profitably at existing premium levels.

''In fact, some of the most competitively priced insurance companies also prove to be among the healthiest,'' the study said. ''High insurance rates, a matter of great concern for consumers, are often the sign of an inefficient insurance company, not a healthy one.''

Public Citizen recommended a series of reforms to protect the industry,

including: repeal of the McCarran-Ferguson Act to eliminate price-fixing, an increase in the proportion of insurance tax dollars that go toward regulation, and the publication of an annual government report on the financial health of individual insurers.

#90288u1221 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - President Bush signed into law Monday a bill to compensate hundreds of American civilians whose health and lives were scarred by radiation in the name of national security during the Cold War.

The measure authorizes a $100 million trust fund to pay damage claims to people who developed cancer and other ailments as a result of exposure to fallout from open-air atomic weapons tests in Nevada or radioactive dust they breathed while mining uranium for nuclear bombs.

The fallout victims, also known as the ''downwinders,'' would be eligible for individual payments of $50,000, and the miners, many of them Navajo Indians, could receive $100,000 each. For cases in which would-be beneficiaries already have died, their families or estates can qualify for compensation.

However, no claims actually can be paid before Congress passes a companion appropriations bill to establish the trust fund. The Justice Department is to administer the claims.

The Radiation Exposure Compensation Act received final congressional approval Sept. 27, capping a 12-year battle by the downwinders and uranium miners to win compensation, first in federal court and then on Capitol Hill.

The courts, while finding the government negligent in exposing unwitting citizens to unsafe levels of radiation, ruled the government is immune from such lawsuits and that compensation was a matter for Congress to address.

In the bill that ultimately emerged, Congress ''apologizes on behalf of the nation'' to individuals who were ''involuntarily subjected to increased risk of injury and disease to serve the national security interests of the United States.''

Bush, signing the legislation before departing on a two-day campaign swing through 15 states, called the bill ''fiscally responsible'' and said it was ''the result of close cooperation between the administratin and Congress.''

''This legislation establishes a compensation system in the executive branch that can be administered efficiently and permit eligible claimants to receive compensation without the expense and delay of traditional litigation,'' Bush said.

The president himself offered no apology to the victims of the radiation, but said, the ''compassionate payments ... would fairly resolve'' their claims.

Congress previously has enacted measures to compensate Marshall Islands residents for damage caused by U.S. nuclear weapons tests and to provide disability to U.S. servicemen exposed to nuclear fallout in Nevada and the Pacific.

Last week, the government issued its first batch of $20,000 checks to aging Japanese Americans who were held in internment camps during World War II. Those payments were made under a reparations program signed into law more than two years ago.

The administration had long shown reluctance to support legislation to recompense civilian downwinders and uranium miners. The Justice Department dropped its objections to the bill only after Congress adopted provisions to account for the victims' age, smoking habits and alcohol consumption in determining who is eligible.

The precise number of payments to be made under the new law is unknown.

The measure is expected to settle claims filed on behalf of 500 to 600 residents of Nevada, Utah and Arizona who developed cancer from exposure to radioactive clouds that drifted over their communities in the 1950s and early 1960s. The fallout was produced by above-ground nuclear explosions conducted during that period at the Nevada Test Site, about 65 miles from Las Vegas.

Many of the downwinders were children who died of leukemia.

Compensation also will be provided for 400 to 500 miners who contracted lung cancer or other respiratory diseases by inhaling radioactive dust while digging uranium ore in mines located in Utah, Arizona, Colorado, New Mexico and Wyoming from 1947 until 1971.

#90288u1230 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - President Bush said Monday that he and both GOP congressional leaders are ''on the same wave length'' in prefering a Senate committee's bipartisan deficit reduction proposal over a House Democratic plan.

Speaking with reporters before leaving on a two-day, five-state political swing, Bush also renewed his attack on Congress for failing to complete work on a budget and deficit cutting plan, prompting an angry reply from House Speaker Thomas Foley, D-Wash.

And the president again refused to clarify publicly which higher taxes he would accept as Congress struggled to complete its budget work by Friday's

deadline, when a bill temporarily funding government operations will expire.

The president has said repeatedly that he would not sign another stop-gap spending bill to keep the government functioning beyond Friday unless Congress sends him a budget and deficit reduction plan by then that he can accept.

Bush, who met Monday with Senate Republican leader Bob Dole of Kansas and House Republican leader Robert Michel of Illinois, said the three of them ''were pretty much on the same wave length'' in prefering the deficit reduction package approved early Saturday by the Senate Finance Committee,

Bush said last week the plan proposed by Democratic members of the House Ways and Means Committee was unacceptable.

The Senate panel's plan would not increase income tax rates for the richest Americans, as would the Democratic plan. But it would double the gasoline tax, from the current 9 cents a gallon to 18.5 cents a gallon. The Democratic plan contains no gasoline tax increases.

House Republicans were still trying to decide Monday whether to offer a GOP alternative deficit reduction package that would be debated either Tuesday or Wednesday on the House floor.

Bush has been walking a delicate political line in trying to work with the Democrats who control Congress to get a budget agreeement while at the same time criticizing Congress for failing to act. Monday, Bush was in attack mode.

''I think it's best this week to just keep the focus that it's the Congress that has the action (on the budget),'' Bush said. ''And the American people seem to understand by significant numbers that it is up in the Congress and it is the Congress to blame.

''So we'll just keep the focus there and still try to work cooperatively with the leaders to get a deal,'' Bush said.

''That's a weak argument for the president to use,'' an angry Foley said when told of Bush's finger-pointing.

He said Bush should not be engaging in ''partisan gaming'' at this point in the budget process and said Bush's comments were ''unwise and not productive.'' He said the administration remains an active player in consideration of the budget and that it would share responsibility for the failure to get a budget plan enacted on time.

Foley said he was not ready to abandon a bipartisan approach to the budget process but said, ''I'm distressed that others seem to be abandoning it.''

Bush was seen as having flip-flopped repeatedly last week in trying to state

his position on what tax increases might be acceptable to him in a deficit reduction plan. And he did nothing Monday to clarify that position.

''I'm not going to say what I will or won't do,'' Bush said. ''That managed to get a little confused last week, so what I'll do is say the action's in the Congress and I will take a look at what comes out. We've indicated to our (congressional) leaders our preferences.''

But he insisted that a final budget agreement still must cut $500 billion from the deficit over five years and that the savings be real and enforceable.

''Let the House work it's will, let the Senate work it's will, and I will stay with what I've said here about the broad parameters,'' Bush said.

Also on Monday, Bush signed an order that would impose up to $105.7 billion in Gramm-Rudman law automatic spending cuts should he and Congress fail to agree on a deficit reduction package whose passage would elminate the cuts.

Those cuts, if they are made, would hit defense and domestic programs equally to force government spending down to $64 billion, the fiscal year 1991 deficit reduction target contained in the Gramm-Rudman balanced budget law.

#90288u1239 10/15/1990 ~United Press International

(OCT. 15) UPI - Iraq today rejected a British warning to get out of Kuwait voluntarily or be forced out at gunpoint. Top Iraqi government officials, quoted on Baghdad Radio, say they woN'T compromise on Kuwait even though they believe war in the Persian Gulf is imminent. The Soviet news agency Novosti, quoting a senior Kremlin official who visited Baghdad, claims that Iraq is looking into a withdrawal as long as it keeps parts of the oil-rich border territory it seized in its lightning August 2nd invasion.

A published report says Saudi Arabia has discovered vast new deposits of high-quality crude oil in previously unexplored areas. The report says the find may boost the Persian Gulf nation's official reserves by 20 percent. It says the Saudis began exploration that led to discovery of the new reserves in central Saudi Arabia more than a year before Iraq's invasion of Kuwait.

Activity continues on the diplomatic front as Lebanon tries to get rebel Christian General Michel Aoun out of the French embassy in east Beirut, where he is seeking political asylum. His two-year fight with the Beirut government collapsed during the weekend in a battle with Syrian-backed forces. The Lebanese government wants Aoun to stand trial. France reportedly has dispatched helicopters to Cyprus that could be used to evacuate Aoun and his group from its heavily fortified embasssy in Beirut.

The Supreme Court has declined to get involved in the case of two Illinois

police officers who say their constitutional rights were violated because they canNOT wear stud earrings while either on or off duty. A federal district court has already upheld the right of the village of Peotone, south of Chicago to issue the order barring off-duty male officers from wearing earrings. The court ruled the police chief had the power to issue the order to protect the morale of his department.

The addition of Justice David Souter was supposed to produce a more conservative Supreme Court, but that's NOT the case in a ruling that upholds a decision on the flag burning issue. The nation's high court todayoverturned a lower court ruling that a flag burner could be prosecuted for ''breach of the peace''... even though NO violence followed his actions. 23-year-old William Carey, a Navy Reservist, was convicted after burning a flag in 1988 to protest U-S policy in Central America.

Internationally acclaimed musician Leonard Bernstein is dead at age 72. The versatile composer, conductor and pianist died of cardiac arrest last night at his home in New York City. Bernstein's death comes only days after he retired from public performance on the advice of his doctor. Boston Pops director John Williams said Bernstein's departure creates ''an unfillable gap in our artistic and spiritual life.''

WEST HARTFORD, CT (OCT. 15) UPI - Two playful baby cougars seized from New York Yankees outfielder Mel Hall are thriving at a small zoo and are a hit with staff and visiting children, officials said Monday.

''They are growing fast,'' said George T. Donnelly, spokesman for the Science Museum of Connecticut. ''It's like having a kitten at home, but translate that to them. They play with a tire'' instead of a string.

It is illegal to keep cougars in Connecticut and the animals, named Tyler and Tawny by museum staff, were taken from Hall's home in Fairfield in July following an anonymous tip, state wildlife officials said.

Hall bought the cougars for $4,600 from Daniel L. Braun, a Fort Lauderdale, Fla., exotic pet dealer. Hall showed them off to teammates in the Yankees clubhouse. He was arrested Oct. 6 and faces up to $400 in fines and 60 days in jail if convicted.

The cougar cubs were well cared for and have doubled their weight to at least 50 pounds since coming to the museum's small zoo, Donnelly said.

Now 21 weeks old, they eat a special high-protein meat mixture packaged like a huge saugage, play with the staff and have nearly lost the ''baby'' spots on their fur, he said.

''The male is very friendly. He will play and bite our shoelaces, but the female is a little standoffish,'' Donnelly said.

The cougars - also known as mountain lions or pumas - are on the federal government's endangered species list.

Tyler and Tawny cannot be released to the wild because both have been declawed and were raised in captivity. They also will grow too large for the museum's zoo.

''That's three strikes against them, so they could not survive,'' Donnelly said. ''They were not mistreated in any way, shape, or form, but we will not be able to keep them here as they become 200-pound animals.''

Federal wildlife officials will decide what becomes of the cougars, but they likely will be moved to a larger zoo, he said.

Hall was to appear Oct. 30 in Bridgeport Superior Court.

DEARBORN, MI (OCT. 15) UPI - Ford Motor Co.'s chairman said Monday the company's $500 million investment in electronics is vital to the No. 2 carmaker because the value of such components in a typical car should double to about $2,000 within the next ten years.

In opening the three-day International Congress of Transportation Electronics in Dearborn, Mich., called "Convergence 1990," Ford Chairman Harold Poling said electronics will help the auto industy meet ever-increasing demands to improve quality, fuel economy, safety and serviceability, all while reducing emissions, weight and cost.

"We believe the electronics industry will play a pivotal role in the future of the automotive industry - an industry that, as you know, has faced formidable challenges over the past decade or so," he said.

Poling cited a University of Michigan study which predicts that almost every new function envisioned for vehicles in future years would depend on electronic technology.

"The fastest growth will be in the areas of chassis electronics and environmental control features," Poling said, but hastened to add that new emissions proposals and more stringent fuel economy standards "will present severe difficulties" for automakers.

He also noted that while the costs of some electronics have fallen 35 percent

during the past 15 years, the costs of automotive goods and services have virtually doubled.

Part of Fords's $500 million commitment to electronics includes the recent renovation and expansion of its Scientific Research Labs in Dearborn, Mich. Ford also is building an electronics and radio plant in Portugal to supply its European vehicles, and just completed construction of electronics plants in Philadelphia and Cadiz, Spain.

Poling predicted that personal computers, fax machines and collision avoidance systems would make their way into cars in increasing numbers during the 1990s. He also said the advent of sophisticated navigation systems may allow cars to "virtually drive themselves.

"For a guy like me, whose first car was a Model A... all of this is truly amazing," Poling said. "So the evolution of electronic technology thus far has been remarkable, and the future holds even greater promise."

#90288u1305 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - Farm-state lawmakers used an environmental shield during debate on the new farm policy law but now are trying to water down two key proposals on pesticides, an environmental leader charged Monday.

One of the proposals would require farmers to keep records of their pesticide use. The other, to break the so-called circle of poison, would bar the export of pesticides that cannot be used in the United States.

Both were approved during floor debate in the House and Senate but are in peril during negotiations over the final version of the farm bill, said Ken Cook of the Center for Resource Economics.

Environmentalists helped farm-state congressmen head off challenges to the farm program with the argument the program provided the government's only leverage for ensuring soil and water conservation. Cook said some farm bill negotiators are now shortchanging the environmental community.

The shift, Cook said, underscored a belief among some environmentalists that ''cooperation with the Agriculture Committee doesn't work.''

Environmentalists, including moderates, have warned in the past that their support for the farm program could be withdrawn if their concerns are slighted.

As it stands, the farm bill would retain the requirement for farmers to practice conservation to qualify for farm program benefits and would toughen protection of wetlands, as well as creating two programs to pay farmers for steps to preserve wetlands and avoid chemical contamination of water supplies.

''It's going to be an entirely different picture if they leave a big chunk out of it,'' Cook said, referring to the pesticide issues. ''It's a package. We're 50 years into this chemical revolution and we have no idea of how much of it is being used.''

According to Capitol Hill sources, negotiations were heading toward a requirement for record-keeping only on restricted-use pesticides, rather than all pesticides as approved by the House and favored by environmentalists. A key remaining issue was who would have access to the records.

The Senate voted to limit access to the records to government employees only. The House voted to allow some information to be released to the public but it would not include the name of the farmer or the precise location that a chemical was used.

One source credited committee Chairman Rep. Kika de la Garza, D- Texas, with pressing for a resolution on record-keeping. Some members would like to drop the provision entirely.

On exports, sources said there was a substantial movement toward a set of rules proposed by Sen. Richard Lugar, R-Ind. They would allow exports of pesticides as long as they were registered in the United States, had a U.S. tolerance level, or were approved by other industrialized nations.

The Lugar rules would be far less restrictive than the House or Senate language. Critics said Lugar's language would bar export of only two chemicals chlordane and heptachlor.

The House and Senate voted to bar exports of pesticides banned in the United States and those that are not registered for U.S. use or do not have a food tolerance level.

Proponents say the restrictions are needed to prevent a ''circle of poison'' in which dangerous chemicals are exported and return as residues on imported foods. Opponents say the limits would simply inspire chemical companies to shoft production to other countries or drive up costs to U.S. farmers. Exports account for a large part of chemical sales.

#90288u1307 10/15/1990 ~United Press International

OTTAWA (OCT. 15) UPI - Teaching criminals to read and write offers the best hope for their rehabilitation and ability to function outside prison, Barbara Bush, wife of President George Bush, said Monday.

Bush, who was in Ottawa to help launch a four-day conference on literacy within the prison system, told corrections officials that poor education

doesn't excuse crime, but it limits people's options and affects the way they view life.

Before criminals can truly be free, she said ''they must first be released from the prison inside their heads.''

Bush said that when she sees the FBI's 10 Most Wanted List, ''I think if we made them feel more wanted earlier they wouldn't be wanted now.''

Bush, who has spent years championing literacy in the United States and internationally, said there are scores of success stories that indicate reading and writing pays off for offenders.

Timmy, who was convicted in the United States of armed robbery, told Bush in a letter he hoped to teach when he is released in 10 years. ''Now that I'm able to read I feel much better about myself,'' he wrote.

According to Bush, 80 percent of prisoners have no high school diploma and 75 percent lack basic reading and writing skills. ''Poor literacy and crime are linked,'' she said.

Bush said offenders can learn one of two things in prison: to do the crime better or how to stop doing the crime. Attending school is the best possible use of time for offenders, she said.

Meanwhile, Canadian corrections officials told the conference there is no direct link between illiteracy and crime. But it is widely recognized that illiteracy can contribute to joblessness and a delinquent lifestyle.

Offenders who cannot read and write have a more difficult time coping when they are released from prison.

A literacy campaign launched three years ago within the prison system resulted in a 900 percent increase in eight grade completions. There has been an 850 percent increase in the number of literate inmates in the United States since similar programs were launched there in 1982.

#90288u1310 10/15/1990 ~United Press International

NEW DELHI, India (OCT. 15) UPI - Black leader Nelson Mandela arrived in India Monday and urged the government to continue its support of the fight against apartheid in South Africa, saying the racist government policy is in ''the last throes of its demise.''

Mandela, who arrived in New Delhi from Nairobi, Kenya, made his remarks during a speech to thousands of cheering Indians at a public rally organized in his honor.

''We are here to appeal to you for your continued political, moral, material and financial support as we enter this crucial phase in our struggle for our liberation,'' Mandela told the crowd. ''At the top of our agenda is the ending of apartheid, because as long as apartheid remains in force violence will continue.''

The deputy president and de facto leader of the African National Congress said violence in South Africa was a sign the apartheid system was ending.

''Never in the history of the human race has a privileged group voluntarily abdicated its power,'' Mandela said. ''South Africa is no exception. Apartheid is in the last throes of its demise and the present violence is indicative of that position.''

Earlier, Prime Minister V.P. Singh and President R. Venkataraman met with Mandela and told him the Indian government had set aside $1 million in assistance to Mandela and his fight against apartheid.

Mandela is in India for a scheduled five-day official visit before traveling on to Brunei, Malaysia, Indonesia, Australia and Japan. He is accompanied by a five-member delegation but not his wife, Winnie.

Mandela, who is being treated as a head of state during his visit, received a ceremonial reception. He drove up in a motorcade to the British-built presidential palace and his vehicle was escorted by horse- mounted lancers in blue turbans and white uniforms from the front gates into the sprawling forecourt of the massive dome-topped building.

Mandela was greeted by Singh, Venkataraman, Foreign Minister I.K. Gujral and other senior officials. He then inspected a military honor guard.

Talking to news reporters moments later, Mandela said it has been one of his ''greatest ambitions'' to visit India.

''It has been my ambition to visit the country because of its history and background,'' Mandela said. ''Second, you must remember the strong ties that exist between South Africa and India. It was after all Mahatma Gandhi who ... established a tradition of non-violent struggle in our country. We have since been influenced by that tradition.

During his speech Monday evening, Mandela said he was thankful to the government of India for its longstanding support of the ANC call for diplomatic and economic sanctions against South Africa.

''India was the first country to voice its abhorrence of apartheid to the world,'' Mandela said. ''Through your consistent support for our struggle, we have now entered a new phase of history in South Africa.

''The African National Congress has been unbanned. Our political leaders have been released and political executions have been suspended. Further, the state of emergency has been partially lifted and exiles are returning and talks towards negotiations are in progress.''

Mandela noted, however, although some political prisoners have been released, ''thousands still languish in various jails of South Africa.''

''These developments are indeed victories for the people, achieved by them through their courageous resistance and sacrifice,'' Mandela said, adding his task is to ''transform this fractured society into a harmonious whole.''

Tuesday, Mandela is to receive the nation's highest civilian award, the Bharat Ratna, during an official ceremony. Wednesday, he is to fly to Agra to visit the Taj Mahal before traveling on to the Hindu holy city of Varanasi to receive a doctorate degree from the Banaras Hindu University.

#90288u1331 10/15/1990 ~United Press International

CHICAGO (OCT. 15) UPI - United Airlines Monday placed a $22 billion order with The Boeing Co. for up to 128 widebody jets - the biggest such order in commercial airline history and the first for the new Boeing 777.

The order, including options, calls for delivery of 68 Boeing 777s and 60 Boeing 747-400s beginning in 1994 and continuing at least through 2001. If all options are taken, deliveries would stretch out at least until 2004. All the planes will be powered by Pratt & Whitney PW-4000 engines. Pratt & Whitney said the order is worth $1.8 billion.

The order for the 777s came despite the fact Boeing has not formally launched full-scale production of the plane, a twin-jet expected to fill a market gap between the 767 and the 747. The plane would compete with the Airbus Industrie A-330, which is already on the market.

In Seattle, Boeing spokesman Jack Gamble said Boeing's board of directors will decide at an Oct. 29 meeting whether to pursue development of the 777, which is expected to cost $4 billion or more to get off the ground. Earlier this year Boeing announced that three major Japanese companies would help with development of major portions of the aircraft.

Monday's big widebody order was United's third major aircraft order in 18 months. "Last year, when we announced both our record order of 370 narrow bodies - Boeing 737s and 757s - and an additional order for 32 Boeing 767-300s we said our next step would be to expand and modernize our widebody fleet," United Chairman Stephen Wolf told reporters.

"With today's announcement, we have made good on that promise to equip United with the newest most modern and efficient jet aircraft well into the next century," Wolf said.

Wolf set the value of the widebody order at $22 billion, but noted the figure was "in essence sticker price plus escalation." UAL and Boeing said it was the biggest widebody order in commercial airline history. "We're hoping to pay a tad less than $22 billion," he added.

The new order comes less than a week after the collapse of an employee buyout of United's parent UAL Corp. UAL directors last Tuesday terminated a merger agreement with the employee group and endorsed continuation of Wolf's aggressive expansion plans.

"Although the order is significant, it is but one component of a comprehensive strategic plan set in motion at the beginning of 1988," Wolf said.

United had planned to finalize the widebody order during the summer but put off awarding the contract at the request of the buyout group, which hoped to use it as leverage to raise $750 million in subordinated financing from the airline's suppliers.

"If the buyout had succeeded last week we probably would have allowed them to make determination on what aircraft they were going to buy and probably would have waited until the ownership of the company had changed," Wolf told reporters. He refused to say how the new order would be financed.

"Clearly it's a fairly large capital commitment we need to get financed in the years ahead and we believe we'll be able to do that," Wolf said. "We've got plenty of time to sort out whether we will acquire or lease or just how we'll finance the aircraft," he added.

But he said the aircraft order would have "very, very little effect in the near term" on UAL's fat cash reserve - estimated by analysts at $1 billion to $1.4 billion.

UAL unions, still interested in a buyout despite their failure to finance for their last bid, have been eying that cash reserve as a potential source of capital for a revised buyout offer.

The agreement between UAL and Boeing includes firm orders for 34 Boeing 777s and 30 Boeing 747-400s, on options for equal numbers of each model. The 777s will seat 363 passengers - including 38 in first class - and have a range of 4,800 miles. They will replace United's DC-10 aircraft on domestic routes. The first 11 are scheduled for delivery in 1995.

The 747-400s will continue to be used as the primary aircraft on United's expanding international routes. The new order is in addition to a previous

United order for 15 of the long-range, fuel-efficient 747- 400s - six of which have been delivered so far.

The first 747-400s in the new order are to be delivered beginning in 1994. Seating configurations have yet to be determined. Of the 15 previously ordered the six already delivered carry 392 passengers and the nine still on order are to carry 448 passengers.

#90288u1357 10/15/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (OCT. 15) UPI - The Czechoslovak Communist Party faced increasing pressure Monday from various political forces as the first anniversary of the November ''Velvet Revolution'' approaches.

In a series of developments:

-President Vaclav Havel's office expanded on the idea of putting communism on mock trial in condemnation of 42 years of monopoly rule.

-The federal agency auditing Communist Party property accused it of hiding much of its wealth in joint ventures.

-A group of anti-communist reform officers is presenting evidence that the army tried to suppress the mass demonstrations last November that toppled the regime.

-Finance Minister Vaclav Klaus was elected chairman of Civic Forum, which led the revolution, putting more pressure on the communists.

Havel's spokesman expanded Monday on a proposal the president made the previous day to put communism on mock trial.

Havel said Sunday, ''We should consider very seriously the idea of a symbolic moral trial at which the previous 40-year regime should be condemned. We must be willing to say clearly that ... people were innocent victims of the regime.''

Spokesman Michal Zantovsky said the president ses a trial similar to one organized in Britain in the 1970s by the philosopher Bertrand Russell that put the United States on symbolic trial for its involvement in Vietnam.

Also on Monday, the federal Ministry of Control, charged with auditing the property of the Communist Party and its front organizations, presented an interim report accusing the communists of hiding much of their wealth in joint ventures.

It said the party tried in early 1990 to transfer its property to sympathetic

local government organizations.

Meanwhile, army representatives are coming under increasing pressure to reveal any plans or orders they had to suppress demonstrations last November.

According to the Czechoslovak news agency CTK, members of the Free Legion, a group of anti-communist reform officers, gave documents last Friday to a presidential commission investigating the army's role in the events.

Free Legion is locked in a battle with the army high command and Defense Minister Miroslaw Vacek over what it describes as incompetent officers appointed during communist rule and still loyal to the party.

In another development, Vaclav Klaus, the country's free-market finance minister, was elected chairman of Civic Forum.

Klaus is expected to transform the Forum into a right-of-center organization promoting his free-market reforms, which have been the main focus of the communists' political objections.

Klaus' main responsibility will be to consolidate the umbrella group's various factions behind the economic reforms, and to carry the Forum's banner into critical local government elections Nov. 23-24.

#90288u1362 10/15/1990 ~United Press International

HARRISBURG, PA (OCT. 15) UPI - Gov. Robert P. Casey vetoed a bill Monday that would have allowed Pennsylvania savings and loan institutions to compete in the national market.

Casey said his veto was in reaction to the nationwide thrift crisis, which is expected to cost taxpayers at least $500 billion in the form of bail-outs. The bill passed the state Senate April 2 by a vote of 46-2 and passed the state House Oct. 2 on a 160-33 vote.

Sponsored by State Senate Majority Leader F. Joseph Loeper, the bill would have allowed Pennsylvania's thrifts to acquire other thrifts elsewhere in the country, or to be acquired by other banks. It would also have allowed state S&Ls to form mutual holding companies that could make acquisitions.

Currently, the 141 S&Ls based in Pennsylvania have not been permitted to open branches or acquire subsidiary companies beyond an eight-state region. Expansion in those states was permitted only where thrift laws were reciprocal with Pennsylvania's. The bill required state Department of Banking approval, and was supported by the department.

Casey said the bill was not in the best interests of the S&L industry and its

investors, and called it "premature." "Until more progress has been made by the federal government in reforming the deposit insurance system and the financial services industries, especially the thrift industry, I do not believe Pennsylvania should rush into such a substantial revision of our own statute," he said.

The veto was Casey's second in recent days. On Friday night, he vetoed the repeal of the so-called six percent widow's tax, calling it a disguised "windfall for the rich."

Republicans criticized the widow's tax veto and vowed an override attempt when the General Assembly returns after the election. Sponsors of the S&L bill were not immediately available for comment.

-30- 2073

#90288u1364 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court took a dual swipe at state rights Monday, ruling some states must get federal approval before creating new judgeships and blocking state prosecution of airlines for false advertising.

The justices also ordered an appeals court to decide whether there is a loophole in the high court's ruling in June that burning the flag is a constitutionally protected form of expression.

In a unanimous decision, issued without detailed comment, the nine justices affirmed the decision of a federal district court in Georgia that the Voting Rights Act of 1964 requires that state to continue to receive federal approval before creating new judgeships.

The requirement is to guard against racial discrimination, but the state had asked the high court to find its current methods of choosing judges did not require federal oversight or violate the law. The high court ruling affects those states, mainly in the South, covered by the Voting Rights Act.

On the other states' rights issue, the justices refused to review an April decision of the 5th U.S. Circuit Court of Appeals that barred 34 states from enforcing state false advertising laws against 14 specific airlines.

The appeals court said the federal Airline Deregulation Act of 1978 bars such state prosecutions, leaving regulation of airline advertising claims to the Department of Transportation.

In the issue of burning of the American flag, the court vacated a lower court ruling that said a flag burner can be prosecuted for ''breach of the peace'' even when no violence followed his action.

The court sent the case back to the 8th Circuit Court of Appeals for reconsideration in light of the high court's June ruling that flag burning is a form of political speech protected by the First Amendment.

The appeals court had sided with prosecutors, who argued that William Cary could have incited riot when he burned a flag during a demonstration against U.S. policies in Honduras March 18, 1988, outside an Armed Forces Recruitment Center in Minneapolis.

It ruled that because there was vandalism during the demonstration, the flag burning occurred ''in a context of violence'' and the case against Cray was not an issue of protected speech but of ''preventing breaches of the peace.''

The appeals court must now reconsider its ''breach of the peace'' rationale in light of the high court's June decision, which struck down an anti-flag burning law enacted by Congress as violating the First Amendment.

In other actions Monday before beginning a two-week recess, the court:

-Let stand a ruling that the forfeiture provisions of the Racketeer Influenced and Corrupt Organizations Act can apply to an obscenity case. The 4th Circuit Court of Appeals had upheld RICO forfeiture in a case involving a Virginia couple that operated nine video rental stores and three bookstores in suburban Virginia just outside the nation's capital.

The ruling forced Dennis and Barbara Pryba to forfeit to the government shares of stock in five companies, corporate assets, real estate and motor vehicles - all for selling four videotapes and six magazines deemed obscene with a total value of $105.30. Attorneys for the couple argued that making an obscenity offense punishable under the RICO statute violated the First Amendment.

-Agreed to decide whether a death sentence is unconstitutional when it is imposed despite a prosecutor's assurance that it would not be sought. The case stemmed from an Idaho judge's directive that Bryan Stuart Lankford be executed for the beating death of a couple on a camping trip. Lankford's attorney said he did not argue against imposition of the death penalty because he had received a written assurance it would not be sought.

-Refused to review a military court's aggravated assault conviction of a serviceman infected with the AIDS virus for trying to engage in homosexual activity without using a condom or informing his partner of his condition.

-Let stand a ruling the Peotone, Ill., police department could order male officers in the small town not to wear earrings, even while off duty.
-Allowed to stand a ruling that federal antitrust laws can be used to halt the merger of non-profit hospitals.

-Agreed to decide whether a damaging job recommendation from a former federal

government employer can constitute malice.

-30- 4602
#90288u1370 10/15/1990 ~United Press International
HAZMIYEH, LEBANON (OCT. 15) UPI - Rebel Christian Gen. Michel Aoun remained holed up in the French Embassy Monday, seeking refuge, while President Elias Hrawi maneuvered to gain custody of Aoun so he could stand trial.

Meanwhile in Christian east Beirut, Syrian troops fortified their positions Monday after overnight clashes broke out between Shiite fundamentalists and Syrian-backed Christian militiamen, killing 16 people, security sources said.

Militiamen of the pro-Iranian Hezbollah and the Syrian-backed Christian breakaway Lebanese Forces militia of Elie Hobeika exchanged machine-gun fire and rocket-propelled grenades in east Beirut Sunday night.

Sources added that the clashes erupted after Hezbollah fighters advanced from their positions in Beirut's southern suburbs behind Syrian troops who captured Aoun's headquarters and parts of east Beirut.

A Hezbollah statement accused Hobeika's gunmen of ''looting, killing and humilating civilians'' in the Christian areas and warned that the party will confront them until the Lebanese authorities take charge of security in the region.

A spokesman for Hobeika's militia said Hezbollah members tried to loot the Christian shops in Hadeth after the Syrians defeated Aoun's Army in the area.

Hrawi met with French ambassador Rene Ala at the temporary presidential residence in west Beirut and told him ''the government wants to try Aoun before deciding whether to allow him to leave,'' one official said Sunday.

''Hrawi warned Ala that any French attempt to evacuate Aoun and his fellow rebel officers without the government's consent would trigger a serious crisis between Lebanon and France,'' the official said.

French President Francois Mitterrand said Monday in Paris he will reject any request to turn Aoun in to Lebanese authorities, insisting that French honor is at stake.

''General Aoun has sought refuge in the French Embassy. He has demanded that France grant him political asylum, and France has accorded it to him. This is now a question of honor for France, which will protect General Aoun,'' Mitterrand said.

The pro-Syrian president told Ala to relay a demand to the French government to withdraw its political asylum to Aoun and his officers who took refuge at

the French Embassy in the Christian district of Hazmiyeh on the eastern outskirts of Beirut.

Aoun was holed up with his advisers at the embassy pending government permission for him to leave for France.

In Paris, about 100 Aoun supporters occupied the Lebanese Embassy for a second day Sunday, vowing to remain there until their leader is granted political asylum in France.

France said Saturday it granted Aoun political refuge and was studying ways to help him leave Lebanon.

As a diplomatic crisis appeared looming between Lebanon and France over Aoun's fate, French guards at the hilltop embassy and the nearby French ambassador's residence took precautionary measures.

Dozens of French guards laid mines along a barbed-wire fence around the embassy and the nearby residence, barring reporters from entering the compound.

Witnesses said the families of the deposed officers joined them at the heavily guarded building amid reports that France had dispatched helicopters to Cyprus in preparation to evacuate the trapped military group.

In the hillside district of Hazmiyeh, where many pro-Aoun Christian civilians live, residents were shocked Saturday when a joint Syrian-Lebanese force launched an offensive and forced the defiant officers to hide at the French Embassy.

Steel-helmeted Syrian troops checked identity cards and searched cars at checkpoints in Hazmiyeh. Grim-faced residents cleared rubble in and outside their houses while tanks roared on the shell-pocked roads.

The wide-scale attack Saturday backed by Syrian-manned warplanes, tanks and heavy armor, left at least 130 people dead and 500 wounded, according to updated hospital reports.

Army Commander Gen. Emile Lahoud inspected Baabda Palace and the nearby ministry of defense as his tanks, flying white flags, manned the streets of Aoun's enclave.

Witnesses said Syrian troops deployed in large numbers along with Lebanese soldiers inside and around the heavily damaged Baabda Palace.

Aoun had refused to step down since he was appointed head of a transitional government by former President Amin Gemayel Sept. 22, 1988, after Parliament failed to elect a new president.

Aoun engaged troops in a futile ''war of liberation'' against Syria's 35,000 soldiers in Lebanon last that left more than 1,000 people dead. He then rebuffed a national reconciliation agreement endorsed by Lebanese lawmakers a year ago in Taif, Saudi Arabia.

#90288u1373 10/15/1990 ~United Press International

LIMA, Peru (OCT. 15) UPI - Left-wing Peruvian guerrillas occupied the Lima headquarters of the Italian news agency ANSA Monday and forced a correspondent to transmit a revolutionary proclamation, the bureau manager said.

Alberto Ku King said that three masked insurgents - two men and a woman - surprised ANSA correspondent Carlos Alvarez as he was opening the metal door to enter the office in the San Isidro neighborhood.

Ku King said the guerrillas, armed with grenades and pistols, forced him to send off a proclamation giving the program of the Tupac Amaru rebel organization in their Third Plenum, or general assembly.

Intruders then painted the walls with slogans alluding to the Third Plenum that was held ''somewhere in the country'' and fled, saying they had left behind a time bomb, Ku King said.

Police arrived 20 minutes later and said they had deactivated the explosive device, Ku King said.

The proclamation was signed by Victor Polay Campos, ''commanding general'' of the Tupac Amaru group. He escaped from jail with 47 other members of his organization July 9.

Tupac Amaru and the ultra-leftist Shining Path are the two guerrilla groups active in Peru in recent years.

#90288u1374 10/15/1990 ~United Press International

LOS ANGELES (OCT. 15) UPI - Former Lincoln Savings & Loan head Charles Keating broke his silence Monday to rebuke prosecutors for charging him with defrauding thousands of investors who bought now-worthless junk bonds at the failed thrift.

"It's dangerous to be right when the government is wrong," Keating said to news photographers as was being brought to court from County Jail for a hearing. The remark was his first public comment on his legal problems, other than his plea of "absolutely not guilty" when he was arraigned earlier this month.

Superior Court Judge Lance Ito set a tentative Dec. 5 trial date for Keating and three codefendants, but Keating's lawyer said he doesn't expect the case to go to trial before next spring.

"In my opinion, my client cannot possibly prepare to go to trial by that date " Keating attorney Steven Neal told the judge. "I would resist going to trial at that date. I'm shooting for early March next year."

Neal cited the complexity of the case in which Keating and three associates are charged with bilking 23,000 investors, mostly elderly people, out of $250 million through the sale of junk bonds at Lincoln branches. The bonds now are virtually worthless.

Neal reminded the judge that there are 42 volumes of grand jury transcripts and 600 exhibits encompassing the testimony of 94 witnesses. The judge indicated that the Dec. 5 date was not firm, saying, "I think we're being overly-optimistic about that date."

The judge also scheduled a hearing for Oct. 26 at which the defense will argue for dismissal of the charges. The judge at that time will also consider extending an order sealing the grand jury transcripts.

Keating, 66, entered the courtroom from a lockup area smiling broadly and frequently looked at family members sitting in the courtroom. He remains in custody in lieu of $5 million bail. His lawyers, having exhausted the state appellate process, last week asked a federal judge to lower the bail. Further proceedings on that request are set for Tuesday.

Keating has been held in County Jail since Sept. 18, when the extraordinary bail was set by Superior Court Judge Gary Klausner, who said Keating was a flight risk.

Keating, the former chairman of the parent company of Irvine, Calif.-based Lincoln Savings, just three years ago estimated his wealth at nearly $40 million. He now claims he is $5.2 million in debt and cannot post the high bail.

The four defendants are charged with 42 counts of securities fraud alleging they schemed to sell the junk bonds issued by Lincoln's parents, American Continental Corp., without telling investors that the bonds were high-risk and uninsured. Authorities say many of the victims lost their life savings.

The codefendants include Judy J. Wischer, 42, former president of American Continental; Rob S. Symes, 37, former Lincoln chief executive officer; and Ray C. Fidel, former Lincoln president. Wischer is free on $200,000 bail; Symes and Fidel are free on $100,000 bail apiece. All defendants have pleaded innocent to the charges. If convicted, they could be sentenced to up to ten years in state prison.

DALLAS (OCT. 15) UPI - President Bush will take a break from campaigning for fellow Republicans and pushing Congress for a new budget to attend the second game of the World Series in Cincinnati, the White House announced Monday.

A spokesman said Bush will fly from Washington to Cincinnati to watch Wednesday's nationally televised game between the Cincinnati Reds and the Oakland A's.

The trip was announced while Bush began a two-day, five-state campaign swing on behalf of GOP candidates, and as he pressed Congress to pass a new deficit-cutting budget by Friday, when emergency funding expires.

Bush, a former Yale first baseman, will fly to the World Series aboard the new Air Force One, a jumbo Boeing 747.

#90288u1380 10/15/1990 ~United Press International

(OCT. 15) UPI - Another part of South Africa's legal apartheid system has come to an end. The government has abolished the 37-year-old Separate Amenities Act that segregated such public facilities as toilets and swimming pools. The act was adopted in 1953 following a campaign of defiance by a then-youthful black leader by the name of Nelson Mandela . The end of the act does NOT end the problem. Some towns under tight conservative control vow to use loopholes in the law to keep their areas segregated.

Israel is NOT cooperating with a U-N delegation that's supposed to investigate last week's deaths of at least 20 Palestinians during rioting on Jerusalem's Temple Mount. The United States was among the Security Council members voting to condemn Israel for its actions. President Bush declines direct comment on the situation other than to say he feels the U-N resolution calling for an investigation should be- in his words- ''fully implemented.''

The state of Georgia has lost a battle before the Supreme Court to overturn part of the 1964 Voting Rights Act that says the federal government must

approve new judgeships. Georgia argued the section of the law was the most extreme case it could find of Congress intruding into the authority of a state. But the Supreme Court disagreed and supported a federal court decision upholding the judgeship portion of the Voting Rights Act.

British Prime Minister Margaret Thatcher has joined President Bush in congratulating Soviet President Gorbachev on his winning the 1990 Nobel Peace Prize. Thatcher calls the award ''richly deserved.'' Gorbachev was honored for his actions that kept former Communist governments of Eastern Europe from crushing the mostly peaceful revolutions that swept them from power last year.

Pro-democracy Kuwaiti refugees today won a bigger role in their post-liberation government following a historic three-day meeting in Saudi Arabia. The Jeddah conference adopted a goal-stating communique in which Kuwait's crown prince Sheik Saad Al-Sabah agreed to create a committee to expand the involvement of Kuwaitis in daily government affairs. The meeting was aimed at helping to chart a course for Kuwait once it is reclaimed from Iraq.

In London, published reports today identified the ''fifth man'' of the notorious Cambridge Spy Ring that fed secrets to the Soviet Union. He was retired British official John Cairncross, who now lives in southern France. The highest-ranking K-G-B officer to defect to Britain is quoted as saying Cairncross ''provided tons of documents'' to the Kremlin. The identity of the fifth man had remained a mystery that led to several theories of who was the unknown member of the ring. The spy ring was recruited during the 1950's among disaffected leftist students at Cambridge University.

WASHINGTON (OCT. 15) UPI - Property and casualty insurers Aetna, AIG, Hartford, Liberty Mutual, and USF&G are at risk of collapsing in a deep recession and triggering a crisis on the scale of the savings and loan bailout a consumer group charged Monday.

A Public Citizen study of 20 of the nation's largest insurers failed the five companies on a series of "solvency tests" addressing long-term and short-term standards such as loss reserves, liquidity, and junk bond holdings. The industry disputed the findings.

"We regard the accusations by Public Citizen as preposterous," said Joyce Willis, director of public relations at the ITT-Hartford Insurance Group in Hartford, Conn. "It is obvious to us that they've used highly questionable judgments to further their federal legislative agenda."

Jonathan Powell, a spokesman for Aetna Life and Casualty Co., also in Hartford called the document "ludicrous." But the study warned that "a combination of low premium volume, high claims, and weak return on investments - all of which occur during an insurance cycle downturn - could spell potential financial trouble for these companies."

"Two companies, USF&G and Fireman's Fund, exhibited all three of the long term business practices that together Public Citizen consider most indicative of long-term financial ill health," the study added.

Fireman's Fund was not included on the list, however, because it is being acquired by Allianz, the German insurance group, according to the consumer organization founded by lawyer Ralph Nader.

"The failure of just one insurance giant would overwhelm the state funds designed to protect policyholders," said Joan Claybrook, president of Public Citizen. "The result could be another taxpayer bailout on the model of the savings and loan industry."

The study cited mismanagement, overburdened and underfunded state regulatory systems, and insurance cycles aggravated by the McCarran-Ferguson Act, which exempts insurers from antitrust laws, as being at the root of the problem for property and casualty insurers.

"Solvency problems generally do not arise because premium levels are inadequate," the study said. "Many companies operate efficiently and profitably at existing premium levels.

"In fact, some of the most competitively priced insurance companies also prove to be among the healthiest," the study said. "High insurance rates, a matter of great concern for consumers, are often the sign of an inefficient insurance company, not a healthy one."

Public Citizen recommended a series of reforms to protect the industry, including: repeal of the McCarran-Ferguson Act to eliminate price-fixing, an increase in the proportion of insurance tax dollars that go toward regulation, and the publication of an annual government report on the financial health of individual insurers.

#90288u1415 10/15/1990 ~United Press International

DETROIT (OCT. 15) UPI - General Motors Corp. and the United Auto Workers said Monday they will formally sign their new three-year labor agreement Friday at GM's world headquarters.

On hand will be GM Chairman Robert C. Stempel and GM President Lloyd Reuss, as well as Alfred Warren Jr., the giant automaker's chief labor negotiator, company spokesman John Maciarz said.

UAW President Owen Bieber and UAW Vice President Stephen Yokich, who led the union's GM negotiations, also will ink the agreement at the Friday morning ceremonies.

The GM/UAW pact covers nearly 300,000 GM auto workers until September 1993. GM and the union reached agreement on the new contract three days after the Sept. 14 deadline was extended. The pact was overwhelmingly ratified by GM workers.

About 100,000 U.S. auto workers at second-ranked Ford Motor Co. are expected to ratify a similar, or "pattern" pact tentatively agreed to earlier this month. Voting is scheduled to end this Sunday.

The UAW already has stepped up efforts to fit the GM and Ford pacts to Chrysler Corp., although the No. 3 automaker insists it cannot afford a similar pact.

#90288u1419 10/15/1990 ~United Press International
WASHINGTON (OCT. 15) UPI - The Supreme Court, bolstering the flag burning decision it handed down just four months ago, Monday vacated a lower court ruling that a flag burner can be prosecuted for ''breach of the peace'' even when no violence followed his action.

The court vacated the conviction from a Minnesota case and sent it back to the 8th U.S. Circuit Court of Appeals for reconsideration in light of the high court's June ruling.

On June 11, the court struck down a new federal anti-flag burning as violating the First Amendment's guarantee of freedom of speech.

But that decision came by a 5-4 vote with Justice William Brennan writing for the majority. Brennan, leader of the court's liberal faction, retired a month later and has been replaced by New Hampshire jurist David Souter.

The more conservative high court technically could have used this case to reconsider the earlier ruling, but chose not to. The appeals court must now decided whether it believes a loophole exists under which flag burners can be prosecuted.

A breakdown of the court's vote on vacating the conviction was not announced.

The case involves William Cary, 23, who burned a flag during a demonstration against U.S. policies in Central America.

Cary, then a member of the U.S. Naval Reserves, burned the flag March 18, 1988 in front of an Armed Forces Recruitment Center in Minneapolis after protesters broke a plate-glass window and lit fireworks at the center.

Three months later a federal grand jury indicted Cary for ''casting contempt upon the flag'' by publicly burning it in violation of federal law.

He was convicted and sentenced to 90 days in jail, and was later court-martialed as well by the U.S. Naval Reserves.

Cary appealed the civilian conviction, but before the case could be heard the Supreme Court struck down a similar anti-flag burning law from Texas, with Brennan writing: ''If there is a bedrock principle underlining the First Amendment, it is that the government may not prohibit the expression of an idea simply because society finds the idea itself offensive or disagreeable.''

The 8th U.S. Circuit Court of Appeals was seemingly precluded from upholding Cary's conviction based on the Supreme Court ruling, but it agreed with the government's newfound contention that Cary's action could have incited riot because they were performed ''in a context of violence'' and therefore were not an issue of protected speech but of ''preventing breaches of the peace.''

The government claimed because of the vandalism surrounding the flag burning, Cary's action could have encouraged such action to continue.

''The federal government's interest in protecting against breaches of the peace ... is unrelated to the suppression of expression,'' a divided appeals court ruled in upholding his conviction. ''Punishing (Cary's) flag burning is no greater a restriction than necessary to further the interest in preventing breaches of the peace.''

The appeals court majority said in the context of the demonstration, Cary's flag-burning was denegrated to a ''simple act of vandalism'' without First Amendment protection.

Cary's attorneys claim no acts of vandalism occurred after the flag was burned thus allegations of inciting violence were unfounded.

The dissenting appeals court judge wrote that there was no evidence Cary burned the flag ''in order to incite imminent lawless action'' and that the flag burning, far from inciting riot, ''apparently signaled the end of the demonstration.''

Cary's attorney's contended the appeals court ''created a previously non-existing flag burning exception to the First Amendment.''

The Minnesota Civil Liberties Union said at issue was whether the government could use the ''breaches of the peace'' rationale to effectly outlaw flag burning in a large number of cases, even with the Supreme Court's June 11 ruling that flag burning was protected by the First Amendment.

In a brief to the high court, the Minnesota Civil Liberties Union said the appeals court finding that Cary's actions took place in a ''context of violence'' has ''virtually gutted'' the Supreme Court's protection of flag burning.

The Justice Department asked the high court to let the appeals court ruling stand.

90-5183 William C. Cary, Jr. vs. United States

BY NORMAN D. SANDLER - UPI

DALLAS (OCT. 15) UPI - Burned last week by his own coyness, President Bush exercised a bit more caution Monday in choosing his words on the budget mess in Washington.

On the road to raise campaign money for Republican candidates in five states, Bush stuck to a script designed to keep pressure on Congress and control the damage of a perceived flip-flop last week on taxes

With stalemate threatening to plunge the federal government back into chaos at week's end, he offered new talk of gloom and doom, punctuated by an admonition that with ''final countdown week'' under way, the American people will have only Congress to blame for failure.

Bombast aside, however, there were no invitations to read lips or hips to gauge his stand on taxes and other issues at stake in the search for a plan to trim the deficit by $500 billion over five years.

Still smarting from the mixed signals he was accused of sending last week, Bush regarded the budget deliberations almost as an outsider rather than a vital player, taking pains in comments to reporters to not be pinned down and caught in another partisan crossfire.

''I'm not going to say what I will or won't do,'' he said. ''That managed to get a little confused last week, so what I'll do is say the action's in the Congress and I will take a look at what comes out.''

After 20 months of skillful sailing through political waters, Bush, who fancies himself ''Mr. Smooth,'' was battling rough seas last week with a series of ambiguous and seemingly contradictory signals on whether he would accept higher taxes on wealthy Americans in exchange for a much-sought cut in taxes on capital gains.

As his position appeared to some to change with each political breeze, the challenge of damage control was compounded by a flurry of polls showing doubts about the economy and the situation in the Persian Gulf exacting a toll on his overall popularity, which only weeks before had neared a remarkable 80 percent.

Whatever the explanation, the problems were undeniable.

A day after Bush left his position on taxes clouded in ambiguity with his

''read my hips'' line, White House press secretary Marlin Fitzwater admitted the president's men ''made a mistake'' in not making clear his terms for a deal on taxes.

''I regret we did not take the time to do it,'' Fitzwater said. ''Hindsight's always better,'' he noted.

Ed Rollins, a key political operative in the Reagan White House and now the GOP's chief congressional campaign strategist, said Sunday the mixup may have been attributable to the distraction of the Persian Gulf crisis.

The important point, Rollins said in a CBS News interview, is now for Bush to ''be consistent in the message.''

The damage, however, had been done. While White House chief of staff John Sununu asserted, with some validity, that Congress will bear the brunt of any public discontent, polls suggest Bush too has been tainted if not weakened.

Democrats were not the only ones surprised by what may still turn out to be a temporary reversal of Bush's fortunes. Taken to an extreme, one veteran White House adviser said the chaos suggested an administration ''self-destructing.''

''They're in trouble,'' the adviser said. ''Not yet enough to sink them, but enough to cause real problems and require some quick and fancy footwork to recover.''

Bush tried to place all that behind him Monday with a two-day political swing that began in his adopted home state of Texas. While his political stock may have dropped, his value to GOP candidates has not. His appearances here alone, to be followed by events in Nebraska, Iowa, Illinois and Michigan, was expected to raise $2 million.

#90288u1438 10/15/1990 ~United Press International

JERUSALEM (OCT. 15) UPI - Declaring that Jerusalem was not occupied territory Prime Minister Yitzhak Shamir said Monday the United Nations had no role to play in investigating the deaths of 20 Palestinians killed during riots on the Temple Mount last week.

Also Monday, British Foreign Secretary Douglas Hurd arrived for a four-day visit. The British leader, who plans to meet Israeli officials and prominent Palestinians, did not make a statement after his plane landed outside Tel Aviv.

Recently, Hurd has sharply criticized Israeli policy in the occupied West Bank and Gaza Strip.

In an address to parliament as it began its winter session, Shamir described

the U.N. Security Council resolution condemning Israel as ''a biased decision.'' The resolution denounced ''acts of violence'' by Israeli security forces and called for a U.N. mission to investigate the disturbances on the Temple Mount.

Shamir said not one part of Jerusalem is occupied territory.

''It is the sovereign capital of the state of Israel,'' he said. ''Therefore, there is no place for any involvement of the United Nations in any issue related to Jerusalem.''

The Cabinet voted unanimously Sunday to reject U.N. Resolution 672 and not to cooperate with the three-member U.N. mission, a move likely to strain relations with Israel's main ally, the United States. Israel fears the U.N. mission will undermine its claim to sovereignty over the holy city.

U.S. Secretary of State James Baker wrote to Foreign Minister David Levy telling him that cooperation with the U.N. delegation would return world attention to the Gulf crisis, the Hebrew newspaper Ha'aretz reported.

In Washington, President Bush refused to comment directly on the Israeli rejection of the U.N. resolution.

''We want to see that U.N. resolution fully implemented. We were a part of it and we think it's the right step. So I'll just leave it there,'' he said.

The State Department said the administration was ''disappointed that the Israeli government has decided not to cooperate with the (U.N.) mission.''

''In fact, we think that a failure to cooperate denies Israel an opportunity to present its case to the secretary general. We are hopeful that the secretary general's representative will be able to carry out his mission as requested by the Security Council in Resolution 672,'' department spokeswoman Margaret Tutwiler said.

The U.N. mission, appointed by U.N. Secretary-General Javier Perez de Cuellar, was to examine the circumstances of the Oct. 8 riots on the Temple Mount during which at least 20 Palestinians were killed by Israeli police.

Shamir said he regretted the loss of life but charged the casualties were the result of ''an unprecedented criminal act,'' the stoning of Jewish worshipers by Moslem demonstrators during the riots.

''The act should have awakened reactions of denunciation and protest among the entire international community,'' he said.

Palestinians said the disturbances were not planned in advance and the stoning was in response to excessive force employed by the police. Palestinians at the

scene as well as two human rights groups have accused police of firing indiscriminately at Moslems on the Temple Mount, the third holiest Islamic site.

It is still not clear what initiated the violence. Israel captured the eastern half of Jerusalem in 1967.

The Israeli rejection of the U.N. mission is not without precedent. In 1979, Israel prevented a three-member U.N. delegation from entering Israel. The Security Council had ordered the delegation to investigate Jewish settlements in the West Bank and Gaza Strip.

Most nations, including the United States, consider Arab East Jerusalem, which comprises the Old City and the Temple Mount, occupied territory.

WASHINGTON (OCT. 15) UPI - Yields were mixed on 13-week and 26-week T-bills Monday at the government's weekly auction.

The Treasury Department auctioned $9.401 billion of 13-week bills at an average discount of 7.18 percent, down from 7.19 percent last week and the lowest since Oct. 1 when the auction also yielded 7.18 percent.

The Treasury also sold $9.442 billion of 26-week bills at an average of 7.22 percent, up from 7.21 percent last week and the highest since Sept. 24 when the yield stood at 7.33 percent.

The investment rate was 7.41 percent on the 13-week bills at an average price of $9,818.50 per $10,000 face value. The rate on the 26- week bill was 7.60 percent at $9,635.00.

#90288u1460 10/15/1990 ~United Press International

(OCT. 15) UPI - Iraq denied it is willing to compromise over its occupation of Kuwait and dismissed a British warning that Iraqi troops must leave Kuwait voluntarily or be forced out at gunpoint.

''I believe war in the (Persian) gulf continues to be imminent, but Iraq will not fire the first shot,'' Baghdad Radio quoted Iraqi Information Minister Latif Nassif Jassim as saying.

''We expect war at any moment and are ready to fight against the Americans and those who come with them,'' Jassim said.

He said Iraqi President Saddam Hussein's government does not fear statements

by British Foreign Minister Douglas Hurd, who said in Cairo Sunday that Saddam ''will withdraw. He has no choice ... His choice is whether he will do it by his own will or by the point of a gun.''

"We are not afraid of war, and we are not afraid of Hurd's statements," Jassim said. "(Hurd) makes such statements because he is not going to fight personally...Other Britons, Americans and other nationals will die in this war.''

President Bush, during a political trip to Texas, decried Iraqi atrocities in Kuwait as ''Hitler revisited'' and raised the prospect of holding Saddam accountable for Nuremberg-style war crimes, a legal option under review by the Justice Department.

Bush cited eyewitness accounts of ''the gastly atrocities perpetrated by Saddam's forces" and decried "the systematic assault on the soul of a nation."

''Hitler revisited,'' he said. ''But remember, when Hitler's war ended, there were the Nuremberg trials. America will not stand aside. The world will not allow the strong to swallow up the weak.''

Deputy White House press secretary Steve Hart said Bush was ''letting Saddam know he's going to be held accountable for Kuwait.'' The war crimes issue is ''under review,'' he said, ''and no decisions have been made.''

Saddam rejected indications he may compromise over his 2-month-old occupation of Kuwait. The Soviet Novosti news agency reportedly quoted a senior Kremlin official who visited Baghdad as saying Iraqi leaders are considering a plan to withdraw from the oil-rich emirate.

Novosti was reported as saying Iraq wanted to keep strips of disputed border territory in Kuwait, including an oil field, and strategic Kuwaiti islands in the northern Persian Gulf.

Palestine Liberation Organization leader Yasser Arafat, who met with Saddam Sunday, was quoted as saying after the meeting that he thought Iraq is in a ''conciliatory mood'' but gave no further details.

U.N. sanctions are hurting Iraq's industry and depriving it of food, Jassim admitted, but the embargo ''will not force Iraqis into submission.''

Iraqi Deputy Premier Sadoun Hammadi said in a weekend interview that sanctions would cause hardship but Baghdad would try to overcome the blockade through ''self-reliance and (an) increase in agricultural production.''

While Iraq officially dismissed reports it is weakening in the face on international opposition, Iraqi envoys tried to muster Arab and Moslem support for Baghdad's lonely cause in Kuwait.

Iraqi envoys held weekend talks in Libya, Tunisia and Jordan in what Arab and Western diplomats said was an attempt by Saddam to gain support by appearing as a champion of the Palestinian cause.

But most Arab leaders, while decrying last week's killing of 20 Palestinians in Jerusalem by Israeli forces, oppose Iraq's occupation of Kuwait.

In other developments Monday:

-Defense Secretary Dick Cheney, visiting London, told the British Broadcasting Corp. there were more than 200,000 allied troops in Saudi Arabia and that he expects an increase in the number of Arab troops deployed against Iraq in the kingdom. Cheney told Prime Minister Margaret Thatcher that American troops could stay in Saudi Arabia ''for years'' if this was necessary to expel Iraqi troops from Kuwait.

-Japan reversed its stand against assigning troops to peacekeeping forces, perhaps allowing for a non-combat role in the gulf.

-The Washington Post quoted diplomatic sources in Baghdad as saying Iraq took down its air defense radar system to prevent U.S. forces from monitoring it and securing information on how to jam it. The Post also said Iraq asked the Bush administration to maintain ongoing military consultations to prevent a war-causing accident but that the United States never responded.

-The Post also reported Saudi Arabia has discovered vast new deposits of high-quality crude oil in that may boost its reserves by 20 percent.

-The official Iraqi news agency said 15 Spanish hostages left Baghdad Monday for home after the intervention of a Spanish lawmaker.

#90288u1474 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Transportation Department granted five U.S. airlines Monday six new routes to Tokyo and two other Japanese cities in the latest expansion of passenger and cargo service to Japan.

Patrick Murphy Jr., deputy assistant secretary for policy and international affairs, issued the order that authorized new routes from five American cities. The government authorized:

- United Airlines to fly between Chicago and Tokyo.
- Delta Air Lines between Los Angeles and Tokyo.
- American Airlines between San Jose and Tokyo.
- America West Airlines between Honolulu and Nagoya.
- Hawaiian Airlines between Honolulu and Fukuoka.

- Delta Air Lines between Portland and Nagoya.

The routes were granted under the authority of a November 1989 bilateral agreement. Nine carriers submitted 23 proposals for the new routes. Hearings were held in April and May before Chief Administrative Law Judge John Mathias.

The department said services from two gateways, Chicago and Los Angeles, were in the best public interest, no matter which airlines were picked to fly the routes. American Airlines' San Jose-to-Tokyo route was the next best proposal, the department said.

The announcement was the last of several awards authorizing new flights to Japan. In July, Federal Express was granted authority to serve Nagoya. In August, United Parcel Service was selected to operate a new all-cargo service to Tokyo. And in September the department allotted the 450 charter flights available under the agreement.

The American-Japanese aviation market generates $6 billion a year, making it America's largest international revenue market. Last year, the Japanese market ranked third in terms of numbers of passengers after Canada and the United Kingdom, and first in revenue passenger miles and passenger revenues.

CHICAGO (OCT. 15) UPI - NFL owners are expected to discuss plans for expansion, the change in management within the World League of American Football and locker room policies during their annual fall meetings Tuesday and Wednesday.

The 28 owners will receive a report from the league's realignment and expansion committee Tuesday, although a final decision is not expected for another year. Among the cities bidding for an NFL franchise are Baltimore, Charlotte, N.C., Jacksonville, Fla., Memphis, Tenn., and St. Louis.

The World League will likely be discussed following Minnesota Vikings General Manager Mike Lynn's decision to leave his post and join the WLAF. Tex Schramm, former head of the Dallas Cowboys, recently resigned as president of the WLAF. The threat of the new league, if any, is expected to be considered.

The subject of media relations will be raised following Boston reporter Lisa Olson's charges of sexual harrassment by members of the New England Patriots, and Cincinnati Coach Sam Wyche's closed-door policy to USA Today's Denise Tom after a Bengals game. The latter prompted Commissioner Paul Tagliabue to fine Wyche about $30,000, the highest penalty ever levied against an NFL coach.

Tagliabue had appointed Harvard law professor Philip Heymann to investigate Olson's charges of the Sept. 17 incident in the Patriots' locker room. Heymann's report may be presented to the owners for discussion.

Other issues on the agenda at the two-day meeting at the O'Hare Hilton Hotel are resolving future exhibition schedules, as well as consideration for future Super Bowl sites, and setting dates for international exhibition games.

The competition committee also is expected to report on any proposed rule changes. However, Chicago Bears owner Ed McCaskey said Monday this year's changes to shorten the length of the game won't be challenged.

''Getting done (playing) under three hours - people like that,'' McCaskey said.

#90288u1510 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - Fire marshals Monday declared that a fire in the Lebanese consulate which injured one man inside and five firefighters had been deliberately set after several telephone threats.

''It is now determined that it was arson,'' reported Fire Department spokesman Tom Kelly. ''The marshals have discovered the presence of flammable liquid at the scene. It also has been determined that the consulate had been the subject of several telephone threats prior to the fire.''

The fire at the Lebanese Consulate in Manhattan broke out at 8:22 p.m. Sunday but was brought under control by about 50 firefighters at 9:07 p.m, said Lt. Jim Powell, a fire department spokesman.

Said Genayel, a member of the consulate, was injured due to the fire, which he had attempted to put out. He was taken to the hospital but his injuries were not believed to be life-threatening, Powell said.

''He had tried to extinguish the fire by using a dry-powered extinguisher,'' the spokesman said.

Three of five firefighters injured hurt their necks due to a partial collapse of heavy plaster from the parlor floor ceiling, he said.

In a related development, Lebanese America Organiztions were scheduled to protest recent Syrian action in East Beirut. The protest was scheduled for

Monday in front at the United Nations.

Victor Bitar, the Lebanese consul general, stood outside the consulate as firefighters worked to put out the blaze, Powell said.

Fire marshals were called to investigate the fire ''to rule out any possible suspicions'' that it was an arson, he said.

Expert action by firefighters saved the converted brownstone from complete destruction, Powell said.

''Chief Henry Cartwright, of the 10th (fire) Battalion, said if firefighters had not been as positively aggressive and gotten ahead of this fire and stopped it, we might have lossed the entire building,'' he said.

The fire started on the basement level (the ground floor,) moved to the parlor level and then to the second floor, he said. ''It got into a void in the wall'' where fires ''spread like a grass fire,'' Powell said.

#90288u1515 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - A former Drexel Burnham Lambert Inc. securities trader Monday linked one-time junk bond king Michael Milken to additional backroom stock market dealings.

The trader, Peter Gardiner, testified at a federal court pre-sentence hearing before Judge Kimba Wood in U.S. District Court in Manhattan. Gardiner has been linked to manipulation of the market in dealings of Wickes Companies Inc. securities.

He admitted to previously lying to the government in its investigation of Milken and before a grand jury and only last May offered his cooperation.

That came when Milken, of Drexel's Los Angeles office, entered an agreement with the government and pleaded guilty to conspiracy, filing false securities information, securities fraud, violating securities reporting requirements, mail fraud and aiding and abetting in the filing of a false income tax return. Milken faces up to 28 years in prison.

Because of the nature of Milken's agreement, the government was allowed to present to Judge Wood for her consideration in imposing sentence, information on additional crimes it alleges Milken committed.

The chief government prosecutor, assistant U.S. attorney John Carroll, said last week in his opening statement the Wickes manipulation was part of a an illegal pattern involving him and confessed Wall Street wheeler-dealer Ivan Boesky. Boesky was the key witness against Milken.

In 1986, Wickes, a Santa Monica, Calif.-based equipment manufacturer later taken private in a leveraged buyout, wanted to launch an acquisition campaign and to convert large quantitites of its preferred stock into common stock, according to the government.

Such a conversion could only take place if the common stock closed at or above a certain price for 20 out of 30 consecutiew trading days, prosecutors have charged.

Gardiner testified Milken told the trading room on Wilshire Boulevard on April 23, 1986, to seek "unsolicited buyers" of Wickes. Asked if Milken had ever made such a move before, Gardiner said, "several times."

He also testified that Milken shouted across the trading desk to him while pointing at his stock information terminal, "Peter, Wickes at 6 and an eighth." Gardiner said he understood that was what Milken wanted the stock to close at since it was trading below $6.

Gardiner testified when he told a colleague, "we had run out of ammo," or couldn't come up with any more customers to hike the price, he was assured "not to worry about that Cary will handle it."

Cary Maultasch, a former Drexel trader who testified last week, handled the Boesky account. "A large block traded at the close," said Gardiner, closing Wickes at 6 and an eighth. Gardiner said he understood Boesky was responsible for it and the trading room was a scene of "relief and jubilaltion" with "high fives" exchanged.

Maultasch testified last week he asked a trader at the Boesky organization to buy 1.9 million shares of Wickes after the stock had traded at or above the necessary price for 19 days.

Asked where he was when he learned Ivan Boesky entered a plea and was cooperating with the government, Gardiner said he was on the trading floor of his Drexel office.

He said that "within days or weeks" he was told by a colleague to "clean out ... get rid of anything that isn't nailed down and don't throw it in the company garbage." "I looked at him like, 'Are you nuts or what?' and he said, he laughed, 'I talked with Mike (Milken).'" Gardiner said he was testifying under a grant of immunity from the government.

#90288u1534 10/15/1990 ~United Press International
DALLAS (OCT. 15) UPI - Decrying the ''systematic assault on the soul of a nation,'' President Bush held out the prospect Monday of a Nuremberg- style prosecution of Iraq's Saddam Hussein for war crimes against the people of Kuwait.

''Hitler revisited,'' Bush said in response to mounting reports of Iraqi atrocities in occupied Kuwait. ''But remember, when Hitler's war ended, there were the Nuremberg trials.''

The reference to Nuremberg, where Nazi war criminals were tried after World War II, came a week after Bush told reporters his patience with Iraq was ''wearing very thin'' because of the ''sickening'' reports coming out of Kuwait.

Though the Justice Department has had the war crimes issues under review for some time, it marked the first time Bush had raised it in public as being

among the next moves the United States could take to rachet up the pressure on Saddam.

In recent weeks, senior administration officials have said the United States may seek additional condemnation of Iraq through the United Nations for its Aug. 2 invasion and subsequent annexation of Kuwait. The officials said that action, intended to reinforce the global opposition to Saddam, could include demands for reparations and even a legal basis for a formal charge of war crimes.

''America will not stand aside,'' Bush declared at a fund-raising luncheon that kicked off two days of campaigning for Republicans in five states. ''The world will not allow the strong to swallow up the weak.''

For the time being, the barely veiled threat by Bush seemed to be more symbolic than substantive. Deputy White House press secretary Steve Hart explained that Bush was ''letting Saddam know he's going to be held accountable for Kuwait.'' Although the war crimes option is under consideration by administration lawyers, he said, ''no decisions have been made.''

Since meeting two weeks ago with the deposed emir of Kuwait, however, Bush has expressed increasing alarm at ''horrible tales'' of deteriorating conditions in the oil-rich emirate.

With polls showing some rise in public doubt about his handling of the Persian Gulf crisis, Bush emphasized the human dimension of what has been widely viewed as a confrontation over cheap oil and hard-to-define strategic interests.

''Every day now, new word filters out about the ghastly atrocities perpetrated by Saddam's forces,'' he said. ''Eyewitness accounts of the cruel and senseless suffering endured by the people of Kuwait, of the systematic assault on the soul of a nation.''

Bush accused Iraqi forces of ''summary executions, routine torture,'' of rounding up newborn babies from incubators and dialysis machines and shooting defiant children in front of their parents.

''What is at stake is whether the nations of the world can take a common stand against aggression or whether Iraq's aggression will go unanswered,'' he said, ''whether we live in a world governed by the rule of law or by the law of the jungle. And that is why America and the world cannot allow this outlaw act to stand.''

#90288u1542 10/15/1990 ~United Press International

(OCT. 15) UPI - President Bush says he and Republican congressional leaders prefer a Senate bipartisan deficit reduction plan over a House Democratic plan. The Senate plan would NOT increase income tax rates for the rich, as would the Democratic plan, but it would double the federal gasoline tax. The Democratic budget package contains NO gasoline tax hikes.

A spray-painting vandal angry with the budget battle sent a message to House Republican Leader Robert Michel. The vandal painted the messages ''Cut Taxes, Deficit'' and ''Repeal- Stolen Pay Raise'' on the front porch of Michel's fashionable two-story home in Peoria, Illinois. NO one has been arrested in the incident.

Soviet President Gorbachev is being showered with praise from around the world today for winning the 1990 Nobel Peace Prize. Gorbachev was awarded the prestigious honor for NOT crushing last year's democracy movement that swept Eastern Europe. For his part, Gorbachev was speechless, saying- ''Words fail one at such moments.'' .

But, in Moscow store shelves are empty and Soviet tempers are short. Soviet

citizens say Gorbachev may have received the Nobel Prize from the West, but he could get a popular uprising from his own people. Muscovites say Gorbachev's popularity is sinking. .

Also today, Gorbachev missed a deadline to present a compromise economic reform plan further delaying consideration of the blueprint by Parliament. Gorbachev and other Kremlin officials have been struggling since September to come up with an acceptable plan for the transition to a free market economy.

Iraq today rejected suggestions it may compromise over its occupation of Kuwait. Baghdad Radio quotes the Iraqi information minister as saying he expects war to break out ''at any moment'' in the Persian Gulf... and that Baghdad is ''ready to fight.'' The official also dismisses a British warning that Iraq leave Kuwait on its own or be forced out at gunpoint.

Japan reportedly has reversed its stand against assigning troops to U-N-backed peace-keeping forces, clearing the way for eventual deployment of NON-combat soldiers to the Persian Gulf. The Japan Times says the government plans to introduce a bill in Parliament tomorrow reflecting its new position.

Lebanese President Elias Hrawi is maneuvering to get custody of renegade Christian General Michel Aoun and make him stand trial for his two-year mutiny against the government. Aoun is in hiding at the French Embassy in east Beirut. 16 people died in fighting last night in the Lebanese capital as Shiite fundamentalists battled Syrian-backed Christian militiamen.

German Chancellor Helmut Kohl's conservative party is preparing to extend its leadership into both houses of Parliament following gains yesterday in elections in Bavaria and four former East German states. The Christian Democratic Union's electoral victory will end the Social Democratic Party's five-month domination of the Bundesrat.

Friends and associates of composer-conducter Leonard Bernstein paid him tribute today as one of the greatest musicians of his time. Bernstein died last night of a heart attack at his New York City apartment. A private funeral service was being planned for the man described as the first ''global musician.''

LOS ANGELES (OCT. 15) UPI - A challenger for the top post of the International Brotherhood of Teamsters vowed Monday to double the size of the nation's largest union in five years if elected.

"I intend to build the Teamsters into a multi-national union," Louis Riga, secretary-treasurer of Local 576 in San Jose, said at a news conference in Los Angeles. "We will have to become multi-national or we'll lose all the gains of the last 100 years." The union now has 1.6 million members.

Riga, 53, is in the midst of a 17-city trip to announce his candidacy for general president of the union to succeed William J. McCarthy, who announced last week that he will not seek re-election at the union's December l991 election.

The union's executive board, in a split vote, endorsed R.V. Durham of North Carolina to succeed McCarthy, who succeeded the late Jackie Presser two years ago.

Ron Carey, an independent candidate backed by reform elements, has also announced his candidacy for the top post. Other possible candidates include executive board members Jack Cox of California and Daniel Ligorotis of Chicago.

The election of the union's officials will take place under government-supervised procedures, as specified in last year's settlement of a government civil racketeering suit. Under the new rules, candidates must receive at least 98 votes from the nearly 2,000 delegates at the union's June convention.

Riga, who acknowledges he is not well known outside the West Coast, said that the government controls are unnecessary and that mob influence within the union has been over-emphasized.

Riga, who is stressing his rank-and-file roots with the slogan "He's one of us " said that the union's leadership over the past two decades has abandoned its recruitment efforts. "Unions have lost two-thirds of their membership since the early 1970s by being narrow in vision and old in principles," Riga said.

Riga said that the need to organize on an international level is key to the survival of the union in order to prevent non-union sub-standard products from

entering the country. He also vowed that if elected, he will not fly in the union's jet. "We have seven jets on the payroll and the workers dues pay for them."

Riga also said that Carey's Teamsters for a Democratic Union organization has a "far left" outlook and is out of step with the rank-and-file membership. "I feel as if I am the middle-of-the-road candidate," he said.

GENEVA (OCT. 15) UPI - Taking specific aim at European Community export subsidies, the United States presented a formal proposal Monday for sharp reductions in barriers to freer world trade in agricultural products.

Uruguay Round officials said the U.S. proposal as expected called for 75 percent reductions over ten years in internal farm support paid to American farmers based on 1986-1988 figures, and in import barriers. Washington called for a 90 percent cut in export subsidies as practiced by the EC, also involving a ten-year schedule and using 1987 as the base year.

U.S. officials including President Bush have warned that a Uruguay Round agreement must include deep cuts in trade-distorting agricultural protectionism.

The U.S. proposal was presented on the Oct. 15 deadline to the General Agreement on Tariffs and Trade, which provides the framework for the Uruguay Round trade liberalization negotiations scheduled to end by Dec. 7.

A package agreement is threatened by sharp differences over farm trade between Washington and Europe, with the EC missing the deadline for agricultural proposals.

The 12 EC members were still bickering among themselves Monday concerning a suggested 30 percent reduction in subsidies based on the year 1986. That figure has been repeatedly rejected in advance as inadequate and unacceptable by the United States as well as the Cairns Group - other major farming nations including Australia, Argentina, Brazil, and Canada.

U.S. officials have also said they doubt that a compromise could be reached because Washington already has stepped back from its original position that farm supports and export subsidies should be eliminated altogether.

France and Germany in particular among EC members have said the big cuts proposed by the United States would bankrupt as many as seven out of ten European farmers.

U.S. negotiators have told other participants Washington does not seek an end to all domestic farm sector support but only that which gives farmers an unfair export advantage or otherwise distorts free competition.

The Cairns Group closely followed the United States position in presenting its own farm trade proposal, Australian officials said. They said the group called for cuts of "no less" than 90 percent in export subsidies and 75 percent in domestic farm supports over ten years. There would be a longer timeframe for the least-developed countries, the officials said.

The Cairns Group proposal was sponsored by 12 of its member countries with Canada deciding to offer its own proposal. Fiji delegates said they had not received instructions from their government.

The Canadian proposal, which has little chance of succeeding because it is more severe than the others, calls for elimination and prohibition of export subsidies within a ten year period and a 50 percent reduction in trade-distorting internal subsidies.

Canada also wants normal tariffs on agricultural products reduced by one-third while other border measures would be converted to tariff equivalents and cut in half, with a maximum of 20 percent.

International Trade Minister John Crosbie, who tabled the proposal in Geneva, described the offer as "balanced and comprehensive", but said it was contingent on all other GATT members agreeing to its provisions.

#90288u1608 10/15/1990 ~United Press International

INDIANAPOLIS (OCT. 15) UPI - Eric Dickerson on Monday passed the team physical he delayed for two months, clearing the final obstacle to his return to the Indianapolis Colts.

Dickerson, the NFL's No. 7 all-time rusher, will rejoin his teammates for practice Tuesday. Dickerson completed his physical while other players enjoyed a day off following an idle weekend.

Refusal to take a physical in August prompted the Colts to place Dickerson on the non-football injured list, sidelining him for the past six weeks and costing him $750,000 of his $1.4 million salary for this season. Dickerson signed a four-year contract extension Saturday worth $10.75 million from 1991 to 1994.

Dickerson cannot be reactivated until Wednesday, but the physical's results made that only a formality. The decision set the stage for Dickerson's return Sunday when the Colts play Denver.

Dickerson, who turned 30 last month, has won four rushing titles in seven NFL seasons. His 11,226 career rushing yards are only 10 behind O.J. Simpson on the league's all-time list. Dickerson has 11 games to achieve an eighth straight 1,000-yard season and he has a chance to break Walter Payton's NFL career rushing record of 16,726 yards.

The relationship between Dickerson and other players will be tested quickly. He criticized the team, particularly its offensive linemen, last spring when he sought a trade and threatened retirement because he feared injury rushing behind Colts' blockers. Dickerson apologized Saturday but hard feelings may remain.

''That was wrong, but when you're frustrated, you do a lot of things, '' Dickerson said. ''I'm sure there are some guys on offense who may not care for me. But when I go on the field I will give 110 percent to protect them and I expect the same from them.''

Indianapolis ranks last in NFL rushing with only 55 yards a game and two-thirds of its plays in a 2-3 start have been passes. Albert Bentley has been a rushing and receiving workhorse in the Colts' one-back attack, gaining 40 percent of the team's yards.

''We anticipate using a lot of two-back formations and bringing Eric on stream as quickly as possible,'' Colts Coach Ron Meyer said. ''We anticipate Dickerson and Bentley being very productive.''

In 41 games over three previous seasons at Indianapolis, Dickerson averaged 30 carries and 98 yards a game. But the Colts plan to work Dickerson into their offense this time instead of build their attack around him. That means fewer rushes for Dickerson and greater unpredictability for the team.

''We won't distort the offense to get the ball to Eric,'' said offensive coordinator Larry Kennan. ''I don't see us changing a lot.''

Jack Trudeau is expected to start Sunday, replacing rookie Jeff George even though the No. 1 draft pick should be recovered from a strained abdomen that kept him out the past two games. Both were Colts' victories.

''I can't imagine us going back to Eric running the ball 30 times a game,'' Trudeau said. ''That would be totally against the direction we've taken. He needs to fit into what we've been doing.''

#90288u1630 10/15/1990 ~United Press International
MELBOURNE, FL (OCT. 15) UPI - A 58-year-old woman who had been comatose for two months has died of St. Louis encephalitis, the first fatality in Florida's current outbreak of the mosquito-borne disease, state health officials said Monday.

Alvena Patton of West Melbourne died at Holmes Regional Medical Center on Saturday. She was admitted Aug. 18 and lapsed into a coma Aug. 21, said Ernie Durfee with the state Department of Health and Rehabilitative Services.

Her husband, Harry Patton, said she was in a coma for four weeks before doctors were able to confirm she was an encephalitis victim. However, he said they had suspected the virus.

Health officials have confirmed 34 cases of encephalitis in Florida since July 28, with 21 more cases suspected, pending the outcome of a second test.

Florida's chief health officer issued an advisory Monday urging communities to hold Halloween activities in the afternoon instead of the evening to reduce children's risk of exposure to mosquitoes carrying the virus.

''We're asking the public to continue taking reasonable precautions until this year's mosquito population is eradicated. Time and cooler weather are the only factors that will end this dilemma,'' said Dr. Charles Mahan, HRS deputy secretary for health.

Although all the confirmed cases have occurred in 15 central and south Florida counties, Mahan encouraged communities statewide to ban trick-or-treating and outdoor parties in the evening.

The virus is spread by the culex nigropalpus mosquito, which picks the virus by feeding on infected birds.

It causes an infection of the brain, producing symptoms such as fever, headaches, light sensitivity, muscle weakness, upset stomach and other flu-like signs.

There is no cure. For most healthy adults, symptoms disappear in about five days. But very young children, those over 55, and those who are already in poor health are most at risk for complications, including coma and death.

Harry Patton said his wife had suffered from pneumonia a few weeks before she became ill. She also suffered from blocked arteries, had had heart surgery in the mid-1980s and was a chronic smoker.

During the last encephalitis outbreak in 1977, 110 cases were confirmed and eight people died.

Health officials advised residents to wear protective clothing and use mosquito repellent if they must be outside between 6:30 p.m. and 8 a.m., when the mosquitoes that carry the disease are most active.

#90288u1641 10/15/1990 ~United Press International
WASHINGTON (OCT. 15) UPI - The nation's airlines, facing skyrocketing fuel prices and a soft economy, cried for help from petroleum markets and the government Monday, saying the industry's survival is at stake.

The Air Transport Association of America asked the petroleum commodities markets to take steps immediately to halt the wild speculation that has driven the price of petroleum to record highs despite adequate supplies.

In recent days, the price of crude oil has closed at higher than $40 a barrel, twice as much as it cost before the Aug. 2 Iraqi invasion of Kuwait.

''While we are vigorous supporters of a free market, we call on the commodities markets to take steps to limit the volatility of speculative trading in oil,'' said ATA President Robert Aaronson.

''The failure of commodities market prices to reflect the adequate supply of oil and refined products dictates intervention. Speculators are amassing fortunes at the expense of ordinary citizens and businesses,'' Aaronson added.

Aaronson's comments were contained in a speech prepared for delivery at an international aviation meeting in Montreal Wednesday. The ATA warned that the airline industry will be forced to cut back services, and that some carriers may not survive in the face of current conditions.

''Airlines have already layed off more than 10,000 employees and delayed delivery of scores of new jets,'' Aaronson said. ''They are faced with a $10 billion annual increase in the cost of jet fuel as a result of the Persian Gulf crisis.'' Much of the cost cannot be passed on to consumers and businesses because of competitive pressures, he said.

The industry expects to lose more than $1 billion in the fourth quarter of 1990 alone, more than it has ever lost in an entire year.

Aaronson also asked the administration and Congress to reconsider billions in new taxes proposed for air travel. Airline ticket and air cargo excise taxes, local airport taxes and other new fees would add $15 billion in aviation taxes over five years, ATA said.

''No industry or sector of the economy has been hit as hard as the airline industry during this fuel crisis,'' Aaronson said. ''Now is the worst possible time to put additional tax burdens on an industry already faced with costs beyond its control, an industry that is scrambling for economic survival.''

CAPE CANAVERAL, FL (OCT. 15) UPI - Engineers are gearing up to fuel the shuttle Atlantis next week in a critical test to find out if the ship is leak free and ready for launch around Nov. 10 on a long-delayed military flight, officials said Monday.

Engineers plan to pump a half-million gallons of liquid oxygen and liquid hydrogen rocket fuel aboard Atlantis's external tank around Oct. 24 to make sure a leak that grounded the ship in July has been eliminated.

While the leak involved the shuttle's hydrogen system, oxygen will be pumped aboard as well to make sure no critical propellant lines were damaged earlier this month when a 9-foot, 70-pound beam fell through Atlantis's engine room in an embarrassing mishap.

If all goes well, Atlantis and its five-man crew should be ready for launch around Nov. 10, three days or so later than had been planned before the beam incident, officials said Monday. A firm date will be set after a two-day flight readiness review Oct. 29 and 30.

But as usual with such military flights, the exact launch time will not be revealed until nine minutes before liftoff and no details will be released about the ship's classified cargo.

The shuttle Discovery, meanwhile, bolted to the top of a NASA 747 jumbo jet, was expected to land at the Kennedy Space Center early Tuesday after a two-day cross-country flight from Edwards Air Force Base, Calif.

Discovery glided to a smooth California landing last Wednesday to close out a successful four-day mission. Officials said the shuttle came through its launch and landing in excellent condition and that no problems were anticipated readying the ship for its next flight in February.

NASA's third shuttle, Columbia, remains grounded because of an elusive engine room hydrogen leak blamed in part for scuttling three launch attempts in May and September.

Hauled to launch pad 39B overnight Saturday, Columbia will be loaded with fuel around Oct. 29 to pinpoint the location of the leak once and for all. Depending on the results, a second such test may be ordered before a launch attempt in December.

Columbia was grounded May 29, the night before its planned liftoff, when sensors detected hydrogen gas leaking into the ship's engine room.

The leak ultimately was blamed on damaged seals inside a 17-inch-wide fuel line ''disconnect'' fitting that subsequently was replaced. But during fueling for a Sept. 6 launch try, it became clear that at least two leaks had been present all along and that only one had been fixed.

The location of the engine room leak remains a mystery. Last week, technicians found and replaced a second damaged seal in a fuel line valve leading to main engine No. 2, but engineers were reluctant to speculate on whether that might have eliminated the leak.

#90288u1678 10/15/1990 ~United Press International

DETROIT (OCT. 15) UPI - The nation's leading automakers idled into the 1991-model year by reporting Monday a combined 2.1 percent decline in U.S. car and light truck sales for the first ten days of October.

Sales of domestically built cars alone rose 1.9 percent from a year ago when measured by sales per day, largely fueled by a 15.9 percent gain in domestic car sales posted by industry leader General Motors Corp.

But GM's impressive gains were measured against comparatively weak year-ago levels that followed massive dealer incentive programs in August and September of 1989, and a now revised policy that encouraged dealers to sell most 1989 model before the 1990-model year began Oct. 1.

Light truck sales slipped 9.5 percent, bringing down industry totals for the latest ten-day period. Still, the annual sales rate for domestically built cars - the most common measure of industry performance - was 6.8 million cars during the Oct. 1-10 period, even with year ago levels.

"It was still a remarkably good period," said industry analyst Ronald Glantz, of Dean Witter Reynolds' San Francisco office, who had reasoned the payback from late September might have been bigger, since automakers were pulling ahead sales "to win bragging rights" for the 1989-model year. "I also believe fourth quarter sales may be better than last year despite the Persian Gulf crisis," Glantz said.

Glantz said a record number of buyers are expected to re-enter the market for the first time since 1985. He said Mideast tensions and higher fuel prices have had almost no impact on the car market except for a small shift toward smaller models. But people may be shying away from full-sized pickup trucks, moving to cars or more fuel stingy compact trucks instead.

But Tom Webb, chief economist for the National Automobile Dealers Association, said developments in the Middle East and the unresolved budget deficit will keep consumers apprehensive. He predicted that dealers will "have to scratch out every possible sale" just to keep pace with "the horrible level of sales" in the fourth quarter of 1989.

The nine companies, which also include Ford Motor Co., Chrysler Corp., American Honda Motor Co., Nissan Motor Manufacturing U.S.A., Toyota Motor Sales U.S.A., Mazda Motor Manufacturing (USA) Corp., Mitsubishi Motor Sales of America, Inc. and Subaru-Isuzu Automotive Inc. (SIA) reported combined sales of 183,925 cars and 86,935 trucks in the United States during the period. This compares with 160,510 cars and 85,365 trucks sold in the year-ago period, automakers said.

The daily selling rate of 30,096 vehicles compares with 30,734 vehicles per day for the same period last year. There were nine selling days this year, compared with eight last year.

So far in 1990, the firms have sold just over 5.5 million cars, down 5.1 percent from the almost 5.78 million units sold in the comparable 1989 period when measured by sales per day. Light truck sales were 3.21 million units, down 3.7 percent from 3.32 million trucks sold during the same period a year ago.

During the period, sales of GM's domestically made cars rose 15.9 percent, while its truck sales were up 7.4 percent from a year ago, both from relatively weak year-ago performances.

Second-ranked Ford posted a 23.8 percent drop in car sales and a 17.2 percent fall in truck sales. Chrysler's car sales managed a 2.6 percent gain, but its light truck sales including minivans fell 26 percent when compared with the combined total a year ago.

Among the smaller companies reporting sales of U.S.-built cars, Honda posted a 22.5 percent rise in sales from year-ago levels. Toyota's sales jumped 97.2 percent from relatively low production volumes a year ago.

Nissan reported a 12.8 percent gain in sales of its U.S.-built cars, while its domestically made compact truck sales rose 14.4 percent, both from low year-ago levels.

Mazda sold 1,184 cars produced at its Flat Rock, Mich. assembly plant, vs. 442 a year ago. It also reported 154 sales of its Mazda Navajo sport utility vehicle built for it by Ford.

Mitsubishi reported sales of 1,092 cars built at its joint venture plant with Chrysler in Illinois, vs. 909 a year ago. SIA sold 299 cars and 582 trucks built at its new joint venture plant in Lafayette, Ind., during the latest ten-day period.

WASHINGTON (OCT. 15) UPI - The House passed a bill Monday to ban mining and oil exploration by American companies in Antarctica and to subject all activities by federal agencies on the frozen continent to U.S. environmental law.

The measure, adopted and sent to the Senate on voice vote, also contains non-binding language urging the president to negotiate an international agreement to prohibit all commercial mineral development in Antarctica.

Similar calls for negotiation of worldwide restrictions on Antarctic mineral activitites were contained in resolutions passed in both Houses of Congress during the first week of October.

Rep. Silvio Conte, R-Mass., the chief sponsor of the legislation, called Antarctica a place that ''should be left pristine and maintained as a land of science.''

''Antarctica is a beautiful place,'' Conte said. ''It's an area we can still talk about protecting now, rather than restoring later.''

The United States is one of 39 nations party to a 1959 treaty establishing Antarctica as an internationally shared scientific area and governing use of the continent.

Treaty signatories negotiated an agreement in 1988 requiring the environmental consequences of mining or oil and gas drilling be considered before such development is approved. But the accord stops short of outlawing mineral development in the fragile Antarctic environment.

Three nations - Australia, New Zealand and France - are opposed to the 1988 agreement, which has not been ratified. The subject is expected to be raised again at a meeting of the Antarctic treaty nations that opens Nov. 19 in Chile.

A 1989 report by the congressional Office of Technology Assessment concluded, ''There are no known commercial deposits of oil, gas or other minerals in

Antarctica.'' The report also doubted mineral exploration was feasible in the harsh climate at the bottom of the world.

Nevertheless, environmental groups have raised concerns that some countries have been conducting geological surveys of potential mineral resources under the guise of scientific research.

The House-passed bill prohibits U.S. citizens or companies from engaging in, financing or providing technical assistance to any oil, gas or mineral development in Antarctica until an international treaty banning those activities is ratified.

In addition, the measure would require activities of all federal agencies on the continent to be conducted in accordance with the National Environmental Policy Act. Under this law, which currently applies only to U.S. territory, the government must prepare lengthy environmental studies of any major federal action it is planning.

Rep. William Broomfield, R-Mich., said the administration objects to this provision because it fears such restrictions could slow down scientific research on the continent.

But Rep. Walter Jones, D-N.C., another bill sponsor, said, ''I do not expect that the routine award of a research grant to an individual scientists will constitute a major federal action triggering the requirement to prepare an environmental impact statement.''

The House Merchant Marine and Fisheries Committee recently approved a separate bill containing additional environmental measures to control waste disposal, tourism and marine pollution in Anarctica.

But Jones, chairman of the panel, said too little time remained for enactment of this bill before Congress adjourns for the year.

#90288u1711 10/15/1990 ~United Press International

SAN FRANCISCO (OCT. 15) UPI - Grammy-winning rock guitarist Carlos Santana Monday sued Miller Brewing Co. and a New York advertising firm for allegedly unauthorized use of a "sound-alike" performance in a 1990 Miller Lite ad.

Santana's suit contends the Milwaukee-based beermaker and its advertising firm Baker Spielvogel Bates, Inc., violated the Lanham Trademark Act by using an imitator to perform Santana's singing and guitar style.

The suit accuses Miller of using Santana's unique style to perform "Black Magic Woman" on nationally televised advertisements. The song was made popular in 1970 on Santana's album Abraxas. It has been subsequently released on other

albums.

Beverly Jurkowski, a Miller spokeswoman said, "Miller did secure the appropriate rights to use the song Black Magic Woman in its advertising." Jurkowski indicated the company has not seen the Santana complaint and could not comment on the details.

She conceded the song was not performed by Santana but the rights were secured from Murbo Music an Bourne Co. The commercial is no longer running, she said.

In 1988, singer Bette Midler won a ground-breaking decision when the 9th U.S. Circuit Court of Appeals ruled she could sue Ford Motors and its ad agency over 1985 TV commercials featuring another singer who imitated Midler's style while singing "Do You Want to Dance." On October 30, 1989 a federal jury awarded Midler $400,000 in damages against the New York ad agency. Ford was dismissed from the case.

Singer-songwriter Tom Waits sued Frito-Lay and its advertising agency in Nov. 1988, for using a Waits impersonator for Doritos corn chips ads. In May, 1990, a federal jury in Los Angeles awarded him $2.475 million against Frito-Lay and its ad agency.

Santana's suit contends Miller's alleged attempt to pass off the "sound alike" as if it were Santana's actual performance has created public confusion.

The suit asks that Miller be restrained from using any Santana sound alike performance of "Black Magic Woman" or any song associated with Santana. The lawsuit seeks an unspecified amount of damages. But the suit seeks triple damages under terms of trademark infringement law.

The suit, filed by Santana attorney David Phillips, contends Miller's "sound alike in the commercial is a deliberate imitation of Santana's internationally recognized distinctive sound and identity, used to profit Miller in selling 'Miller Lite Beer' and appropriates Santana's property right in his distinctive sound in violation of his right of publicity."

Santana gained wide fame for his performance at the legendary Woodstock Festival in New York state in 1969. He has sold more than 20 million albums. He won a Grammy award in 1989 for Best Rock Insturmental Performance and a 1988 award from the Bay Area Music Awards as Musician of the Year.

#90288u1722 10/15/1990 ~United Press International

WASHINGTON (OCT. 15) UPI - The Supreme Court agreed Monday to hear an appeal in the case of a man sentenced to death in Idaho despite assurances from a prosecutor that he would receive a maximum sentence of life in prison.

The case involves the June 1983 beating death of a couple while camping in a rural area.

Bryan Lankford and his brother, Mark Lankford, were convicted of the killings in separate trials in Idaho City, Idaho.

Bryan Lankford was convicted of two counts of first-degree felony murder in the deaths of Robert and Cheryl Bravence. Before sentencing, he was called as witness at his brother's trial. He refused to testify before being granted immunity.

The state then notified the trial court and Bryan Lankford's attorney in writing that the death penalty would not be sought in his case.

In fact, at the Oct. 12, 1984, sentencing hearing, the state sought the minimal sentence available - an indeterminate life sentence - for Bryan Lankford, who had participated with authorities and who claimed his brother committed the actual murders.

State Judge George Reinhardt III, however, independently sentenced Bryan Lankford to death.

The state's highest court affirmed the conviction.

But the Supreme Court vacated the judgment and remanded the case back to the state. Idaho's highest court again upheld the conviction by a 3-2 decision, sending the case again to the Supreme Court.

Lankford claims because he was not notified a death sentence was being considered, his attorney presented no argument against such a penalty and so he was not able to offer a defense.

The state, in its brief to the Supreme Court, said that a prosecutor's assurances are not binding and argued that the Idaho homicide statutes gave Lankford ''constitutionally adequate notice of the potential penalty for first degree murder.''

#90288u1725 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - The dollar mostly strengthened on New York and other world foreign exchange markets Monday in a breather from its precipitous descent of last week, but the Japanese yen posted further strong gains.

Currency traders said yen-related dealings dominated international dealings as Japanese banks, insurance companies and other participants continued their

repatriation of funds from world capital and money markets.

Credit has tightened recently in Japan, and the Tokyo Stock Exchange's steep decline obliged banks to shore up their capital positions. All of this created heavy domestic demand for the yen, boosting it in markets.

"The yen continued to move from strength to strength," said Robert Hatcher, a Barclays Bank corporate dealer. He said the impact was felt most by currencies of Britain and Australia, where interest rates have softened. Britain lowered its basic interest rate one point to 14 percent Oct. 8, and Australia lowered its rate a point Monday to 16 percent.

Late in New York the dollar was quoted at 1.5265 German marks, up a bit from 1.5250 marks Friday, and 127.75 Japanese yen, off from 129.10. Hatcher said the dollar's firmness derived mainly from technical factors, as most players think it will move lower and are not buying it.

One reason for the dollar's respite from the downward ratcheting it suffered last week was that there was no news to shove it lower. The market is waiting for developments in the Persian Gulf and in Washington, Hatcher said. "We don't have any material or economic data to trade off."

Other New York dollar rates: 1.2905 Swiss francs, up from 1.2865; 5.1120 French francs, up from 5.1090; and 1,143 Italian lire, ahead from 1,142.75. The pound slipped to $1.9490 from $1.9655.

In Europe, the dollar closed higher against the major currencies despite Wall Street lethargy and continued U.S. budget uncertainty.

Dealers said the dollar was higher, but still under pressure amid the failure by Washington to reach agreement on reducing the budget deficit. Players were unconvinced by President Bush's promise of an eventual pact.

The dollar closed higher in Frankfurt, at 1.5230 German marks against 1.5210 Friday, and rose too in Zurich, to 1.2845 Swiss francs vs. 1.2815.

In London, the pound skidded nearly two cents to $1.9550 vs. $1.9745. Sterling sales took place amid an apparent move away from high interest rates around the world as Australia followed Britain's move.

Reports of German Bundesbank doubts about the pound's entry into the Exchange Rate Mechanism right now also sent sterling lower. The British currency joined the European exchange rate grid Oct. 8 after long hesitation.

The dollar rose in Paris, Brussels and Milan, to 5.1055 French francs vs. 5.0930, 31.36 Belgian francs vs. 31.28, and at 1,142.55 lire vs. 1,140.25.

Earlier, the dollar plummeted against the Japanese yen in Tokyo, reflecting a

gloomy outlook for the U.S. economy. The dollar closed at 128.15 yen, down 1.15 yen from Friday's close of 129.30 yen. "Bearish sentiment is growing toward the dollar," commented one dealer. Like others, he noted U.S. inflationary pressures.

Gold fell on heavy Middle East and Far East selling on indications Iraq and the United States were privately softening their positions. Speculators were worried that gold, which topped $400 an ounce recently, might plunge.

Precious metals analyst Michael Spriggs of Warburg Securities in London, said that without active hostilities, gold will slip to the $350 level.

In Zurich, the precious metal fell nine dollars to $379 an ounce vs. $388 an ounce, and in London lost $8 to hit $379.25 an ounce vs. $387.25.

Republic National Bank in New York closed cash gold at $376 an ounce, off from $388.25 Friday. The New York Commodity Exchange settled contract gold at $375 an ounce, down from $387.50.

Silver closed lower in Zurich at $4.20 an ounce vs. $4.35, and also was lower in London at $4.23 an ounce vs. $4.31.

Republic closed cash silver at $4.16 an ounce, off from $4.325. Comex silver closed at $4.132 an ounce, off from $4.306.

#90288u1733 10/15/1990 ~United Press International

CHICAGO (OCT. 15) UPI - The National Hockey League is expected to clear up its future with cable television in the next month or two, league president John A. Ziegler Jr. said Monday.

The league's three-year, $51 million pact with SportsChannel America expires after the 1990-91 season, and the two currently are embroiled in contract negotiations.

Ziegler admitted the NHL is disappointed with the exposure gained in its deal with SportsChannel, which originally promised to pump its hockey broadcasts into 25-30 million homes. Ziegler said it has reached 12.5 million to 15 million homes, while Broadcasting magazine recently put the figure at more like 10.5 million.

"You've got be able to reach the hockey markets, and that's one of the more disappointing aspects, that they did not reach all of our hockey markets," said Ziegler, in town to kick off publicity for this season's NHL All-Star Game at Chicago Stadium.

"And with our expansion plans coming to fruition, hopefully, we want to make

sure where we may locate new franchises, that they're going to be able to get the national game, not just the local game."

Ziegler said the problem with SportsChannel's original estimates developed when some local cable system owners realized they could make money by producing their own hockey broadcasts rather than just being the receivers and distributors the NHL and SportsChannel had in mind. The local cable system owners, in turn, became competitors of SportsChannel, the main one being Prime Ticket on the West Coast.

"It was something nobody anticipated and was a very suprising and interesting development in the cable business," Ziegler said. "That's where SportsChannel apparently missed the ball," he added.

Before its deal with SportsChannel, the NHL broadcast its games nationally on ESPN, and before that on the USA Network. Ziegler said there are a number of alternatives available if the contract with SportsChannel is allowed to expire.

"Because we're into this exclusive period of discussion, it would not be appropriate to be talking about that," he said. "We're in discussions now, and I would hope in 30-60 days we'll find out how SportsChannel and ourselves see the future."

The NHL has come under severe criticism for being the only major sport to not have a national television package to showcase its games. "That's because we have not tried to get one. We've gone a different way," Ziegler said, showing the league hasn't changed its stance at all. "Remember, all sports is a business. From a business standpoint, this league has made great strides in the last 10 years.

"The basic idea and the basic concept has been great. Where SportsChannel is seen, our hockey fans have enjoyed it better than any other national presentation of hockey than we've ever had. What we have to do is find a way to get make sure we can get to more households on our national package." The 42nd NHL All-Star Game will be shown on network television, however, for the second straight year.

On another matter, Ziegler defended the league's current drug policy, which suspends players for a first offense, although they can be reinstated after treatment. "If the players' association has a better way to achieve that, then I hope they bring it forward and bring it forward quickly," he said.

Whereas other sports have a policy that allows players to turn themselves in and get treatment without such severe punishment for a first offense, Ziegler said he does not want hockey fans "to have to pay and to have each club be babysitters for drug users."

#90288u1734 10/15/1990 ~United Press International

NEW YORK (OCT. 15) UPI - Stocks closed higher in moderate trading Monday but the gains were concentrated in the blue chip Dow stocks which rebounded from an early plunge tied to program selling.

The Dow Jones industrial average, which jumped 32.92 Friday, rose 18.32 to close at 2416.34.

Among broader market gauges, the NYSE composite index added 1.42 to 165.84 and Standard & Poor's 500-stock index rose 3.20 to 303.23. The price of an average share gained 25 cents.

The broad market failed to keep pace with the Dow as advances barely led declines, 794-741 among the 1,976 issues crossing the NYSE tape. Volume amounted to 164,980,000 shares, down from 187,944,370 shares Friday.

The Dow industrials rode a roller-coaster through midday, which analysts blamed on waves of program buying and selling as well as profit taking on the swings down.

Prices opened higher and quickly added to their gains until the Dow was up about 20 points. But the gains were wiped out as the Dow fell to unchanged levels and then into the minus column, bottoming out with a loss of 35 points.

In the afternoon, however, the Dow boomeranged back into positive territory thanks to program buying and optimism about a budget pact this week. President Bush said Monday that he and both of the GOP's congressional leaders were "on the same wave length" in preferring a Senate committee's bipartisan deficit reduction proposal over a House Democratic plan.

Lower oil prices also helped the rebound, analysts said. Crude oil futures fell below $38 a barrel Monday. Prices were down $1.79 to $37.90 in late trading.

"We had some volatility here today but didn't end up too badly," said Ron Doran, director of institutional trading at C.L. King & Associates in Albany, N.Y. "The feeling is we might get this budget thing through and that would be helpful."

But Doran said there is still a lot of uncertainty in the market about the prospects for a budget agreement by Friday's deadline. "There's still time to self-destruct, so the move here today is temporary. My feeling is traders are cautiously optimistic," he said.

He also said he did not think volume was heavy enough to convince investors that the market has bottomed out from its plunge over the last two months. "I don't think it was enough to convince people the market has reached a plateau.

It's going to take a while to get our confidence back," he said.

On the trading floor, IBM was the most active issue, down one to 99 1/4 even as other Dow stocks recovered. It reported higher earnings for the third quarter of $1.95 a share, compared with $1.51 a share in the 1989 period, but the results appeared to be at the low end of analysts' expectations.

They were also said to include a substantial contribution from foreign operations because of the weak dollar. Big Blue has reportedly refused to quantify for analysts the size of that contribution.

Eastman Kodak followed, surging 3 1/4 to 37 7/8 after being ordered late Friday to pay $909.5 million for infringing on Polaroid's instant photography patents. But Polaroid had expected a much larger award and plunged 6 1/2 to 22 3/4 on the news. Archer Daniels Midland was third, off 2 1/8 to 21 1/2 after reporting lower first-quarter earnings.

Among the other blue chips, Philip Morris gained 7/8 to 45 5/8, AT&T rose 1/4 to 32 1/4, General Electric added 1 3/8 to 54 3/8, Sears gained 1 3/8 to 24 3/8, and Merck added one to 78 1/2. Coca-Cola rose 5/8 to 42 1/4 and General Motors gained 5/8 to 37 3/8.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 194,881,120 shares, compared with 224,595,970 shares traded in the previous session.

Prices fell in moderate trading on the American Stock Exchange. The Amex Market Value index lost 0.70 to 293.27. Declines led advances 307-235 among the 786 issues traded. The price of an average share dipped three cents. Composite volume totaled 11,942,700 shares, down from 13,848,975 traded Friday. Echo Bay Mines led the Amex issues, off 1 1/8 to 10 7/8.

The National Association of Securities Dealers composite index gained 1.98 to 329.53.

#90288u1901 10/15/1990 ~United Press International

NEW YORK (UPI-FNNPRO) - American Telephone & Telegraph Co. is expected to set the tone Tuesday for a moderately strong third quarter in the telecommunications industry, when the company releases its earnings, analysts said Monday.

''At the very least, AT&T should match its year-ago earnings of 65 cents a share, and I would actually expect earnings higher by a few cents, like 68 cents to 70 cents a share, but this could be on the optimistic side,'' said analyst Audrey Stevoff with Duff & Phelps.

Among the factors curbing AT&T's earnings, she cited sluggish equipment sales for the second quarter in a row and a declining economy eroding consumer spending.

Analyst David Boczar with New Japan Securities earlier forecast earnings of 70 cents a share while saying the outlook for the telecommunications giant was certainly better on the long term than on the short term.

''AT&T will continue to incur costs related to its new Universal credit card while the outlook for the communications equipment segment remains sluggish, reflecting the overall economic conditions,'' he said.

Stevoff, who estimated that AT&T had retained 64 percent of the long- distance business, expected AT&T to remain strong in that sector due to an aggressive marketing campaign.

''But AT&T remains under strong pressure from its competition, MCI and Sprint '' she said.

MCI Communications Corp. is expected to report higher third-quarter earnings on an operating basis, excluding a substantial write-off the company is taking to terminate its analog operations, said analyst George Dellinger with County NatWest USA.

''On an operating basis, I expect MCI to report between 65 cents and 70 cents a share in the third quarter, up from 62 cents in the same period last year,'' Dellinger said. ''This does not include a large write-off which MCI is taking to close its analog plants since the company has completed its conversion to digital.''

Dellinger pointed out that, although the quarter ''was a good one for MCI,'' it might fall short of meeting Wall Street's expectations.

''The name of the game is expectations, and if you fall short of Wall Street's expectations, there is not so much you can do,'' he said.

Dellinger's estimate for AT&T was on the low side, ''flat or at 66 cents compared with 65 cents last year.'' He estimated AT&T's share of the long-distance carrier business at not more than 62 percent, but holding relatively strongly at that level.

''The start-up cost to open a new Universal account is $80 before any money comes in and this is hurting the quarter,'' he said.

Overall, Dellinger estimated that the telecommunications industry was growing at a strong rate, ''three times faster than the gross national product,'' boosted by new products such as data transmission.

Stevoff said projections are reasonably good not only for long- distance giants but also for the seven Bell companies, formed after the 1984 break-up of the telecommunications monopoly.

Pacific Telesis Group was the only local distance company expected to release lower third-quarter earnings, due to a major rate reduction.

Stevoff predicted 10 percent gains at Ameritech Corp., expected to report $1.16 a share vs. $1.06 in the year-ago quarter, and at U S West, with 78 cents a share vs. 71 cents.

Other exected gainers among the Bell companies are Southwestern Bell Corp., with a projected $1.11 a share, up from $1.06, and Bell Atlantic Corp., with 91 cents, up from 86 cents.

All gainers benefited from growth in call volume and line access.

Nynex Corp. and BellSouth Corp. were likely to report flat third- quarter earnings of $1.47 and 89 cents respectively, Stevoff said. She cited a one-time charge at Nynex to end an investigation by the Federal Communications Commission, and rate reductions at BellSouth as the reason for the modest performance.

(OCT. 15) UPI - The Senate today prepared to approve a 268-BILLION-dollar defense appropriations bill that would result in the largest single-year cut in military spending since the end of the Vietnam War. The massive defense cut comes despite the Persian Gulf crisis.

With a stalemate threatening to plunge the federal government back into chaos at week's end, President Bush today offered new talk of gloom and doom on the budget mess in Washington. He told reporters in Dallas the American people will have only Congress to blame if there's NO budget agreement. .

Bush also decried ''gastly atrocities'' by Iraqi forces in Kuwait as ''Hitler revisited.'' During his political trip to Texas, Bush raised the prospect of holding Saddam Husseim accountable for war crimes. .

Defense Secretary Cheney reportedly says American troops could stay in Saudi Arabia ''for years'' if necessary to expel Iraqi troops from Kuwait. During a visit to London, Cheney told the B-B-C there are more than 200-thousand allied troops in Saudi Arabia.

Israeli Prime Minister Yitzhak Shamir says the United Nations shouldN'T play a role in investigating the Palestinian deaths at Jerusalem's Temple Mount. He says Jerusalem is NOT occupied territory, and therefore the U-N should have NO involvement in issues related to Jerusalem.

The jailed former head of California's Lincoln Savings and Loan, Charles Keating, made his first public comment on his troubles today as he entered a Los Angeles courtroom. Keating said- quote- ''It's dangerous to be right when the government is wrong.'' A judge set trial for December 5th.

Flags are flying at half staff today at New York's Lincoln Center for the Performing Arts in mourning for musical giant Leonard Bernstein. The famed conductor-composer-pianist died yesterday of a heart attack. He was 72.

Fumes filled the cabin of a Trans World Airlines jetliner shortly after takeoff today, forcing the D-C-9 with 53 people aboard to return to the St.

Louis International airport. A T-W-A spokesman says the NON- toxic fumes were released when a backup hydraulic line ruptured.

President Bush has signed into law a bill to compensate hundreds of Americans who developed cancer and other ailments due to radiation exposure from open-air atomic weapons tests in Nevada. The bill authorizes a 100-Million-dollar trust fund for damage claims.

NASA officials say engineers are getting ready for the crucial fueling of the shuttle Atlantis next week. The operation will reveal if Atlantis is leak-free and ready for launch around November 10th on a long-delayed military flight.

#90288u2012 10/15/1990 ~United Press International

TROY, N.Y. (OCT. 15) UPI - The problem with Yankee ingenuity is there is too much focus on inventors - and too little acclaim for the unsung heroes who get innovative products to the marketplace, the head of General Electric Co. warned Monday.

''Campuses and corporations too often glorified the inventors and not enough (was done) to support the nuts and bolts of productivity,'' said GE Chairman Jack Welch, during a satellite interview at Rensselaer Polytechnic Institute.

''Universities, national labs and corporations are too focused on individual achievements over team efforts and overall results,'' he said.

Welch's appearance was a key feature of a two-day conference for business and science writers on American technology and competitiveness in the next millenium.

Welch, who recently returned from a visit to the Soviet Union, said the bureaucracies that shackled Soviet engineers for 70 years are not unlike corporate bureaucracies that constrained American engineers for the past 40 years.

In the Soviet Union ''we are seeing entrepeneurship across the table, '' Welch said, describing the perestroika-generation of engineers as ''zealous and passionate.''

He said among the biggest hurdles facing American engineers are a glut of administrative duties, a ''publish-or-perish'' philosophy and a yen for complexity.

The American system ''rewards complexity and sophistication. (American) people have trouble dealing with simplicity,'' Welch noted.

But simplicity is a concept the Japanese have mastered and, through it, have

fostered cheaper consumer goods that are also high in quality, he said.

''Universities must stop revering the ... complicated solution,'' he said. The emphasis on ''next generation and upscale'' is a formula for defeat on the world economic stage, he repeatedly said.

''That's the back end of winning the productivity game,'' he said.

Welch described the future world marketplace as divided into three blocs: the European Economic Community, Japan and the Pacific rim, and a North American entity consisting of the United States, Canada and Mexico.

He chided those who suggest Americans will lose manufacturing jobs as a result of joint ventures that giant U.S. companies are signing with Japan, Mexico and other countries.

''Don't get Yankee ingenuity and Yankee parochialism confused,'' Welch said.

Welch went to describe two joint ventures with the Japanese which benefited GE for opposite reasons.

He said a joint venture with Japan's Fanuc Corp. saved his company from a disastrous attempt in the 1970s at producing robotics and equipment for factory automation.

''Japan was ahead of us and had us beat,'' Welch said.

He said Fanuc gave GE Japanese technology in return for access to the American market.

Welch said the second venture with Yokogawa Electric Corp. meant giving away American technology - this time in the field of medical imaging - in return for access to the Asian market.

#90288u2041 10/15/1990 ~United Press International
LA JOLLA, Calif. (OCT. 16) UPI - Canada's ambassador to the United States told border businessmen Monday that his nation was ready to begin negotiating a free trade agreement with the United States and Mexico despite skepticism at home.

Speaking at a high-tech forum sponsored by Rep. Jim Bates, D-San Diego, Ambassador Derek H. Burney said his government believed Canada must seek trade alliances with its North American neighbors even though just such an agreement with the United States recently whipped up bitter complaints from Canadian labor unions and others who feared Canada had given up too much.

''You can't stand still and prosper ... (but) there are a lot of people in Canada who would prefer to throw up the walls and hope for the best,'' Burney said during a question-and-answer session following his speech.

Officials from Ottawa, Washington and Mexico City were preparing to begin talks on trilateral free trade that would form an economic alliance that would further open their markets to one another through a raft of agreements on tariffs, travel regulations and protections.

A free-trade agreement between the United States and Canada was implemented last year and Burney said it was still being digested by the Canadian people and vocal critics of Prime Minister Brian Mulroney's government.

''I recognize there is still opposition in Canada to the Free Trade Agreement for a whole raft of reasons, some of which even have something to do with the agreement,'' Burney said.

''Some of the most extreme and effective criticisms of this agreement, however have been put aside and it is being looked at in economic terms,'' he said.

At stake for Canada in the talks is access to the lucrative American market and to 85 million Mexicans who theoretically will have more disposable income to spend on consumer goods if current economic reforms launched by Mexico City bear fruit.

Being the smaller of the three nations, however, may mean Canada will be the last to realize any major benefits from a free trade agreement since its industrial base is just not large enough to start pouring goods into the United States and south across the Rio Grande.

''It is going to take time because Canada is going to have to make major investments to rationalize these new opportunities,'' said Ann Hughes, deputy assistant secretary of western hemispheric economic policy for the U.S. Commerce Department.

Burney said opportunities in Mexico for Canadian and American companies were not limited to manufacturing. Improvements in infrastructure, such as telecommunications, also would be open for bidding.

''It will take time for the benefits to be as visible as the critics, '' Burney said.

#90288u2173 10/15/1990 ~United Press International

(OCT. 15) UPI - President Bush traveled to Dallas today to kick off two days of campaigning for Republicans in five states. But the major issue at a luncheon today was the Persian Gulf crisis. Bush suggested that Iraqi

President Saddam Hussein was ''Hitler revisted''... and like the Nazis, Saddam could face trial for war crimes. The president says there are increasing numbers of tales of horror coming from occupied Kuwait.

A former securities trader at Drexel Burnham Lambert Incorporated says one-time junk bond king Michael Milken was involved in backroom stock market dealings. Trader Peter Gardiner linked Milken to a share manipulation during testimony today at a pre-sentence hearing before a federal judge in New York. Milken, who has already pleaded guilty to several charges, faces up to 28 years in prison.

1976 Olympic gymanists champion Nadia Comaneci says the man who helped her flee Romania was far from being her lover. Comaneci charges that Florida roofer Constantin Panait kept her prisoner in hotel rooms... beat her regularly... and cheated her out of 150-thousand dollars. She says the ordeal with Panait lasted three months and took her across the United States and into Canada, where he finally fled.

The World Health Organization reports that tuberculosis cases and deaths are rising sharply due to the spread of the AIDS virus. The U-N health agency says there are about three-Million deaths a year from tuberculosis... with eight-Million new cases every year. The W-H-O says the figures are up even though it is relatively inexpensive to prevent and cure the lung disease.

Some New York car owners who paid for warranty-type repairs to their new vehicles will be reimbursed under the state's ''lemon law.'' A dozen automobile manufacturers have agreed to pay refunds that could total as much as 100-Million dollars. The settlements follow four years of court battles. The carmakers entered into the refund agreement without admitting any wrongdoing.

MONTREAL (OCT. 15) UPI - Brian Skrudland's fourth goal of the season at 7:06 of the third period Monday night, helped the Montreal Canadiens to a 3-1 victory over the Washington Capitals.

Skrudland shot the puck over the pads of Washington goalie Don Beaupre, who had slid out of the net, giving Montreal a two-goal advantage.

Dale Hunter had cut the Canadiens lead to 2-1 at 5:39 of the third period by deflecting a drive off the stick of Bob Rouse past Montreal goalie Patrick Roy.

Roy, who has started all six of Montreal games, stopped 22 Washington shots and Brent Gilchrist had two assists for the Canadiens.

Montreal took the lead at 17:51 of the first period on a shot by Guy Carbonneau. Carbonneau took a feed from Mike Keane chopped at the pucj which bounced along the ice and eluded Washington goalie Don Beaupre.

Mike McPhee extended Montreal's lead to 2-0 at 4:35 of the second period, steering a drive from the blue line by defenseman Eric Desjardins past Beaupre for his second goal of the year.

It was Beaupre's first start of the season. Washington had used Mike Liut in net in their their first five games this season.

Washington got their best scoring chance of the game when they were shorthanded in the first period. Former Canadiens defenseman Rod Langway broke in on Roy during a three-on-one break but missed an open net.

During the game the Canadiens announced that goalie Brian Hayward was being suspended with pay. Hayward bolted the team a week ago, demanding to be traded and was suspended without pay.

But the NHL Players Association informed Montreal General Manager Serge Savard that he couldn't suspend Hayward without pay, so the club was forced to make the change although Hayward would not rejoin the team.

NEW YORK (OCT. 15) UPI - The World Series will be broadcast to U.S. armed

forces stationed in 132 countries around the world, including troops in the Middle East, over the Armed Forces Radio and Television Service (AFRTS), Major League Baseball announced Monday.

Between the half innings, messages to soldiers from their families and friends at home will be broadcast, as well as messages from President Bush and Major League Baseball Commissioner Fay Vincent Jr. The family messages will be produced by local CBS affiliates.

The CBS broadcasts of the games will be transmitted to Major League Baseball Productions headquarters in South Hackensack, N.J., where the messages from home will be inserted. The game will then be broadcast by the AFRTS to military installations around the world and to U.S. ships and land-based troops throughout the Middle East.

NEW YORK (OCT. 15) UPI - Nadia Comaneci, the gymnastics darling of the 1976 Olympics who fled Romania last year, said Monday her reputed boyfriend in the United States beat her regularly, kept her prisoner in his home and blackmailed her of $150,000 in income.

Comaneci said the traumatic ordeal lasted three months and took her on a harrowing journey through Florida, California, New York and Canada. She said shortly after arriving in the United States she was locked in hotel rooms and a Los Angeles apartment and not allowed so much as to answer the phone.

''I was in a free country,'' she said. ''But I was not free.''

Comaneci, who turns 29 next month, said she has settled since February in Montreal, where she is planning to become a Canadian citizen, stage gymnastics exhibitions and perhaps enter coaching.

The woman who scored the first perfect 10 in the Olympics said the Florida roofer with whom she was romantically linked had taken her earnings from interviews and magazine layouts and returned with his wife to his native Romania.

Comaneci spoke at a ballroom table to a handful of reporters after being honored by the Women's Sports Foundation. Wearing a crisp gray business suit and white blouse, she said in halting but capable English that this was the first time she was speaking of her travails in America since her perilous escape from Romania on Nov. 28, 1989.

She said she wants to clear her name following the leering innuendo surrounding her involvement with Constantin Panait, the self-employed roofer who helped her flee Romania and soon dominated her life at will.

''I am not a scandal person,'' she said. ''This is not my image.''

At a Hollywood, Fla., news conference just over 10 months ago, Comaneci said she was involved with Panait and did not care he was married. She stoked romantic flames, hinting they would set up house. She also said at the time she wanted nothing to do with her celebrated coach, Bela Karolyi.

Comaneci now insists Panait was not her paramour, but her captor. She added that she speaks often with Karolyi, a Romanian who runs an acclaimed gymnastics school in Houston. Karolyi was not immediately available at his school to confirm the account of his most famous pupil.

''When I came to the United States this guy kept me like I was in a prison,'' she said of Panait. ''He didn't let me call anybody. I couldn't call my family in Romania. I knew something was wrong. ... I couldn't go anywhere alone. I moved from one apartment to another.''

Comaneci said she did not speak of Panait's abuse because he was her lifeline to this country. She also feared more beatings from him if she did not cooperate.

''He punched her, black and blue,'' Alexandru Stefu, Comaneci's manager in Montreal, said as he pointed to the side of his face. ''The guy is a bandit.''

Comaneci was asked if she was sexually abused by Panait. She did not reply. She admitted to physical punishment, but did not want to elaborate. She said she is still recovering emotionally.

''He beat me,'' she said. ''There are some things I don't even want to remember.''

Comaneci said she did not go to the police or take legal action against Panait because she did not understand how to handle such things.

''I come from a communist country,'' she said. ''We learned nothing of lawyers nothing about rights. I don't know what to do. He said, 'I'll send you back to Romania.' It was like I was dropped from the sky. I knew nothing. I was scared.''

Comaneci said she had few resources when she arrived, but income from interviews, photographs and a fashion spread in a London magazine produced about $150,000. However, she said she was not allowed to cash a check and never saw a dime.

''He used me for money,'' she said.

A network of Romanian friends came to Comaneci's aid, including Stefu. She

said she and Panait traveled to Canada in February because of the prospect of lucrative contracts.

That was where she finally rid herself of him. Apparently, Panait feared Stefu or the police would intervene, and the roofer ran off to the airport at dawn, leaving Comaneci behind.

''I said, 'I'm free, I'm free,''' Comaneci recalled, thrusting her arms in the air.

Comaneci said she is glad to return to Montreal, the site of her great triumph where as a winsome 14-year-old she mesmerized a global television audience with her grace, strength and acrobatics.

Her first perfect 10 on the uneven parallel bars was one of the Olympics' finest moments. She won three gold medals, plus a silver and a bronze, in Montreal and two golds at the 1980 Olympics.

But all her medals were left behind in Romania, where Comaneci said she was once the ''little princess'' but had fallen into disfavor with deposed ruler Nicolae Ceausescu.

''He didn't like anybody more famous than himself,'' she said.

Panait held an exit permit and assisted her escape. A guide led her and six others across frozen fields before she and Panait reunited at a Hungarian police station.

Comaneci said she does not want to recover her money from Panait because she wants to avoid such attention. She performed at a gymnastics exhibition at Vail, Colo., two weeks ago (''It was very, very hard for me.'') and plans similar events and promotions in Canada. She has no intention of returning to competition.

She also said she may pursue a project with exercise queen Jane Fonda and added the Disney company has bought the movie rights to her life.

''I am very happy now,'' she said. ''I am safe. This is the life I want to have.''

#90288u2329 10/15/1990 ~United Press International

(OCT. 15) UPI - President Bush left Washington today on a two-day political swing. Earlier, Bush said he and G-O-P congressional leaders are ''on the same wave length'' in preferring a Senate panel's bipartisan deficit reduction package over a House Democratic plan. Bush also renewed his attack on Congress for failing to complete work on the budget... prompting Democratic House

Speaker Thomas Foley to chide the president for engaging in ''partisan gaming.''

The Supreme Court made two decisions today that limit state's rights. The justices unanimously ruled that some states must get federal approval before creating new judgeships. They also blocked state prosecution of airlines for false advertising. In addition, the justices ordered an appeals court to decide if there is a loophole in the high court's June ruling that burning the flag is a form of expression protected by the Constitution.

Soviet President Mikhail Gorbachev says he is ''deeply moved'' by being awarded the 1990 Nobel Peace Prize. Gorbachev said his selection today means society recognizes that the world's fate is linked to the fortunes of his perestroika reforms. He adds that everyone who sincerely supports the victory of perestroika in the Soviet Union shares in his being named the Peace Prize laureate.

A surrogate mother involved in an UNprecedented custody battle in California testified today that she always believed she had an ''absolute'' right to keep the child. Anna Johnson told a Santa Ana court that she signed a contract agreeing to give up the child to his genetic parents. But Johnson says she NEVER fully understood the document detailing her agreement with Mark and Crispina Glover to carry their fertilized egg.

#90288u2456 10/15/1990 ~United Press International

(OCT. 15) UPI - House Republican leader Bob Michel says the G-O-P is ''putting the finishing touches on'' an alternative deficit reduction plan that will be offered on the House floor tomorrow. The Illinois lawmaker says ''it DOESN'T appear'' the plan includes new taxes... as does a money blueprint proposed by Democrats on the Ways and Means Committee. Michel says the Republican plan would rely ''heavily on cutting spending'' to reduce the deficit.

The Senate refused today to stop production of the multi-BILLION- dollar B44 margin a proposal that opponents say would have killed the B-2 program. The vote on the futuristic warplane highlighted consideration of the fiscal 1991 defense appropriations bill... which represents the largest single-year reduction in military spending since the Vietnam War.

An opposition newspaper in Egypt blames Iraqi intelligence for last week's assassination of Egyptian Parliament Speaker Rifaat El Mahgoub. The paper says the Iraqis planned the attack and ordered Palestinian extremist Abu Nidal to carry it out. The article cites UNidentified sources as saying the killers originally planned to blow up the Cairo hotel where Mahgoub was scheduled to meet with his Syrian counterpart.

Israel's representative to the United Nations met today with the secretary-general at the world body's headquarters in New York. The Israeli official informed U-N chief Javier Perez de Cuellar of his nation's decision NOT to receive a U-N team to probe last week's killing of 20 Palestinians in Jerusalem. Israel's refusal to cooperate raises the question of whether the United Nations will send a mission at all.

-30- 1813
#90288u2459 10/15/1990 ~United Press International
(OCT. 15) UPI - South African black nationalist Nelson Mandela was in New Delhi today... where he urged the Indian government to continue its support of the fight against apartheid. Thousands of Indians cheered Mandela during his speech at a public rally organized in his honor. Mandela says South Africa's racist government policy is in- quoting here- ''the last throes of its demise.''

A jury has been picked and opening arguments are to begin tomorrow in the obscenity trial of the Miami rap group 2 Live Crew. Four women and two men will hear the Fort Lauderdale, Florida, case against group members Luther Campbell, Christopher Wongwon and Mark Ross. Defense attorney Bruce Rogow says he needed a black jury to insure a fair trial... but only one member of the panel selected today is black.

-30- 951
#90288u2617 10/15/1990 ~United Press International
(OCT. 15) UPI - The Senate voted 79BILLION- dollar defense appropriations bill for fiscal 1991. The measure is 20- BILLION dollars less than what President Bush asked for at the beginning of the year, and nearly 16-BILLION dollars below what Congress approved last year. .

Earlier, the Senate refused to stop production of the futuristic B-2 stealth bomber. The bill passed tonight includes about five-BILLION dollars for the acquisition of two B-2's this year. The House has voted to cancel the B-2 program. The differences will have to be worked out by a conference committee.

Congress is trying to come up with a budget agreement by Friday, when a bill temporarily funding government operations expires. House G-O-P leader Bob Michel says Republicans are finishing up work on their version of a deficit cutting package, to be offered for debate tomorrow. .

President Bush took to the road today to raise money for Republican candidates in five states. Before he left Washington, he met with G-O-P leaders and later said they all basically prefer the Senate Finance Committee's bipartisan budget plan to one proposed by House Democrats.

At a Republican fund-raising luncheon in Dallas, President Bush held out the

prospect of a Nuremberg-style prosecution of Iraq's Saddam Hussein for war crimes against the people of Kuwait. The Justice Department is currently reviewing that option.

Iraq is dismissing reports it is weakening and considering a plan in which Iraqi troops would withdraw from Kuwait. Baghdad Radio quotes the Iraqi information minister as saying he believes war in the Persian Gulf ''continues to be imminent, but Iraq will NOT fire the first shot.''

Muscovites reacted with indifference and even with hostility today to news of Soviet President Gorbachev's winning the Nobel Peace Prize. One man, a historian, says the award ''may have been untimely and may even compromise him in the eyes of the people.''

#90288u2625 10/15/1990 ~United Press International

(OCT. 15) UPI - The World Health Organization says tuberculosis is again on the rise... killing nearly three-Million people worldwide yearly. Officials say progress against T-B has ''come to an abrupt halt'' in some industrial countries such as the United States.

Leftist Peruvian rebels occupied the Lima headquarters of the Italian news agency ANSA today and forced a correspondent to transmit a revolutionary proclamation. The guerrillas then fled, saying they'd left a time bomb. Police deactivated the device.

New York fire marshals say last night's blaze at the Lebanese consulate in Manhattan was arson. One Lebanese employee and five firefighters were injured in the fire, which followed several telephone threats to the consulate.

Still NO trace of two federal wildlife biologists and their pilot whose plane vanished Thursday while tracking polar bears in the frozen Arctic north of Alaska. Coast Guard officials say the trio had survival gear and two-weeks' worth of food with them.

Authorities in La Canada Flintridge, California, have jailed a woman and her 11-year-old son in the slaying of the boy's 78-year-old grandmother. Police say the woman was wearing camouflage fatigues and the boy was dressed as a girl when they were arrested last night.

-30- 1433

#90288u2696 10/15/1990 ~United Press International

(OCT. 15) UPI - President Bush used a little more caution today in discussing the budget after last week's fiasco caused by his apparent flip-flop on taxes. Bush told reporters in Washington he wasn't prepared to discuss what he would or wouldN'T accept concerning taxes in a budget plan. The president would only

say the budget question was before the Congress and he'd take at look at what they produce.

Kuwaiti exiles are demanding the return of their homeland from Iraqi invaders. The demand was included in a communique unanimously adopted today by Kuwaitis meeting in Jeddah, Saudi Arabia. The document also declares there will be more democratic freedoms in Kuwait once it is liberated from Iraq. The 20-point communique stopped short of demanding Iraq be forced out of Kuwait.

The Supreme Court today agreed to hear an appeal in the case of a man sentenced to death in Idaho despite assurances from a prosecutor that he would receive a maximum sentence of life in prison. Bryan Lankford and his brother, Mark, were convicted of the 1983 beating death of a couple. The state had notified the trial court in writing that the death penalty would NOT be sought in the case.

-30- 1342

#90288u2701 10/15/1990 ~United Press International

(OCT. 15) UPI - A former radical who pleaded guilty to planting bombs in three banks in the early 1970's won a reduction in his prison term today-thanks to a judge and government prosecutors in San Francisco. The federal Parole Commission had refused to grant Ronald Kaufman parole this year as recommended in his 1987 plea bargain. But authorities allowed Kaufman to withdraw his guilty plea and be resentenced... meaning he'll be released in about eight months.

Buyers from across North America are making off with goods they bought at a multi-Million-dollar auction by Exxon. There's one more day to go in the four-day event to sell off goods used during the oil company's cleanup of the Exxon Valdez oil spill off the Alaskan coast. Auction officials in Anchorage say the operation already has exceeded all expectations. The final day of the auction comes next month in Tacoma, Washington.

#90289b0006 10/16/1990 ~Business Wire

SAN JOSE, CA (OCT. 16) BUSINESS WIRE - The Coast Distribution System (ASE:CRV) Tuesday reported its financial results for the quarter and nine months ended Sept. 30.

Sales for the third quarter were $37,641,000 in 1990, a 3 percent increase over the like period in 1989. The company incurred a net loss of $187,000, or 4 cents per share, as compared to earnings of $1,539,000, or 35 cents per share, in 1989.

Sales for the nine months ended Sept. 30, 1990, increased 11 percent to $120,640,000 from $108,576,000 in 1989. Net earnings were $1,105,000, or 26

cents per share, in 1990, and $3,732,000, or 80 cents per share, in 1989.

The increase in the company's sales was attributable to the acquisitions, made in September of 1989 and January 1990, of Griffin Marine, a distributor of marine parts and accessories, and Mohawk Trailer Supply, a distributor of recreational vehicle parts and accessories.

In conjunction with these acquisitions, the company added a 14th distribution center and increased its overall operating costs to accommodate the increase in sales.

Coast's sales and earnings have been adversely affected by the weakness in the recreational vehicle market and the significant sales decline in the marine industry.

The company has embarked upon a cost-cutting program in an effort to reduce the impact on earnings that has resulted from the significant sales decline in the primary marketplace.

     #90289b0016 10/16/1990 ~Business Wire
MOUNTAIN VIEW, CA (OCT. 16) BUSINESS WIRE - Paravax Inc., a company specializing in the development of vaccines to control parasites in pets and other animals, has signed a research and development and licensing agreement with Mobay Corp. Animal Health Division.

Mobay, a subsidiary of Bayer USA Inc., the management holding company of Bayer AG, is a worldwide leader in the animal health market.

The Paravax-Mobay agreement concerns development of a cat vaccine against Toxoplasma gondii, one of the most common protozoan infections of man and domestic animals. As many as 500 million people worldwide may be infected with Toxoplasma. The disease it causes, toxoplasmosis, can be fatal in immune-compromised individuals.

In pregnant women, infections can cause miscarriages and severe fetal abnormalities. Toxoplasmosis is also a major cause of spontaneous abortions in sheep and goats.

Cats are a major source of Toxoplasma. Although the animals themselves suffer relatively few effects from the parasite, they can pass the infection to humans and farm animals through contact with cat feces or contaminated soil.

Currently, more than 54 million cats are kept as household pets in the United

States. Of these, 12 million receive vaccines annually for such diseases as rabies and distemper. The collaboration between Paravax and Mobay will focus on the development and formulation of a vaccine that will reduce shedding of the highly infectious Toxoplasma oocysts (eggs) in cat feces.

The new cat vaccine technology is based on work performed at the University of Kansas Medical Center and Dartmouth College. Under terms of the agreement, Mobay will produce and market the vaccine worldwide.

Paravax Inc. was founded in March 1988 to develop products for the prevention and control of parasitic diseases in animals. Using the tools of biotechnology, Paravax Inc., takes a novel, immunological approach to the science of animal health.

#90289b0018 10/16/1990 ~Business Wire

SAN JOSE, Calif. (OCT. 16) BUSINESS WIRE - Compression Labs Inc. (CLI)(NASDAQ/NMS:CLIX), Tuesday reported revenue for the third quarter, ended Sept. 30, 1990, of $13.5 million, an increase of 87 percent from the like quarter last year.

Net income for the third quarter increased 287 percent to 673,000, or 7 cents per share, compared with $174,000, or 2 cents per share in the like period of 1989.

For the nine months ended Sept. 30, 1990, revenues increased 73 percent to $35 million, compared with 20.2 million for the like period a year ago. Net income for the first nine months of 1990 increased 217 percent to $1,369,000, or 14 cents per share, up from $432,000, or 5 cents per share in the like period of 1989.

John E., Tyson, president, chief executive officer and chairman of the board, attributed the revenue growth to the fulfillment of orders from large contracts the company has received over the last 18 months, and orders from new customers added during the quarter.

''Contracts with Hewlett Packard, General Electric, IBM, Telecom Australia, and Boeing, as well as resellers AT&T, U.S. Sprint, Sony and Philips, continue to fuel our growth,'' said Tyson.

CLI's product backlog continued to grow during the third quarter, increasing

12 percent over the previous quarter to $17.8 million. The company's total backlog, including research and development contracts, reached $25.5 million during the quarter.

During the quarter, the company added a variety of new customers including RJR/Nabisco; the U.S. Department of Justice; FocusVision Network Inc., a provider of remote focus group services; and the U.S. Army's training and Doctrine Command, for its new reservist video teletraining network.

CLI, founded in 1976, is the world leader in full-motion, color videoconferencing systems for use by business, government and education.

CLI is a full service provider of videoconferencing solutions, including room systems, codecs and multipoint units. Considered an effective communications tool for innovative organizations around the world, videoconferencing has emerged as a strategic resource for competing successfully in the 1990s. -0- T

SUNNYVALE, CALIF. (OCT. 16) BUSINESS WIRE - Supertex Inc. (NASDAQ:SUPX) Tuesday announced a 16 percent increase in net sales to $6,245,000 for the second quarter ended Sept. 29, from $5,404,000 for the like fiscal quarter last year.

Net income was $792,000, or 7 cents per share, compared with $911,000, or 7 cents per share, for the like period of the prior fiscal year. Higher income in the prior year resulted primarily from the inclusion of pretax income of $300,000 from the sale of an investment in a flat panel display company.

For the six months ended Sept. 29, net sales were $12,229,000, a 15 percent increase from $10,611,000, while net income fell 10 percent from $1,657,000 to $1,498,000 for the like period last year.

Research and development activities and related expenditures continued at an even higher level than the prior quarter of this year, and almost doubled from the like period last year. This increase is primarily for the development of new products. Compared with the like period of last year, R&D expenditures increased 91 percent from $427,000 to $814,000.

As the company's product mix shifts to proprietary high-voltage products, and foundry business declines, contract assembly and product testing costs increased significantly.

However, gross margins for the second quarter, as a percentage of net sales, increased as compared to the like period of last year as well as the prior quarter. This is due to the sales of higher-margin proprietary products, which is in line with the company's business strategy.

''As the semiconductor industry appears to be going into a recession, we may expect some revenue decrease as a result. However, due to the types of markets we serve, our margins should not be adversely affected,'' commented Dr. Henry C. Pao, president and chief executive officer.

''With good cash flow, we are not afraid to invest heavily in research and development for new products.''

Supertex Inc. is a publicly held, specialty semiconductor manufacturer focused on CMOS, DMOS, and HVCMOS technologies for use in the data processing, telecommunications, instrumentation, and defense industries. The quotation symbol for Supertex Inc., listed on the NASDAQ National Market System, is SUPX.

#90289b0021 10/16/1990 ~Business Wire

ALBANY, OR (OCT. 16) BUSINESS WIRE - Oregon Metallurgical Corp. (OREMET Titanium) announced Tuesday that it earned $2,340,000, or 22 cents per share, on sales of $23,946,000 for the quarter ended Sept. 30, 1990.

In 1989, third quarter earnings were $3,329,000, or 36 cents per share, on sales of $30,062,000.

For the first nine months of 1990, earnings were $7,247,000, or 69 cents per share, on sales of $73,271,000. This compares with earnings of $9,749,000, or $1.05 per share, on sales of $86,971,000 for the first nine months of 1989. The reduced earnings per share reflects the increased number of shares outstanding following the stock offering completed in late 1989.

Last year's nine months' earnings were further increased by $12,412,000, or $1.33 per share, interest income from state and federal income tax refunds and $1,157,000, or 12 cents per share, from the cumulative effect of a change in accounting for income taxes for a total of $2.50 per share.

Several factors continue to influence demand for titanium. Cooling in the national economy and cutbacks in military spending have prompted customers to reduce inventories resulting in slowing sales. Uncertainty in the Middle East has dampened growth plans for some industrial customers. We see no immediate relief from the present business climate.

#90289b0024 10/16/1990 ~Business Wire

SAN FRANCISCO (OCT. 16) BUSINESS WIRE - Union Bank (OTC:UBNK) reported net income of $37.3 million for the quarter ended Sept. 30, 1990, up from $35.6 million for the comparable period in 1989.

Earnings per common share were $1.08, up from $1.05 a year earlier.

The bank reported a return on assets of 0.92 percent, compared with 0.96 percent in the third quarter of 1989. Its return on common equity was 16.28 percent, down from 17.59 percent.

Total loans rose to $12.4 billion from $11.2 billion, spurring a 3.7 percent increase in net interest income, although the net interest margin continued to be squeezed by reduced demand deposits. Total deposits increased to $11.5 billion from $11.2 billion. Total assets rose to $16.7 billion from $15.8 billion a year ago.

Nonperforming loans increased to $255.1 million from $249.7 million at June 30 1990, and $228.3 million at Sept. 30, 1989. Nonperforming assets fell slightly to $271 million from $273.8 million at June 30, 1990, but rose from $242.1 million a year earlier.

Nonperforming assets represented 1.62 percent of total assets, down from 1.72 percent at June 30, 1990, but up from 1.53 percent at Sept. 30, 1989. Nonperforming construction loans and other real estate owned increased to $105.8 million from $89.1 million at June 30, 1990, and $90.3 million at Sept. 30, 1989.

This rise was offset by reductions in nonperforming commercial and foreign loans.

At quarter end, the bank's reserve for loan losses was $308.9 million,

comparable to the $309.4 million on the books at Sept. 30, 1989. The reserve was 2.48 percent of loans and 121.1 percent of nonperforming loans at Sept. 30 1990, down from 2.77 percent and 135.5 percent a year earlier. The decrease is primarily due to the writedowns of all loans to lesser developed countries, some of which were on performing status, to market value.

Net charge-offs for the quarter were $20.8 million, including $13.2 million in foreign loans. Charge-offs were $25.9 million in the third quarter of 1989.

During the quarter, the bank issued a $98 million capital note, bolstering its capital position. The bank's primary and total capital ratios were 8.03 percent and 10.01 percent at the end of the quarter.

At the September meeting of the board of directors, President Seishichi Itoh announced that he plans to return to the Bank of Tokyo for reassignment at the end of October. Taisuke Shimizu, vice chairman and chief financial officer, is expected to be elected as president and chief executive officer at the Oct. 24 board meeting.

Shimizu has wide ranging experience with the Bank of Tokyo and was a key member of the management team that oversaw the November 1988 merger of California First Bank, San Francisco, and Union Bank, Los Angeles.

The fifth largest commercial bank in California, Union Bank has 177 branches throughout the state and five facilities overseas.

#90289b0026 10/16/1990 ~Business Wire

KANSAS CITY, MO. (OCT. 16) BUSINESS WIRE - The upward trend of revenues and profits continued for La Petite Academy in the third quarter and nine months ended Sept. 30.

Net earnings in the three months ending Sept. 30 were $1,527,000, equal to 10 cents a share, compared to $1,243,000, or 8 cents a share, a year earlier, a gain of 22.9 percent. Revenues amounted to $49,291,000, compared to $42,819,000 a year ago, an increase of 15.1 percent. The operating margin improved to 5.4 percent compared to 5.2 percent for the same quarter last year.

For the nine months ending Sept. 30 net income was $6,708,000, equal to 42 cents a share, against $5,349,000, or 34 cents a share, a year before, or a gain of 25.4 percent. Revenues of $150,225,000 were 17.2 percent ahead of the $128,161,000 total a year earlier. Expenses as a percentage of revenue decreased to 92.2 percent from 92.7 percent a year before, equaling an

operating margin of 7.8 percent compared to 7.3 percent.

As of Sept. 30, La Petite had an enrollment of about 81,000 children in its 739 centers located in 32 states. In the nine months, 31 new schools were opened and 19 olders units which did not meet volume and profit levels were closed. The current plans call for the opening of 50 centers in 1990.

Capital requirements for this year will total approximately $40 million, the bulk of which will stem from sale/leaseback financing. La Petite remains in a strong financial position with no bank debt, cash of $17.5 million and stockholders' equity of $79.2 million.

#90289b0028 10/16/1990 ~Business Wire

SANTA MONICA, CA (OCT. 16) BUSINESS WIRE - INTERACTIVE Systems Corp. and Lotus Development Corp. have signed a long-term agreement under which INTERACTIVE will market the UNIX System V, Release 3.2 version of Lotus' popular 1-2-3 spreadsheet through its distributors and authorized value-added resellers (VARs).

Under the terms of the agreement, Lotus provides end user support for Lotus 1-2-3 users, including 90 days of free access to its Prompt Support Line. To run this version of 1-2-3, end users must have a 386/486-based Compaq, IBM or IBM-compatible personal computer with 4 megabytes of RAM and 5 megabytes of free disk space, as well as the INTERACTIVE UNIX System V, Release 3.2 operating system.

Lotus 1-2-3 for UNIX System V is functionally compatible with Lotus 1-2-3,

Release 3.1 and completely file-, macro- and keystroke-compatible with earlier versions. With earlier versions, key features include improved data-analysis capabilities and graphics, a relational database, file-reservation features, and a facility for three-dimensional modeling.

Three-dimensional modeling has proven to be a particularly useful way to visualize the interaction between spreadsheet data from multiple company divisions or government agencies.

The UNIX System V version of 1-2-3 uses the standard .WK3 file format to assure compatibility with many platforms. The open systems orientation is also inherent in UNIX, in the form of support for cross-platform file and data sharing, networking, multitasking and multiple users.

Running under INTERACTIVE UNIX System V, Release 3.2, the power of 1-2-3 is enhanced, giving end-users the ability to open up to 26 worksheets at one time run multiple sessions simultaneously and perform program background processing.

The product also allows users to access outside databases via Lotus' DataLens technology.

Lotus 1-2-3 for UNIX System V is available in four editions: Single-user, Additional-user, Multi-user and Documentation. The Single-user Edition is priced at $695. The Multi-user Edition, $1,295, is designed for installation on a 386 PC server, and provides an efficient way for up to 10 attached terminal users to share software.

The Additional-user Edition, $495, contains one set of documentation and licenses for four additional users in a multiuser configuration. The Documentation Edition, $60, provides a complete user documentation set.

Lotus Development Corp. is a leading developer of applications software for personal computers and information services delivered on CD-ROM, and worldwide supplier of applications software for workstation, minicomputer and mainframe computing environments.

Segue Software Inc., founded in November 1988 by Dr. Peter G. Weiner, a recognized industry pioneer and expert, is the first company dedicated to bringing standard industry software from DOS to UNIX. The privately financed company is located in Santa Monica.

INTERACTIVE Systems Corp., a Kodak company, is the premier supplier of UNIX products and development services to the computer industry, and is gaining leadership in the commercial UNIX marketplace.

#90289b0052 10/16/1990 ~Business Wire
PORTLAND, OR (OCT. 16) BUSINESS WIRE - Louisiana-Pacific Corp. (NYSE:LPX) Tuesday reported that both sales and earnings in the third quarter were lower than the record third-quarter results the company achieved in 1989.

The company reported quarterly earnings of $21.2 million on sales of $450.9 million. This compares with 1989 third-quarter earnings of $51.5 million on sales of $510.1 million. On a per-share basis, the company earned 57 cents in the third quarter of this year, compared with $1.34 in the same quarter in 1989.

''Our building products business was hit across the board by a drop in demand, as world and national events took their toll on consumer confidence,'' according to Harry A. Merlo, Louisiana-Pacific's chairman and president. ''Worldwide pulp markets also continued their decline from the record levels of 1989.''

For the first nine months of the year, L-P earned $95 million, or $2.54 per share, on sales of $1.4 billion. This compares with 1989's record nine-month earnings of $139.8 million, or $3.66 per share, on sales of $1.5 billion.

Merlo said that weak demand will continue until the President and Congress take more positive steps to address the continuing budget crisis and its negative effect on consumer and investor confidence. Meanwhile, supply constraints caused by timber shortages, could improve the pricing outlook for building products early next year.

LOS ANGELES (OCT. 16) BUSINESS WIRE - The battle for consumer allegiance among bank customers shifted from the tellers' counter to the skies as Coast Federal Bank Tuesday announced a major new program to attract customers.

Coast said that customers who conduct one of six qualifying transactions can receive two travel certificates good for reduced fare, roundtrip travel on Northwest Airlines, the nation's fourth largest air carrier.

The discounted fare is $124 one way, based on roundtrip purchase ($89 to/from California and Seattle or Spokane).

Coast Federal, with assets of nearly $11 billion and 120 offices statewide,

said that customers can qualify for the discounted airfare by opening or adding to a checking or savings account, opening or renewing a certificate account, taking out a home loan or arranging for electronic payment of loans every month.

Gerald D. Barrone, president and chief operating officer, explained that the new program is intended to appeal to new customers as well as existing Coast customers by providing a valuable incentive to do business with the Los Angeles-based consumer bank.

Barrone noted that travel is one of the major interests of Coast's primary customer group (adults age 55 and over) and that the Northwest offer provides one of the most attractive fares of any major airline.

Under the Coast Northwest Travel Certificate program, retail bank customers can order certificates in any Coast office after completing a qualifying transaction and paying a $4 handling fee. Northwest will then mail them a certificate good for travel, which can be arranged through Coast's own travel program, any travel agent or the airline.

Northwest flies from seven California airports to nearly 200 destinations in the Continental United States and Alaska where customers can fly at the discounted rates.

PASADENA, CA (OCT. 16) BUSINESS WIRE - Terry Wilson, president and executive director of the AAF Rose Bowl Aquatics Center, announced his intention to resign at the end of his two-year contract that expires on Dec. 31, 1990.

Wilson announced his plans at the monthly board of directors meeting held on Thursday.

In a prepared statement to the board, Wilson said, ''I feel that what I set out to accomplish...getting the center built and operating... is complete and that now is the time for me to move on to new challenges.''

Wilson will remain at the Aquatics Center until a replacement is found and will continue to serve on the board of directors to help provide a smooth transition for the new president.

''Over the last two years, Terry has worked long, grueling hours for the good of the complex,'' said John Naber, chairman of the board. ''He has given tirelessly of his skills and experience. Terry is personally responsible for

raising over a quarter million dollars and was instrumental in managing our transition from a vision to a reality. We look forward to his ongoing contributions as a board member,'' said Naber.

During Wilson's tenure as president, he oversaw the construction of the $6.5 million dollar multi-purpose swimming and diving complex and the initiation of team and recreational programs at the Center. Over 18,000 people came to swim at the two Olympic sized pools since its opening on June 25 of this year.

''In spite of the personal rewards of this job, I feel it is time for me to explore new opportunities and seek new challenges more in line with my long-term career goals and aspirations,'' said Wilson.

Wilson, 33, came to the Aquatics Center two years ago from Business Wire, an international press relations wire service, where he served as western division manager of BW SportsWire. Prior to joining Business Wire, Wilson worked with three international public relations firms: Carl Byoir & Associates, Daniel J. Edelman Inc. and Hill & Knowlton.

The Rose Bowl Aquatics Center board of directors, this community and future generations of Pasadenan's owes Terry Wilson their deepest appreciation in making this center a reality,'' said Nick Conway, vice chairman of the board.

#90289b0076 10/16/1990 ~Business Wire

PALO ALTO, CA (OCT. 16) BUSINESS WIRE - Watkins-Johnson Co. (NYSE:WJ) Tuesday reported sales of $78,645,000 and net income of $3,561,000, or 47 cents per share, for the third quarter of 1990, ended Sept. 28.

Sales, net income and earnings per share for the first three quarters of 1990 were $230,831,000, $9,581,000 and $1.22, respectively. Included in the company's 1990 results is a net gain of $514,000 or 6 cents per share, resulting from the settlement of a pricing dispute with the U.S. Government.

For the third quarter of 1989, net income amounted to $7,323,000, or 87 cents per share, on sales of $70,526,000. For the first three quarters of 1989, sales amounted to $233,571,000 and net income totaled $18,045,000 or $2.15 per share.

Net income for 1989 included an award of $2,858,000, or 34 cents per share, resulting from a judgment against the government of Iran.

As a result of the company's stock repurchase program, average shares outstanding for the first three quarters of 1990 were reduced to 7,885,327 from 8,402,770 in 1989.

Firm backlog on Sept. 28, 1990 stood at $252,371,000, compared to the Sept. 29 1989 backlog of $274,994,000. The portion of the current backlog shippable within 12 months is 83 percent, compared to 80 percent one year ago.

#90289b0080 10/16/1990 ~Business Wire

DENVER (OCT. 16) BUSINESS WIRE - Colorado National Bankshares Inc. (NASDAQ:COLC) announced Tuesday net income of $1,198,000, or 11 cents per share, for the third quarter of 1990, compared to $849,000, or 7 cents per share, in the third quarter last year.

For the first nine months of 1990, the company earned $3,985,000, or 36 cents per share, compared to $3,770,000, or 34 cents per share, for the same period a year ago.

Will F. Nicholson, Jr., chairman of the board and president, commented: ''We are pleased with the substantial improvement in our interest margin -- total interest income less total interest expense -- in both the third quarter and the first nine months. During the current quarter, the margin was up $3.6 million (12.6 percent) from the like period of 1989, while for the first nine months it was up $10 million (11.5 percent) as compared to the first nine months of 1989.''

Nicholson further commented, ''Colorado's depressed commercial real estate market persists as our number one problem. Although declining commercial real esate values is a recent development for banks in many areas of the country, Colorado's banks have operated in that environment for several years.

''Unfortunately, we cannot yet determine that commercial real estate values have hit bottom in this state. Uncertainties surrounding the real estate market continue to restrain the slowly developing recovery of the Colorado economy.''

Credit charges, a figure which includes the provision for loan losses plus net expenses of foreclosed property, reflected the softness of the Colorado real estate market. During the most recent quarter, such charges were $16.6 million, up 46 percent from the $11.3 million recorded in the third quarter of 1989.

For the first nine months of 1990 credit charges totaled $44.3 million, up

$18.3 million (70 percent) from the $26 million recorded in 1989. The increased credit charges resulted in the company incurring pre-tax losses for the third quarter and for the first nine months of 1990.

Colorado National Bankshares Inc., is a Denver-based bank holding company which owns 21 commercial banks, an insurance agency, a mortgage company and a leasing company. It is also manager and 50 percent owner of Rocky Mountain BankCard System Inc., a national credit card issuer and one of the largest processors of credit card transactions in the country.

#90289b0082 10/16/1990 ~Business Wire

CUYAHOGA FALLS, OH (OCT. 16) BUSINESS WIRE - Falls Financial Inc. (NASDAQ:FFII) (Falls) Tuesday reported third quarter 1990 net income of $663,000, or 42 cents per share as compared to $391,000 for the like period in 1989.

Gene Stalnaker, president and chief operating officer of Falls reported that net income for the nine months ended Sept. 30 increased 32.3 percent to $2.0 million, or $1.29 per share, as compared to $1.5 million for the like period in 1989. Earnings per share are not presented for 1989 as the company completed its common stock offering on Dec. 11, 1989.

Falls' ratio of stockholders equity to total assets at Sept. 30, 1990, is 12.23 percent, as compared to 12.34 percent at Dec. 31, 1989. In reporting the company's results, Howard W. Atwood, chairman and chief executive officer noted that Falls is prudently deploying its capital raised in the public offering in order to gain better economies of scale. Falls Financial Inc.'s common stock is traded on NASDAQ under the symbol ''FFII.'' Its subsidiary, Falls Sasvings Bank, FSB, operates 11 retail banking offices in Summit and Portage Counties.

REDONDO BEACH, CA (OCT. 16) BUSINESS WIRE - TRW has added Westinghouse Electric Corp.'s Advanced Technology Division (Linthicum, Md.) to its MIMIC team, Dr. Marvin S. Stone, vice president and general manager of the Electronics & Technology Division, the TRW unit responsible for the company's role on the MIMIC program, announced Tuesday.

Preparations are underway for TRW's MIMIC team, currently working on MIMIC Phase 1, to compete for a Phase 2 contract expected to be awarded by the Department of Defense (DoD) in 1991. MIMIC, short for Millimeter/Microwave Monolithic Integrated Circuits, is DoD's premiere manufacturing technology development program for advanced gallium arsenide integrated circuits.

The goal of the MIMIC program is to form an industrial base for the affordable manufacture of gallium arsenide integrated circuits operating in the microwave and millimeter wave frequency ranges. An important MIMIC priority is to shrink these circuits to chips operating as part of very compact modules. Uses for MIMIC chips and modules include spacecraft, aircraft and small diameter smart munitions.

The MIMIC program is sponsored by DoD's Defense Advanced Research Projects Agency. The TRW team's progress is monitored by the U.S. Army Laboratory Command's Electronics Technology and Devices Laboratory, Fort Monmonth, N.J.

Westinghouse's Advanced Technology Division is a multidiscipline organization with research, development and production activities in gallium arsenide, silicon, imaging and optical technologies for a broad range of military applications. It is part of the Electronic Systems Group of Westinghouse Electric Corp., which brings several near-term MIMIC insertions to the team.

The Electronics & Technology Division is part of TRW's Electronic Systems Group.

The business and technical strengths of TRW's Electronic Systems Group include the management of a wide range of research, development and application tasks, projects and programs; systems engineering for complex electronic applications; advanced digital signal processing; the design and fabrication of sophisticated microelectronic devices in both silicon and gallium arsenide (such as the MIMIC program); and, primarily, design and fabrication of payloads for a wide range of military, civil and scientific spacecraft.

OAKLAND, CA (OCT. 16) BUSINESS WIRE - Golden West Financial Corp., (NYSE/PSE/MSE:GDW), parent of World Savings and Loan Association, announced Tuesday that reported earnings, or income from all sources, amounted to $43 million, or 68 cents per share, for the third quarter of 1990, a 3 percent increase over the $42 million, or 66 cents per share, posted for the like three months in 1989.

Core earnings, or profits from the company's basic business activities, totaled $41 million, or 65 cents per share, a 10 percent improvement over the $37 million, or 59 cents per share, for the three month period ended Sept. 30, 1989.

The company also announced that reported earnings for the first nine months of 1990 reached $139 million, or $2.21 per share, up from the $117 million, or $1.86 per share, recorded in the like period of 1989. Concurrently, core income increased to $130 million, or $2.07 per share, compared with $106 million, or $1.68 per share, for the first three quarters of 1989.

Not including any of Golden West's 1990 acquisitions, the company's balance increase for the first nine month of this year was 22 percent more than for the first three quarters of last year.

At the same time, the Association's regulatory risk-based capital ratio was more than twice the 6.4 percent requirement.

Golden West is a savings and loan holding company with assets in excess of $21 billion. The company's principal subsidiary, World Savings and Loan Association, headquarterd in Oakland, Calif., currently has 113 authorized offices in that state, 65 in Colorado, 10 in Kansas, 7 in Texas and 6 in New Jersey.

A separate subsidiary, World Savings and Loan Association of Ohio, conducts business through eight facilities, while a third subsidiary, World Savings and Loan Association of America, located in the state of Washington, operates two branches in the Seattle area. With a total of 211 offices, the Golden West system comprises one of the largest multi-state branch networks in the country.

The company's stock is listed on the New York, Pacific and Midwest Stock Exchanges under the ticker symbol GDW. Options on Golden West's stock are traded on the Philadelphia Options Exchange.

#90289b0121 10/16/1990 ~Business Wire
LOS ANGELES (OCT. 16) BUSINESS WIRE - Medco Research Inc. (NASDAQ:MEDR) (BSE:MRE.B) Tuesday announced that its new drug MEDR 640 (adenosine) was found to be effective in limiting reperfusion injury in the dog model of heart attacks.

Researchers at Vanderbilt University are scheduled to present their findings at the 63rd Scientific Sessions of the American Heart Association (AHA) to be held Nov. 12-15 in Dallas.

An abstract of their presentation appears in a recent issue of CIRCULATION 1990; 82:III-263. These investigators found that ''intravenous adenosine administered after reperfusion results in a permanent reduction in myocardial reperfusion injury. Adjunctive therapy with adenosine may enhance myocardial salvage in the setting of thrombolysis and acute myocardial infarction.''

In addition to this abstract, the Vanderbilt researchers recently published a related article (Babbott DH, et al., ''Intracoronary adenosine administration during reperfusion following 3 hours of ischemia: effect on infarct size, ventricular function, and regional myocardial blood flow.''(AM HEART J 1990; 120:808-818).

Previously, these investigators published that adenosine limits myocardial reperfusion injury after 90 and 120 minutes of coronary occlusion in the dog model (e.g., Olafsson B, et al., ''Reduction of reperfusion injury in the canine preparation by intracoronary adenosine: importance of endothelium and the no-reflow phenomenon.'' CIRCULATION 1987; 76:1135)

In the latest study they found that ''myocardial salvage cannot be achieved with intracoronary adenosine after 180 minutes of coronary occlusion in the closed chest canine model.'' In view of the previous positive findings by the Vanderbilt investigators and others, this experiment suggests that, like thrombolytic therapy, effective treatment of reperfusion injury will require early intervention.

On the basis of these and other data, Medco has scheduled next month to commence clinical trials to investigate the safety and efficacy of MEDR 640 as an adjunct to thrombolytic therapy in patients with acute myocardial infarction. Mervyn B. Forman, M.D., Ph.D., Associate Professor of Medicine at Vanderbilt University and Principal Investigator of the Vanderbilt studies has served as a consultant to and assisted Medco with the MEDR 640 project.

SAN RAFAEL, CA (OCT. 16) BUSINESS WIRE - Westamerica Bancorp. (ASE:WAB), parent company of Westamerica Bank, Tuesday reported record third quarter net income of $2.9 million or 56 cents per share.

This represents a 44 percent improvement over third quarter 1989 earnings of $2.0 million or 39 cents per share and the seventh successive quarter earnings increases. For the nine months ending Sept. 30, 1990, the company earned a record $7.9 million or $1.51 per share. This compares to $5.1 million or $1.00 per share for the first nine months of 1989.

According to David L. Payne, Westamerica's chairman, president and chief executive officer, ''the quarterly and year-to-date results benefited from growth in net interest income and effective expense control.''

Payne indicated that while the bank was pleased with third quarter results, loan demand and deposit growth were sluggish. He stated the bank intends to remain cautious in credit origination and will not relax its underwriting standards.

Return on average assets was .85 percent and return on common equity was 15.2 percent in the third quarter of 1990 compared with .62 percent and 11.9 percent, respectively, a year ago.

Net loan chargeoffs for the third quarter were $942,000 or 0.41 percent of average loans. The loan loss provision was maintained at $1.2 million, the same as the previous and year ago quarters. At Sept. 30, 1990, Westamerica's allowance for loan losses equaled $12.3 million or 1.37 percent of loans compared to $11.3 million or 1.24 percent of loans a year ago.

Non performing assets were $15.9 million at Sept. 30, 1990, up from $13.9 million at June 30, 1990 and $15.7 million a year ago. The annual regulatory examination of Westameria's loan portfolio is in process. Third quarter results reflect current adjustments. Additional adjustments to non performing assets may occur in the fourth quarter following completion of the examination.

Net interest income on a fully taxable equivalent basis increased to $15.9 million in the current 1990 quarter compared with $15.2 million in the like 1989 quarter and $15.7 million in the second quarter of 1990. The net interest margin was 5.17 percent for the third quarter of 1990 compared to 5.11 percent in the previous quarter and 5.22 percent in the year ago quarter.

Non-interest income in the third quarter of 1990 was $3.7 millon, up 10 percent from the year ago quarter. Higher loan servicing and deposit account fees accounted for most of the increase.

Non-interest expense in the third quarter of 1990 declined to $13.7 million, down $462,000 or 3 percent from the year earlier quarter. The decrease reflects reduction of personnel expenses and other operating costs.

Total assets at Sept. 30, 1990 were $1.36 billion, an increase of 2 percent from a year ago. Deposits at Sept. 30, 1990 were $1.19 billion compared to $1.20 billion a year ago.

Reflecting the slow growth in the economy, total loans were $899 million at Sept. 30, 1990, compared to $911 million a year ago, a decrease of 1 percent. As single family real estate and consumer installment loans increased over the last year, commercial and construction loans decreased by a greater amount.

Total equity capital on Sept. 30, 1990 was $76.8 million, an increase of 13 percent over Sept. 30, 1989. The capital ratio of equity to total assets at Sept. 30, 1990 was 5.67 percent compared to 5.15 percent a year ago. Capital ratios significantly exceeded regulatory requirements.

Westamerica Bank is a regional community bank with 33 offices located in Marin Sonoma, San Francisco, Contra Costa, Mendocino, Nevada, Sacramento and Solano Counties.

SALT LAKE CITY (OCT. 16) BUSINESS WIRE - Merit Medical Systems Inc. (NASDAQ:MMSI;MMSIU;MMSIW) sales for the third quarter of 1990 were $1,200,999 compared with $311,538 for the third quarter of 1989.

The 285 percent increase was due to increased sales of the Merit IntelliSystem as well as increased sales for our Control Syringes.

Sales for the nine month period ending Sept. 30, 1990, were $2,731,268 compared to $968,042 for the comparable year ago period.

A quarterly profit of $56,370 was realized compared with a loss of $136,946 for the year ago period. Nine months results were a loss of $29,399 compared with a loss of $294,051 for the year ago comparable.

Gross margins for the quarter were 50 percent. We anticipate continued products is underway with two new products to be introduced by year end.

I am pleased to announce that Philip Triolo, Ph.D. has recently been appointed director of engineering and brings a wealth of knowledge and expertise in biopolymers, an important component of all our products. We have already felt his presence with the preparation of two new patent applications which have been developed along with William Padilla and Arlin Nelson, two of our inues to be the case. Our vision of building a premier company is being realized by the hard work of many quality employees and the support of our shareholders.

We are looking forward to reporting year-end results and 1991 expectations in our next report.

SAN JOSE, CALIF. (OCT. 16) BUSINESS WIRE - VLSI Technology Inc. (NASDAQ:VLSI) reported net revenues of $75.4 million for the third quarter ending Sept. 29, 1990, down 2 percent from the corresponding quarter a year ago and down 11 percent from the previous quarter.

There was a net loss for the quarter of $18.8 million, or 77 cents per share, vs. revenues of $77.1 million and net income of $3.3 million, or 14 cents per share, for the third quarter of 1989. Operating results showed a loss of $19.5 million, as compared with a profit of $4.6 million in the corresponding quarter a year ago.

Included in the current quarter operating loss was a pre-tax charge of $12.75 million in conjunction with the company's exit from the memory product business. The charge includes severance costs, inventory and fixed-asset write-downs and other costs of restructuring.

Alfred J. Stein, chairman and and chief executive officer, said: ''Three factors affected our operating results in the third quarter.

''As previously communicated on Aug. 27, we announced we were exiting the memory business because of continued losses in that business, the extremely competitive nature of the memory marketplace in general, high manufacturing start-up costs and costly ongoing research and development expenditures associated with the business.

''Next, we also stated the company was seeing a dramatic softening in market demand worldwide for our older established chip sets used in '286-based personal computers.

''In the Far East markets, a combination of customer push-outs and increased price pressures on the older chip sets eroded revenues and profit margins. Having a lesser impact but certainly a performance factor was a downturn in software sales that occurred in this quarter.

VLSI Technology Inc. produces application-specific integrated circuits, application-specific standard products, and the software used in the design of these products. The company, which is based in San Jose, has approximately 2,000 employees worldwide.

SALT LAKE CITY (OCT. 16) BUSINESS WIRE - First Security Corp. (OTC/NASDAQ:FSCO) will acquire the Ogden, Utah deposits of MountainWest Financial under an agreement signed Tuesday.

The acquisition is subject to the approval of the appropriate regulatory agencies.

Spencer F. Eccles, First Security Corp.'s chairman and chief executive officer and David C. Richard, MountainWest Financial's president and chief operating officer, made the joint announcement.

Eccles said that MountainWest's Ogden deposits will be combined with First Security Bank of Utah, which currently operates 93 offices in 52 communities statewide. MountainWest Financial currently operates three offices in the Ogden area with deposits of $33 million.

''Because approval of the sale is pending by the appropriate regulatory agencies, an exact date the transaction will be completed is not known,'' said Richard. ''It is anticipated that completion of the transaction could take place by year-end.''

''In the meantime,'' Richard said, ''our customers will continue to find business conducted as usual with no disruption of quality service at MountainWest offices. Normal business hours will be observed, and the offices will continue to operate as they have in the past.''

Eccles said: ''This will be another important acquisition for First Security. We have announced four acquisitions in Utah in less than a year to extend our coverage of certain strategic markets in the state.''

First Security Corp. is the largest financial services organization headquartered in the Intermountain West. It is the oldest continuously operating multi-state bank holding company in the United States.

First Security operates 183 full-service banking offices in Utah, Idaho, Oregon and Wyoming. Other subsidiaries include a leasing company, two insurance companies, an investment management firm and a discount brokerage.

#90289b0198 10/16/1990 ~Business Wire

BEVERLY HILLS, CALIF. (OCT. 16) BUSINESS WIRE - Great Western Financial Corp. Tuesday reported third-quarter 1990 earnings of $37 million, or 29 cents per share, compared with $68.4 million, or 52 cents per share, for the third quarter of 1989.

Third-quarter earnings were reduced by a real estate loan loss reserve totalling $85 million, compared with $28 million in the 1989 third quarter.

For the nine months, net earnings were $189 million, or $1.47 per share, compared with $177 million, or $1.37 per share, for the same period of 1989.

The company said that its level of non-performing assets remains essentially unchanged from the year-earlier quarter, despite continued deterioration in the commercial real estate markets nationwide. At Sept. 30, 1990, total non-performing assets and troubled debt restructurings had declined to 2.54 percent of assets compared with 2.92 percent a year earlier.

In addition to a regular $25 million quarterly provision for losses, Great Western reserved an additional $60 million for two hotel and office complexes located on the East Coast.

With a combined loan balance of $205 million, these are the largest properties in the company's non-performing assets category. The loans have been reclassified from troubled debt restructures to in-substance foreclosures and written down to their estimated fair market value.

Net interest income, the primary source of operating income, rose to $286 million for the third quarter of 1990, compared with $248 million in the same quarter of 1989. For the first nine months of 1990, net interest income totaled $859 million compared with $701 million for the same period a year earlier.

Total new loans in the third quarter of 1990 were $3.4 billion, a 19 percent increase over the $2.8 billion recorded in the third quarter of 1989. For the nine months, total new loans were $9.9 billion compared with $9.8 billion in the first nine months of 1989.

Great Western Financial Corp., with assets of $42 billion, is the parent company of a real estate-oriented, retail bank. One of the nation's leading residential mortgage lenders, the company operates more than 1,000 mortgage lending, retail banking and consumer finance offices nationwide.

#90289b0202 10/16/1990 ~Business Wire

MILPITAS, CA (OCT. 16) BUSINESS WIRE - Quantum Corp. (NASDAQ:QNTM) Tuesday reported record sales and earnings for the second quarter of fiscal 1991, ended Sept. 30, 1990.

Sales for the second quarter were a record $192.2 million, an increase of 69 percent over the $113.4 million reported for the second quarter of fiscal 1990 and up 18 percent from $162.7 million, for the first quarter of fiscal 1991, ended July 1, 1990.

Net income for the second quarter of fiscal 1991 quarter was $18.5 million, or 64 cents per share, up 48 percent from $12.5 million, or 45 cents per share, in the comparable quarter a year ago, and an increase of 7 percent over the $17.3 million, or 60 cents per share in the previous quarter.

Net income for the previous quarter includes 8 cents per share from the settlement of a patent infringement suit with Western Digital Corp. When the patent settlement is excluded from the first quarter results, net income for the second quarter increased 23 percent.

According to Quantum chairman and chief executive officer Stephen M. Berkley, ''Our record sales this quarter reflect continued strong demand for our products and the addition of key new OEM customers worldwide. In addition, we contineue to strengthen our relationships with existing customers as they design our newer products into their new systems.''

Gross margin for the second quarter of fiscal 1991 was 26 percent compared with 26.6 percent reported in the prior quarter and 29.6 percent in the comparable quarter a year ago.

Quantum's balance sheet remains strong with $131 million in cash and long-term investments, an increase of $9 million during the quarter. The company has no bank debt.

According to Berkley the compnay continues to invest agressively in technology to develop new products that set performance and reliability standards and are timely to market. ''This quarter we established new standards in the market for small form factor, low power drives with the announcement of two OEM families of dirves designed for use in laptop, notebook, portable, and low-end desktop systems.

Our 42 and 84 megabyte Go-Drive Series drives represent the highest capacity, highest performance, highest reliability drives yet announced in the 2-1/2-inch form factor.

Likewise, our low-power, 84 and 168 megabyte Gem Series drives set new capacity, performance, and reliability standards for the quarter-height,

3-1/2-inch form factor. We currently have additional product families in development designed for the business PC, desktop workstation, and laptop markets.''

The company also recently announced major expansion plans in the Pacific Rim. ''We are aggressively building our sales and support capabilities in the Pacific Rim in response to the large market opportunity there.

''This quarter we opened direct sales offices in Singapore and Taiwan and a logistics center in Singapore to facilitate distribution of our products throughout Asia. We also plan to serve our rapidly growig European customer base with a European manufacturing facility in 1991.''

The company's subsidiary, Plus Development Corp., contributed approximately 10 percent to Quantum's second quarter revenues, up from 9 percent in the previous quarter. Plus's sales increased 39 percent from the first fiscal 1991 quarter as a result of continued strong demand for the Plus Impulse SCSI and AT drives and the Hardcard II drives.

This quarter, Plus announced two new products in the Hardcard II line, the high performance 52 and 105 megabyte Hardcard II XL products designed for 286 and 386 microprocessor-based personal computers.

Since its founding in 1980, Quantum has emerged as a leading independent manufacturer of reliable, high-performance, mass storage systems for business, engineering, and scientific computing. The publicly held company has products designed for a broad range of computer systems including desktop workstations; personal computers; and notebook, laptop, and portable computers.

Quantum markets its drives to OEMs and distributors worldwide. Plus Development Corp. a Quantum subsidiary established in 1983, designs and markets personal computer storage enhancement products for end users through 2,500 dealers in 27 countries worldwide.

LOS ANGELES (OCT 16) BUSINESS WIRE - Zero Corp. (NYSE/PSE:ZRO) Tuesday announced net sales for the three months ended Sept. 30, 1990 were $50,284,000 compared with $49,047,000 for the prior year, an increase of 2.5 percent over the three months ended Sept. 30, 1989.

Net income and net income per share were $3,572,000, or 23 cents per share, compared with $4,251,000, or 27 cents per share (adjusted for the stock split distributed in Sept. 1989), in the prior year, respectively.

Wilford D. Godbold Jr., president and chief executive officer of Zero, stated that ''Although economists continue to debate the issue, it appears that the U.S. economy is in a recession. Our operating results are reflecting that condition.

''However, Zero's financial position continues to be very healthy with a current ratio of 4-to-1 and cash and fixed rate marketable securities of $18 million which are available for acquisitions of both product lines and niche companies. Stockholders' equity has increased to $121 million and our long-term debt is now below $3 million.

''Even though the state of the economy probably will not allow us to have a record year in net income, I am encouraged with the quality of the acquisition opportunities that we see. Each of our operations is focusing on opportunities to improve market position in the niches that it serves and is focusing on cost reduction plans and actions.

''As we noted previously, we have been in the process of evaluating all of our product lines and determined in August to sell the aircraft ground support business and in September to sell our workbench line. Both sales have been completed. In August, we announced a program to repurchase up to 400,000 shares of our common stock. Thus far, we have purchased 162,700 shares under that program.''

Zero is a leading supplier of cases, cabinets and cooling equipment supplied primarily to the electronics industry and of cargo enclosures for airborne cargo and baggage. Its consumer, industrial and commercial cases are marketed under the Zero Halliburton and Anvil names.

SAN DIEGO (OCT 16) BUSINESS WIRE - In response to inquiries, Dr. Peter Baram, chairman and chief executive officer of Xytronyx Inc. (ASE:XYX), a San Diego-based biotechnology company, Tuesday issued a statement expanding on Monday's announcement regarding the company's PerioGard Periodontal Tissue Monitor Kit application with the U.S. Food and Drug Administration.

The company reported that the FDA had issued a letter seeking additional data concerning record-keeping and requiring modifications of certain labelling for the kit. Baram said ''record-keeping'' referred to the location in the application of very specific information relative to dates of manufacture, number of units tested and specifications.

The information requested in the FDA letter has been supplied previously in the company's PMA submission and will be referenced in the company's response.

Baram also said the FDA has requested textual modifications to the kit's label and package insert. The changes are not viewed by the company as altering claims or performance that were endorsed by the FDA Dental Panel Review meeting of May 17, 1990.

Baram also confirmed that Xytronyx has been inspected by representatives of both the U.S. and California FDAs, which issued no findings of deficiency. All PMA applicants must successfully pass such facilities inspections.

As earlier announced, Colgate-Palmolive Co. has paid $2 million under an option agreement for the worldwide marketing and distribution rights for the kit.

Xytronyx Inc. is engaged in the development and commercialization of products based on biotechnological research primarily in the areas of medicine, dentistry and veterinary medicine.

#90289b0386 10/16/1990 ~Business Wire

HONOLULU (OCT. 17) BUSINESS WIRE - Bancorp Hawaii Inc., the parent company of Bank of Hawaii and its principal subsidiary, Hawaiian Trust Company Ltd. and FirstFed America Inc., reported earnings for the nine months ended Sept. 30 of $70.3 million, up 19.8 percent over last year at this time.

On a per share basis, fully diluted earnings were $4.07 for the year-to-date, compared with $3.58 for the like period last year. Third quarter earnings were $24.9 million, up 18.2 percent over the corresponding quarter last year.

Several significant events occurred during the third quarter. In early July, Bancorp successfully completed its first common stock issue in 10 years. The proceeds were used to partially fund the acquisition of FirstFed America Inc. and retire maturing medium-term debt.

Bancorp's acquisition of FirstFed was also finalized in July having received all the appropriate regulatory approvals. The acquisition resulted in Bancorp Hawaii's consolidated assets now exceeding $10 billion.

Bancorp's assets of $10.3 billion increased 36.7 percent from the corresponding period in 1989; of this increase $895.5 million is attributed to the FirstFed acquisition. If FirstFed had been included in the prior year for comparison, the total asset increase would have been 21.6 percent. At quarter-end, also including FirstFed in the prior year's comparison, net loans increased to $6.1 billion, and deposits to $8.7 billion, up 15.8 percent and 21.8 percent, respectively.

Also during the quarter, Bank of Hawaii acquired a network of 17 ATMs from GTE. The ATMs are situated in supermarkets throughout the state. This has increased the number of ATMs owned by Bank of Hawaii to more than 100. Combining the network of FirstFed ATMs, the total rises to 115 systemwide.

Bancorp Hawaii is the largest financial organization in Hawaii, with more than 100 offices throughout the state, Asia and the Pacific. Its principal subsidiaries are Bank of Hawaii, FirstFed America Inc., First National Bank of Arizona, Bancorp Finance of Hawaii and Bancorp Finance of Hawaii-Guam. Hawaiian Trust Company Ltd. and Bancorp Leasing of Hawaii are the principal subsidiaries of Bank of Hawaii.

Bank of Hawaii has offices in Hawaii, the Pacific Basin, Tokyo, Hong Kong, Singapore, Seoul, Manila, New York and Nassau.

SAN JOSE, CA (OCT. 16) BUSINESS WIRE - Pacific Western Bancshares Inc. (AMEX:PWB), the parent company of Pacific Western Bank, Tuesday reported net income of $4.5 million, or 36 cents per share, for the quarter ended Sept. 30.

This record quarterly income represents an increase of 25 percent over the third quarter of 1989 when the company earned $3.6 million, or 29 cents per share.

The return on average shareholders' equity (ROE) in the third quarter was 20.5 percent on an annualized basis vs. 19.4 percent in the like period last year. Return on average assets (ROA) was 1.44 percent compared to 1.42 percent the third quarter in 1989.

For the first three quarters of 1990, net income was up 41 percent at $12.8 million, or $1.01 per share, compared to the $9 million, or 74 cents per share earned in the first nine months of 1989. ROE, on an annualized basis, was 20.3 percent this year vs. 17.6 percent in the first three quarters of 1989 while ROA increased from 1.21 percent last year to 1.45 percent this year.

The major factor in the company's earnings improvement during the third quarter was a strong increase in net interest income, up 20 percent to $17.7 million as compared to last year's $14.8 million. This resulted from total loans growing 14.6 percent to $862 million on Sept. 30, 1990, in contrast to 1989's $752 million. However, there was a slight 2.5 percent decline in loan volume from the second quarter of this year.

Net interest margin remained stable at 6.3 percent from the preceding quarter, but declined from 6.7 percent a year ago primarily as a result of lower interest rates and the impact of recent acquisitions which added $214 million of lower yielding but highly liquid assets.

The company's record performance was aided by its control over non-interest expenses in spite of acquisitions which added over 25 percent to its total resources. Non-interest expenses grew 15.4 percent to $14.6 million for the third quarter of 1990, as compared to $12.6 million in the like period a year ago and actually declined as a percent of average assets from 4.96 percent to 4.66 percent.

Pacific Western Bancshares Inc. is a bank holding company. Through its subsidiaries, the company offers trust and asset management services. The holding company's Pacific Western Bank has 28 locations in three counties serving California's Santa Clara Valley and Monterey Bay area.

#90289b0604 10/16/1990 ~Business Wire
SUNNYVALE, CALIF. (OCT. 16) BUSINESS WIRE - Telebit Corp. (NASDAQ:TBIT) Tuesday reported operating results for the third quarter and first three quarters of fiscal 1990.

Revenue for the third quarter ended Sept. 30, 1990, was $10,033,000, an increase of 13 percent over the $8,845,000 recorded a year earlier. Net income for the third quarter was $904,000, a 101 percent increase over the $449,000 recorded in the comparable quarter one year ago.

The significant increase in net income was due primarily to interest income on approximately $20 million raised in the company's initial public offering of April 1990.

Earnings per share amounted to 13 cents, compared with 10 cents recorded for the third quarter of 1989. As a result of the initial public offering the number of shares used in computing earnings per share increased from 4,536,000 in 1989, to 7,025,000 in 1990.

For the first three quarters of fiscal 1990, revenue totaled $31,523,000, an increase of 38 percent from the $22,924,000 recorded in the same period of fiscal 1989.

Net income for the first three quarters of 1990 was $2,774,000, a 143 percent increase over the $1,143,000 recorded during the prior year period. Earnings per share for the first three quarters of 1990 equaled 48 cents, 85 percent over the 26 cents recorded a year ago.

Telebit Corp. designs, manufactures and markets advanced high speed products for dial-up networking and wide-area communications. The company's patented Packetized Ensemble Protocol (PEP) and proprietary digital signal processing technologies provide extremely reliable error-free communications across the worldwide switched telephone network.

Telebit markets its products worldwide through distributors, original equipment manufacturers, and value-added resellers.

#90289b0607 10/16/1990 ~Business Wire
KANSAS CITY, MO (OCT. 16) BUSINESS WIRE - United Telecommunications Inc. Tuesday announced earnings per share of 41 cents for the third quarter of 1990.

This reflects improvement over second-quarter earnings, which were 18 cents per share. Second-quarter earnings included non-recurring charges of $72 million, or 18 cents per share.

Consolidated net income for the third quarter of 1990 increased to $90 million from $41 million in the previous quarter. Net income was $95 million, or 45 cents per share, in the third quarter of 1989. Consolidated net income was $238 million and earnings per share were $1.10 for the first three quarters of 1990, compared with $262 million and $1.24 per share for the same period in 1989.

William T. Esrey, chairman and chief executive officer of United Telecom, said the company's long distance unit, US Sprint, reported third-quarter revenues of $1.3 billion, up more than 3 percent over the second quarter. Year-to-date revenues were $3.7 billion, up 19 percent from $3.1 billion for the same period in 1989.

US Sprint operating profit of $54 million for the three months ended Sept. 30, 1990, was up $24 million from the $30 million, excluding the non-recurring charges, recorded in the second quarter. United Telecom's local telephone operations reported revenues of $679 million in the third quarter, compared with $666 million reported for the same period a year ago. Operating income for the local telephone companies for the quarter was $169 million, compared with $168 million in the third quarter of 1989.

For the first nine months of 1990, operating income for the local communications division was $512 million, up 6 percent from $483 million for the first nine months of 1989.

United's complementary businesses reported net operating revenues for the quarter of $205 million, up 4 percent from $196 million in the third quarter of 1989. Complementary businesses reported operating income of $16 million for the quarter, compared with $11 million for the third quarter of 1989.

Consolidated net operating revenues were $2.1 billion for the third quarter, up from $1.9 billion in the third quarter of 1989. For the first nine months of 1990, consolidated net operating revenues were $6.2 billion, up from $5.5 billion for the same period in 1989.

COSTA MESA, CA (OCT. 16) BUSINESS WIRE - Emulex Corp. (OTC:EMLX), a leading supplier of system- and network-enhancement products for the computer industry

announced Monday that Robert N. Stephens has been elected president and chief executive officer.

A 20-year veteran in the computer industry, Stephens was most recently senior vice president and general manager of the Microcomputer Products Group of Western Digital Corp.

In making the announcement, Emulex Chairman Fred B. Cox said: ''In Bob Stephens, we believe we have found an outstanding executive to lead Emulex during the important years ahead. His broad industry experience in communications, networking and microcomputer products, along with his leadership ability, will be vital to Emulex.

Stephens joined Western Digital in 1986 and served in several executive positions. In January 1990 he assumed his most recent position, heading the Microcomputer Products Group, with responsibility for research and development marketing and manufacturing of Western Digital's imaging, communication and systems-logic product lines.

In the fiscal year ended June 30, 1990, this group accounted for approximately $330 million in revenues. Under Stephens' leadership, his group at Western Digital achieved leading market positions and a reputation for award-winning products in the local-area network adapter market and video microchip and board markets, and launched a successful entry into the systems-logic business.

Prior to 1986 Stephens held a variety of executive positions with IBM, was vice president of manufacturing and operations at Magnuson Computer Systems and was president and chief executive officer of California Network Systems. A native of Iowa, Stephens holds bachelor's and master's degrees in industrial psychology from San Jose State University.

At Emulex, Stephens replaces David W. Hanna, who is a member of the Emulex board of directors and who assumed the presidency on an interim basis last June. Both Cox and Hanna continue as Emulex directors, and Stephens will also be a director. Cox continues as chairman of the board, focusing on customer relations and major accounts.

Emulex designs, manufactures and markets high-performance storage and networking products for Digital Equipment, IBM personal computer, Small Computer System Interface and UNIX markets. Emulex's worldwide operations in nearly 100 countries serve end-user customers, dealers, distributors, OEMs, systems integrators and value-added resellers. Net revenues for fiscal 1990, ended July 1, were $120.5 million.

BOISE, ID (OCT. 16) BUSINESS WIRE - Amidst an environment of continued reduced housing starts, TJ International (NASDAQ: TJCO) Tuesday announced decreased sales and earnings for its third quarter.

Sales fell 13 percent to $89,930,000 compared with 1989's third quarter sales of $103,897,000. Income followed suit, declining 18 percent to $4,464,000, or 62 cents per share, from $5,419,000 and 75 cents per share during the corresponding quarter a year ago.

For the first three quarters of the year, sales decreased 2 percent to $262,485,000 compared with $267,126,000 in 1989. Net income dropped 15 percent to $11,381,000 from the $13,321,000 earned during the first nine months of 1989. Net income per share decreased 15 percent to $1.58 from the $1.85 earned during the first three quarters of 1989.

These results ended eight years of steadily increasing year-to- year quarterly sales comparisons and prompted TJ International Chief Executive Officer and President Walt Minnick to comment: ''This suggests to us that the new housing industry in North America is finally in its first continent-wide recession since 1982. It is too early to forecast the probable depth or duration of this economic readjustment.''

Minnick noted that despite the gloomy market environment, he is encouraged by the company's ability to gain market share in the residential structural business. ''We have also taken aggressive measures to control costs, which have resulted in respectable operating margins despite the increasing competition that naturally occurs when markets shrink. During this period, which is a normal and recurring event in our industry, we intend to keep a close reign on costs, as we have done successfully in prior housing recessions.''

He also said the Boise-based specialty building materials manufacturer would press forward with expenditures on productivity-enhancing capital projects and efforts to further the company's penetration of new markets.

MURFREESBORO, TN (OCT. 16) BUSINESS WIRE - First City Bancorp Inc. (NASDAQ/NMS:CITY) Tuesday announced improved financial results for its third quarter and nine months ended Sept. 30, 1990.

Net income was $91,841, or 7 cents per share, compared with net income of $26,099, or 3 cents per share, reported during the third quarter of 1989.Net interest income increased to $1,058,456 compared with $763,452 in the third quarter a year ago.

Net income for the nine months ended Sept. 30, 1990 was $254,577 or 19 cents per share, compared with $227,889, or 32 cents per share, for the same period last year. Net interest income was $3,017,577 compared with $2,468,895 in the same period a year ago.

Earnings per share amounts for the three months and nine months ended Sept. 30 1990, reflect 662,000 new shares sold by the Bank on Sept. 21, 1989.

At Sept. 30, 1990, total assets were $149.6 million, an increase of $22.4 million from $127.2 million a year ago. Stockholders' equity was $11.8 million.

For regulatory calculations, primary capital includes $1,356,936 of convertible debentures and the loan loss valuation reserve resulting in a primary capital/total asset ratio of 8.5 percent.

Deposits at Sept. 30, 1990 were $120.9 million compared with $109.5 million a year ago.

First City Bancorp's sole subsidiary, First City Bank, serves customers in Murfreesboro, Smyrna, Columbia and the Nashville suburb of Bellevue. The common stock of First City Bancorp is traded over-the-counter in the National Market System under the NASDAQ Symbol CITY.

#90289b0615 10/16/1990 ~Business Wire

IRVINE, CALIF. (OCT. 16) BUSINESS WIRE - Diceon Electronics Inc. (NASDAQ:DICN) Tuesday reported financial results for the year ended Sept. 30, 1990.

Net sales for the year increased 5.6 percent to $125,466,000, as compared with $118,771,000 for fiscal 1989. The company incurred a net loss of $10,243,000 or $1.85 per share, as compared with fiscal-1989 net loss of $2,287,000, or 39 cents per share.

Fourth-quarter net sales increased 11.2 percent to $34,346,000, vs.

$30,878,000 for the comparable period in 1989. Net loss for the quarter was $5,176,000, or $1 per share, vs. net loss of $155,000, or 3 cents per share, for the fourth quarter of 1989.

The loss for the fourth quarter and year includes a previously announced (Sept. 24, 1990) realignment of operations which has resulted in a provision for restructuring charges after tax of $4.67 million, or 90 cents per share, for the quarter, and 84 cents per share for the year.

Weak demand from a significant segment of the company's customer base, combined with continuing price erosion, poor product mix and excess capacity, continue to affect the company's performance.

While the company does not expect industry conditions to change during the next several quarters, it is hopeful that the realignment being made to its operation will enable it to operate at lower cost and be more responsive in meeting the needs of the market place.

Diceon Electronics is one of the country's leading manufacturers of both complex and high-technology multilayer circuit boards and backpanels. Customers include original equipment manufacturers of computer, telecommunications and instrumentation systems.

#90289b0617 10/16/1990 ~Business Wire

PASADENA, Calif. (OCT. 16) BUSINESS WIRE - Conversion Industries Inc. (ASE:CVD) Tuesday reported results for the three months and nine months ended Aug. 31, 1990.

The third quarter 1990 operating income was ($316,851) vs. $338,712 for 1989. Net income for the 1990 third quarter was affected by lower oil production by its 52 percent owned oil and gas subsidiary, International Colin Energy Corp. (TSE:KCN), largely due to the sale of certain interests in their oil- and gas-producing properties and the lower oil prices prior to the Iraq invasion of Kuwait.

The present higher oil prices will enhance their results for the quarter ended Nov. 30, 1990.

In 1989, the third quarter income was improved by investment income of $587,186, whereas for 1990 there was no comparative investment income.

Revenue for the nine months was $3,718,504, compared with $1,623,784 recorded during the same period one year ago. Operating income was ($174,796) vs.

$95,836, and net loss was ($185,778), or (7 cents) per share vs. income of $945,235 or 40 cents per share. The 1989 net income included a recovery of a prior reserve against notes receivable of $607,883.

Conversion Industries is an integrated independent power production company.

MOUNTAIN LAKES, NJ (OCT. 16) BUSINESS WIRE - COMPUTER HORIZONS CORP. (NASDAQ:CHRZ) Tuesday announced that the record net earnings achieved during the nine months, ended September 26, 1990 exceeded earnings for any full year in the company's history.

For the third quarter ended September 26, 1990 net income increased 194% to a record $917,000, or $.35 per share, on a 17% increase in revenues to $25,379,000. These results compare to net income of $312,000, or $.13 per share, on revenues of $21,667,000 for 1989's third quarter.

For the nine months ended September 26, 1990, net income rose 187% to $2,369,000, or $.93 per share, on a 19% increase in revenues to $73,799,000. For the prior comparable nine months, net income before accounting change was $825,000, or $.34 per share, on revenues of $62,134,000.

Commenting on the substantial gains, John J. Cassese, President, stated, ''Two primary factors contributed to the excellent third quarter and record nine months earnings. The cost controls implemented as a result of the restructuring at the end of 1989 continue to make a major contribution. And, most importantly, our investment in solution-oriented project business, a strategy we have been building on for sometime now, is generating the desired results.

''We are happy to report these record third quarter and nine months earnings, which surpass any full year in our 21 year history. We anticipate a good fourth quarter and look forward to reporting an outstanding 1990,'' Mr.

Cassese concluded.

COMPUTER HORIZONS CORP. is one of the nation's largest independent providers of custom software development, systems integration, management consulting and training and education serving a clientele of Fortune 500 companies nationwide through a network of 25 offices.

FAIRFIELD, CT (OCT. 16) BUSINESS WIRE - GE's earnings per share for the third quarter of 1990 were $1.16, up 12% from $1.04 in the third quarter of 1989, Chairman John F. Welch, Jr. reported Tuesday.

Net earnings were $1.026 billion, up $81 million, or 9%, from $945 million for the third quarter of 1989.

Consolidated revenues of $14.2 billion in 1990's third quarter were up 9% from $13.0 billion for the comparable 1989 period.

Earnings per share of $3.44 for the first nine months of 1990 were 12% more than last year's first nine months per- share earnings of $3.06. Net earnings for this year's first nine months were $3.064 billion, an increase of 11% from the $2.766 billion in the comparable period of 1989. Consolidated revenues for the first nine months of 1990 totaled $41.2 billion, up 7% from $38.4 billion in 1989's first nine months.

The comments that follow compare revenues and operating profit by industry segment for the third quarter of 1990 and 1989.

-- Aircraft Engines operating profit was up significantly from a year ago, principally on a continuation of much higher revenues. -- Power Systems operating profit increased sharply reflecting much improved revenues. -- GE Financial Services net earnings were 19% ahead of last year's quarter led by another very strong performance by GE Capital. -- Major Appliances had a much higher operating profit driven by strong productivity gains. Revenues were about the same as last year. -- Aerospace operating profit was up in the third quarter on higher revenues, reflecting timing of deliveries. -- Technical Products and Services revenues and operating profit were about the same as last year. -- Industrial operating profit was about the same as 1989 on somewhat lower 1990 revenues. -- Materials operating profit was substantially lower despite increased revenues reflecting increasing material costs which have yet to be recovered through price increases. -- Broadcasting operating profit and revenues were modestly lower than a year ago primarily because of market softness. -- All other operating profit was about the same as last year on lower revenues.

#90289b0626 10/16/1990 ~Business Wire

CAMBRIDGE, MASS. (OCT. 16) BUSINESS WIRE - Lotus Development Corp. Tuesday reported revenue grew slightly and net income declined from the year-ago period in its third quarter ended Sept. 30.

The company also announced a plan to repurchase up to 5 million shares of its outstanding common stock, or approximately 12 percent of its 43 million shares outstanding.

Net sales for the third quarter totaled $157.4 million, a 2 percent increase over sales of $153.9 million in 1989's correspondingquarter. Net income totaled $8.6 million, or 20 cents per share, a 63 percent decrease from net income of $23 million, or 54 cents per share, in the similar 1989 period.

For 1990's first nine months, Lotus' revenue rose 23 percent to $498.1 million from $406.1 million. Net income climbed 42 percent to $54.8 million, or $1.27 per share, from $38.5 million, or 92 cents per share.

''While the quarter was negatively affected by the transition to 1-2-3 Release 3.1 from 3.0, we are encouraged by initial marketplace response to the product '' said Jim Manzi, Lotus' president and chief executive officer. ''We shipped 1-2-3 Release 3.1 in the last two weeks of the quarter and, if early indications from our resellers and corporate customers are any measure, we expect the product will contribute significantly the success of the 1-2-3 product family. In addition, Release 2.2 continued to sell extremely well, and Notes exceeded its sales forecast.

''We've also been encouraged this year by the response to our newly developed products, like 1-2-3/G, Notes, 3.1, Freelance Graphics for OS/2, Lotus MarketPlace and Lotus Improv, our newest spreadsheet for NeXT computers,'' Manzi added. ''Each has been praised for innovative features that set new standards in their respective product categories. We will continue to invest in research and development efforts which result in pioneering products that offer our customers new and easier ways to solve their business problems.''

Robert Schechter, Lotus' chief financial officer and senior vice president, added: ''We continue to manage expenses carefully and are confident that we have made the right investment decisions to grow our business. Should sales of 1-2-3 Release 3.1 remain strong and nothing dramatic occurs from a macroeconomic perspective, we expect to significantly increase our profitability in the fourth quarter.''

In addition to 1-2-3 Release 3.1, Lotus in the third quarter shipped a special version of 1-2-3 Release 2.2 with character set support for Eastern Europe; Agenda 2.0, an enhanced version of the personal information manager that includes major improvements in ease of use; Lotus MarketPlace: Business, the first member of a new family of sales and marketing tools that, running on an Apple Macintosh, help businesses find new customers; Lotus Notes 1.1, a Windows 3.0 compatible version of the group communications product; server editions of Symphony 2.2, the company's high-end integrated software program, and 1-2-3/G, the graphical version of the spreadsheet for OS/2 and the Presentation Manager operating environment; and the Viewer Toolkit for Magellan 2.0, allowing third-party developers to create new viewers for personal computer programs.

The company also announced Lotus Improv, the highly acclaimed spreadsheet for the NeXT computer; and Freelance Graphics for OS/2 with Presentation Manager, which gives users a fill-in-the-blanks approach to creating presentations. Freelance Graphics for OS/2 will ship in the fourth quarter; Lotus Improv is expected to ship by the end of this year or early next year.

Stock Repurchase Plan

Lotus said it plans to repurchase up to 5 million shares of its outstanding common stock in the open market from time to time at prices that are attractive to the company.

''Our shares are undervalued,'' said Manzi. ''We consider this an excellent opportunity to invest in the common stock of our company, and to demonstrate our commitment to enhancing shareholder value.''

Schechter added: ''While this action represents a significant financial investment, we remain committed -- and will have the resources -- to continue our investments in research and development, marketing and support of products that will fuel our growth.''

Lotus has previously completed three stock repurchase programs. In September 1988, the company initiated a plan to repurchase up to 15 percent of its common stock. In February and August 1986, separate repurchase plans were announced, each for up to 10 percent of the company's outstanding shares.

Lotus Development Corp. (NASDAQ:LOTS) develops, markets and supports business software that helps users access, analyze, communicate and share information. Founded in 1982, the company's first product, Lotus 1-2-3, is the most popular personal computer software program in the world with more than 12 million users.

Lotus markets its broad range of products in more than 65 countries and offers users comprehensive support options, including 24-hour-a-day, 7-day-a-week support in the U.S. for PC versions of its 1-2-3 spreadsheet.

#90289b0629 10/16/1990 ~Business Wire

ATLANTA (OCT. 16) BUSINESS WIRE - Coca-Cola Enterprises (NYSE:CCE) reported today that net income per common share in the third quarter increased 98.7 percent to 13 cents. Net income available to common shareholders rose 80.8 percent to $15.0 million. For the first nine months of 1990, net income available to common shareholders rose to $70.1 million or 58 cents per common share, compared to $51.1 million or 39 cents for the same period in 1989.

Operating cash flow in the third quarter increased by 12.7 percent to $150.7 million. For the first nine months operating cash flow increased by 5.1 percent to $436.8 million. Operating cash flow during the first nine months reflects a total of $19.3 million of second quarter incremental reserves for potentially uncollectible trade accounts receivable and restructuring charges relating primarily to the planned standardization of the Company's information system operations. Excluding these items, operating cash flow for the first nine months was $456.1 million reflecting a 9.8 percent increase over the preceding year. Operating cash flow in the third quarter and the first nine months was affected by higher selling, adminstrative and general expenses primarily related to increased marketing costs as compared to prior year periods.

CCE's volume in physical cases rose approximately 3 percent in the third quarter of 1990 as well as through the first nine months of the year. Assuming that the acquisition of Coca-Cola Bottling Company of Arkansas and the divestiture of CCE's majority interest in Coca-Cola Bottling Company of Ohio and its ownership of Portsmouth Coca-Cola Bottling Company, Inc. had occurred at the beginning of 1989, physical case volume would have grown by approximately 4 percent for the third quarter, and approximately 3 1/2 percent for the first nine months of the year.

In the third quarter and first nine months of 1990, net pricing for case sales to retailers increased by approximately 3 percent over the prior year. Related cost of sales per unit was basically flat during the third quarter of 1990, and showed a moderate 1 percent increase during the first nine months.

Other deductions were $3.0 million for the third quarter and $9.4 for the first nine months. This compares to other income of $0.3 million for the third quarter of 1989 and $13.6 million for the first nine months of 1989.

In the third quarter of 1990, CCE repurchased approximately 3.3 million shares of common stock from public shareholders and from The Coca-Cola Company. Cumulative repurchases through the end of the third quarter under the current 25.0 million share repurchase program totalled approximately 23.5 million shares. Approximately 1.5 million shares remain under the current program, and these shares are expected to be purchased by the end of 1990.

MONTGOMERY, AL (OCT. 16) BUSINESS WIRE - Alfa Corp. (NASDAQ/NMS:ALFA) Tuesday announced results for the third quarter and nine months ended Sept. 30, 1990.

Net income for the third quarter of 1990 was $7,194,885 compared with third quarter 1989 net income of $7,115,513, an increase of 1.1 percent. The earnings per share comparison was 35 cents vs. 34 cents in the year-earlier period, up 1.6 percent.

Operating income for the third quarter, excluding net realized investment gains was $5,766,069, or 28 cents per share, compared with third quarter 1989 operating income of $6,282,041, or 30 cents per share, a decrease of 7.8 percent on a per share basis.

Net income for the first nine months of 1990 was $17,128,980, or 82 cents per share, compared with net income of $19,508,496, or 93 cents per share, in the first nine months of 1989. Operating income for the first nine months of 1990 was $14,559,465, or 70 cents per share, compared with operating income of $17,329,435, or 83 cents per share, in the year-earlier period.

Commenting on the results, Alfa Corp.'s President, Goodwin L. Myrick, said: ''We are pleased to report record net income for the quarter; however, realized investment gains were a more significant part of the quarter's earnings than is usual. Operating income is down for the quarter primarily because of the effect which the severe storm losses incurred in the past three years have had on investment income and reinsurance premiums.

''Also contributing to the quarter's earnings decline are increases in operating expenses which we believe are temporary and do not represent a trend. We remain confident about our long-term earnings prospects.''

Alfa Corp. is engaged in insurance and financial activities through its subsidiaries. The common stock of Alfa Corp. is traded in the NASDAQ National Market System under the symbol ALFA.

BIRMINGHAM, Ala. (OCT. 16) BUSINESS WIRE - HEALTHSOUTH Rehabilitation Corp. (NYSE:HRC) reported Tuesday that it generated net income of $3,271,00 on operating revenues of $63,176,000 for the quarter ended Sept. 30, 1990.

This represents a 55 percent increase as compared to the net income generated in the third quarter, 1989. Revenues were 71 percent greater than those experienced in the like period prior year.

Primary earnings per share for the quarter were 25 cents, a 25 percent increase as compared to last year. On a fully diluted basis, earnings per share for this quarter were 24 cents, a 6 cent increase as compared to the

1989 quarter.

''We are pleased to report that, on a year-to-date basis, operating revenues are 76 percent ahead of last year,'' said Richard M. Scrushy, chairman of the board, president and chief executive officer.

''In this nine month period, we generated net income of $8,755,000, 56 percent more than that generated in the same period of 1989, with primary earnings per share increasing 42 percent to 75 cents.''

HEALTHSOUTH Rehabilitation Corp. is a leading provider of comprehensive medical rehabilitation services in the United States. The company currently employees some 3,500 people and operates 50 locations in 21 states.

VAN NUYS, CA (OCT. 16) BUSINESS WIRE - Superior Industries International Inc. (NYSE:SUP) Tuesday announced the company achieved record results for the third quarter ended Sept. 30.

Superior recorded revenues of $67,872,000 compared with revenues of $53,541,000, a 27 percent increase over the like quarter a year ago. Net income for the third quarter of 1990 grew 25 percent to $3,767,000, or 44 cents per share, compared with net income of $3,021,000, or 35 cents per share for the third quarter of 1989.

The per-share amounts reflect the 10 percent stock dividends issued on June 29 1990.

A recognized leader in its field, Superior Industries International Inc. supplies cast aluminum wheels for Ford and General Motors and the overseas

market, along with other products, and also serves the national automotive aftermarket with a broad range of accessory and RV products.

#90289b0659 10/16/1990 ~Business Wire

ENCINO, CA (OCT. 16) BUSINESS WIRE - C U Bancorp (NASDAQ:CUBN), the parent company of California United Bank, N.A., Tuesday reported net income of $1.15 million or $0.25 per share for the quarter ended September 30, 1990.

For the first nine months of this year, the Company earned $4.58 million or $1.00 per share. Earnings for the comparable three and nine month periods of 1989 were $1.47 million or $0.32 per share, and $4.48 million or $0.97 per share, respectively. Per share amounts for the comparable periods of 1989 have been adjusted to reflect a 6-for-5 stock split distributed on May 15, 1990.

John J. Keating, President and Chief Executive Officer, stated that the current quarter's results were primarily due to growth in net interest and non-interest income, offset by management's decision to increase the quarter's provision for possible loan losses. He added that despite the additional provision, C U Bancorp's annualized return on average assets was 1.36% and return on average equity was 18.04% for the first nine months of 1990.

The current quarter's loan loss provision was $1.45 million, compared with $0.30 million in the same period of 1989 and $0.45 million in 1990's second quarter. At the end of the current third quarter, the Company's allowance for possible loan losses totalled $4.79 million. This amount represented 1.77% of the total loan portfolio. The loss reserve represented 79.9% of nonperforming loans and 140.8% of nonaccrual loans.

Net interest income before the provision for loan losses was $8.37 million for 1990's third quarter and $23.84 million for the latest nine months, advancing 25.6% and 22.4%, respectively, over the comparable periods in 1989. Net interest margins for the latest quarter and nine months were 8.78% and 8.56%, versus 8.74% and 8.57%, respectively, a year ago. Noninterest income before gains from security transactions was $1.05 million for 1990's third quarter and $3.07 million on a year-to-date basis, up 38.0% and 59.1%, respectively, from 1989. Advances in this area were primarily attributable to the Company's mortgage banking operations.

Total assets amounted to $463.6 million at September 30, 1990, up 6.4% over

1989's third quarter, but down 13.0% from June 30 of this year. The decrease is reflective of deposit consolidation among the Company's financial service customers. The Company said, however, that the average asset volume for the third quarter of 1990 (which is more indicative of earning capacity) was 20.1% above the level of the third quarter of 1989 and only 1.60% below the 1990 second quarter.

Shareholders' equity totaled $35.3 million or $8.30 per outstanding share. Primary capital amounted to $40.1 million, representing a leverage ratio of 8.56%, or 2.56 percentage points above the minimum regulatory requirement.

C U Bancorp and its subsidiary, California United Bank, N.A., were formerly known as Lincoln Bancorp and Lincoln National Bank, respectively. With offices in Encino and Beverly Hills, and a third branch soon to be opened in Costa Mesa, the Company offers a full range of commercial banking services primarily to middle-market businesses based in Southern California.

LAS CRUCES, N.M. (OCT. 16) BUSINESS WIRE - Energy Optics Inc. Tuesday reported a 7 percent increase in revenues and a continuing decline in operating losses for the fiscal year ended July 31, 1990.

The electro-optical development and manufacturing concern posted revenues for the year of $623,783, up from $580,947 in fiscal 1989. The loss dropped to $84,528, equal to 3 cents per average common share outstanding, from $188,517, or 7 cents per share a year ago. Most of the recent year's losses occurred in the first half, with both the third and fourth quarters showing improvement.

Average shares outstanding stood at 2,553,294 on July 31, only slightly above the year-ago figure. The current total is 2,951,612 shares. The company has a tax loss carry-forward of more than $3 million which will benefit future earnings.

Edward N. Laughlin, president, said every category of operating costs was reduced for the year except expenditures for research and development which doubled to $123,930. This added investment has brought several promising new products closer to production and marketing, he noted.

The company also has done a significant amount of product development for other companies during the past year, several of which projects may lead to

manufacture of the resulting products by Energy Optics, Laughlin said. The company also is currently quoting on substantial manufacturing contracts which could speed its transition from a development and engineering concern to a manufacturing enterprise as well, he added.

Energy Optics Inc.

PHOENIX (OCT. 16) BUSINESS WIRE - CyCare Systems Inc. (NYSE:CYS) reported net income of $1.0 million, or 18 cents per share, for the third quarter ended Sept. 30, 1990, a 33 percent increase over $773,000, or 13 cents per share, reported for the same period a year ago.

A loss of $12.4 million, or $2.23 per share, on revenue of $60.4 million was reported for the nine month period. This compares with net income of $2.4 million, or 41 cents per share, on revenue of $64.7 million reported in 1989.

The 1990 nine month results include write-offs and provisions for restructuring charges totaling $20.9 million before tax taken during the second quarter.

For the third quarter, income before tax was $1.6 million, a 23 percent increase over $1.3 million reported in 1989.

Jim Houtz, chairman and chief executive officer, stated: ''This is a good step toward a stronger level of financial performance that we believe the company is capable of achieving. Our cost structure has been reduced and system sales have improved.''

Cycare is one of the nation's leading providers of computerized information processing systems and services to the healthcare industry with over 4,800 clients, including physicians, medical group practices, faculty practice plans hospitals and managed care organizations.

Headquartered in Phoenix, the company's business, product and sales/service

centers are located in Atlanta; Chicago; Dallas; Detroit; Dubuque, Iowa; Houston; Long Island, N.Y.; Miami; Minneapolis; Portland, Ore.; San Antonio, Texas; San Diego; Wausau, Wis.; and Woodland Hills, Calif.

SAN DIEGO (OCT. 16) BUSINESS WIRE - Dr. Peter Baram, chairman and chief executive officer of Xytronyx Inc. (ASE:XYX), a San Diego-based biotechnology company, Tuesday announced it has signed a letter agreement with PACO Pharmaceutical Services Inc., Lakewood, N.J., to jointly manufacture an initial large order from Colgate-Palmolive Co. for the PerioGard Periodontal Tissue Monitor Kit.

The initial order of 53,500 kits will be released after FDA approval of the kit or approval for export.

As announced earlier, Colgate-Palmolive Co. has paid $2 million under the option agreement for the worldwide marketing and distribution rights for the kit.

Following the letter agreement between Xytronyx and PACO, the two companies will attempt to develop a more detailed manufacturing agreement covering higher volume of the kit over a longer period of time.

Xytronyx Inc. is engaged in the development and commercialization of products based on biotechnological research primarily in the areas of medicine, dentistry and veterinary medicine.

BELLINGHAM, WA (OCT. 16) BUSINESS WIRE - Horizon Bank (NASDAQ:HRZB) announced increased earnings for the second quarter and first half of the fiscal year ended Sept. 30, 1990.

Earnings for the quarter were $1.2 million, or 34 cents per share, up from $1.1 million and 31 cents per share in the corresponding period one year ago. Earnings for the six months rose to $2.3 million, or 65 cents per share, up from $2.1 million and 59 cents per share.

Total revenue for the quarter increased to $8.3 million, up from $7.5 million, including interest income of $7.7 million vs. $6.9 million. Total revenue for the six months was $16.1 million, compared to $14.5 million, including interest income of $15.2 million vs. $13.5 million.

According to V. Lawrence Evans, president, loan demand remained strong through the first half, although ''there are signs of a slowdown in the Northwest economy that resembles the current national market.'' The bank's non-performing assets were an extremely low .18 percent of total assets. Despite this low non-performing asset ratio, the bank has chosen to increase its loan loss reserves for potential loan problems.

Evans added that the bank's assets, deposits and net worth showed strong growth during the period.

Horizon Bank is a state-chartered, FDIC-insured savings bank with eight offices serving Whatcom, Skagit and Snohomish counties.

DALLAS (OCT. 16) BUSINESS WIRE - Vinland Property Trust (NASDAQ: VIPTS) Tuesday announced operating results for the third quarter and nine months ended Aug. 31, 1990.

For the three months ended Aug. 31, 1990, the trust recorded a net loss of $149,000, or 2 cents per share on revenues of $1.1 million, compared with a net loss of $1.1 million, or 19 cents per share, on revenues of $1.7 million in the third quarter of the prior year.

For the nine months ended Aug. 31, 1990, the trust recorded net income of $713,000, or 12 cents per share, on revenues of $7.7 million, compared with a net loss of $3.4 million, or 57 cents per share, on revenues of $4.8 million in the first nine months of 1989.

Rental income for the third quarter and nine months ended Aug. 31, 1990, decreased to $700,000 and $2.4 million, respectively, as compared with $1.0 million and $3.2 million for 1989's third quarter and first nine months.

''Rental income was lower this year because we lost a shopping mall through foreclosure in June 1989, sold an apartment complex in January 1990 and gave back to the senior lien holder another apartment complex in February 1990,'' said a spokesperson for the trust.

Vinland Property Trust is a combination mortgage and equity real estate

investment trust which operates primarily in Texas and Oklahoma.

PAWTUCKET, RI (OCT. 16) BUSINESS WIRE - Hasbro Inc. (ASE:HAS) Tuesday reported its results for the third quarter ended Sept. 30.

Revenues were $448,775,000, up 11.4 percent from $403,016,000 in the third quarter of 1989. Net earnings for the quarter were $33,100,000, compared to $31,303,000 last year. Earnings per share were 57 cents compared to 53 cents a year ago. The weighted average number of common shares outstanding was 57,979,000 compared to 59,556,000 a year earlier.

For the year to date, revenues totaled $1,027,218,000, compared to $992,700,000 in 1989. Net earnings for the nine months were $61,256,000, or $1.05 per share while for the same period of 1989, earnings were $68,185,000, or $1.15 per share. The weighted average number of shares outstanding was 58,500,000 for the nine months of 1990 compared to 59,252,000 the prior year.

The weighted average number of shares outstanding in both the quarter and nine months reflects a decrease attributable to the repurchase of shares by the company.

''We are pleased with both our revenues and earnings,'' said Alan G. Hassenfeld, chairman and chief executive officer. ''The international operations, particulary those in Europe, continue to report significant growth in revenues and earnings, both in their local currencies and U.S. dollars. Domestically, the favorable reception to our new promotional products, including New Kids on the Block dolls, World Wrestling Federation action figures and Go-Go My Walking Pup, have had a positive effect on our results,'' Hassenfeld continued.

#90289b0671 10/16/1990 ~Business Wire

ATLANTA (OCT. 16) BUSINESS WIRE - Dun & Bradstreet Software (D&B Software), the world's largest financial, human resource and manufacturing applications software and services vendor, announced today a strategy to expand its investment in four key business areas -- product enhancements, technology offerings, customer services and future applications.

In addition, the company announced a formula to migrate customers to these future applications at no charge.

D&B Software, a division of The Dun & Bradstreet Corp., was formed earlier this year by the merger of Management Science America Inc. and McCormack & Dodge Corp. The company serves more than 10,000 customers worldwide, including 75 percent of the Fortune 500.

D&B Software Executive Vice President Jim Henderson said the company, which has more than one third of its development resources devoted to product enhancements, will continue to work with a broad range of customers to determine priority enhancements for the future.

Henderson said D&B Software will expand its product offerings to more fully utilize technologies and strategic hardware platforms, including relational technology, workstation and midrange areas. The company will soon announce a human resource package with relational capabilities, a development tool that allows customers to build distributed or cooperative applications and three additional financial applications for DEC VAX computers.

Currently, more than one third of D&B Software's development resources are focused on this area.

D&B Software will also expand its investment in future applications by developing an architecture, or development framework, that will encompass open systems, including IBM's SAA and UNIX. The company is devoting one quarter of its development resources to its future architecture and will increase this staffing level in the coming years.

Henderson added that customers who implement relational, workstation or midrange products and who maintain a maintenance contract will receive corresponding components of future applications at no additional charge.

D&B Software will also invest in customer service by implementing new support services and products and by increasing the size of its consulting staff. The company will further investigate training technologies to enhance education and documentation for its products.

NASHVILLE (OCT. 16) BUSINESS WIRE - International Paper Tuesday announced it has launched the first comprehensive program to test the economic feasibility of recycling post-consumer paperboard milk and juice cartons on a national

basis.

Initiated on Oct. 16 in Williamson County, Tenn., the program will run through May 31, 1991.

Twenty schools will collect their used polyethylene-coated gable-top cartons for the pilot project. The cartons will be shredded and sanitized locally and then transported to a regional repulping center where the components can be separated into two streams for reuse.

Joseph Rimstidt, International Paper's vice president - liquid packaging, says the company has experience in recycling waste cartons from its own production plants. ''This effort is aimed at applying similar technology to post-consumer cartons.''

A key element of the program, according to Rimstidt, is that it eliminates the need for a local repulping facility. ''By solving that problem, we expect to demonstrate to communities and institutions across the nation that recycling milk and juice cartons makes sense in economic as well as environmental terms.''

Rimstidt points out that the widespread use of the gable-top cartons, which are also gaining popularity for packaging shampoos, detergents and other products, makes them an ideal target for recycling. ''We're looking at recovering about half-a-ton a week of post-consumer pulp from Williamson County alone,'' he says. ''On a national basis, the potential could be as high as 175,000 tons per year if we reach the recycling rate of old newspapers which is currently about 35 percent.''

One ton of pulp is equivalent to about 200,000 sheets of copier paper, 2,500 rolls of paper towels or 3,000 boxes of facial tissue.

International Paper, headquartered in Purchase, N.Y., is a worldwide producer of paper and forest products and the largest producer of liquid packaging board in the world. The company is a major producer of printing and writing papers, paperboard and packaging products, and wood products. The company also operates specialty businesses and distributes paper and wood products. International Paper has manufacturing operations in 22 countries and exports its products from the United States to more than 70 nations.

WASHINGTON, D.C. (OCT. 16) BUSINESS WIRE - An estimated 14% increase in sales and orders and a ''significant reduction in losses'' were forecast for Siemens Corp. Tuesday by Dr. Horst Langer, the company's chairman and chief executive officer.

Siemens Corp., New York, is the shareholding company in the United States for the U.S. companies of Siemens AG, the $40 billion German electronics/electrical equipment company.

Preliminary figures of Siemens Corp. for the 1989/90 fiscal year (10/1/89 - 9/30/90) indicate the company had total U.S. sales of approximately $4 billion compared with $3.6 last year, with orders totaling some $4.2 billion up from $3.8 billion in 1988/89. In addition, Langer indicated the company could show a ''significant reduction'' in the DM572.5 million losses reported last year.

In remarks delivered to a group of European journalists today, Langer underscored the company's continuing commitment to the U.S. market. The target, he stated, is that by the end of the decade, sales in the U.S. should be in the range of 20% of total Siemens' sales. In the last decade, Siemens has grown substantially in the U.S. market by 23% per annum. The company grew in the last five years by 17%, more than half of which was achieved by internal growth.

Siemens has eight operating companies with approximately 29,000 employees. Including joint ventures, the number exceeds 35,000. The company achieved more than 80% of its sales from domestic manufacturing and local content. Approximately 15% of sales have been derived from exports. The company spent more than $400 million for research and development in the last fiscal year and has 2,000 people engaged in these activities.

#90289b0690 10/16/1990 ~Business Wire

LAGUARDIA AIRPORT, NY (OCT. 16) BUSINESS WIRE - Earnings and revenues for the third quarter and first nine months ended Sept. 30 were records for FlightSafety International (NYSE:FSI).

For the third quarter, net income rose 17 percent to $18,910,000, equal to 55 cents per share from $16,131,000, or 47 cents per share, in the 1989 quarter.

Third quarter revenues increased 26 percent to $72,443,000 from $57,359,000 a year ago.

Depreciation and amortization in the third quarter rose 20 percent to

$7,951,000 from $6,640,000 in the corresponding 1989 period.

Nine months earnings increased 37 percent to a record $63,935,000 equal to $1.87 per share from $46,692,000, or $1.37 per share, in the first nine months of 1989.

Effective Jan. 1, 1990, FlightSafety adopted Statement of Financial Accounting Standards No. 96 - ''Accounting for Income Taxes.'' Accordingly, the method of computing deferred income taxes was changed to the method prescribed in SFAS No. 96.

The 1990 first nine months net income was increased by $9,011,000, or 26 cents per share, caused by the reduction in deferred taxes recorded in prior years for the differences between the book and tax return expenses and changes in tax rates.

Results for the first nine months include a first quarter pre-tax loss of $5,885,000 from the sale of marketable securities.

Revenues for the nine months ended Sept. 30 increased 24 percent to $207,676,000 from $168,148,000 in the 1989 period.

Depreciation and amortization in the first nine months rose 16 percent to $22,456,000 from $19,292,000 in the corresponding 1989 period.

All areas of this high technology aviation, marine and power training company contributed to higher earnings and revenues, according to Albert L. Ueltschi, president and chief executive officer.

Substantial sales increases were achieved in the quarter and for the nine months by the Simulation Systems division due primarily to demand for flight simulators from overseas airlines.

#90289b0692 10/16/1990 ~Business Wire

REDMOND, WA (OCT. 16) BUSINESS WIRE - Microsoft Corp. Tuesday reported revenues of $369.4 million for the first quarter of fiscal year 1991, which ended Sept. 30, 1990, a 57 percent increase over the $235.2 million for the same period of fiscal 1990.

Net income for the quarter was $87.6 million, an increase of 77 percent over the $49.6 million for the corresponding period of fiscal 1990. Earnings per share were 71 cents as compared to 43 cents a year ago.

In business activity during the quarter, IBM has reaffirmed its relationship with Microsoft by extending licensing agreements for DOS, Windows and OS/2. The development of OS/2 was streamlined by having each company focus on certain products.

IBM and Microsoft will provide a family of PC operating systems and graphical operating environments that are compatible and scalable from entry-level to high-end, advanced PCs. Microsoft will continue to develop Windows and DOS and be the primary developer for OS/2 version 3.x. IBM will have the primary role for developing OS/2 versions 1.x and 2.x, with assistance from Microsoft. All these products will be cross licensed by both companies.

In product activity during the quarter, Microsoft began shipping two products that represent a major advance in our networking business:

-- Microsoft LAN Manager version 2.0, a comprehensive networking system that provides powerful tools for administration, security, and fault tolerance. Microsoft LAN Manager is the foundation of Microsoft's networking line of products.

-- Microsoft SQL Server version 1.1, a high-performance relational database management system for local area networks. SQL Server, developed jointly with Sybase Inc., allows for the creation of sophisticated ''client-server'' applications that bring advanced new capabilities to developers of local area networking systems.

In other product news, IBM selected the Microsoft Works integrated software package to be included with every IBM PS/1 personal computer. The PS/1, designed for the growing home market, is now available nationwide.

Microsoft Corp. (NASDAQ:MSFT) develops, markets and supports a wide range of microcomputer software for business and professional use, including operating systems, languages and application programs, as well as books, hardware and CD ROM products for the microcomputer marketplace.

#90289b0695 10/16/1990 ~Business Wire

WAYNE, NJ (OCT. 16) BUSINESS WIRE - American Cyanamid Co. announced Tuesday higher sales in the third quarter of 1990, a gain from the divestment of its Shulton business and increased net earnings for the quarter vs. the same period a year ago.

Worldwide sales in the third quarter of 1990 were $1.1 billion, up 9 percent from the $965 million in the same period last year.

Net earnings, including the gain on the divestment of the Shulton business, were $94 million, or 99 cents per share, compared with $61 million, or 65 cents per share, in the same period last year.

During the third quarter, as previously announced, Cyanamid completed the sales of various product lines comprising its Shulton Group for approximately $850 million. The resulting net gain of $248 million, or $2.59 per share, has been reported in discontinued operations. Earnings from discontinued operations in the third quarter of 1989 were $10 million, or 11 cents per share.

Also during the quarter, Cyanamid provided, on a pre-tax basis, about $290 million, primarily for special costs associated with plans to curtail and consolidate certain product lines; to reduce the carrying value of certain assets to estimated realizable amounts, including investments in subsidiaries and affiliates; and for increased environmental remediation costs, primarily in the chemicals business.

Costs related to plans to reduce employee population also are included. After tax benefits, these special costs reduced earnings from continuing operations and net earnings by about $206 million, or $2.15 per share, resulting in a third quarter 1990 loss from continuing operations of $154 million, or $1.60 per share, compared to earnings from continuing operations of $51 million, or 54 cents per share, in the same period last year.

Cyanamid's Medical Group achieved higher sales in the third quarter, led by ethical pharmaceuticals, biological products, consumer health products and medical devices. Excluding the special costs, operating earnings of the Group were lower than the same period a year ago, due to heavy promotional expenses associated with the introduction of new products.

Although the major portion of the selling cycle for Cyanamid's Agricultural Group occurs in the first six months of the year, worldwide sales of the group were higher in the third quarter compared to the same period last year with crop protection chemicals and animal nutrition and health products contributing to the performance. Excluding the special costs, operating results of the group were lower than last year.

Sales of the company's Chemicals Group were about the same as last year. Operating results of the group, excluding the special costs, were lower due to the general softening of the U.S. economy, causing weakness in key markets served by the group, increased raw materials and energy costs due to the Persian Gulf crisis and operating losses from its Formica business in Latin America.

Nine months sales rose 7 percent to $3.4 billion vs. $3.2 billion a year ago. Net earnings for the first nine months of 1990 were up 17 percent to $296 million, or $3.10 per share, from $254 million, or $2.71 per share, in the same period last year.

Discontinued operations for the first nine months of 1990 were $245 million, or $2.56 per share compared to $27 million, or 29 cents per share in the same period of 1989.

Earnings from continuing operations for the first nine months of 1990 were $51 million, or 54 cents per share compared to $227 million, or $2.42 per share last year.

Earnings from continuing operations and net earnings for the first nine months of 1990 include special costs of about $206 million, or $2.15 per share.

Cyanamid is a research-based biotechnology and chemical company which develops medical, agricultural and chemical products and manufactures and markets them throughout the world.

WESTCHESTER COUNTY, NY (OCT. 16) BUSINESS WIRE - The board of directors of Peoples Westchester Savings Bank (NASDAQ:PWSB) Tuesday declared its eighth consecutive quarterly cash dividend since initiating dividend payments in November 1988.

''A cash dividend of 12 cents per common share will be paid on Nov. 16, 1990 to shareholders of record as of November 1st,'' announced Bank Chairman, President, and Chief Executive Officer, William F. Olson. ''At a time when the economy and real estate market are experiencing continued weakness, we are especially pleased that we have been able to sustain our policy of paying quarterly dividends.''

Insured by the FDIC through the Bank Insurance Fund (BIF), Peoples Westchester is a $1.7 billion New York State-chartered community bank with 27 offices serving those who live and work in Westchester County.

#90289b0701 10/16/1990 ~Business Wire

NASHVILLE, TN (OCT. 16) BUSINESS WIRE - Nineteen more companies have joined a multivendor effort to ensure interoperability of products supporting frame relay -- the new high performance data networking technology.

The following companies Tuesday announced their support for a common specification for frame relay connections to link customer premises equipment to networking equipment:

ACC -- Advanced Computer Communications
Ascend Communications Inc.
BBN Communications
CrossComm Corp.
Frame Relay Technology Inc.
Gateway Communications Inc.
Hughes Network Systems
Netrix Corp.
Newbridge Networks
Promptus Communications Inc.
RAD Network Devices Inc.
Sync Research
Telematics International Inc.
Teleos Communications Inc.
3Com Corp.
Timplex
Vitalink Communication Corp.
Wellfleet Communications Inc.
Zilog

The common specification was originally announced on Sept. 4 by cisco Systems, Digital Equipment Corp., Northern Telecom, and StrataCom. It is based on the standard frame relay interface proposed by the American National Standards Institute (ANSI) T1S1 standards committee.

The common specification supports the proposed ANSI standard and, in addition, defines extensions to that standard, including a Local Management Interface that allows the exchange of control information between the user device and the frame relay network equipment.

The specification is open to all vendors and will evolve to comply with frame relay standards as they become fixed through the efforts of ANSI.

The initial four companies invited other frame relay vendors to review the specification and to join their effort to solidify the industry around a common implementation of the frame relay standard.

They said that multivendor support for a common standard would provide assurance of product compatibility to network managers and would form a basis

for all suppliers to facilitate interoperability for their products.

The joint specification is available for review from cisco Systems, Digital Equipment Corp., Northern Telecom, and StrataCom.

OVERLAND PARK, KS (OCT. 16) BUSINESS WIRE - Puritan-Bennett reported earnings of 35 cents per share and a recovery in hospital equipment orders for the quarter ended Sept. 30, 1990, chairman and president Burton A. Dole Jr. announced Tuesday.

Third quarter orders of $61,808,000 and sales of $61,603,000 were up 10.3 percent and 5.5 percent, respectively, over the same period last year. Earnings of $3,967,000 were essentially the same as last year's third quarter, which also translated to 35 cents per share.

Year-to-date orders of $185,276,000 and sales of $186,729,000 established new records and were up 9.2 percent and 10.5 percent, respectively, over the same period last year. Year-to-date earnings of $11,893,000, or $1.04 per share, were down 4.4 percent from last year's first nine months, which translated to $1.10 per share.

''We were particularly pleased with the recovery of Bennett Group orders, which during the third quarter were up over 20 percent from the same period last year,'' Dole said. ''Unit orders for our 7200 series microprocessor ventilator were up 20 percent in the United States and 26 percent internationally compared with last year's third quarter.

''These orders exceeded third quarter shipments by 14 percent, helping to replenish backlog. Bennett Group orders also benefited from the growing momentum of our CliniVision respiratory department management information system whose year-to-date orders have more than doubled the levels during the same period last year,'' the chairman added.

''We were also pleased with the success of our efforts to reduce non-R&D SG&A spending from second quarter levels,'' the chairman continued.

''We continue to invest in our important continuous arterial blood gas monitoring project, which alone accounts for an earnings difference of 16 cents per share between this and last year to date,'' the chairman concluded.

Puritan-Bennett is a world leader in products related to respiration. These products are used in multiple health care settings and on aircraft.

#90289b0723 10/16/1990 ~Business Wire

LOS ANGELES (OCT. 16) BUSINESS WIRE - Occidental Petroleum Corp. Tuesday announced third quarter net income of $109 million (36 cents per share) on sales of $5.4 billion in 1990, compared with net income of $108 million (39 cents per share) on sales of $4.8 billion for the third quarter of 1989.

The 1990 results included an after-tax charge of $16 million associated with the previously announced settlement in the Wyoming Tight Sands litigation, partially offset by an after-tax gain of $8 million from the sale of domestic gas properties. The third quarter 1990 results also included a net extraordinary loss of $2 million (1 cent per share), which resulted from the early extinguishment of debt, partially offset by the federal income tax benefit realized from the application of a capital loss carryforward to offset capital gains.

The 1989 results included an after-tax gain of $54 million from the sale of various domestic oil and gas properties, and an after-tax charge of $22 million from the restructuring of domestic oil and gas operations. The 1989 results also included a net extraordinary gain of $42 million (15 cents per share), which primarily resulted from the federal income tax benefit realized from the application of a capital loss carryforward to offset capital gains. Oil and gas divisional earnings for the third quarter of 1990 were $78 million compared with $17 million for 1989. The 1990 operating results reflected higher worldwide crude oil prices, higher domestic natural gas liquids prices and increased international crude oil volumes, partially offset by lower domestic natural gas prices and volumes.

In addition to the litigation charge and gain on sale of gas properties, the 1990 results included a benefit of $14 million from a lower income tax allocation resulting from the reversal of tax reserves. The 1989 results benefited from the sale of Occidental's interests in the Hartzog Draw Unit and other small oil and gas properties, which was partially offset by the restructuring charge.

Chemical operations reported divisional earnings of $152 million for the third quarter of 1990, compared with $254 million for 1989. The reduced earnings resulted from lower sales prices in all major product areas, as well as higher feedstock costs in petrochemicals. Partially offsetting the lower sales prices were improved volumes in petrochemicals and polymers and plastics and the benefit of continued cost reductions. The third quarter 1990 earnings also benefited by a $12-million lower income tax allocation resulting from the reversal of tax reserves.

Natural gas transmission operations reported divisional earnings for the third quarter of 1990 of $53 million, compared with $34 million for 1989. The increased earnings for the quarter resulted from income from the new Amarillo/Gulf Coast transmission line which was placed in service during February 1990, as well as continuing benefits of lower operating costs, partially offset by lower transport volumes. The third quarter 1990 earnings also benefited by a $6-million lower income tax allocation as a result of the reversal of tax reserves.

Divisional earnings from agribusiness operations were $29 million in the third quarter of 1990, compared with $23 million in 1989. The 1990 increase reflected higher beef sales prices and higher beef and pork volumes, partially offset by higher live cattle and hog costs.

Coal operations reported an increase in divisional earnings for the third quarter of 1990 to $3 million, from a loss of $2 million in 1989, reflecting higher sales prices. The third quarter of 1989 was also impacted by unauthorized work stoppages.

As previously disclosed, the Internal Revenue Service has completed audits of Occidental and certain of its subsidiaries through 1985. As a result, certain income tax reserves are no longer deemed necessary and are being reversed in 1990, the effect of which is being reflected as a reduction of the effective tax rate applied to each quarter. Most of the benefit recorded in the 1990 third quarter earnings has been allocated to the operating divisions.

For the first nine months of 1990, Occidental's net income totaled $306 million, compared with $255 million in 1989. Sales were $15.6 billion in the first nine months of 1990, compared with $15 billion in the same period in 1989. Divisional earnings for the first nine months of 1990 were $1.0 billion compared with $1.1 billion for 1989. Earnings per share were $1.03 for the first nine months of 1990, compared with 93 cents per share for the 1989 period.

INDIANAPOLIS (OCT. 16) BUSINESS WIRE - Eli Lilly and Co. Tuesday reported record sales and earnings for the third quarter of 1990.

Sales were $1.282 billion, an increase of 29 percent over the same period last year. Third-quarter net income rose 21 percent, to a record $257 million. Earnings per share were 90 cents, an increase of 23 percent over the same period one year ago.

In discussing the company's third-quarter results, Lilly Board Chairman Richard D. Wood said, ''The record third-quarter performance resulted from sales growth in each of the company's operations. Higher unit volumes were achieved in both domestic and international markets, with exchange rate comparisons also favorably influencing international sales.''

Worldwide sales of pharmaceutical products were significantly higher than those of the third quarter of last year. Important contributors to sales growth were Axid, Ceclor, Dobutrex, Humatrope, Humulin, Prozac, and Vancocin HCl.

Each of the medical devices and diagnostics companies reported strong increases in third-quarter sales, led by Advanced Cardiovascular Systems Inc. Also, during the quarter, Devices for Vascular Intervention Inc., received U.S. Food and Drug Administration approval to market the Simpson Coronary AtheroCath. The AtheroCath is the first device of its kind that cuts, captures, and removes plaque from coronary arteries.

Sales of animal health products were slightly higher than in the third quarter of last year.

Sales and net income for the first nine months of the year reached record levels. Sales rose 24 percent, to $3.748 billion. Net income totaled $872 million, an increase of 22 percent. Year-to-date earnings per share were $2.99 up 22 percent from 1989.

#90289b0743 10/16/1990 ~Business Wire

FORT WORTH, TEXAS (OCT. 16) BUSINESS WIRE - Cash America Investments Inc. (NYSE) announced Tuesday third quarter earnings.

Daniel R. Feehan, president, reported today that third quarter earnings for 1990 were $2,254,000, an increase of $411,000 or 22 percent from the $1,843,000 reported for the same quarter last year. Net earnings per share for the quarter were $.19, an increase of $.03 or 19 percent over the $.16 per share reported for the third quarter of last year. Revenues for the quarter were $28.0 million as compared to $21.8 million for last year's third quarter, an increase of $6.2 million or 28 percent.

Net earnings for the current nine-month period were $6,015,000, an increase of $1,250,000 or 26 percent from the $4,765,000 reported for the nine months ended September 30, 1989. Earnings per share for the nine months ended September 30, 1990 were $.50 per share, an increase of 28 percent from the $.39 per share reported for the 1989 nine-month period. Revenues for the first nine months of 1990 were $81.2 million as compared to $60.9 million last year, an increase of $20.3 million or 33 percent.

Feehan explained that the company's continued improvement in earnings and revenues is due to internal growth in earning assets (loans and inventory) since year-end and expansion of new locations through acquisitions and new start-ups. Earning assets since December 31, 1989 have grown $13.0 million or 32 percent, including $2.3 million in earning assets acquired.

Feehan also reported that the company added a net 13 locations during the current quarter. This brings the net locations added since year-end to 23, with 15 acquisitions, 12 new start-ups and four locations combined with other existing locations. The company closed out the current quarter with 146 locations operating in the state of Texas, Louisiana, Tennessee, Oklahoma, Georgia and Florida. The company's stock is now traded on the New York Stock Exchange under the symbol PWN.

BALTIMORE (OCT. 16) BUSINESS WIRE - Reflecting the recent sharp decline in world stock markets, Worldwide Value Fund, Inc.'s (NYSE: VLU) net asset value (NAV) at September 30, 1990 was $14.81 per share against $21.99 per share a year earlier and was off from $19.03 per share at June 30, 1990.

VLU's total return (NAV appreciation/depreciation and dividends) for the quarter and nine months ended September 30, 1990 was a negative 20.4 pct. and 19.9 pct., respectively.

The fund's performance was affected by weakening global economic conditions, surging oil prices, and tensions arising from the warlike situation in the Middle East, which has led to one of the most punishing quarters major stock markets have endured in over two decades.

Net investment income for the value-oriented fund in the September 1990 quarter was $256,000, or $.09 per share, against $84,000, or $.03 per share, a year earlier, and year-to-date was $412,000, or $.14 per share, compared with $285,000, or $.09 per share, for the 1989 initial nine-month period.

As of September 30, 26 percent of VLU's portfolio was represented by investments in the United States, 14 percent was invested in Italy, 11 percent in Spain, and 10 percent in the United Kingdom.

The remainder was invested primarily in other European countries. Charles J. Swindells, VLU Chairman stated, ''We continue to believe that in these uncertain times diversification is a viable and important investment strategy and that VLU represents good diversification, since the fund can invest in many markets, currencies and companies.

'' Furthermore, since VLU invests in securities we consider undervalued, we remain convinced that over an extended period of time, VLU's stock price will eventually reflect more closely its true underlying value.''

Worldwide Value Fund, Inc. was formed in 1986. It is managed by Lombard Odier International Portfolio Management, Ltd. of London, and Legg Mason Fund Adviser, Inc. of Baltimore.

SAN ANTONIO (OCT. 16) BUSINESS WIRE - The board of directors of Valero Natural Gas Co., the general partner of Valero Natural Gas Partners L.P. (NYSE:VLP), has declared a quarterly cash distribution of $.625 per unit to holders of the partnership's publicly traded preference units.

A like amount was declared for the partnership's common units held by subsidiaries of Valero Energy Corp., which have an approximate 49 percent interest in the partnership. The distribution is payable Nov. 29 to holders of record at the close of business Nov. 8.

Valero Natural Gas Partners L.P. owns a 7,100-mile intrastate network of natural gas transmission and gathering lines throughout Texas, purchases and sells natural gas to distribution companies, electric utilities, other pipelines and industrial customers throughout the United States, and provides gas transportation services to third parties.

The partnership also owns 10 gas processing facilities and markets natural gas liquids to refineries, petrochemical plants and domestic fuel distributors.

FORT WORTH, TX (OCT. 16) BUSINESS WIRE - The board of directors of Sunbelt Nursery Group Inc. (ASE: SBN) Tuesday announced that, upon the unanimous recommendation of the special committee of the board, consisting of two independent directors, the board has determined to express no opinion as to whether the company's stockholders should accept or reject the previously announced offer by a subsidiary of Pier 1 Imports Inc. to acquire through a cash tender offer at a price of $12 per share all of the outstanding common stock of the company not owned by such subsidiary.

In reaching this determination, the board considered a number of factors, including the recommendation of the special committee and the opinion of the financial advisor to the special committee that the value of the common stock held by stockholders other than Pier 1 and its subsidiary is between approximately $11 and $15 per share.

A more detailed description of such matters is contained in the company's Schedule 14D-9 Solicitation/Recommendation Statement filed Tuesday with the Securities and Exchange Commission.

Sunbelt Nursery Group Inc. is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States, with 96 stores that feature nursery stock and lawn and garden supplies. The company's common stock is traded on the American Stock Exchange under the symbol ''SBN.''

TAMPA, FL (OCT. 16) BUSINESS WIRE - Eastern Environmental Services Inc. (NASDAQ:EESI) Tuesday announced it has signed a definitive purchase agreement to acquire a South Carolina landfill permitted for construction and demolition debris, tires, plastics, asbestos, fiberglass and other special wastes.

Permitted capacity for the site exceeds four million cubic yards and could

easily be expanded to 10 million cubic yards. Acquisition could occur within 30 days subject to company due diligence items and regulatory approval.

EESI is currently negotiating the acquisition of existing landfills in New York, Michigan, North Carolina and Georgia as part of its strategy to continue expansion of its landfill, waste collection and waste hauling operations. The company owns several landfills and waste hauling operations serving a 12 state area.

INDIANAPOLIS (OCT. 16) BUSINESS WIRE - Hybritech Inc. announced Tuesday that its third-quarter sales were $29.4 million, and gross profits were $18.2 million.

Sales and gross profits declined, compared with the third quarter of 1989 when Hybritech had a $12 million nonrecurring item. Without this nonrecurring item last year, third-quarter 1990 sales would have increased 31 percent.

Unit volume increases resulted in higher product sales in both domestic and international markets when compared with the same period last year. The increase continues to be led by the growth in sales of cancer diagnostic products.

Sales for the first nine months reached $89.6 million, a gain of 12 percent. Gross profits increased 5 percent during the same period, to $55.2 million.

Hybritech is a subsidiary of Eli Lilly and Company.

HOUSTON (OCT. 16) BUSINESS WIRE - Swift Energy Co. (ASE, PSE:SFY), announced

Tuesday that it has entered into agreements to purchase oil and gas properties located in Oklahoma, Louisiana and Texas for an aggregate purchase price of $28.6 million.

These purchases were made in conjunction with the company's continuing business of offering units in income and pension limited partnerships.

During the third quarter ended Sept. 30, partnership subscriptions totalled $10.6 million and compared favorably to $7.7 million in the second quarter of 1990 and to $10.1 million in the third quarter of 1989.

Total subscriptions to partnerships and joint ventures through the nine months ended Sept. 30 totalled approximately $43.5 million.

As managing general partner of limited partnerships, Swift Energy receives from 5.5 percent to 13.5 percent of the net revenues from any properties acquired. Financial statement purposes, Swift recognizes its pro rata interest in the properties when they are purchased by the limited partnerships.

The properties to be acquired include interests in 361 gross (42.4 net) oil and gas wells located in Acadia and Jackson Parishes, Louisiana; Canadian, Custer and Roger Mills Counties, Oklahoma; and 11 counties in Texas. Swift and its independent consultants estimate that the purchased interest in these properties have proved net working interest reserves of approximately 39.5 billion cubic feet of natural gas and 766,000 barrels of oil as of Oct. 1.

Due to the level of recent property acquisitions, substantially all of the partnership funds raised in the third quarter of 1990 will be invested immediately in producing properties, and will enable immediate purchase of property interest at the end of the fourth quarter upon formation of partnerships currently being offered under the company's public income and pension fund offerings.

Swift Energy Co. is an independent oil and gas company primarily engaged in the acquisition, exploration, development and operation of oil and gas properties through partnerships and joint ventures.

The company also offers directly geological consultation and prospect generation services.

CAMBRIDGE, MASS. (OCT. 16) BUSINESS WIRE - Lotus Development Corp.'s new advanced graphical spreadsheet, 1-2-3 Release 3.1, is gaining strong acceptance as businesses including Amoco, American Cyanamid, and Fireman's Fund Mortgage upgrade users and add the new application to their standards lists.

Distributors and resellers are reporting brisk sales of 1-2-3 Release 3.1 and positive customer reaction to Lotus' new in-store Instant Upgrade program, which began with the shipment of 1-2-3 Release 3.1 in September.

''The early momentum we're seeing for Release 3.1 results from several factors '' said Frank King, senior vice president of Lotus' Software Business Group. ''It's a graphical spreadsheet that millions of people already know how to use and can run on today's PCs. It delivers the analytical capabilities our customers require to run their businesses and allows them to choose the operating system that best meets their needs -- DOS or DOS with Windows 3.0.''

The controllers department at Amoco Corporation has the largest number of spreadsheet users within the company. According to John Flynn, manager of Accounting Systems for Amoco, ''We've been working with Release 3.1 since July as a Lotus beta site and the department is now upgrading to the product. The product's ability to easily produce finished copy for senior management and the excellent analytical capabilities already in Release 3.0 means it's time for us to move from Release 2.2 to Release 3.1. Our users are excited about Release 3.1's easy-to-use spreadsheet publishing capabilities and new graphical interface.''

American Cyanamid, a New Jersey-based Fortune 500 company, has begun the process of installing 1-2-3 Release 3.1 within their corporate divisions. The product will be used for a variety of critical tasks, ranging from departmental and divisional budgeting to report generation and presentations to senior management. According to Elaine Zolty, an information center analyst at American Cyanamid, ''We chose 1-2-3 Release 3.1 because it builds upon the 3D organization and consolidation benefits of Release 3.0, offering the analytical tools we require combined with great spreadsheet publishing.''

Fireman's Fund Mortgage is upgrading many of its 1-2-3 users to Release 3.1. According to Joyce LeMaster, a training and support consultant for Fireman's Fund Mortgage, ''We are extremely impressed with Release 3.1's spreadsheet publishing capabilities and presentation-quality output. Our users are very excited about the product's ease of use, WYSIWYG display and print preview capabilities, as well as its compatibility with prior versions of 1-2-3.''

Distributors and resellers are reporting strong demand and initial sales of 1-2-3 Release 3.1. For example, Soft Warehouse, a major reseller of computer hardware and software applications, sold out of its stock of Release 3.1 in less than three days.

''Early indications are that Release 3.1 is selling extremely well -- surpassing our initial expectations for the product,'' said Bruce Fredrickson, vice president of marketing for Ingram Micro D. ''Our resellers are responding to strong end-user demand and are already re-ordering additional units.''

Software Spectrum, a Dallas-based corporate reseller, is seeing a high level of customer enthusiasm for 1-2-3 Release 3.1. According to Richard Sims, founder and president of Software Spectrum, ''1-2-3 Release 3.1 delivers the features my customers are looking for -- spreadsheet publishing, mouse support and compatibility with Windows 3.0.''

With Lotus' Instant Upgrade program at participating resellers including Businessland, Computerland, Egghead Discount Software, and Soft Warehouse, Lotus customers may upgrade to 1-2-3 Release 3.1 and 2.2 by simply turning in the original title page of their 1-2-3 reference manual. This instant access to Release 3.1 is available at more than 600 computer specialty stores nationwide.

In addition to advertising and direct mail, resellers are offering nationwide introductory product seminars, promotional programs such as mouse giveaways and demonstration copies of 1-2-3 Release 3.1.

1-2-3 Release 3.1 is a major update to the best-selling 1-2-3 that provides an easy-to-use, WYSIWYG graphical work environment combined with powerful analytic tools and advanced spreadsheet publishing. In addition to providing a true 3D work environment for easier spreadsheet organization and consolidation, Release 3.1 is the only spreadsheet that allows users to automatically compress print to fit on a single page, use a built-in mini word processor, automatically wrap text around a graph, and place more than 96 type styles in a single worksheet.

Lotus Development Corp. (NASDAQ:LOTS) develops, markets and supports business software that helps users access, analyze, communicate, and share information. Founded in 1982, the company's first product, Lotus 1-2-3, is the most popular personal computer software program in the world with more than 12 million users. Lotus markets its broad range of products in more than 65 countries and offers users comprehensive support options, including 24-hour-a-day, 7-day-a-week support in the U.S. for PC versions of its 1-2-3 spreadsheet.

CINCINNATI (OCT. 16) BUSINESS WIRE - CBIS and BancTec Systems Inc., have entered into a co-marketing and technology sharing agreement to market an imaging solution which interfaces check images captured by BancTec's ImageFIRST 5500 system to CBIS's ImageBanc image statement application.

ImageFIRST 5500 is a second-generation high-speed image system designed for multi-application document processing. With the system, users are able to improve funds availability, achieve significant cost savings, reduce paper handling, and increase quality and productivity in remittance, sales draft, and check processing environments.

ImageBanc is the banking industry's first installed and proven IBM host-based image item processing application system. ImageBanc provides banking customers with easy-to-read, ''checkless'' image account statements. By offering an image statement, bankers can attract new customers, increase fee income, reduce postage and check-handling costs and enhance customer loyalty.

The solution is not limited to check processing. In the future, it can be adapted to other document processing environments, such as credit card processing, loan document management, trust document management, lock box services and cash management services.

BancTec Systems Inc., a subsidiary of Dallas-based BancTec Inc., provides products that employ state-of-the-art document processing, optical character recognition, magnetic ink character recognition, and image processing technologies to read, digitize, encode, sort and process financial documents.

CBIS, a subsidiary of Cincinnati Bell Inc., provides information management solutions to financial, telecommunications and government entities. Its Composed Applications group specializes in image and document management applications and is an industry leader in providing mainframe, open-ended image processing solutions.

#90289b0770 10/16/1990 ~Business Wire

LINCOLN, NE (OCT. 16) BUSINESS WIRE - Terrano Corp. (NASDAQ:TRNO) announced Tuesday that Humana Inc. (NYSE:HUM) purchased a fully paid-up license for the ILS-5 Laboratory Information System and twelve additional Terrano enhancement modules including Laboratory Management, Preventive Maintenance, Automated Results Reporting, Remote Results Reporting, Advanced Microbiology, Advanced Calculations, Advanced Formatter, Query Language/Report Writer, Blood Bank Inventory, Transfusion Service Manager, Anatomic Surgical Information Retrieval

System and Terrano's Generic Instrument Interface.

The agreement provides for three years of Software Support Services plus options for paid-up licenses on Terrano's Distributed Laboratory System Interface, Personal Computer Interface and Remote User Network. It also provides for hardware to be purchased from Terrano.

The total value of this agreement, including software and hardware, will exceed several million dollars over the next three years.

Humana, based in Louisville, Ky., owns and/or operates more than 80 acute care hospitals throughout the United States. According to the Sept. 24, 1990 issue of ''Healthweek,'' Humana Inc. is the third largest investor owned hospital management company in the country with 17,584 beds under management. Terrano initially contracted with Humana in 1983 for the delivery of individual hospital laboratory information systems.

Fifteen ILS-5 Systems, including a variety of Terrano enhancement modules, have been installed in Humana hospitals to date plus a comprehensive system installed at Humana's corporate headquarters. In December 1989, Humana's Laboratory User Committee recommended that Humana reanalyze the LIS marketplace because it has been six years since they had done so.

Humana subsequently sent Requests For Proposals (RFP's) to 21 laboratory information system vendors. Terrano was selected as Humana's exclusive vendor of laboratory information systems after this extensive review of the LIS industry.

The agreement will allow Humana to install ILS-5 systems in any or all of its remaining hospitals on either the Prime Computer Inc. 50-Series or IBM AS/400 Series hardware platforms. The existing 16 Humana ILS-5 sites utilize the Prime 50-Series platform.

''This agreement is a major achievement and a strong vote of confidence for our company,'' said James Terrano, president and chief executive officer of Terrano Corp. ''Humana is truly a leader in the healthcare provider industry and knows the value of innovative systems backed by viable companies,'' he added.

Arthur C. Brown, director of Data Systems Procurement for Humana Inc., said, ''We picked the ILS-5 as our LIS in 1983 because of its efficient and comprehensive handling of laboratory data and its price performance compared to other vendors' systems.

''When we looked at the marketplace again this year, we found that Terrano still had the system best suited to Humana's needs.''

#90289b0783 10/16/1990 ~Business Wire
STAMFORD, CT (OCT. 16) BUSINESS WIRE - Champion International Corporation Tuesday reported fully diluted third quarter earnings per share of 59 cents, down from $1.06 a year ago and 60 cents last quarter, which included a net eight cent-per-share gain for non-recurring items.

Third quarter net income of $62 million was down from $102 million a year ago and $63 million in the second quarter.

The company said its paper business showed steady overall improvement during the quarter but that markets for its building products were poor both in the U.S. and in Canada.

For the first nine months, fully diluted per share earnings were $1.86 and net income was $196 million. In 1989, nine-month earnings per share were $3.38 and net income was $329 million.

Third quarter income from operations in the company's paper segment of $163 million was off from $168 million in last year's third quarter but up substantially from the second quarter figure of $75 million, which included $43 million of non-recurring expense in connection with several modernization projects.

#90289b0789 10/16/1990 ~Business Wire
WESTBURY, NY (OCT. 16) BUSINESS WIRE - E-Z-EM Inc. (NASDAQ:EZEM) Tuesday announced net sales of $18,013,000 and a net loss of $78,000, or 1 cent net loss per common share, for the first fiscal quarter ended Sept. 1.

In the prior year's first quarter, the company reported net sales of $21,171,000 and net earnings of $1,101,000, or 26 cents per share.

Net sales for the current quarter decreased $3,158,000, or 15 cents, as compared to the prior year. The decline in sales is due primarily to the reclassification of Lafayette product sales of $1,648,000 to other income (expense) in connection with the planned disposition of this business, as well as a decline in Nucleotome sales of $830,000 and custom contract pharmaceutical sales of $403,000.

The current quarter's results include a provision, before tax, of $1.5 million

($945,000 after tax or 12 cents per share), relating to the recall of products containing inflatable latex cuffs. This before tax reserve is included in cost of goods sold and represents an estimate of the costs associated with the implementation of the product recall announced on Oct. 5.

''In recent months a number of articles have been published concerning a noted increase in allergic reactions to latex products,'' said Daniel R. Martin, president and chief operating officer of E-Z-EM. ''This, in part, prompted us to issue a Medical Alert letter in May of this year reminding the medical community of the possibility of such reactions when using products that utilize natural latex components, such as retention enema tips.

''Evidence accumulating since May suggests that water-soluble proteins found in natural latex may trigger severe allergic reactions. Therefore, in voluntary cooperation with the United States Food and Drug Administration (''FDA''), the company recalled all of its latex-containing products.''

''Further, the company has filed necessary paperwork, known as a 510k, with the FDA to provide an alternative retention tip to the marketplace utilizing non latex material. We expect to receive approval from the FDA by fiscal year end. In the interim, we are supplying non retention enema tips to the medical community.''

Research and development expenses increased 61 percent in the current quarter to $1,629,000 from $1,014,000 due to projects in the field of interventional radiology of $374,000 and in the surgical division of $192,000. During the quarter clinical testing continued in the use of carbon dioxide as a contrast agent in peripheral vascular studies and the use of an accelerated fibrinolysis device for quick dissolution of peripheral blood clots.

One R&D project was commercialized: the first sale of Percupump 1A, a new model injector used in Computed Tomography (CT) procedures, occurred late in the quarter. Research and development expenditures are expected to continue at or exceed current levels and significant revenues resulting from commercialization are not anticipated during this fiscal year.

The company's product recall reserve coupled with increased diagnostic products operating expenses and reduced contribution from Surgical Dynamics Inc., a 51 percent owned subsidiary, accounted for approximately 80 percent of the decline in net earnings in the quarter.

At first quarter end, approximately 57 percent of the company's assets consist of inventories, accounts receivable, other marketable investments and certificates of deposit and cash.

The current ratio is 4.20 to 1, with net working capital of $30,883,000.

E-Z-EM is a leading manufacturer and distributor of diagnostic imaging and

other health care products.

#90289b0794 10/16/1990 ~Business Wire

NEW ORLEANS (OCT. 16) BUSINESS WIRE - Hibernia Corp. (NYSE: HIB) Tuesday announced 1990 third quarter net income of $5.0 million, or $.18 per share.

Net income for the third quarter of 1989 was $17.2 million, or $.64 on a per share basis.

Hibernia also today declared a cash dividend of $.15 per share compared to $.25 per share in the previous quarter.

''The banking industry and Hibernia are heavily concentrating efforts on strengthening the balance sheet and collecting problem loans,'' said Martin C. Miler, chairman of Hibernia Corp. ''This priority is designed to position us for improved forward earning capabilities, and Hibernia management is focused and committed to accomplishing this objective as swiftly as conditions permit.''

''Toward that end, we have reduced earnings by building our reserve for possible loan losses and lowered the cash dividend to strengthen our capital base going forward,'' Miler said.

Hibernia's loan loss reserve at quarter-end totalled $118.5 million, which was 2.26 percent of total loans and 96.8 percent of non-performing loans. Total non-performing assets amounted to $156.1 million, including the $122.4 million in non-performing loans.

The dividend is payable November 16 to shareholders of record on November 2. Shares outstanding at the end of the third quarter totalled 27.6 million.

For the first nine months of 1990, Hibernia reported a net loss of $2.8 million, or $.10 per share. Earnings for the same period last year were $47.7 million, or $1.79 per share.

Total assets of the corporation were $7.4 billion at September 30, 1990, compared to assets of $6.3 billion at the end of the third quarter last year. This reflects the combined results of Hibernia Corp.'s Louisiana and Texas bank subsidiaries.

#90289b0797 10/16/1990 ~Business Wire

ALBANY, NY (OCT. 16) BUSINESS WIRE - Home & City Savings Bank (NASDAQ:HCSB) Tuesday reported net income of $1.7 million, or 57 cents per share, for the third quarter ended Sept. 30.

This compares with net income of $1.3 million, or 45 cents per share, in the year-ago quarter.

Year-to-date net income was $4.8 million, or $1.67 per share, which compares with net income of $5.1 million, or $1.77 per share, for the same period in the prior year.

John J. Brunner, chairman, president and chief executive officer, said, ''Despite adverse economic conditions, we have been able to increase reserves and maintain earnings. In addition, we have increased the dividend which provides a stronger yield on our shareholders' investment.''

Home & City's total assets at Sept. 30, were $859.9 million and deposits totaled $745.2 million. Stockholders' equity grew to $96.3 million, resulting in a book value per share of $33.47.

The bank's equity-to-asset ratio was 11.20 percent at Sept. 30, which greatly exceeds current and anticipated regulatory requirements.

The provision for loan losses was $975,000 for the third quarter of 1990, compared with $900,000 for the third quarter of 1989. Net interest income before provision for loan losses was $7.4 million for the quarter, compared with $7.0 million for the year-ago quarter.

The increase in net interest income is largely due to an interest rate spread of 2.95 percent for the third quarter of 1990 as compared to 2.73 percent for the same period in 1989. Non-interest income was $943,000 for the third quarter of 1990, compared with $778,000 for the same period in 1989.

Increases in various fee related income accounted for a majority of the additional non-interest income. Non-interest expense was $4.3 million for the third quarter, compared with $4.4 million for the third quarter of 1989.

The provision for loan losses was $2.2 million for the first nine months of 1990, compared with $1.5 million for the first nine months of 1989. Net interest income before provision for loan losses remained unchanged at $22.1 million for the first nine months of 1990 and 1989.

Non-interest income was $2.8 million for the nine month period ended Sept. 30 compared with $2.5 million for same period a year ago. The increase is

attributable to stronger origination and commitment fees and improvements in other fee income sources. Non-interest expense for the first nine months of 1990 was $13.9 million, compared with $14.4 million for the same period one year ago.

The decrease was due mainly to net gains on real estate owned of $288,000 during 1990, compared with net losses on real estate owned of $232,000 during 1989. In addition, expenses associated with the terminated merger transaction of $586,000 were offset by reductions in general operating expenses.

At Sept. 30, the allowance for loan losses totaled $4.2 million. During the third quarter $975,000 was added to the allowance. The allowance was charged with $581,000 during the quarter, net of recoveries, to recognize losses in the loan portfolio.

Home & City Savings Bank is the largest New York State chartered savings bank headquartered in Albany, providing retail and commercial financial services in upstate New York. Home & City has 2,877,500 shares of common stock outstanding and is listed on the NASDAQ National Market System under the ticker symbol ''HCSB.''

#90289b0800 10/16/1990 ~Business Wire

BIRMINGHAM, ALA. (OCT. 16) BUSINESS WIRE - Central Bancshares of the South Inc. (NASDAQ/NMS:CBSS) Tuesday reported record third quarter earnings and record earnings for the nine months ended Sept. 30, 1990.

Net income per share was 59 cents for the third quarter of 1990 compared to 45 cents for the like period in 1989, a 31 percent increase. Third quarter net income was up 27 percent to $12.3 million in 1990 compared to $9.7 million in 1989.

Net income per share was $1.70 for the nine months ended Sept. 30, 1990, compared to $1.44 for the like period in 1989, an 18 percent increase. Net income rose from $31.1 million in 1989 to $35.7 million in 1990, a 15 percent increase.

Harry B. Brock Jr., chairman and chief executive officer, said, ''At a time of so much negative news about the banking industry, we are especially pleased that Central Bancshares continues to be profitable and strong.'' Brock said that continued growth in earning assets and improved margins over 1989 levels were the major contributors to the record earnings results.

Total assets increased 8 percent to $4.9 billion at Sept. 30, 1990, from $4.5 billion at Sept. 30, 1989.

The increase resulted primarily from a 9 percent increase in loans outstanding to over $3 billion at Sept. 30, 1990, from $2.8 billion a year earlier.

Contributing to the asset growth was a 10 percent increase in the investment portfolio, from $1.2 billion to $1.3 billion. Deposits funded the majority of the increase by growing 11 percent to $3.3 billion from $3.0 billion with shareholders' equity increasing 6 percent to $322.5 million at Sept. 30, 1990.

Annualized return on equity for the first nine months of 1990 was 15.23 percent and return on assets was 1.03 percent.

Shares of Central Bancshares of the South Inc.'s common stock are traded in the NASDAQ national market system under the symbol CBSS.

#90289b0807 10/16/1990 ~Business Wire

HOUSTON (OCT. 16) BUSINESS WIRE - Seitel Inc. (ASE:SEI) Tuesday announced that it expects to report third quarter 1990 revenues of approximately $5.4 million, an increase of approximately 56 percent over third quarter 1989 revenues.

Revenues for the first nine months of 1990 are estimated at approximately $16.2 million, an increase of approximately 40 percent over revenues during the same period in 1989.

Earnings per share are estimated to increase approximately 57 percent to approximately 22 cents for the third quarter of 1990 compared to 14 cents for the 1989 quarter. Earnings per share are estimated to increase approximately 52 percent to approximately 70 cents for the nine months ended Sept. 30, 1990, compared to 46 cents for the 1989 period.

In making the announcement, Paul A. Frame, Seitel's president, said, ''Seitel's performance in the third quarter and nine months is a result of continued demand for both our existing data base and interest in new data creation projects. The interest has been developed as part of Seitel's strategic plan that was initiated in 1987 and focuses our activities in the Texas-Louisiana Gulf Coast regions.

''Although the Persian Gulf crisis has focused the world's attention on increasing oil prices and potential benefits to those companies associated with the oil industry, our revenues and earnings during 1990 to date are directly attributable to our strategic plan.''

Seitel Inc. is engaged in the development of a proprietary seismic data bank and arranging the creation and marketing of seismic data. The analysis of seismic data for the identification and definition of underground geological structures is a principal technique used in oil and gas exploration to determine the existence and location of subsurface hydrocarbons.

SUFFERN, NY (OCT. 16) BUSINESS WIRE - Rapitech Systems, Incorporated announced Tuesday its results of operations for the fiscal year ended July 31, l990.

Revenues for the fiscal year ended July 31, l990 increased $788,438 to $1,487,097 from $698,659 for the prior fiscal year. The Company generated a net profit of $27,099 (.01 per share) for the 1990 fiscal year, as compared to a net loss of $1,457,392 ($.42 per share) for the prior fiscal year.

Jeffrey M. Tolk, President of Rapitech, stated that ''The results of operations for the fiscal year ended July 31, l990 demonstrate the acceptance in the marketplace of the value of Rapitech's technology. Although a significant portion of the revenues generated were a consequence of the Company's software licensing agreement with Amdahl Corporation, the Company continues to embark on new enterprises.''

Rapitech Systems, Incorporated is the leading developer of a series of language translation and migration tools, Conversionware, which translates proprietary dialects of Fortran, Cobol, VMS-Fortran and other languages into industry standard 'C' language and 1977 ANSI Fortran language. In addition, the Company offers a full range of consulting services which include custom and turnkey translations on a total project management basis.

Conversionware is a registered trademark of Rapitech Systems, Incorporated.

#90289b0825 10/16/1990 ~Business Wire

NEW YORK (OCT. 16) BUSINESS WIRE - The Leslie Fay Companies Inc. announced Tuesday that it had achieved record sales and earnings for the 13 and 39 weeks ended Sept. 29, 1990.

Net sales were $268,655,000 for the 13 weeks ended Sept. 29, 1990 and $256,169,000 for the 13 weeks ended Sept. 30, 1989. Net income for the 1990 period was $15,427,000, or 81 cents per share, compared to net income of

$13,487,000, or 71 cents per share for the 1989 period.

For the 39 weeks ended Sept. 29, 1990 net sales were $657,835,000 and net income was $26,176,000, or $1.37 per share, compared to net sales of $614,518,000 and net income of $23,366,000 or $1.22 per share, for the 39 weeks ended Sept. 30, 1989. The 1990 results reflect the acquisition of the Evelyn Pearson business in May 1990 and the Spitalnick & Co. operations in June 1990 as well as the opening of new divisions.

John J. Pomerantz, chairman and chief executive officer of Leslie Fay stated, ''We are pleased, particularly in this extremely unsettled retail climate, to have been able to continue our strong performance for the third quarter surpassing last year's record breaking third quarter.

''This represented an increase of approximately 14 percent in net income with a 5 percent increase in net sales. In our first three quarters of 1990, our per share net income has exceeded the $1.35 earned during all of 1989. Our sales at regular price of dresses, suits and sportswear have increased and are the primary reason for the improvement in profits for the 13 week period.''

Pomerantz also said, ''The wide acceptance of our products and our strong financial condition should enable us to surmount the challenges and uncertainties which lie ahead. At September 29, 1990, our working capital had increased to $194,365,000 from $150,768,000 at September 30, 1989 and our stockholders' equity amounted to $186,293,000 compared to $156,948,000 at the earlier date.''

Leslie Fay is a leading manufacturer of women's dresses, suits, blouses, sportswear and activewear. It's common stock is listed on the New York Stock Exchange under the symbol LES.

#90289b0829 10/16/1990 ~Business Wire

HORSHAM, PA (OCT. 16) BUSINESS WIRE - The Frankford Corporation, parent company of Frankford Trust Co., reported earnings for the quarter and nine months ended Sept. 30.

Net income for the quarter ended Sept. 30, 1990, was $1,171,000, or 40 cents per share, compared with $1,676,000, or 58 cents per share, earned during the third quarter last year. Net income for the nine months ended Sept. 30, 1990, amounted to $2,407,000, or 83 cents per share, compared with $4,544,000, or $1.57 per share, earned in 1989.

Leon H. Layton, president and chief executive officer of the corporation, commented that ''1990 earnings reflect an increased provision for loan losses which recognizes the continued weakening in the local real estate market and in the economy in general.''

During the third quarter, the corporation set aside $800,000 as a provision for loan losses. This provision compares with a third-quarter 1989 provision of $425,000, and brings the provision for the year to date to $3,950,000, compared with $1,075,000 during the same period last year.

Net loan charge-offs for the third quarter amounted to $739,000, compared with $299,000 in 1989. For the nine months ended Sept. 30, 1990, net charge-offs totaled $3,117,000, compared with $824,000 in 1989.

At Sept. 30, 1990, the reserve for loan losses totaled $4.6 million, or 1.23 percent of total loans and 92.7 percent of non-performing loans, compared with a reserve of $3.8 million, or 1.04 percent of total loans and 67.6 percent of non-performing loans at Dec. 31, 1989.

Tax-equivalent net interest income for the first nine months of 1990 amounted to $17,414,000, compared to $17,358,000 earned in 1989. The net interest margin for the nine-month period was 4.5 percent, compared to 5.08 percent last year.

Non-interest income amounted to $3,237,000, down slightly from $3,492,000 last year, and gains from the sale of mortgages and securities amounted to $271,000 compared to $511,000 earned during the first nine months of last year.

Last year's non-interest income figure included pre-tax income of $387,000 resulting from the sale of the bank's Fifth and Chestnut Street office in September 1989. Non-interest expenses were held to $13,181,000, down from $13,260,000 last year.

At Sept. 30, 1990, The Frankford Corporation's assets totaled $556 million, up 11.1 percent from a year ago. Total deposits increased 11.3 percent to $479 million, and net loans rose 7.9 percent to $373 million.

Frankford Trust Co. has 17 full-service banking offices serving Philadelphia, Bucks, Delaware and Montgomery counties.

#90289b0833 10/16/1990 ~Business Wire

DECATUR, AL. (OCT. 16) BUSINESS WIRE - William D. Powell, president of First Federal Savings Bank, Decatur, (NASDAQ/NMS:FFSD) Tuesday reported increased

earnings for the Savings Bank's fourth quarter and year ended Sept. 30, 1990.

''Net income increased over 57 percent in the fourth quarter compared with the same quarter last year as a result of the continued improvement in our net interest income,'' stated Powell. ''During the past year, we have concentrated on improving our net interest margin.

''First Federal's asset position remained strong at year-end. We had no repossessed assets and only a nominal amount of real estate owned at year-end. Our conservative underwriting standards and our limited exposure to construction and commercial loans are contributing factors to the continued high quality of our loan portfolio,'' continued Powell.

Net interest income after the provision for loan losses increased 27.1 percent in the fourth quarter to $1.7 million compared with $1.3 million in the same quarter of fiscal 1989. The improvement in net interest income was due primarily to lower interest expense on deposit accounts.

Net income for the fourth quarter increased to $456,000 compared to $290,000 in the fourth quarter of last year. Net income per share advanced 62.5 percent in the latest quarter to 39 cents compared with 24 cents in the same quarter of fiscal 1989.

For fiscal year 1990, net interest income after the provision for loan losses rose 10.2 percent to $6.3 million compared with $5.7 million for fiscal 1989. Net income increased 12.5 percent to $1.7 million compared with $1.5 million in fiscal 1989. Net income per share rose by 15.3 percent in fiscal 1990 to $1.43 per share compared with $1.24 in the prior year.

''In the fourth quarter, the demand for single family mortgage loans continued to be below last year's level. As a result, we have not been aggressive in bidding for costly jumbo certificates of deposits. Although this has resulted in a slight decline in total deposits, retail deposits increased from last year. This has been a positive factor in our improved net interest margin,'' concluded Powell.

First Federal is a federally chartered, FDIC-insured savings bank operating seven full-service offices in north Alabama. The common stock of First Federal Savings Bank is traded in the NASDAQ National Market System under the symbol FFSD.

#90289b0838 10/16/1990 ~Business Wire

HOPKINTON, MA (OCT. 16) BUSINESS WIRE - EMC Corp. (NYSE:EMC) has announced

general availability of cache memory upgrades for IBM 3990 Model 3 storage controllers.

EMC's upgrades consist of multiple 16 megabyte boards offered for standard configurations of 32, 64, 128, and 256 megabytes.

EMC's 3990-3 cache upgrades are designed using state-of-the-art 4-megabit chip technology, IBM's current 3990 upgrades utilize 1-megabit chips.

''EMC's use of 4-megabit chip technology in its 3990-3 cache upgrades demonstrates the company's focus on implementing the latest technological advancements into its storage products prior to the host manufacturer,'' said EMC's senior vice president of marketing, Bob Ano.

EMC's 3990-3 cache upgrades are priced 25 percent below comparable IBM upgrades. For example, EMC's list price for an upgrade from 64 megabytes to 128 megabytes is $115,200 as compared to IBM's list price of $153,600.

This product introduction gives EMC products for all of the performance-oriented storage catagories for mainframe computers including; main memory, expanded storage, cache memory, solid state disk, and integrated cached disk arrays.

''Our 3990 cache upgrades complement our other storage offerings, giving mainframe users a breadth of storage solutions to choose from,'' said Ano.

''This introduction combined with the recent introduction of our Symmetrix Series of Integrated Cached Disk Arrays gives IBM mainframe users two viable storage alternatives,'' siad Ano.

''EMC's 3990 cache upgrades allow 3990 users to obtain 25 percent more storage for their planned expenditure. For users who are looking for the performance benefits of cached disk without the high environmental costs, large footprint, and storage management overhead, EMC's Symmetrix is the ideal solution.''

EMC Corp. supplies innovative, high-performance storage products and related services for midrange and mainframe computer systems worldwide.

POMONA, NY (OCT. 16) BUSINESS WIRE - Barr Laboratories Inc. (AMEX:BRL) received approval Tuesday from the Food and Drug Administration (FDA) to commence manufacture and sale of Methotrexate Tablets.

Methotrexate is used alone or in combination with other anticancer agents in the treatment of breast and other types of cancer. Methotrexate is also used in combination with other chemotherapeutic agents in the treatment of advanced stage non-Hodgkin's lymphomas.

Over the past three years the company has focused its research and development efforts on anti-cancer and other life-saving drugs. Today's approval for Methotrexate is the first in a series of anticipated approvals from the FDA for other anti-cancer products. Barr Laboratories already has received a large number of approvals for narcotic analgesics which ease cancer-related pain. Additionally, the company is the only current source of AB rated generic Leucovorin Calcium, a product which reduces the unpleasant side effects normally associated with various treatments for cancer and AIDS.

Annual sales of Methotrexate in 1989 are estimated to be in excess of $30 million. The company anticipates capturing up to 40 percent of the innovator's market.

Barr Laboratories is a prime manufacturer of a broad range of multi-source pharmaceutical products commonly known as generic drugs.

ORLANDO, FL (OCT. 16) BUSINESS WIRE - AT&T has been awarded a $157 million contract to build a new undersea fiber-optic cable that will link the U.S. mainland to Hawaii in 1993.

Known as Haw-5, the cable is the fifth to link Hawaii to the mainland and the second fiber-optic cable to do so. Together with other cables and satellite facilities that are in place or planned, Haw-5 is part of a network to provide communications among the countries of the Pacific Rim.

Announcement of the contract award was made at a meeting in Orlando of 23 co-owners of the cable.

The cable will carry voice and data traffic. The cable includes three pairs of fiber, two active and operating at 560 megabits per second and one fiber pair for reserve. If the entire cable were used for voice, it could handle 80,000 simultaneous telephone conversations.

AT&T will own 52 percent of the cable. Co-owners include telecommunications organizations in Australia, Belgium, Canada, France, Germany, Hong Kong, Italy Japan, the Netherlands, New Zealand, the Philippines, Sweden, Taiwan, the United Kingdom and the United States.

Haw-5 will be 2,750-miles long. Landing points for the cable will be in San Luis Obispo, Calif. and Keawaula on the island of Oahu in Hawaii.

#90289b0860 10/16/1990 ~Business Wire

STAMFORD, CT (OCT. 16) BUSINESS WIRE - Senior Service Corp. (NASDAQ:SENR;BSE;SNR), the only public company devoted exclusively to serving the changing health and lifestyle needs of Americans over 65, reported Tuesday revenues of $2,216,786 in the first quarter ended August 31 compared with revenues of $3,265,144 in the same period last year, which include the U.S. publishing operations that were sold in the past fiscal year.

Revenues of Almost Family, the company's expanding adult daycare chain, rose 88 percent in the first quarter.

The first quarter results reflect Senior Service's continuing investment in the expansion of its adult daycare operations, including substantial marketing costs associated with the launch of the Almost Family brand name during the summer and the opening of new centers.

A net unrealized foreign exchange loss of $125,584 was a factor in the net loss of $913,154 compared with a loss of $19,449 in the first quarter last year. This unrealized exchange loss reflected the strength of the Swiss Franc against the U.S. Dollar and is principally attributable to a 10 million Swiss Franc subordinated convertible 5 1/2 percent note.

Commenting on the first quarter, President and CEO Donald L. Luke indicated that the bottom line reflected, ''the significant investment Senior Service is making now in order to establish early leadership in adult daycare, a rapidly

developing service for older people who have age-related disabilities.''

Luke also reported that the restructuring of Senior Service in order to focus on developing its adult daycare and home health care operations will soon be completed. He announced that the company had signed an agreement in principle for the cash sale of its U.K. book publishing unit to a British company.

''Our efforts are now sharply focused on establishing a strategic leadership position in adult daycare and a specialized niche in home health services,'' he said.

Commenting on the balance sheet, Luke indicated that the cash position reflected heavy investment in expanding adult daycare capacity and the one-time payment of $400,000 to the Company's Founder-Chairman and a Vice President, both of whom retired from management on August 1.

Both of Senior Service's specialty health care operations address the most pressing health services needs of older Americans. Adult daycare and home health care fill the wide gap between hospital and nursing home care at a substantial cost saving to the consumer. In addition, adult daycare and home health services provide an opportunity for older people to remain as independent as possible, while offering vital respite and peace of mind to their families.

#90289b0884 10/16/1990 ~Business Wire

AKRON, OH (OCT. 16) BUSINESS WIRE - Ohio Edison Co.'s board of directors Tuesday adopted a shareholders rights plan to help ensure that the terms of any unsolicited takeover attempt would be fair.

The plan provides a dividend of one right to purchase an additional share of common stock for each share owned by shareholders of record on Oct. 26.

The rights would be exercisable if, without prior approval of Edison's board, a person or group would acquire 15 percent or more of the company's common stock or would start a tender offer to acquire 25 percent or more of common stock. However, in the event of certain actions by an acquirer which could result in a change of control, each right would convert into a right to purchase the company's common stock or the acquirer's stock, at special prices. The plan also provides Edison the option of issuing shares of common stock in exchange for rights.

Rights under the plan expire on Oct. 16, 2000. These rights will not affect

Edison's earnings per share or affect the way its common stock is currently traded on stock exchanges.

In other action, the board authorized the company to refund $26 million of two series of pollution control bonds to further reduce interest costs. The two series of bonds, both with an interest rate of 9.2 percent, are $19 million of Ohio Air Quality Development Authority Pollution Control Revenue Bonds, 1979 Series A, and $7 million of Beaver Valley County Industrial Development Authority Pollution Control Revenue Bonds, 1979 Series G.

Each series of bonds will be refunded with a new series of bonds, in the same principal amounts by the respective authorities. The redemption date of the bonds is scheduled for Dec. 3, 1990, but is subject to the sale of new bonds.

#90289b0889 10/16/1990 ~Business Wire

ROSELAND, NJ (OCT. 16) BUSINESS WIRE - Automatic Data Processing Inc. achieved record revenues and earnings in the first quarter of fiscal 1991, Josh S. Weston, chairman and chief executive officer, announced Tuesday.

This represents ADP's 117th consecutive quarter of double-digit earnings per share growth since becoming a public company in 1961.

Revenues were $414,282,000 in the quarter ended Sept. 30, up 3 percent from last year. Pre-tax earnings increased 5 percent. Net earnings, aided by a lower effective tax rate, increased 13 percent to $41,740,000, and earnings per share grew 14 percent to $.58 from $.51 last year. During the first fiscal quarter ADP purchased 2.8 million shares of its common stock and since then it has purchased 1.7 million additional shares. The acquisition of treasury shares reduced pre-tax earnings while aiding earnings per share. The board of directors recently authorized the purchase of up to 5 million additional shares.

Commenting on the first quarter, Weston said, ''Our quarterly performance was especially aided by double-digit revenue growth and improved margins in Employer Services and Dealer Services. These two business units comprise almost 70 percent of ADP's revenues.

''In addition, Employer Services first quarter new account sales and client retention both improved noticeably over fiscal 1990. Brokerage Services, about 20 percent of ADP's revenues, had an improved operating margin during the quarter on reduced volume. Despite the weakness in the brokerage industry, we are very pleased with our first quarter's results and are increasingly confident with our previously announced estimate that fiscal 1991 earnings per

share growth will exceed 10 percent.

''As previously reported, revenue growth continues to be negatively impacted by the absence of revenues from recently disposed businesses including our banking, Canadian quotation and manufacturing services, and 81 percent of our Brazil business, as well as other ongoing pruning activities. Revenue growth will accelerate once inter-year comparisons are no longer affected by prior business dispositions.''

#90289b0892 10/16/1990 ~Business Wire

EVANSVILLE, IN (OCT. 16) BUSINESS WIRE - Old Natinal Bancorp (NASDAQ:OLDB) Tuesday reported another increase in quarterly earnings.

Third quarter net income per share increased to 52 cents, an 11 percent increase from the second quarter results of 47 cents. Net income for the third quarter was $5,728,000, compared to $5,223,000 for the second quarter.

The third quarter results also exceeded the results for the third quarter of 1989, with net income per share at 52 cents versus 49 cents and net income at $5,728,000 versus $5,601,000. Year-to-date net income per share is $1.42 compared to $1.44 reported for 1989.

Old National Bancorp Chairman, Dan W. Mitchell, noted continued improvement in the bank holding company's core earnings at a time when many banks are having significant problems. ''Regulatory examinations were recently completed at most of our affiliate banks, and we passed with flying colors.

''Examiners are looking at all banks with intensified scrutiny right now, particularly the loan portfolios and loss reserves. We are quite pleased with the results of our examinations.''

Assets of Old National Bancorp are now $2.2 billion and will exceed $2.5 billion with the consummation of the three pending mergers by year-end. In October, the company will close mergers with Security Bank and Trust of Mt. Carmel, Ill., and Farmers Bank & Trust Co. of Henderson, Ky.

A merger with Warrick National Bank of Boonville, Ind., will be completed in November. Those additions, along with improved fourth quarter earnings from existing affiliate banks, are expected to boost net income for 1990 to record levels.

#90289b0906 10/16/1990 ~Business Wire
MEMPHIS, TN (OCT. 16) BUSINESS WIRE - First Tennessee National Corp. (NASDAQ/NMS:FTEN)(FTNC) reported net income for third quarter 1990 of $14,942,000, or 94 cents per share, a 6.2 percent increase over $14,066,000, or 89 cents per share, reported for the same period last year.

Earnings growth resulted primarily from a rise in net interest income. Return on average equity was 15.19 percent and return on assets was .93 percent.

For the nine months net income totaled $34,603,000, or $2.17 per share, vs. $16,033,000, or $1.01 per share, for year-to-date 1989. Net income for the first nine months of 1989 included a 70 cents per share net loss recorded in the second quarter, the result of an additional increase to the loan loss reserve.

''We have obtained improvements in our operating performance through emphasizing the most efficient use of expense dollars and a stabilization of nonperforming assets,'' said Ronald Terry, chairman of First Tennessee.

Nonperforming assets totaled $90.9 million at Sept. 30, 1990, down from $92.1 million recorded at June 30, 1990. At Sept. 30, 1989, nonperforming assets amounted to $88.7 million. Approximately $23 million of nonperforming assets as of Sept. 30, 1990, were either contractually current or were past due fewer than 90 days.

The allowance for loan losses amounted to $77 million at period end compared to $67.1 million at Sept. 30 last year and $77.2 million at June 30, 1990. Year-to-date net charge-offs totaled $27.4 million at the end of September 1990 compared to $31.4 million at Sept. 30, 1989.

Fully taxable equivalent net interest income for the nine months grew 5.6 percent compared to the first nine months of last year. Average earning assets as a percentage of total assets rose to 89 percent compared to 87.1 percent for the same period last year, contributing to the increase.

Lower costs on interest-bearing deposits reduced the pressure on the spread between yields on earning assets and rates paid on interest-bearing liabilities. Growth in consumer loans, investment securities and short-term investments also enhanced net interest income.

For the nine months noninterest income rose 9.5 percent, excluding securities transactions, strengthened by increased bond and trust revenues. Bond division income was up 15.4 percent for the period while trust service income rose 9.9 percent.

Service charges on deposit accounts and other service fees rose 7.3 percent. Without the $2.2 million one-time gain resulting from a decline in projected

benefit obligations of the pension plan recorded in the second quarter, noninterest income rose 6.8 percent.

Noninterest operating expense for the first nine months of 1990 was .5 percent over the same period in 1989. Productivity program improvements led to a decline in most all expense categories compared to the first nine months of last year.

An increase did occur in the other expense category during the third quarter due to market adjustments on foreclosed properties and other expenses related to the disposition of real estate.

''We remain confident in the continued strength of our balance sheet and earnings capacity going into 1991,'' said Terry. ''As a result, the board of directors approved a 5 percent increase in the quarterly dividend from 40 cents to 42 cents per share. This increase will be reflected in the dividend payable on Jan. 1, 1991, to shareholders of record on Dec. 14, 1990.''

First Tennessee is among the 100 largest bank holding companies in the United States, reporting total assets at Sept. 30, 1990, of $6.5 billion and shareholders' equity of $395.1 million. The corporation's common shares are traded in the NASDAQ National Market System under the symbol FTEN.

#90289b0913 10/16/1990 ~Business Wire

LOS ANGELES (OCT. 16) BUSINESS WIRE - H.F. Ahmanson & Co. (NYSE:AHM), parent company of Home Savings of America, the nation's largest savings and loan institution, Tuesday reported that third-quarter net earnings increased to $61.3 million, or 62 cents per share, compared with $49.2 million, or 50 cents per share, in the like 1989 period.

This 24.6 percent gain in quarterly net earnings reflects continued growth in core operating earnings, principally net interest income.

For the first nine months of the year, net earnings increased to $183.1 million, or $1.85 per share, compared with $128.1 million, or $1.29 per share, earned in the first nine months of 1989. The 43 percent increase in the first nine months net earnings was also attributable to continued growth in core operating earnings.

Core earnings comprised 97 percent of the company's first nine months' net earnings.

Commenting on the third-quarter earnings results, Richard H. Deihl, chairman and chief executive officer, said: ''Core earnings increased by 50.2 percent from the third quarter of 1989 and accounted for all of this quarter's net earnings. We will maintain our emphasis on core earnings as we continue to strengthen our balance sheet and maintain strict expense control.''

Net interest income totaled $289.2 million for the quarter, compared with $239.5 million in the third quarter of 1989. This 20.8 percent improvement is attributable to a $5.0 billion increase in interest earning assets, mainly monthly adjustable-rate mortgages, and an increase in the effective net spread.

The effective net spread was 2.60 percent in the third quarter of 1990, compared with the 2.38 percent in the third quarter of 1989.

Deposits at Home Savings of America increased by $1.2 billion during the quarter and brought the deposit increase for the first nine months of 1990 to a record $3.6 billion. Mortgage loan originations during the third quarter were $3.2 billion. Mortgage loan originations were $10.7 billion for the first nine months of 1990.

Of these loans, 92 percent were single-family mortgages and 77 percent were loans on properties located in California.

Only 10.7 percent of the loans originated in 1990 had loan-to-value ratios in excess of 80 percent, all of which were loans on single-family residences. The company, as a matter of policy, does not originate loans with loan-to-value ratios higher than 90 percent. All of the loans originated in 1990 were on residential real estate properties.

The company ceased making new commercial and industrial real estate loan commitments in December 1988. C&I real estate loans now comprise 5.5 percent of the loan portfolio.

Other income was $39.3 million during the third quarter. This $19.2 million decrease, from the $58.5 million earned in the third quarter of 1989, was primarily attributable to a decline in income from the operations of the real estate development subsidiaries and a decline in the gain on sale of loans and mortgage-backed securities.

In addition, other income was less than the third quarter of 1989 due to non-recurring gains from the sale of certain assets in last year's third quarter.

H.F. Ahmanson & Co., with $48.8 billion in assets, is the parent company of Home Savings of America. Home's $36.8 billion deposit base is the largest of any U.S. savings institution. It operates 360 savings branches in nine states and 97 mortgage lending offices in 13 states.

#90289c0049 10/16/1990 ~Comtex
WASHINGTON (OCT. 16) COMTEX - Federal Reserve Chairman Alan Greenspan said today the greatest obstacle facing the Soviet Union and East European nations in their quest to transform their economies from centrally planned to market systems is erasing 40 years of cultural aversion to free enterprise.

"The major problem is going to be a deep-seated distrust in much of Eastern Europe about the ideology of markets," Greenspan said. "Entrepeneurship, profits, speculation ... are generally perceived to be inappropriate to the organization of civilized society. That's what the education systems of the Soviet Union and Eastern Europe have been pushing since the end of World War II."

Greenspan, opening the concluding session of the two-day American Stock Exchange convention here, avoided any mention of the budget debate raging on Capitol Hill and how it could affect Fed strategy concerning interest rates. Instead, he launched into what amounted to a lecture on the differences between East-West economies since the post-War period.

In remarks before the same forum later this morning, Greenspan's predecessor, Paul Volcker, said the financial services industry is moving from the excesses of the 1980s characterized by highly leveraged transactions and speculative bank lending practices which has resulted in the situation of lower investment and productivity.

"Financially, those difficult circumstances reflect a repair process underway " Volcker said. "From aggressive lending to more prudent standards, leverage is no longer as popular, this is part of the healing process."

Volcker, who refuses to second-quess Fed policy, nevertheless said, "The

danger of monetary policy that accomodates inflation is more likely to aggravate (the economic) situation than ease it."

The Fed is attempting to balance competing goals of stimulating the economy and fighting inflation. Easing of the monetary policy could lead to lower interest rates which would help spur the economy. But such an action, coupled with surging oil prices, could trigger higher inflation.

Greenspan believes the East will ultimately succeed in converting to market-style economies and said this will benefit the West.

"My suspicion is that transitions, while extraordinarily difficult and disruptive, will ultimately emerge to create viable economies in Eastern Europe and the Soviet Union," he said. "This is highly advantageous to the West because when your neighbor prospers, you prosper."

WASHINGTON (OCT. 16) COMTEX - The 8-K report filed at the SEC shows on Sept. 21, 1990, the board of directors of Frances Denney Companies Inc. (TICKER: DNNY) voted to change the company's name to Trend Laboratories Inc.

The holder of a majority of the company's outstanding stock agreed to the name change, and on Oct. 1, 1990, the company filed to complete this transaction.

-30- 503
#90289c0061 10/16/1990 ~Comtex
WASHINGTON (OCT. 16) COMTEX - The 8-K report filed at the SEC shows the board of directors of Summcorp(TICKER: SMCR), on Sept. 26, 1990, declared a regular quarterly cash dividend of $0.18 per share, payable Nov. 1, 1990, to shareholders of record as of Oct. 15, 1990.

The dividend reflects a 5.9 percent increase over the $0.17 per share dividend paid during each of the last two quarters, and a 12.5 percent increase over the dividend of $0.16 per share declared quarterly during 1989.

The board also authorized the purchase of up to 300,000 shares of the company's common stock on the open market.

The purchase authority extends to 3.36 percent of the company's total 8.94 million shares outstanding.

-30- 889
#90289c0062 10/16/1990 ~Comtex
WASHINGTON (OCT. 16) COMTEX - The 8-K report filed at the SEC shows U.N.A. Corp.(TICKER: UNAW) on Sept. 28, 1990, following approval of the holders of common stock of U.N.A., merged with Okura Acquisition Corp., with Okura being the surviving entity.

This transaction is pursuant to an agreement dated July 13, 1990, among U.N.A. Okura Acquisition and Okura & Co.

The merged entity will continue to operate under the name of U.N.A. Corp.

As a result of the merger, each outstanding share of U.N.A. common stock was converted into the right to receive $0.20 in cash, without any interest thereon, or an aggregate of $1.19 million, based on the 5.96 million shares outstanding on Sept. 18, 1990.

This also includes the right to payments, if any, one year after the effective time of the merger, from the escrow fund established in the merger agreement.

WASHINGTON (OCT. 16) COMTEX - The 10-K report filed at the NASD shows Comparator Systems Corp.(TICKER: IDID) lost $1.99 million, at an unknown price per share, on revenues of $10,459 for the fiscal year ended June 30, 1990.

This compares with net losses of $1.33 million, or $0.00 per share, on revenues of $46,136 for fiscal 1989.

The company states it has not had the funds to engage in the aggressive marketing essential to sale of a new and relatively novel product.

It reports the need for a network of manufacturers' representatives in foreign

locations; a small domestic sales organization is in place.

Comparator says it has now defined the product pricing and features necessary to achieve viable sales volume and with completion of the current new technology acquisition negotiations and current private placement, feels it is in a position to undertake aggressive product development and marketing.

The company's executive offices are located at 2862 McGaw Avenue, Irvine, CA 92714, and its telephone number is (714) 851-4300.

EXECUTIVE HOUSE INC OF CHICAGO, IL OWNS 1,757,393 SHARES (24.00%) OF AEGIS INDUSTRIES INC (TICKER: HAGISE) OF SECAUCUS, NJ.

ANNOUNCEMENT:

Aegis Industries Inc. granted EHI the option to purchase all of the issued and outstanding NPS shares owned by Aegis Industries Inc. commencing on Jan. 1, 1993 or the date EHI shall have received audited financial statements of NPS for its fiscal year ending Sept. 30, 1992, and expiring on the 90th day following such initial exercise date, at a price equal to three time the average annual after-tax earnings of NPS for the two years ending Sept. 30, 1992. Aegis Industries Inc. and NPS were accorded the right to repurchase the shares and the NPS preferred shares, respectively, from EHI for an aggregate purchase price of $1,600,000 plus accrued but unpaid dividend, and EHI was accorded the right to require Aegis Industries Inc. and NPS to purchase the shares and the NPS preferred shares, respectively. EHI committed to a stand-by letter of credit in the amount of $150,000 in favor of NPS' institutional lender to continue in effect until NPS and the IRS have entered into an agreement. EHI was accorded the right to designated one nominee to be included on the nominee slate of both issuer and NPS. Accordingly, Messrs. Haft and Certilman were elected to Aegis Industries Inc.'s board and Mr. Certilman was elected also to NPS' board.

LATEST TRANSACTION:

On Sept. 19, 1990 pursuant to a master agreement and related agreements, dated as of June 26, 1990 by and among EHI, Aegis Industries Inc. and NPS Industries Inc., Executive House Inc. acquired 1,757,393 shares for a price of $450,000; contemporaneously, EHI purchased such number of convertible preferred shares of NPS representing, upon conversion and after giving effect thereto, 20 percent of NPS' then issued and outstanding common shares for a purchase price of $1,000,000; and all of the then issued and outstanding common stock of IFTI Capital Appreciation Management Corp. for a purchase price of $50,000 or aggregately $1,500,000. Also, on Sept. 19, 1990, EHI sold to Aegis Industries Inc. 333,333 shares of its common stock for a purchase price of $500,000.

TOKYO (OCT. 16) - Sumitomo Bank Ltd. announced on Tuesday the resignation of its chairman, Ichiro Isoda, and vice chairman, Yasushi Nishi, to take responsibility for an alleged loan scandal.

Vice president Teizaburo Nishi also resigned his post, the announcement by one of Japan's top banks said.

But president Sotoo Tatsumi will retain his position in order to help restore the confidence lost in the wake of the scandal, Sumitomo officials said.

The resignation of three of Sumitomo's top leaders was endorsed at a policy-making panel meeting Tuesday morning, they said.

The resignations came after Mr. Isoda's October 7 announcement that he would step down in connection with the arrest of a former bank branch maager allegedly involved in shady loan deals.

Akinori Yamashita, 45, former head of a Sumitomo branch in Yokohama, was arrested on October 5 for allegedly arranging 22.8 billion yen (165.2 million dollars) in loans to Mitsuhiro Kotani, 53, a leader of a stock speculators' group.

In his October 7 announcement, Mr. Isoda said, "it is natural that the top official of a bank whose employee committed such a serious crime should take responsibility in view of the bank's public character."

Mr. Isoda, 77, Sumitomo's chairman since 1983, and Mr. Nishi will become advisors to the bank, Japan's first in earnings and third in assets.

WELLINGTON (OCT. 16) - New Zealand Prime Minister Mike Moore Tuesday welcomed U.S. proposals for cutting farm subsidies worldwide, saying they were tough enough to break the logjam around the GATT talks due to end in December.

The United States and the Cairns Group of free-trade advocates, including New Zealand, presented revised proposals in Geneva on Monday under the General Agreement on Tariffs and Trade (GATT) Uruguay Round of talks aimed at freeing world commerce.

The plans both sought 75 percent reductions in production subsidies and support and 90 percent cuts in export subsidies. The reforms would be spread over 10 years from 1991.

The US proposal lowered the free trade sights slightly so it would be more acceptable to the GATT's 105 members but was "tough enough" to break through the current logjam in the negotiations, Mr. Moore said.

Mr. Moore said the U.S. proposals could "slice through the absurd levels" of protection and assistance barring New Zealand's access to many export markets.

In a statement, he said the U.S. plan would be a sound basis for negotiation over the remaining five weeks as it contained detailed suggestions on the speed and extent of reform.

An earlier U.S. initiative to eliminate all support by the year 2000 was unacceptable to the European Economic Community and Japan, he said.

"The current U.S. offer says there is room to negotiate, but the pressure for real and tough reduction in support and protection stays on," he said.

MANILA (OCT. 16) - Local subsidiaries of U.S. soft drinks giants Coca-Cola and Pepsi are pressing on with a cola war in the Philippines despite a feared recession, the Business World newspaper reported here Tuesday.

Coca-Cola Bottlers Philippines Inc. is finalizing a 500-million-peso (19-million-dollar) expansion project, topped by a new plant south of Manila which is touted as one of the biggest and most sophisticated in the world.

Pepsi-Cola Products Philippines Inc., for its part, is embarking on a 300-million-peso (12-million-dollar) expansion, Business World said.

Coca-Cola dominates the Philippine soft drinks market, which has an annual turnover of about 10 billion pesos (388 million dollars.)

The Coca-Cola subsidiary, part of the beer-based San Miguel Corp. empire, was the Philippines' 10th largest corporate earner in 1989, when it grossed 8.09 billion pesos (314 million dollars) and had a net income of 379 million pesos (14.7 million dollars).

The Pepsi franchise, controlled by the Lorenzo family of Manila, was far behind with sales of 815 million pesos and a net income of 855,000 pesos (33,200 dollars).

NEW DELHI (OCT. 16) - South African black nationalist leader Nelson Mandela became the second foreigner to receive India's highest civilian award when he was given the "Jewel of India" here Tuesday.

Indian President Ramaswamy Venkataraman presented the award to Mr. Mandela at a special investiture ceremony in the presidential palace.

In a departure from tradition, no speeches were made at the ceremony which lasted just three minutes and was attended by cabinet ministers and opposition politicians.

Mr. Mandela then mixed with the gathering, shaking hands and signing autographs for admirers.

The 72-year-old deputy president of the African National Congress (ANC) arrived here Monday on a four-day visit, his first to an Asian country since being freed in February from 27 years of imprisonment.

He is also due to visit the eastern Indian metropolis of Calcutta, the Hindu holy city of Benares and the Taj Mahal town of Agra before ending the trip Friday.

The nationalist leader is the second foreigner to receive the Bharat Ratna (Jewel of India) award after the late "frontier Gandhi", Khan Abdul Ghaffar Khan,
who was similarly honoured in 1987.

Other recipients include Nobel laureate Mother Teresa, the Calcutta-based Roman Catholic nun who has devoted her life to serving the poorest of the poor.

#90289d3380 10/16/1990 ~French/German News Agency

JAKARTA (OCT. 16) - Several OPEC oil ministers Tuesday criticised Western nations for their failure to act to bring order to world oil markets.

Oil ministers from Algeria, Nigeria, Venezuela and host Indonesia, gathering here for an energy seminar, said the major industrialised countries could help stabilise the volatile markets if they released their huge oil reserves instead of waiting until the Gulf crisis worsened.

Celestino Armas of Venezuela described measures by the Organization of Petroleum Exporting Countries (OPEC) to stabilise the market and the West's failure to act as "an astonishing contrast."

"The major nations keep hesitating about what to do on energy policies while the International Energy Agency (IEA) looks like it's stuck in the Shakespearean dilemma 'to be or not to be'," Mr. Armas said.

The Paris-based IEA, comprising Western industrialised countries, oversees the energy needs of member countries.

Oil prices passed 40 dollars a barrel last week, more than double the level before the Iraqi invasion of Kuwait on August 2, on fears of a deterioration of the situation in the Gulf.

PARIS (OCT. 16) - French consumer prices rose by about 0.55 percent in September after rising 0.6 percent in August, provisional official figures showed on Tuesday.

This took the increase so far this year to about 3.1 percent and during the last 12 months to between 3.8 percent and 3.9 percent.

The economy ministry described this as "rather a good result".

The increase in oil prices accounted for about 0.4 inflation points, and excluding the effect of oil prices, inflation in September was less than 0.2 percent.

"That means that the internal inflationary factors remain under control," the ministry said.

Since the Gulf crisis began France has achieved one of the best price performances within the European Economic Community (EEC), the ministry said.

CAIRO (OCT. 16) - Following the assassination of Egyptian parliamentary speaker Rifaat Mahgoub last week, Egyptian authorities have detained at least 300 persons including many Iraqis, Palestinians and Jordanians who entered the country with forged passports, press reports said here Tuesday.

The interior ministry assumed that the assassins have not left Egypt, the reports said. The authorities were checking hotel guests and persons who rented furnished apartments.

Under an order from Interior Minister Moahmmed Abdel Halim Mousa, anyone found to be unconnected with the assassination is to be freed immediately.

According to the daily Al Akhbar, authorities at the Cairo airport arrested two Lebanese, three Syrians and an Egyptian said to have a great resemblance with pictures of the assassins made on the basis of testimony from eyewitnesses. Those arrested would be shown to the witnesses, Al Akhbar said.

JOHANNESBURG (OCT. 16) - Rand Mines gold division turned a 16.6 millon rand (6.53 million U.S. dollar) second quarter loss into a two million rand (790,000 dollar) taxed profit in the third quarter, results released here Monday showed.

The five operating mines - Harmony, Blyvoor, Durban Roodepoort Deep, East Rand Proprietary Mines (ERPM) and Barbrook - maintained gold production at 12,155 kilograms, which fetched an average of 32,172 rands (12,716 dollars) per kilo, up 1.9 percent from 31,569 rands (12,477 dollars) in the second quarter.

Unit costs on underground operations rose 8.4 percent to 123.53 rands (48.8 dollars) per ton of ore.

Beleaguered ERPM, a key marginal saved by a government and bankers' rescue plan in July, turned a 37 million rand (14.6 million dollar) second quarter loss into a 12.7 million rand (4.98 million dollar) third quarter profit, mainly on the back of the sale of sand dumps and slimes dams.

NICOSIA (OCT. 16) - Libyan leader Colonel Moamer Kadhafi has said he would mobilize "one million men" to offset any military action in the Gulf, the official Libyan news agency JANA reported in a dispatch received here.

Col. Kadhafi, who was speaking Monday, said the mobilisation would involve several categories of the Libyan people, besides regular troops and reservists. He did not elaborate.

"Libya would be forced to mobilize one million men if anything were to happen in the Gulf," he said.

But he did not specify if these forces would be sent to the Gulf or if they would stay on alert in Libya.

"Turkey, Egypt and other countries have mobilized. Some have done so to send troops to the Gulf while others mobilized because they fear for themselves," he said.

Libya, with a population of nearly four million, has denounced the dispatch of foreign troops to the Gulf as part of a multinational force to protect Saudi Arabia and other regional states against any attack by Iraq following Iraq's August 2 invasion of Kuwait.

BOGOTA (OCT. 16) - The army has seized 852 kilos (1,875 pounds) of cocaine and arrested 103 alleged traffickers in a rural drug raid that uncovered a huge coca plantation near Colombia's northern coast, officials said Tuesday.

Helicopter-borne soldiers swooped down on an estimated 80 million coca plants spread over ranches covering 2,000 hectares (5,000 acres) between the cities of Simiti, San Pablo and Santa Rosa in southern Bolivar province, Colonel Carlos Castro Garcia said.

Troops destroyed six clandestine cocaine processing laboratories and confiscated cocaine-processing chemicals, a weapons cache, and 30 vehicles bearing Venezuelan license plates which had been used to transport drugs, he said.

The army will destroy the coca crops, he added.

Col. Castro Garcia said the plantation in Magdalena Medio, 450 kilometers (279 miles) north of Bogota, had been run by Marxist guerrillas of the Colombian Revolutionary Armed Forces, whom he accused of "working in coordination and in complete unity with the drug traffickers."

The high-quality cocaine, packaged and ready to be shipped to the United States, was found hidden under shrubs in a rural area near Uribia in Guajira province, officials said.

SYDNEY (OCT. 16) - The Australian government was under strong pressure Tuesday to shift economic policy following what was seen as an extraordinary speech calling for change by Reserve Bank Governor Bernie Fraser.

In a blunt critique of government policy late Monday, Mr. Fraser called for tax cuts instead of wage increases to slash the current 7.7 percent inflation.

Addressing a bankers' conference, he said high interest rates alone could not fight inflation.

His remarks followed his bank's decision announced hours earlier to ease monetary policy by cutting interest rates, triggering a similar reduction by major banks.

Mr. Fraser is one of Australia's most powerful economic policy advisers and, although as governor has the independence and freedom to say what he likes, has rarely if ever offered such unsolicited advice.

But many observers assumed Mr. Fraser was speaking with government approval to

signal a shift in economic policy.

Opposition frontbencher John Howard said he found it hard to believe the governor could have made such comments without Treasurer Paul Keating at least giving tacit approval.

According to opposition leader John Hewson, it was the first time a reserve bank governor had ever made a substantial criticism of government economic policy.

Mr. Fraser said that expected wage increases following a union accord with the government would keep inflation high for the next year or two.

He argued that monetary policy, one of the government's major economic tools, alone could not significantly reduce inflation "except at extremely heavy costs in terms of lost production and employment" - in effect by triggering a deep recession.

He urged the government to use its eight billion dollar (6.3 billion U.S.) budget surplus to trade tax cuts for wage hikes, in what he said was the most acceptable and effective way of reducing inflation.

In a radio interview, Mr. Keating said he had not discussed the matter with Mr. Fraser and did not support his proposition - but he appeared later in the day to change his mind.

BAGHDAD, Oct 16 (AFP) - Iraqi Airways has resumed flights between and Baghdad and Kuwait after a near week-long interruption, the director of the national carrier, Noureddin Safi Hammadi, said Tuesday.

He said the flights resumed on Monday. Sources at Baghdad airport said there were four flights a day.

Iraqi Airways had suspended flights between Baghdad and Kuwait for "technical reasons," he said without elaborating.

Iraq invaded Kuwait on August 2 and later issued a decree naming the Gulf state a province of Iraq.

#90289d3800 10/16/1990 ~French/German News Agency

MANILA (OCT. 16) - The Philippines' largest paper manufacturer Tuesday imposed a 13 percent increase in the price of newsprint, putting added pressure on the country's freewheeling and overcrowded press industry.

"Some newspapers are floundering because of increasing costs," said Alice Villadolid, president of the Philippine Press Institute, a private group that monitors the industry and seeks to promote professionalism.

"We expect a few to fold up," she added.

She said 12 major dailies, 15 tabloids, two business journals, five Chinese-language newspapers and sundry vernacular publications nationwide are fighting it out for a market of less than three million copies a day.

The government-controlled Paper Industries Corp. of the Philippines raised its prices ahead of expected hikes in the cost of ink, and following a 19.1 per cent rise in the minimum wage. Transport costs are also expected to zoom, while advertising and retail prices of newspapers have not caught up.

"Newspaper owners are having sleepless nights figuring out how to handle the rise in the price of paper, ink and other printing items," Federico Pascual, editor-in-chief of the mass-circulation Philippine Daily Inquirer, wrote over the weekend.

The Philippine press has blossomed since the 1986 overthrow of martial law ruler Ferdinand Marcos and the rise to power of President Corazon Aquino, who has often complained about the daily strident criticism she gets.

Most Philippine newspapers are linked with business conglomerates or political groups gearing up for the 1992 presidential elections.

#90289d3810 10/16/1990 ~French/German News Agency

MANILA (OCT. 16) - The Philippine government's program to make an affordable "people's car" available to the middle class is off to a bumpy start after the price ceiling had to be raised because of spiralling costs.

The Board of Investments, which conceptualized the program, said Tuesday it agreed to raise the limit to about 200,000 pesos (7,767 U.S. dollars), from 175,000 pesos (6,796 dollars), for a basic model.

The depreciating peso and rising production costs prompted the new ceiling, which was sought by manufacturers and initially rejected by the government.

The price could even go higher before the cars finally get rolling on local roads in early 1991, because the new ceiling did not take into account a 19 per cent increase in the minimum daily wage set Monday.

Brand-new passenger cars here currently cost at least 260,000 pesos (10,000 dollars). Coupled with high interest rates on loans, the prices make new cars

accessible only to affluent Filipinos.

The government has allowed six firms to join the "people's car" program, limited to cars with engine displacements of up to 1,200 cc - KIA of South Korea, Fiat of Italy, Gurgel of Brazil, Honda, Daihatsu and Nissan of Japan.

The participants will enjoy incentives intended to help them limit their prices to the government-set ceilings.

The Philippine car and truck market is currently dominated by three Japanese giants - Toyota, Mitsubishi and Nissan.

WASHINGTON (OCT. 16) - The World Bank has granted Venezuela three loans worth a total of 680 million dollars to be used to reform the country's financial sector and public companies, a bank official said.

Shahid Husain, a World Bank vice minister for Latin America, said the loans included about 300 million dollars for the financial sector and 350 million dollars for the public sector.

The remaining 30 million dollars was designated for a technical assistance project aimed at promoting investments and strengthening institutions, he said.

In announcing the loans, Mr. Husain praised Venezuelan President Carlos Andres Perez's program of economic reforms and expressed confidence that the loans would help improve the nation's banking and public sectors.

The World Bank approved the loans in June.

The loan agreement was signed here Monday by Mr. Husain and Carlos Stark, Venezuela's vice minister of finance.

About 162.5 million dollars - a quarter of the two larger loans - will be aimed at supporting measures to reduce the nation's external debt.

#90289d3860 10/16/1990 ~French/German News Agency

BEIJING (OCT. 16) - China's exports of light industrial products could break the record 13 billion dollar mark this year, a quarter of the country's total export revenue, the China Daily said Tuesday.

The English-language newspaper, quoting industry officials, said exports had shown a dramatic rise in the first half of the year to June, climbing 30.8 per cent to 6.7 billion dollars compared with the same period the previous year.

The paper quoted export values of some items in the first three quarters of the year over the same period the previous year, including watches up 76.5 per cent to 111 million dollars, bicycles up 28.8 percent to 86 million dollars and sewing machines up 48 percent to 27.14 million.

But the paper said exports of carpets and canned food, considered China's main exports, had dropped "marginally," without giving figures.

The China Daily said Wang Yanyi, the deputy director of the export office of the ministry of light industry, attributed the increase to the government's policy of allowing the sector's exporters to retain more of the foreign exchange they earned.

This, he said, had encouraged many exporters to turn their sights to the world market and away from the "sluggish market at home."

Leading enterprises had been given the right to trade directly with clients and could retain 80 percent of foreign exchange earned or up to 100 percent in some cases, Mr. Wang said.

Previously they had to sell through trading companies and could keep only 12.5 percent of foreign exchange, the rest going to the state, he added.

NEW DELHI (OCT. 16) - Indian consumers are staring at harder days ahead after being slapped with a 25 percent hike in petroleum prices that would push costs up and raise inflation to double digits, analysts said Tuesday.

The main opposition party, Congress (I), called the increase "insensitive and anti-people," while businessmen condemned it and even the government's communist allies urged Premier Vishwanath Pratap Singh to dilute the "bitter medicine."

The "Gulf surcharge" imposed Sunday on all petroleum products except cooking gas came two days after the government cut fuel supplies by 15 percent, triggering panic buying and fears of rampant hoarding and black marketeering.

Designed to beat back a fiscal crisis caused by spiralling prices on the international oil market, the hike would inevitably raise the price of all commodities and services and affect people's living standards, analysts said.

The inflation rate, 9.1 percent in the 1989-90 fiscal year ending in March, would shoot past 10 percent, upsetting government attempts to curb it at around seven per cent, they predicted.

"It is a double kick in the stomach for the poor," said Congress (I) spokesman and legislator M. J. Akbar, charging the V.P. Singh administration with financial mismanagement.

"The Gulf crisis is only a handy fig leaf through which the government is trying to cover the disasters created by its ineptitude," he said.

Gurudas Gupta, a pro-government Communist MP, was equally scathing.

"It is a dangerous decision," he said. "It will push inflation to double digits and have disastrous consequences for the economy."

"Instead of announcing this steep hike, the government should have resorted to physical rationing of petroleum products," he added.

The Communist Party of India-Marxist had asked the government to target only the affluent and spare the poorer sectors "who are already finding it difficult to maintain their livelihood."

#90289d4100 10/16/1990 ~French/German News Agency

CANBERRA (OCT. 16) - Australian farmers will have to shoot 50 million sheep this year in an effort to balance supply and demand for wool, an opposition MP said Tuesday.

The sheep are part of a record 170 million-strong flock which is at the heart of the current crisis in the Australian wool industry.

"A slaughter scheme appears to be the only way of bringing the supply and demand back into any sort of balance next selling season," opposition primary industries spokesman Bruce Lloyd said.

He said 50 million, including 10 million old sheep, should be killed.

Australian wool growers have faced falling demand for their wool and sheep since Asian and European buyers withdrew from the wool market.

Farmers, under the eye of government rangers, have already started shooting their flocks as the price of sheep falls to as low as 40 U.S. cents a head.

#90289d4610 10/16/1990 ~French/German News Agency

TOKYO (OCT. 16) - The yen climbed to a 19-month high against the dollar Tuesday, encouraged by market expectations that the Japanese unit will rise further despite the prospect of short-term consolidation.

The Japanese unit opened stronger and climbed to 127.75 to the dollar at one stage before retreating in the afternoon session to end trading at 128.05, up from 128.15 at Monday's close.

Foreign exchange dealers said that market participants were concerned about

growing ecomomic uncertainties in the United States.

Some precicted that, depending on developments in the Gulf crisis, the yen could climb as high as 125 to the dollar by the end of the month. That compares with more than 160 at the end of April.

But others are more cautious. The Nomura Research Institute, an affiliate of Japan's biggest securities firm, reckons the yen is a little "overvalued" and likely to retreat to around 135 to the dollar.

Matthew Berlow, chief economist at Credit Lyonnais Securities Japan Ltd., said the yen's surge in recent months was mainly due to higher interest rates.

Japanese long-term interest rates have risen to around nine per cent while short-term rates are currently around eight per cent. Given a relatively low level of inflation, it is only natural that the yen has become more attractive as an investment currency, Mr. Berlow said.

Higher interest rates, accompanied by plunging stock prices since the start of the year, have put an end to a long period of excess liquidity in Japan.

As a result, many of the cash-laden institutions which helped fuel the yen's decline earlier this year by investing heavily abroad are now repatriating some of their funds, partly to offset losses in the Japanese stock and bond markets.

#90289d5180 10/16/1990 ~French/German News Agency

MOSCOW (OCT. 16) - Soviet President Mikhail Gorbachev's economic reform programme aims at introducing some privatisation within two years during application of a four-stage move towards a market economy, the Interfax news agency reported here on Tuesday.

The programme, distributed to members of the Soviet parliament on Tuesday and summarised by Interfax, laid down four stages spread over 18 months to two years.

Entitled "The prinicpal orientations of stabilisation of the economy and of the change to a market economy", it is described as a synthesis of two reform programmes, a radical programme by presidential adviser Stanislav Shatalin and a cautious plan by Prime Minister Nikolai Ryzhkov, over which members clashed in September without reaching any conclusion.

President Gorbachev put it before representatives of the 11 republics on Saturday.

The first stage would be based on the introduction of legislative texts required for economic reform and "stabilisation measures", and particularly a reduction of the budget deficit, an increase in savings interest rates, and the reduction of state ownership and introduction of private ownership of property together with reform of home ownership.

The second stage would concern "meaningful and progressive" application of market prices for a "large range" of goods for consumption or for production. The measures adopted under the first stage should prevent big increases in prices.

The third stage would be aimed at "stabilising the market for consumer goods and for the means of production" through development of market relationships.

The fourth stage would "strengthen the trends towards stabilisation of the economy and finances", and would "improve the consumer market "mainly through the creation of "an area of competitive markets".

Major moves to remove monopolies and to remove state involvement in the economy, as well as privatisation, should also occur during the period covered by the programmes of either 18 months or two years.

This timescale had been laid down as a result of studies of "stabilisation programmes in other countries" and through taking into account conditions unique to the Soviet Union, the document said.

#90289d5250 10/16/1990 ~French/German News Agency

BERLIN (OCT. 16) - The privatisation of around 45,000 state-owned wholesalers and retailers in former East Germany has been suspended, the Treuhandanstalt, the agency tasked with selling off East German state assets, said Tuesday.

The suspension was decided by a subsidiary of the Treuhandanstalt that was set up last week with specific responsibility for privatising the distribution network, the subsidiary's chief official, Wolfgang Bernhardt said.

Sales will continue after a review of sales that were carried out before

German unification on October 3, he said.

The announcement came after mounting criticism from east German chambers of commerce and industry that the privatisation was going too slowly and was being encumbered by too many rules.

Mr. Bernhardt said that the regulations would be simplified and steps taken to ensure that all investors had an equal opportunity to bid for the enterprises.

The subsidiary, the Gesellschaft zur Privatisierung des Handels GmbH, is responsible for all state-owned distributors and sales outlets except large city department stores and the Interhotel chain.

#90289d5370 10/16/1990 ~French/German News Agency

LONDON (OCT. 16) - The Mergers and Monopolies Commission on Tuesday rejected a proposed assets swap between the Grand Metropolitan food group and the Australian Elders IXL brewing group because it was "against the public interest".

But Trade and Industry Minister Peter Lilley said that he might approve the deal to exchange public houses for breweries if the details were changed. He has asked the office of fair trading to negotiate changes by November 16.

Grand Met shares fell two pence on the news to 564 pence.

The two companies had announced on March 13 that they had agreed for Grand Met to sell breweries for 366 million pounds in cash. Meanwhile 4,960 public houses owned by Courage and controlled by Elders, and 3,570 public houses managed by Grand Met would be acquired by Inntrepreneur Estates, a company equally owned by Grand Met and Elders.

These public houses would then agree to sell Courage beer for 10 years.

The commission had already expressed its opposition to an undue concentration of brewing interests when it published a report in 1989 which was critical of the six main British beer groups, and said that each of them should not own more than 2,000 public houses so as to re-introduce real competition.

#90289d5390 10/16/1990 ~French/German News Agency

MIAMI (OCT. 16) - A nephew of Nicaraguan President Violeta Chamorro has said he unknowingly solicited money from a drug dealer during the 1980s for the Nicaraguan rebels known as contras.

Adolfo "Popo" Chamorro, Nicaragua's consul here, told a news conference Monday

he met in 1984 with George Morales, who he thought was a wealthy Cuban sympathetic to the contra cause.

He said the contact with Mr. Morales was authorized by U.S. officials. Mr. Chamorro, moreover, denied involvement in drug trafficking or knowing of any such activities by Mr. Morales, who is now serving a 16-year sentence.

But he abruptly ended the news conference when asked whether he had been warned by U.S. authorities that Mr. Morales was under indictment on drug charges when the contras accepted cash and aircrafts from him.

In 1987, Mr. Morales told a Senate committee that Mr. Chamorro and Octaviano Cesar, the brother of a key aid to Mrs. Chamorro, had been involved in a guns-for-drugs swap in Costa Rica.

Those accusations surfaced again seven months ago in a trial in Tulsa, Oklahoma of Colombian drug pilot Fabio Ernesto Carrasco.

Mr. Carrasco testified that he paid Mr. Chamorro and Mr. Cesar millions of dollars to fly cocaine into Florida on planes that returned to Central America with arms.

The contras were disbanded earlier this year after Mrs. Chamorro took over from the leftist Sandinista National Liberation Front, which had ruled Nicaragua since 1979.

WIESBADEN, Germany (OCT. 16) - German factory gate prices in September were 2.1 percent higher than a year earlier, official figures showed on Tuesday.

The increase was due mainly to higher prices for oil products since Iraq invaded Kuwait at the beginning of August, the federal statistical office said.

-30- 467

#90289d5430 10/16/1990 ~French/German News Agency

MAPUTO (OCT. 16) - Rebels of the Mozambique National Resistance (RENAMO) killed 11 people when they fired indiscriminately on a crowd attending a weekend traditional music festival, Radio Mozambique said Tuesday.

The incident, following close on last week's shooting of 30 civilians by rebels in the southern Gaza province, happened Sunday night at Cheringoma, 200 kilometers (125 miles) north of the port city of Beira.

The attackers made off with property stolen from the victims, the radio said.

President Joaquim Chissano's Frelimo government, which is currently enacting a multi-party constitution removing the last traces of the former Portuguese colony's Marxist ideological past, has been trying to re-convene peace talks to end the 15-year civil war.

But RENAMO has called for the prior withdrawal of President Robert Mugabe's estimated 10,000 Zimbabwean troops now reported to be conducting a major pre-rainy season offensive against the rebels.

More than half the population has been uprooted by the war which has reduced Mozambique to the status of one of the world's poorest nations.

#90289d5550 10/16/1990 ~French/German News Agency

JERUSALEM (OCT. 16) - British Foreign Secretary Douglas Hurd on Tuesday urged Israel to respect the will of the United Nations, official Israeli sources reported.

Mr. Hurd met Foreign Minister David Levy and Prime Minister Yitzhak Shamir at the start of a four-day visit that was expected to be complicated by his recent, sharply-worded criticism of Israeli policy toward the Palestinians.

Mr. Hurd refused to comment Tuesday on the recent killings in east Jerusalem by Israeli security forces of 21 Palestinians, an incident that triggered unanimous condemnation by the U.N. Security Council.

The Israeli government denounced Friday's council resolution as one-sided and vowed not to cooperate with a fact-finding team that Secretary General Javier Perez de Cuellar wants to send to Jerusalem.

Official sources said Mr. Hurd urged Israeli authorities "not to defy the United Nations."

The foreign secretary also suggested that Israel might reject the resolution but still agree to receive the U.N. mission.

Mr. Levy on Tuesday charged that the council had "adopted a one-sided resolution by not condemning attacks perpetrated against worshippers who had come to pray at Judaism's holiest site."

The October 8 killings occurred after security forces opened fire on Palestinians near the Dome of the Rock and Al-Aqsa mosques who had thrown stones at Jews praying at the nearby Wailing Wall.

The Palestinians were reported to have gathered to prevent a feared attempt by Jewish extremists to penetrate the area around the two mosques.

Mr. Hurd was the target Tuesday of harsh treatment by the English-language Jerusalem Post, which suggested sarcastically: "Israel could demand that Britain immediately open negotiations with the Irish Republican Army.

"We should call upon Britain to attend an international conference and agree

to a 'land for peace' deal on Northern Ireland."

#90289d5740 10/16/1990 ~French/German News Agency
TOKYO (OCT 16) - Japan is inflating its import figures by buying gold abroad needed to mint commemorative coins for the enthronement of Emperor Akihito next month, press reports said Tuesday.

Japan imported 63 tonnes of gold last month, nearly four times more than in September 1989, according to customs statistics.

By buying foreign gold to make two million coins to mark Emperor Akihito's enthronement November 12, Japan could reduce its trade surplus by about 110 billion yen (900 million dollars), the economic daily Nihon Keizai Shimbun said.

The finance ministry has also decided not to draw down Japanese reserves, the Jiji Press news agency quoted government sources as saying.

The ministry declined to comment on the reports.

Japanese gold imports were worth some 845 million dollars in September, a 350 per cent increase from the same month a year earlier.

Gold accounted for almost five per cent of Japanese imports in the month, which increased 10.3 per cent overall to 19 billion dollars.

In August, the finance ministry imported 27 tonnes of gold, compared with 17 tons for the entire January to July period.

The commemorative coins, which will require 60 tonnes of gold, will be put into circulation on April 1, 1991. They will be Japan's first officially issued commemorative coins for five years.

ROME (OCT 16) - Yevgeny Primakov, a Soviet presidential aide who has just come back from talks in Baghdad, started here Tuesday what the Kremlin described as a delicate mission to the West in connection with the Gulf crisis.

In other developments, U.S. Secretary of Defence Dick Cheney arrived in Moscow for talks. The Soviets denied they were planning to give him secret information on Iraqi military capabilities.

Kuwait's crown prince, Saad al-Salim al-Sabah, said the U.N. Security Council's demand for an Iraqi withdrawal from Kuwait should be carried out

immediately. He hoped the Iraqi troops would be forced out ''either peacefully or by war''.

Primakov, a counsellor to Soviet President Mikhail Gorbachev, is also to travel to France Wednesday and then to the United States. So far he has disclosed nothing of his talks with the Iraqis starting two weeks ago in Amman and Baghdad.

The Soviet Union, which still has military advisers in Iraq, has disapproved of the western military buildup in the Gulf and has been seeking an Iraqi withdrawal from Kuwait by way of negotiation.

A gorbachev spokesman, Vitaly Ignatenko, said in Moscow Tuesday that Primakov's mission was a ''very delicate matter''. It was a step that had been thought through by the president to prevent the Gulf crisis turning into a war.

Ignatenko described as ''false'' a weekend news report here that Primakov had detected a softening in Iraq's position.

PARIS (OCT 16) - Delphine Seyrig, the French actress who embodied the "discreet charm of the bourgeoisie" in French cinema for more than a decade, died here Monday of cancer aged 58, her family said Tuesday.

Delphine Seyrig, a militant feminist who sought out reputedly difficult and innovative film-makers such as Alain Resnais and Marguerite Duras, first came to public notice in Resnais' "Last Year in Marienbad" and "Muriel" in the 1960s.

Her sophisticated manner and distinctive, low-pitched voice made her ideal for a leading role in Luis Bunuel's satire, "The Discreet Charm of the Bourgeoisie".

"She is not a woman, she is an apparition," exclaimed Antoine Doisnel, the screen hero of Francois Truffaut's "Stolen Kisses" in which she starred.

In the 1980s, Delphine Seyrig had mainly concentrated on theatre, notably starring in works by Harold Pinter and Sylvia Plath. She won public acclaim for playing Sarah Bernhardt in a work by Irish writer John Murrell.

She had to withdraw last month from a planned production of a Peter Shaffer play, "Laetitia" because of her illness.

BRUSSELS (OCT 16) - The Rwandan government wants rapidily to arrange a truce with the rebels who invaded from Uganda two weeks ago, to be followed by negotiations on refugees, Belgian Prime Minister Wilfried Martens said Tuesday after talks with Rwandan leader Juvenal Habyarimana.

Mr. Martens was speaking in a television interview from the Kenyan capital Nairobi, where he met Major-General Habyarimana on Monday and was due to hold further talks with him on Tuesday.

Talks with Kenyan leader Daniel arap Moi were also scheduled, and Mr. Martens was to travel to Kampala on Wednesday for a meeting with Ugandan leader Yoweri Museveni. Diplomatic sources in Nairobi said Mr. Martens would the following day move on to Burundi, Belgium's other former territory along with Rwanda, for discussions with President Pierre Buyoya.

Mr. Martens said a truce would be a guarantee that Belgian aid workers could stay at their posts in Rwanda. The Kigali authorities wanted to engage in political negotiations to settle the problem of Rwandan refugees in neighbouring countries, he said, commenting that he did not know if that would be possible.

Spokesmen for the rebel Rwandan Patriotic Front told a radio station here there was no question of negotiations with the Habyarimana regime because of its "murderous" record. Pre-conditions for a truce were the resignation of Gen. Habyarimana, the departures of Belgian, French and Zairean troops, an end to "arrests and massacres", and lifting of the state of emergency, said Jean Barahinyura and Jean-Bosco Rwyamirira.

The Front comprises mostly Tutsis, the minority tribe which fled in vast numbers when the Hutu majority unleashed the first of a series of pogroms 30 years ago. But "Colonel" Alexis Kanyarengwe, who said he was on the battlefield in Rwanda a few days ago with the rebels, told the paper La Libre Belgique that the issue in his country was one of "power being used to oppress Hutus as well as Tutsis. We must find a solution bringing democracy to the country's institutions".

Gen. Habyarimana has been in power since mounting a bloodless coup in 1973.

ANKARA (OCT 16) - Turkish foreign ministry officials Tuesday declined to confirm or deny reports that four Iraqi military attaches might be expelled after the arrest of a Turk spying for Baghdad.

A source said the case was now at the hands of judicial and military authorities.

Press reports, quoting State Security Court prosecutors, said Ahmet Alver, a 34-year-old former oil industry official, had sold information to the Iraqi attaches on an oil refinery in south-eastern Turkey, on oil pipelines and on Turkish troop deployments and activities at airbases near the border with Iraq.

Alver reportedly visited Baghdad last June for a two-week course on espionage techniques. He is said to have been paid 5,000 dollars.

He was caught at the start of October by agents of the National Intelligence Organisation (Mit). Iraqi attaches were also reportedly photographed in secret meetings with Alver.

MONTEVIDEO (OCT. 16) - Iraq said Tuesday it would supply Third World countries with oil free of charge if the economic blockade imposed after its invasion of Kuwait was lifted.

The offer was made by Iraq's National Assembly vice-president, Ghanim Aziz Khaduri, at a meeting of the Interparliamentary Union at the Uruguyuan sea resort of Punta del Este.

He told about 800 members of parliaments from more than 110 nations that Iraq sought peace in the Gulf.

The blockade against Iraq was ''a conspiracy by the United States and Britain'' to control Arab oil, he said.

No U.S. representative is taking part at the conference which is also scheduled to discuss worldwide debt, economic growth and educational issues.

#90289d6520 10/16/1990 ~French/German News Agency

DES MOINES, Iowa (OCT 16) - U.S. President George Bush, responding to hecklers protesting the U.S. military buildup in the Gulf, insisted Tuesday that the United States could not be isolationist.

Three youths briefly interrupted the president's speech at a political rally here for Republican candidates with shouts of "Bring our troops home from Saudi Arabia" and "No blood for oil."

A police officer ejected the hecklers from the hall. Outside a dozen more people were demonstrating against the U.S. military presence in the Gulf.

"Some people never get the word," Mr. Bush said. "The fight isn't about oil, the fight is about naked aggression that will not stand."

"I understand where these kids are coming from," Mr. Bush said, recalling that he had fought in World War II.

"Their view should not be entirely written off but they got it wrong, they got the facts wrong ... They are looking in a bit of an isolationistic way. We can't do that," Mr. Bush said.

"If we don't stand up against aggression around the world when it's naked and brutal, who will?" he asked.

"The United States has the responsibility to lead and to put together this coalition that says very simply to Saddam Hussein: you cannot bully your neighbor, you cannot wipe out a member of the Arab League, of the United Nations," said Mr. Bush.

Mr. Bush reiterated that U.S. troops would remain on Saudi soil no longer than necessary, but he insisted that Iraq must relinquish its hold of Kuwait and restore the emirate's legtimate government.

He also stressed that Iraqi President Saddam Hussein "will be held accountable" for his aggression.

DHAHRAN, Saudi Arabia (OCT 16) - More than 700 soldiers from Britain's 7th Armoured Brigade, the "Desert Rats" of World War II fame, arrived in Saudi Arabia from Germany on Tuesday.

The troops, the first British ground forces to arrive in the kingdom, touched down at a Saudi air base on three Royal Air Force Tristar jets.

According to a British military spokesman, Lieutenant Colonel Nick Claypool, more than 700 soldiers a day are exected to arrive in Saudi Arabia over the next 10 days.

Lt. Col. Claypool said Britain would eventually have some 9,500 servicemen, including Royal Air Force personnel and support units such as engineers, in the kingdom.

"There will be a total of about 15,000 British troops in the theater," he said including those aboard warships and in other Gulf states.

The first ships carrying armoured recovery vehicles and tank transporters for the 7th Armoured Brigade are scheduled to arrive on Wednesday, Lt. Col. Claypool said.

A total of 120 Challenger tanks for the 7th Armoured Brigade, which is usually based in Germany, are also being shipped to Saudi Arabia.

British engineers have been in Saudi Arabia for several weeks constructing a base camp for the British troops being sent to Saudi Arabia following the August 2 Iraqi invasion of Kuwait.

The 7th Armoured Brigade is to come under the tactical command of U.S. Marine Lieutenant General Walter Boomer and be integrated into the 1st Marine Division.

Lieutenant General Peter de la Billiere, the commander of British forces in the Gulf, arrived in Dhahran on Saturday.

He told reporters that British troops bring "a most valuable increase in the amount of armour available" to the multi-national force in Saudi Arabia.

British Tornado warplanes have been stationed at a Saudi air base since early August.

#90289d6960 10/16/1990 ~French/German News Agency

JOHANNESBURG (OCT. 16) - Heavy Middle East selling on the New York bullion market, which sent gold crashing through the 370 dollars an ounce mark Tuesday has put renewed pressure on at least 20 of South Africa's 35 major gold mines dealers said.

Dealers told state-run television the 25 dollar fall in price since Friday would cost the country five million rands (1.97 million dollars) a day, and put up to 100,000 miners' jobs in jeopardy, as the 370 dollar mark was the bottom line of survival for more than half of South Africa's gold mines.

Speculators were running riot in a quiet market, dealers said, as investment dried up worldwide.

But any flare-up in the Gulf could once more send the gold price soaring through 400 dollars an ounce, dealers said.

#90289d7000 10/16/1990 ~French/German News Agency

WIESBADEN, Germany (OCT 16) - German industrial prices in September were 2.1 percent higher than a year earlier, mainly because of higher oil prices after the August 2 Iraqi invasion of Kuwait, the federal statistical office reported Tuesday.

It added that retail prices in the former territory of East Germany rose a

sharp 1.8 percent in September over August, chiefly because of hikes in clothing and leisure and training.

The increase was 3.4 percent lower than East Germany's average inflation for 1989, which is the office's reference point, the office said.

But it came only two months after German monetary union, which helped to stabilise prices in the German Democratic Republic.

#90289d7060 10/16/1990 ~French/German News Agency

JOHANNESBURG (OCT 16) - The South African government and the African National Congress (ANC) resumed talks in Pretoria Tuesday in spite of a war of words that had been raging between the two sides.

Both parties have said that the row, which erupted on Thursday when black nationalist leader Nelson Mandela called into doubt President Frederik de Klerk's integrity, was not serious enough to derail the peace process in South Africa.

The meeting was the fourth following the August 6 Pretoria agreement and the first since last week's dispute.

Mr. Mandela claimed the president had leaked information on the content of discussions between the two parties last week, mainly relating to the release of prisoners and the return of exiles.

The ANC deputy president said on Saturday before departing on a six-nation tour of Asia that he did not think anyone should be alarmist about the row.

He said that while the government had "insulted" him, the ANC and government shared "many common areas" which would ensure that negotiations stayed on track.

Delegations, headed by Law and Order Minister Adriaan Vlok and the Chief-of-Staff of the ANC's military wing Umkhonto we Sizwe, Chris Hani, Tuesday discussed the consequences of the ANC's decision to relinquish the armed struggle against the Pretoria government, a spokesman for Mr. Vlok said.

Meanwhile, the extreme-right wing Conservative Party opened its annual conference near Durban by unanimously re-electing Andries Treurnicht as its leader.

Conservative Party spokesman Koos van der Merwe said in a radio interview that the government had no mandate for the policies it was enacting and called for early general elections.

He was speaking the day after the government had officially scrapped one of the cornerstones of the apartheid system, the Separate Amenities Act, thus opening up public amenities to all races.

WASHINGTON (OCT. 16) - Cuba has lowered the minimum ages for Cubans who want to visit relatives in the United States, possibly hoping they will stay abroad and reduce the burden on the Cuban economy, U.S. officials said Tuesday.

Cuba told U.S. diplomats it lowered the age from 55 years to 45 years for men, and 50 years to 40 years for women, the officials said.

The liberalized travel rules most likely have an economic motivation because of the decline in the Cuban economy, said the officials, who asked not to be identified.

They said Cuba may want to increase traffic with the U.S. to bolster hard currency holdings which have severely restricted the island's ability to import.

In addition, officials said Cuba may hope many of those who leave will never return, thus easing demand on Cuban goods and services which have been depleted by cutbacks from the Soviet Union.

The officials said the United States could face a "legal Mariel" as a result of the liberalized travel rules, referring to the Mariel boat lift 10 years ago that brought an estimated 125,000 undocumented Cubans to the United States.

The United States will have to issue visas on the basis of whether they believe applicants are going to stay in the United States, said one official.

#90289d7320 10/16/1990 ~French/German News Agency

BUDAPEST (OCT 16) - Soviet Union has drastically cut its electricity supply to Hungary to 900 megawatt for the rest of the month, MTI news agency said here Tuesday.

Quoting officials from the Hungarian Ministry of Industry and Trade the agency said the average level of Soviet electricity supplies to Hungary was 1,900 MW.

Reductions were due to delays of maintenance works on their power plants, according to Moscow.

A 640 MW cut-back was announced first for three days last week and only for the period of the evening peak hours.

Later a 200-300 MW capacity reduction for this month was communicated to the Hungarian authorities and on Monday Soviet exporters informed their Hungarian counterparts of an additional 650 MW cut-back.

Hungary gets 28 percent of its annual 40 billion kWh electricity consumption from Soviet Union.

Under a mutual agreement the Soviet Union is to deliver 11 billion kWh to Hungary this year.

To-date the supply of Soviet electricity, contrary to oil exports, has been smooth, and over 80-100 million kWh have been delivered in advance.

Crude oil, however, is lagging 1.5 million tonnes behind the agreed 6.5 million tons for this year.

#90289d7360 10/16/1990 ~French/German News Agency

BANJUL (OCT 16) - West African nations are scrambling to hold a special summit meeting on the Liberian crisis in Banjul, The Gambia, around October 29, officials quoted Gambian President Dawda Jawara as telling overseas radio stations Tuesday.

Sir Dawda is acting president of the 16-nation Economic Community of West African States (ECOWAS) which is seeking an end to the 10-month civil war in Liberia.

He also announced that a council of ministers of the seven-member ECOWAS mediation committee would meet here next Tuesday to prepare the summit.

A summit on the Liberian crisis was cancelled last Sunday without ever being officially announced.

A senior Ivoirian government official had disclosed on Friday that the summit would gather 12 ECOWAS members in Yamoussoukro, the Ivory Coast's political capital.

Analysts said they believed the summit was cancelled because it would have set out too glaringly a split between French- and English-speaking ECOWAS members over an intervention force sent to Liberia to restore peace.

They said the French-speaking members oppose the force's offensive role in Liberia, while the English-speaking members back its efforts to prevent the main rebel leader, Charles Taylor, from taking over the country.

The intervention force was set up last August despite the protests of some

French-speaking members that only a full summit could create such a body.

The force started with 2,500 men, mostly Nigerians but also Ghanaians, Gambians, Sierra Leonians and Guineans.

Its mission was to force a cease-fire in the fighting between three Liberian forces -- two rebel armies and the remnants of the Liberian army.

But critics of the intervention force grew louder after it swelled to 6,000 men, more or less absorbed the splinter rebel forces of Prince Johnson and the remnants of the Liberian army, and proceeded to push Mr. Taylor's National Patriotic Front out of the sectors of Monrovia that his rebel army controlled.

#90289e0021 10/16/1990 ~Latin America New Agency

PORT-AU-PRINCE (OCT. 16) EFE - Former Haitian President Leslie Manigat, deposed in a military coup two years ago, has returned from exile to register his candidacy in December's elections.

Hundreds of friends and well-wishers turned out at Port-au-Prince airport late Monday despite teeming rain to greet Manigat, ousted in June 1988 after just five months in office.

+I am happy to return, without resentment and convinced of the principles that I defend,+ said the former president, who won January 1988 elections which the opposition alleged had been rigged.

No government official was at the airport to receive Manigat, who arrived on a commercial flight from the United States.

Earlier this month, provisional President Ertha Pascal Trouillot lifted a ban on Manigat returning home.

The government had originally insisted that the deposed leader could come home if he renounced any intention to run in this year's presidential elections slated for December 16.

Haiti's National Electoral Council has said it will only accept Manigat as a candidate if he presents his papers personally.

Manigat was overthrown by Gen. Henry Namphy. Three months later, Namphy was deposed by Gen. Prosper Avril, who fled to the United States after an 18-month rule marked by violence and protests.

Trouillot was chosen to head the caretaker government after his departure.

Over the weekend, supporters of former dictators Francois Duvalier and his son

Jean-Claude Duvalier announced they had formed a party which would field a presidential candidate.

#90289e0035 10/16/1990 ~Latin America New Agency

MANAGUA (OCT. 16) EFE - Some 80 former Contra guerrillas occupied the headquarters of the leftist Sandinista party in a northern Nicaraguan town, while another 30 took over a nearby town, the opposition daily Barricada reported Tuesday.

The seizures follow land disputes in the area where at least 18 people have died in clashes between the ex-Contras and peasants in recent weeks.

The paper said the group raided documents and stole +money for the poor+ at the Sandinista party offices in Quilali on Monday near the Honduran frontier, as well as taking over social welfare offices and a health centre.

The same day other foremer rebels took over a nearby town, threatening the population.

Barricada said it feared those involved could turn violent +through drink+, while the police sat in their barracks.

Similar incidents when peasants took over buildings to protest the former rebels' takeover of their land led to the earlier clashes with the Contras.

The Contras were officially disbanded in June after a 10-year battle against the former Sandinista government, which was defeated in general elections earlier this year.

#90289f1973 10/16/1990 ~United Press International

CHICAGO (OCT. 16) UPI - The grain market was under pressure all day Tuesday and closed lower on the Chicago Board of Trade. However, losses in corn and soybeans were tempered by the forecast for widespread rain for a couple of days in the major production areas.

Soybeans were at or near session lows at the final bell, trading at their lowest levels in two weeks. Deferred soybeans were especially weak on news that the ''triple base'' planting option could begin next year. November 1991 soybeans were down 9 1/2 cents at the close.

Congressional negotiators approved the plan early Tuesday, which still must pass the full congress. While the proposal was bearish for soybeans, it provided limited support for corn on talk that farmers might plant less corn and more soybeans.

Wheat made contract lows in every month in relatively quiet trading. The lack of buying interest weighed on wheat prices, as did news that India plans to sell up to 1 million tons of wheat by the end of the year.

At the close, corn was off 1/2 to 2, soybeans down 2 1/2 to 9 1/2, wheat off 2 1/2 to 4 1/4 and oats down 3/4 to 1.

SANTIAGO (OCT. 16) XINHUA - SPAIN WILL INVEST 1.2 BILLION DOLLARS IN CHILE OVER THE NEXT FIVE YEARS ACCORDING TO A FRIENDSHIP AND COOPERATION AGREEMENT TO BE SIGNED BY THE TWO COUNTRIES' FOREIGN MINISTERS ON THE OCCASION OF KING JUAN CARLOS AND QUEEN SOFIA'S OFFICIAL VISIT ON OCTOBER 17-22, A CHILEAN FOREIGN MINISTRY HIGH-RANKING OFFICIAL SAID HERE TODAY.

THE FOREIGN MINISTRY'S LEGAL DEPARTMENT HEAD EDUARDO VIO GROSSI SAID THAT THE AGREEMENT INCLUDES THE FIELDS OF ECONOMY, SCIENCE AND TECHNOLOGY, CULTURE, LEGAL AND CONSULAR AFFAIRS AND POLITICS. A POLITICAL HIGH COMMISSION WILL BE SET UP, AS WELL AS SUBCOMMISSIONS FOR EACH OF THE SECTORS SO THAT "RELATIONS WITH SPAIN ARE PERMANENT," HE SAID.

THE ACCORD WILL INCLUDE AN ECONOMIC PACT FOR 1.2 BILLION DOLLARS WORTH OF INVESTMENTS OVER THE NEXT FIVE YEARS AND A 800 MILLION DOLLAR LOAN, HE SAID, ADDING THAT 50 PERCENT OF THE LOAN WOULD HAVE NORMAL COMMERCIAL INTEREST RATES WHILE THE OTHER HALF WOULD HAVE PREFERENTIAL RATES.

VIO GROSSI SAID THAT THE TREATY WOULD STRENGTHEN "ALL THE BONDS BETWEEN SPAIN AND CHILE. IT RESUMES AND GIVES A NEW DIRECTION TO THE RELATIONS BETWEEN THE TWO COUNTRIES."

HE DECLARED THAT ONCE IT IS SIGNED, THE AGREEMENT WOULD BE SUBMITTED TO THE APPROVAL OF CONGRESS AND OF CHILEAN PRESIDENT PATRICIO AYLWIN, ADDING THAT IT COULD COME INTO FORCE IN MARCH NEXT YEAR.

NEW DELHI (OCT. 16) XINHUA -- BUTTERFLIES ARE MOVING OUT OF THE HIMALAYAS AS A DIRECT CONSEQUENCE OF DEFORESTATION, ACCORDING TO AN RENOWNED INDIAN ENTOMOLOGIST, LOCAL PRESS REPORTED TODAY.

"I DON'T WANT TO SOUND ALARMIST BUT AN INCREASE IN THE AVERAGE TEMPERATURE BY EVEN HALF A DEGREE CENTIGRADE IN THE HIMALAYAS COULD BRING ABOUT A CATASTROPHE " ENTOMOLOGIST FREDERICK SMETACEK CAUTIONED.

SMETACEK, WHO SPECIALIZES IN STUDYING THE COLORFUL HIMALAYAN BUTTERFLIES, SAID THAT IF THE BALANCE BETWEEN INSECTS LIKE BUTTERFLIES, BIRDS AND TREES IN THE

HIMALAYAS IS UPSET, THE ARID WEATHER OF THE PLAINS WILL INVADE THE LOWER FOOTHILLS.

SMETACEK REGULARLY CRISSCROSSES THE HIMALAYAS AS TO ADD TO HIS ORE THAN 10,000-STRONG BUTTERFLY AND MOTH COLLECTION. HE HAS ONE OF THE LARGEST AND MOST FASCINATING COLLECTION OF THESE CUTE LITTLE INSECTS IN ASIA.

ONE BUTTERFLY SPECIES HE IS PARTICULARLY INTERESTED IN IS THE SNOW APOLLO -- AN EXTREMELY RARE SPECIMEN WHICH CAN BE FOUND AT THE DIZZY HEIGHTS OF 12,000 TO 20,000 FEET IN THE HIMALAYAS. THESE SNOW-COLORED WINGED INSECTS, NUMBERING NO MORE THAN A COUPLE OF HUNDRED, ARE THE SOLE POLLINATING AGENTS IN THE ICY BARRENNESS OF THE UPPER REACHES OF THE MIGHTY HIMALAYAS.

IF THE BUTTERFLIES DIE, SMETACEK SAID, THE ENTIRE PLANT LIFE OF THE UPPER HIMALAYAS MAY END, CAUSING DISASTROUS ICESLIDES.

ISLAMABAD (OCT. 16) XINHUA - THE GOVERNMENT OF PAKISTAN WILL RECEIVE FROM SWITZERLAND A GRANT OF ABOUT 2 MILLION U.S. DOLLARS FOR AN AGRICULTURAL PROJECT.

AN AGREEMENT TO THIS EFFECT WAS SIGNED HERE ON MONDAY BY SWISS AMBASSADOR P.A. TROENDLE AND SECRETARY OF ECONOMIC AFFAIRS DIVISION R.A. AKHUND ON BEHALF OF THEIR RESPECTIVE GOVERNMENTS.

EARLIER THIS YEAR, THE GOVERNMENT OF SWITZERLAND SANCTIONED A GRANT OF 17 MILLION DOLLARS FOR IMPLEMENTATION OF AGRICULTURAL DEVELOPMENT PROJECT IN PAKISTANS.

THE PROJECT, LOCATED IN NORTHWEST FRONTIER PROVINCE, HAS THE OVERALL OBJECTIVE OF DEVELOPING MODELS FOR INCREASING FARMERS' PRODUCTIVITY AND INCOME. THE MAIN COMPONENTS OF THE PROJECT ARE SOCIAL ORGANIZATION, WATERCOURSE RENOVATION AND MAINTENANCE, ON-FARM IMPROVED WATER MANAGEMENT, IRRIGATION SYSTEM RESEARCH AND AGRICULTURAL RESEARCH.

THE GOVERNMENT OF SWITZERLAND WILL PROVIDE EQUIPMENT, TRAINING, COSTS FOR WATERCOURSE RENOVATION AND TECHNICAL ASSISTANCE FOR THE PROJECT UNDER THIS AGREEMENT.

CANBERRA (OCT. 16) XINHUA - NEW REGULATIONS AIMED AT PREVENTING THE DISPOSAL OF GARBAGE FROM SHIPS INTO THE SEA WILL BE INTRODUCED IN NOVEMBER, THE FEDERAL SHIPPING AND AVIATION SUPPORT MINISTER, BOB COLLINS, ANNOUNCED TODAY.

COLLINS SAID IN A STATEMENT THE REGULATIONS EXTEND EXISTING OIL AND CHEMICAL POLLUTION CONTROLS AND ARE PART OF THE INTERNATIONAL CONVENTION FOR THE PREVENTION OF POLLUTION FROM SHIPS.

"THE DISPOSAL OF ALL TYPES OF GARBAGE AT SEA WILL BE STRICTLY CONTROLLED, WITH STIFF PENALTIES FOR OFFENDERS," HE SAID.

IT IS KNOWN THAT THE FEATURE OF THE REGULATIONS IS A BAN ON THE DUMPING OF ALL PLASTIC MATERIALS, INCLUDING SYNTHETIC ROPES AND FISHING NET, AT SEA.

PLASTIC SEVERELY THREATENS THE WHOLE MARINE ENVIRONMENT, ESPECIALLY MARINE MAMMALS THROUGH ENTANGLEMENT AND INGESTION.

COLLINS STRESSED IN THE STATEMENT THAT THE REGULATIONS WILL APPLY TO ALL CRAFT FROM SMALL RECREATIONAL TO LARGE COMMERCIAL VESSELS.

ALTHOUGH THESE REGULATIONS ARE AN OPTIONAL PART OF THE CONVENTION, THE FEDERAL GOVERNMENT HAS DECIDED THEY WOULD BE APPLIED TO AUSTRALIAN WATERS, HE SAID, ADDING THAT STATE GOVERNMENTS HAVE ALSO GIVEN SUPPORT FOR THE NEW REGULATIONS.

BEIJING (OCT. 16) XINHUA - CHINA HAS MADE GREAT PROGRESS IN ITS ENVIRONMENTAL STANDARDS AND WISHES TO WORK TOGETHER WITH OTHER COUNTRIES IN ADDRESSING GLOBAL ENVIRONMENTAL ISSUES.

THIS REMARK WAS MADE BY JIN JIANMING, DEPUTY DIRECTOR OF THE STATE ENVIRONMENTAL BUREAU, AT A GATHERING TO MARK "WORLD STANDARDS DAY" HERE THIS AFTERNOON.

HE SAID THAT THE DESTRUCTION OF THE OZONE LAYER, THE GREENHOUSE EFFECT, ACID RAIN AND THE TRANSNATIONAL TRANSPORTATION OF TOXIC AND HAZARDOUS WASTES HAVE BECOME GLOBAL ENVIRONMENTAL PROBLEMS, AND CHINA IS DUTY-BOUND TO JOIN THE EFFORTS TO PROTECT MANKIND'S LIVING SPACE AND SOLVE GLOBAL ENVIRONMENTAL ISSUES.

ENVIRONMENT IS THE THEME OF WORLD STANDARDS DAY THIS YEAR. CHINA JOINED THE TECHNICAL COMMITTEE FOR THE QUALITY OF AIR, WATER AND SOIL OF THE INTERNATIONAL STANDARDS ORGANIZATION (ISO) IN 1980. OVER THE PAST DECADE, CHINA HAS PROMULGATED 200 NATIONAL STANDARDS, INCLUDING 12 ENVIRONMENTAL QUALITY STANDARDS, 43 POLLUTANT-DISCHARGE STANDARDS AND 145 BASIC METHODS AND OTHER STANDARDS. IT HAS ALSO ADOPTED 19 INTERNATIONAL ENVIRONMENTAL STANDARDS.

JIN SAID THAT THE CHINESE GOVERNMENT HAS ALWAYS ATTACHED GREAT IMPORTANCE TO ENVIRONMENTAL STANDARDS AND PROMULGATED A WHOLE RANGE OF POLICIES, REGULATIONS AND LAWS.

TO PROMOTE ENVIRONMENTAL PROTECTION WORK, HE SAID, CHINA HAS SENT A DOZEN DELEGATIONS TO INTERNATIONAL MEETINGS AND ON STUDY TOURS OF ENVIRONMENTAL STANDARDS OF OTHER COUNTRIES. THERE ARE A NUMBER OF CHINESE SCIENTIFIC WORKERS AND EXPERTS WORKING IN THE UNITED STATES, BRITAIN AND GERMANY ON INTERNATIONAL CO-OPERATION PROJECTS.

IN THE NEXT DECADE, JIN SAID, CHINA WILL TAKE INTO ACCOUNT THE NEED FOR OBJECTIVE MANAGEMENT IN WORKING OUT STANDARDS FOR ENVIRONMENTAL QUALITY AND POLLUTANT DISCHARGE, AND STRIVE FOR THE MAXIMUM ECONOMIC RESULTS AND SOCIAL BENEFITS BY USING WHAT FINANCIAL AND MATERIAL RESOURCES ARE AVAILABLE. AT THE SAME TIME, CHINA WILL ATTACH GREATER IMPORTANCE TO THE ELIMINATION OF POLLUTION IN PRODUCTION PROCESSES AND INCLUDE POLLUTION-FREE TECHNOLOGICAL PROCESSES AND COMPREHENSIVE UTILIZATION IN THE STANDARDS FOR ENVIRONMENTAL PROTECTION.

RIO DE JANEIRO (OCT. 16) XINHUA - BRAZIL AGREED TO SELL FRANCE 80 TUCANO AIRPLANES, LOCAL PRESS REPORTED TODAY.

THE AGREEMENT WAS SIGNED BETWEEN BRAZIL'S AERONAUTICS COMPANY (EMBRAER) AND THE FRENCH AIR FORCE. THE DEAL IS ESTIMATED AT 200 MILLION DOLLARS.

THE TUCANO IS A MILITARY TRAINING PLANE WITH ELECTRONIC EQUIPMENTS. BRAZIL HAS SOLD 597 PLANES OF THIS KIND. THE MAIN BUYERS INCLUDE ARGENTINA, EGYPT, HONDURAS, ENGLAND, IRAQ AND PERU.

THE PLANES TO BE SOLD TO FRANCE ARE EXPECTED TO BE DELIVERED DURING 1991 AND 1994.

TOKYO (OCT. 16) KYODO - NEC CORP. SAID TUESDAY IT WILL BEGIN SHIPPING NEXT WEEK A SMALL PORTABLE PERSONAL COMPUTER (PC) WHICH COMBINES THE POWER OF A TYPICAL PC AND THE CONVENIENCE OF AN ELECTRONIC NOTEBOOK.

THE PC-98HA, CALLED THE HANDY 98, IS A 1.1 KILOGRAM, A5 PAPER-SIZED DIARY-TYPE PERSONAL COMPUTER. THE HANDY 98 IS 234 MILLIMETERS LONG, 148 MILLIMETERS WIDE AND 36 MILLIMETERS IN THICKNESS AND WILL SELL FOR 198,000 YEN, EXCLUDING TAX, COMPANY OFFICIALS SAID.

THE DIARY COMPUTER UTILIZES A 16-BIT NEC V50 MICROPROCESSOR WHICH PROVIDES 640 KILOBYTES OF USER MEMORY, 1.25 MEGABYTES OF INTERNAL MEMORY, AND A RAM (RANDOM ACCESS MEMORY) CARD SLOT.

THE RAM CARD, CONTAINING THE INTEGRATED PC SOFTWARE MS-WORKS, WILL INCLUDE JAPANESE-LANGUAGE DATABASE, SPREADSHEET, BUSINESS CHART, WORDPROCESSING, AND COMMUNICATIONS FUNCTIONS.

IT IS EQUIPPED WITH A 6.9-INCH, 640 BY 400 PIXEL RESOLUTION LIQUID CRYSTAL DISPLAY SCREEN AND A REDUCED-SIZED KEYBOARD.

IN ADDITION, THE COMPUTER IS CAPABLE OF EXCHANGING DATA WITH NEC PC-9800 SERIES MACHINES VIA AN RS-232C INTERFACE CABLE.

AN OPTIONAL DOCKING STATION INTERFACE, CONTAINING A 3.5-INCH MICRO DISK DRIVE, ENABLES THE HANDY 98 TO UTILIZE ABOUT 500 SOFTWARE APPLICATIONS AVAILABLE WITH THE PC-98LT PERSONAL COMPUTER.

THE NICKEL CADMIUM BATTERY PACK GIVES SEVEN HOURS OF COMPUTING TIME AND CAN BE RECHARGED IN 1.5 HOURS. IT HAS A LOW POWER CONSUMPTION OF 2 WATTS.

NEC EXPECTS TO SELL ABOUT 200,000 UNITS IN THE FIRST YEAR AFTER SHIPMENT, OFFICIALS SAID.

#90289k0027 10/16/1990 ~Japanese News Agency

TOKYO (OCT. 16) KYODO - NEW MACHINERY ORDERS PLACED IN AUGUST BY THE PRIVATE SECTOR EDGED UP A SEASONALLY ADJUSTED 1.1 PERCENT FROM THE PREVIOUS MONTH, THE ECONOMIC PLANNING AGENCY (EPA) SAID TUESDAY.

NEW PRIVATE-SECTOR ORDERS ROSE BY 14.7 PERCENT ON AN ANNUAL BASIS TO HIT AN ALL TIME HIGH OF 1,048.1 BILLION YEN IN THE MONTH, ECLIPSING THE PREVIOUS HIGH OF 1,036.9 BILLION YEN RECORDED IN JULY.

THE FIGURES, WHICH EXCLUDE WILDLY FLUCTUATING ORDERS FOR SHIPS AND THOSE FROM ELECTRIC POWER FIRMS, ARE SEEN AS AN EARLY INDICATOR OF TRENDS IN CORPORATE CAPITAL SPENDING.

"ALTHOUGH I CAN'T MAKE ANY PREDICTIONS FOR NEXT YEAR, MACHINERY ORDERS IN THE COMING MONTHS SHOULD REMAIN BRISK," AN EPA OFFICIAL SAID.

ORDERS IN SEPTEMBER, HOWEVER, MIGHT FALL IN REACTION TO THE STEADY GROWTH POSTED IN JULY AND AUGUST, HE SAID.

IN AUGUST, OVERALL ORDERS, INCLUDING THOSE FROM THE PUBLIC SECTOR AND THOSE FROM ELECTRIC POWER FIRMS, FELL 1.3 PERCENT FROM THE PRECEDING MONTH, BUT JUMPED 19.1 PERCENT FROM THE CORRESPONDING PERIOD LAST YEAR.

"THE MONTH-ON-MONTH DROP IN THE ORDERS IN AUGUST IS A REACTION TO THE SHARP RISE IN ORDERS FOR PLANTS AND SHIPS DURING THE PREVIOUS MONTH," THE OFFICIAL SAID.

OVERALL ORDERS ROSE BY 16.1 PERCENT ON A MONTH-ON-MONTH BASIS IN JULY AND BY A HEFTY 23.6 PERCENT FROM THE CORRESPONDING PERIOD LAST YEAR.

MACHINERY ORDERS FROM THE MANUFACTURING SECTOR INCREASED 2.8 PERCENT IN AUGUST FROM THE PREVIOUS MONTH AND 11.9 PERCENT FROM THE SAME PERIOD THE YEAR BEFORE.

THOSE FROM THE NONMANUFACTURING SECTOR SAGGED 0.7 PERCENT IN AUGUST, BUT ROSE 17.8 PERCENT FROM THE SAME MONTH LAST YEAR.

#90289k0039 10/16/1990 ~Japanese News Agency

TOKYO (OCT. 16) KYODO - SNOW BRAND MILK PRODUCTS CO. SAID TUESDAY IT HAS SIGNED AN AGREEMENT WITH U.S.-BASED IMMUNE TECHNOLOGY INC. TO JOINTLY DEVELOP MEDICINES THAT WILL PROVIDE IMMUNITIES TO A NUMBER OF DISEASES.

THE RESEARCH AGREEMENT COVERS WORK ON MEDICINES AND METHODS OF TREATMENT FOR ORGAN TRANPLANT INFECTIONS, CHRONIC RHEUMATISM, AND EARLY CHILDHOOD DIABETES, COMPANY OFFICIALS SAID.

SNOW BRAND MILK PRODUCTS WILL BE LICENSED TO MARKET IN JAPAN ANY PRODUCTS WHICH EVOLVE FROM THE COOPERATIVE RESEARCH PROJECT.

THE TWO COMPANIES WILL INITIALLY WORK TOGETHER TO DEVELOP A MEDICAL APPLICATION FOR A DISEASE-FIGHTING ORGANIC SUBSTANCE DISCOVERED BY CORNELL UNIVERSITY'S DR. JEFFREY C. LAWRENCE, WHO IS CURRENTLY CHIEF SCIENCE ADVISER TO THE U.S. FIRM, OFFICIALS SAID.

IMMUNE TECHNOLOGY, ESTABLISHED IN BOSTON, MASSACHUSETTS IN 1986, DEVELOPS BIOTECHNOLOGICAL PRODUCTS FOR MEDICAL PURPOSES.

#90289k0074 10/16/1990 ~Japanese News Agency

TOKYO (OCT. 16) KYODO - ANY ATTEMPT BY THE SOVIET UNION TO RESOLVE ITS TERRITORIAL DISPUTE WITH JAPAN BY RETURNING ONLY TWO OF THE FOUR DISPUTED ISLANDS OR SETTING THEM ASIDE FOR THE JOINT USE OF THE TWO COUNTRIES WOULD BE

"IMPOSSIBLE" TO ACCEPT, A FOREIGN MINISTRY SPOKESMAN SAID TUESDAY.

"IN ORDER TO RESOLVE THE NORTHERN TERRITORIES PROBLEM, IT IS INDISPENSABLE THAT ALL FOUR ISLANDS BE RETURNED," SPOKESMAN TAIZO WATANABE TOLD JAPANESE REPORTERS.

"ANY TWO-ISLAND OR JOINT-USE SCENARIO IS IMPOSSIBLE, THAT'S OUR POSITION," WATANABE SAID.

WATANABE WAS REACTING TO SOVIET FOREIGN MINISTER EDUARD SHEVARDNADZE'S REMARKS MONDAY IN THE SUPREME SOVIET THAT MOSCOW IS NOT CONSIDERING THE TRANSFER OF THE ISLANDS TO JAPAN, BUT THAT THEY COULD BE JOINTLY UTILIZED ECONOMICALLY BY THE TWO COUNTRIES.

THE SPOKESMAN WAS ALSO ALLUDING TO REMARKS BY PROMINENT JAPANESE POLITICIANS EARLIER THIS MONTH THAT THEY HAD BEEN INFORMED BY SOVIET OFFICIALS THAT MOSCOW WOULD BE WILLING TO RESURRECT A SINCE-DISAVOWED 1956 DECLARATION PROVIDING FOR THE TRANSFER OF TWO ISLANDS IN THE DISPUTED GROUP.

THE SOVIETS SEIZED THE FOUR ISLANDS, WHICH JAPAN REFERS TO AS ITS INHERENT "NORTHERN TERRITORIES," AT THE END OF WORLD WAR II.

WATANABE CALLED ON THE SOVIETS TO BEGIN SERIOUSLY CONSIDERING THE RETURN OF ALL FOUR ISLANDS AHEAD OF SOVIET PRESIDENT MIKHAIL GORBACHEV'S SCHEDULED VISIT TO JAPAN IN MID-APRIL.

#90289k0077 10/16/1990 ~Japanese News Agency

KNOXVILLE, TENNESSEE (OCT. 16) KYODO - THE HEAD OF TOYOTA MOTOR MANUFACTURING (TMM), A U.S. SUBSIDIARY OF TOYOTA MOTOR CORP., SAID MONDAY THE COMPANY WILL RAISE ITS ANNUAL PRODUCTION OF CAMRY SUBCOMPACT CARS FROM THE CURRENT 210,000 VEHICLES TO 240,000 AFTER 1992.

COMPANY PRESIDENT FUJIO CHO TOLD A PRESS CONFERENCE AT THE HEAD OFFICE THAT THE PLANNED PRODUCTION INCREASE WILL REDUCE IMPORTS OF THE CAMRY FROM JAPAN AND ALLOW SOME OF THE SURPLUS PRODUCTS TO BE IMPORTED TO JAPAN IN LINE WITH TOYOTA'S IMPORT EXPANSION PROGRAM.

REFERRING TO THE U.S. AUTO MARKET, WIDELY REPORTED TO BE SLUGGISH, CHO SAID HE SEES NO DRAMATIC CHANGE IN DEMAND FOR THE COMPANY'S PRODUCTS FOR THE TIME BEING.

ANNUAL SALES OF THE CAMRY IN THE U.S. MARKET CURRENTLY STAND AT 270,000-280,000 VEHICLES.

#90289k0084 10/16/1990 ~Japanese News Agency

TOKYO (OCT. 16) KYODO - A TOTAL OF 94 DOMESTIC FLIGHTS WILL BE CANCELLED SHORTLY BEFORE AND AFTER THE ENTHRONEMENT OF EMPEROR AKIHITO ON NOVEMBER 12 TO MAKE ROOM FOR SPECIAL FLIGHTS CARRYING FOREIGN DIGNITARIES, TRANSPORT MINISTRY OFFICIALS SAID TUESDAY.

THE CANCELLATION WILL OCCUR ON NOVEMBER 10, 11, AND 14, THE OFFICIALS SAID.

FOREIGN DIGNITARIES FROM ABOUT 150 COUNTRIES AND ORGANIZATIONS ARE SCHEDULED TO ATTEND THE ENTHRONEMENT CEREMONY. MISSIONS FROM SOME 30 COUNTRIES PLAN TO COME ON SPECIAL FLIGHTS, THE OFFICIALS SAID.

SPECIAL FLIGHTS ARRIVE AT HANEDA AIRPORT IN TOKYO. THE DEFENSE AGENCY WILL TRANSFER DIGNITARIES WHO ARRIVE AT THE NEW TOKYO INTERNATIONAL AIRPORT IN NARITA, 50 KILOMETERS EAST OF TOKYO, TO CENTRAL TOKYO BY HELICOPTERS AND YS-11 TURBOPROP PLANES, THEY SAID.

HANEDA AIRPORT IS FILLED TO CAPACITY BY REGULAR FLIGHTS, SO THE MINISTRY HAS ASKED AIRLINES TO CANCEL 94 FLIGHTS TO MAKE WAY FOR THE DIGNITARIES, THEY SAID.

THE MINISTRY ALSO HAS URGED AIRPORTS ACROSS THE COUNTRY TO TIGHTEN SECURITY DURING THE PERIOD.

#90289k0088 10/16/1990 ~Japanese News Agency

TOKYO (OCT. 16) KYODO - THE FOUNDER OF AMERICAN FAMILY LIFE ASSURANCE CO. JOHN B. AMOS, WHO DIED IN AUGUST, WILL BE DECORATED WITH JAPAN'S SECOND CLASS ORDER OF THE SACRED TREASURE FOR HIS CONTRIBUTION TO REDUCING TRADE FRICTION WITH THE UNITED STATES, GOVERNMENT SOURCES SAID TUESDAY.

THE DECISION WAS MADE IN THE DAY'S CABINET MEETING, THE SOURCES SAID. AMOS WILL BE THE FIRST FOREIGN BUSINESSMAN IN THE FINANCIAL SERVICES INDUSTRY POSTHUMOUSLY AWARDED A JAPANESE ORDER.

AMOS, AS THE CHAIRMAN OF AMERICAN FAMILY LIFE ASSURANCE, BASED IN COLUMBUS, OHIO, SUCCESSFULLY POPULARIZED CANCER INSURANCE IN JAPAN.

HE WAS KNOWN AS A SUPPORTER OF JAPAN AGAINST THE U.S. GOVERNMENT AND CONGRESS AT A TIME WHEN TRADE FRICTION BETWEEN THE TWO COUNTRIES WAS WORSENING, ASSERTING THAT THE JAPANESE MARKET WAS NOT REALLY CLOSED.

HIS COMPANY ALSO CARRIED NEWSPAPER ADVERTISEMENTS INFORMING READERS OF ITS SUCCESS IN SELLING CANCER INSURANCE IN JAPAN.

THE CEREMONY CONFERRING THE ORDER IS SCHEDULED FOR MID-NOVEMBER IN WASHINGTON, ACCORDING TO THE SOURCES. AS AMOS DIED IN AUGUST AT AGE 66, HIS WIDOW ELENA WILL TAKE PART IN THE CEREMONY, THEY ADDED.

#90289k0092 10/16/1990 ~Japanese News Agency
TOKYO (OCT. 16) KYODO - EMPLOYEES AT FOREIGN-AFFILIATED COMPANIES IN JAPAN ARE MUCH MORE LIKELY TO HAVE WEEKENDS COMPLETELY OFF AND TO TAKE ALL THEIR PAID VACATION TIME THAN THOSE AT JAPANESE-OWNED FIRMS, ACCORDING TO A SURVEY RELEASED TUESDAY.

THE FIVE-DAY WORK WEEK HAS BEEN FULLY ADOPTED AT 85.5 PERCENT OF FOREIGN-OWNED FIRMS, COMPARED WITH ONLY 9.6 PERCENT OF JAPANESE COMPANIES, THE JAPAN PRODUCTIVITY CENTER FOUND IN THE SURVEY, CONDUCTED IN MARCH.

AT A JAPANESE SUBSIDIARY OF THE WORLD'S TOP RANKING COMPREHENSIVE CHEMICAL MAKER, 87.4 PERCENT OF ALL EMPLOYEES USED UP THEIR ANNUAL PAID HOLIDAYS, COMPARED TO THE JAPANESE AVERAGE OF 51.5 PERCENT.

OFFICIALS IN CHARGE OF LABOR AFFAIRS AT FOREIGN COMPANIES TOLD THE CENTER THEY ARE ENCOURAGING EMPLOYEES TO TAKE DAYS OFF. MANY OF THE COMPANIES FEEL IT IS THE RESPONSIBILITY OF SENIOR STAFF TO MAKE SURE THEIR YOUNGER COLLEAGUES USE THEIR VACATION TIME, THE CENTER SAID.

AT THE JAPANESE SUBSIDIARY OF A MAJOR FOREIGN OIL COMPANY, EXECUTIVES ENTRUST THEIR SUBORDINATES WITH THEIR JOBS WHEN THEY GO ON VACATION AND KEEP ANY COMPLAINTS ABOUT THE RESULTS TO THEMSELVES, THE CENTER SAID. THIS NOT ONLY LETS THE EXECUTIVES HAVE TIME OFF, IT GIVES OTHER EMPLOYEES A CHANCE TO DEVELOP THEIR ABILITIES, IT SAID.

MANY FOREIGN-CAPITALIZED FIRMS ALLOW PAID SICK LEAVE, THE CENTER NOTED. HOWEVER, EVEN IF EMPLOYEES AT FOREIGN COMPANIES HAVE MORE TIME OFF, THEY WORK HARD WHILE THEY ARE ON THE JOB, THE CENTER NOTED.

THE CENTER, WHICH PROMOTES BUSINESS EFFICIENCY, SENT QUESTIONNAIRES TO 2,525 COMPANIES WITH FOREIGN CAPITAL OF OVER 50 PERCENT, OF WHICH 502 COMPANIES RESPONDED.

#90289k0093 10/16/1990 ~Japanese News Agency
MANILA (OCT. 16) KYODO - FIVE HEAVILY ARMED MEN ROBBED TWO JAPANESE NATIONALS AND THEIR THREE FILIPINA COMPANIONS OF SOME 1.7 MILLION PESOS (ABOUT 9 MILLION YEN) IN CASH AND JEWELRY SHORTLY AFTER THEIR ARRIVAL IN MANILA, POLICE REPORTED TUESDAY.

POLICE CORPORAL REYNALDO BACULAN IDENTIFIED THE VICTIMS AS MINORU HIRAYAMA, 40 AND YUICHI AJIMA, 29, WHOSE ADDRESSES IN JAPAN WERE NOT AVAILABLE. BOTH SAID THEY WERE BUSINESSMEN.

BACULAN SAID THAT THE TWO JAPANESE WERE FETCHED BY THEIR FEMALE FRIENDS AT THE AIRPORT AT 10 P.M. ON MONDAY AND WERE BOUND FOR THE HOLIDAY INN WHEN THEY WERE ROBBED.

THE VICTIMS SAID THAT WHILE CRUISING ALONG THE WATERFRONT ROXAS BOULEVARD, A CAR SUDDENLY BLOCKED THEIR PATH.

FIVE MEN ARMED WITH .45 CALIBER PISTOLS AND M-16 ASSAULT RIFLES EMERGED FROM THE BLOCKING CAR, POINTED THEIR GUNS AT THEM, FORCED THE THREE FEMALE COMPANIONS OUT OF THE VEHICLE AND TOOK THE TWO JAPANESE AWAY, THE VICTIMS SAID.

HIRAYAMA AND AJIMA TOLD POLICE THAT THEY WERE DUMPED UNHARMED BY THE SUSPECTS IN A MAKATI STREET AFTER BEING DIVESTED OF CASH AND JEWELRY.

THEY SAID THE MONEY TAKEN FROM THEM WAS INTENDED TO PAY FOR EXPENSES OF "CULTURAL DANCERS" TO BE BROUGHT TO JAPAN. POLICE SAID THE DUO WERE THE SEVENTH AND EIGHTH VICTIMS SINCE SEPTEMBER 12 OF A SYNDICATE PREYING ON JAPANESE.

#90289k0099 10/16/1990 ~Japanese News Agency

JAKARTA (OCT. 16) KYODO - PRESIDENT SOEHARTO OF INDONESIA ON TUESDAY APPEALED FOR THE INDUSTRIALIZED COUNTRIES TO RELEASE THEIR STOCKPILED OIL TO COPE WITH THE CURRENT OIL CRISIS.

THE APPEAL CAME IN AN OPENING ADDRESS TO THE INTERNATIONAL ENERGY CONFERENCE UNDERWAY HERE UNTIL OCTOBER 18.

ORGANIZATION OF PETROLEUM EXPORTING COUNTRIES (OPEC) OIL MINISTERS SADEK BOUSSENA OF ALGERIA, JIBRIL AMINU OF NIGERIA, CELESTINO ARMAS OF VENEZUELA, GINANJAR KARTASASMITA OF INDONESIA, AND OPEC SECRETARY GENERAL SOEBROTO ARE ATTENDING.

AT A LATER PRESS CONFERENCE SOEBROTO SAID PETROLEUM PRODUCTION IS FALLING SHORT OF WORLD CONSUMPTION BY AN ESTIMATED 1.8 MILLION BARRELS PER DAY (BPD), NECESSITATING THE RELEASE OF STOCKS BY THE GOVERNMENTS OF THE CONSUMER COUNTRIES TO FILL THE GAP.

SOEBROTO STRESSED THAT THE ESTIMATED SHORTAGE DOES NOT TAKE INTO CONSIDERATION THE COMING INCREASE OF OIL DEMAND OVER THE WINTER, POSSIBLE MISHAPS IN THE NORTH SEA, OR A DECLINE IN SOVIET PRODUCTION.

HOWEVER, JIBRIL AMINU ADMITTED THAT OPEC CAN ONLY APPEAL FOR THE COOPERATION OF THE CONSUMER COUNTRIES.

WORLD OIL PRICES SOARED TO 40 DOLLARS PER BARREL LAST WEEK, MORE THAN DOUBLE THE PRICE PREVAILING BEFORE THE GULF CRISIS.

IN AN EARLIER STATEMENT GINANJAR PREDICTED THE PRICE OF CRUDE COULD REACH MORE THAN 50 DOLLARS PER BARREL SHOULD WAR BREAK OUT IN THE GULF REGION.

ON THE OTHER HAND, ALGERIAN OIL MINISTER BOUSSENA STRESSED THAT IT IS VERY DIFFICULT TO PREDICT OIL PRICES AND THAT OPEC'S ONLY MEANS TO CONTROL PRICES WAS THROUGH PRODUCTION LEVELS, WHICH NOW SEEM INADEQUATE TO MEET DEMAND.

OPEC HAS DONE WHAT IT CAN AND THE BALL IS NOW IN THE CONSUMER COUNTRIES' COURT SAID BOUSSENA.

#90289m0001 10/16/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 16) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei posts another gain, adding 497 points. ... In London the FTSE is off 4 points at midday. ... Bonds are lower with the yield on the thirty year Treasury up to 8.95%. ... The dollar is mixed. ... Brent North Sea crude is off 50 cents to $37.30 in overseas trading. retail and wholesale revenue rose 2.1% from July to August, mostly due to inflation. ... PRESIDENT MIKHAIL S. GORBACHEV of the Soviet Union has been named the 1990 winner of the Nobel Peace Prize in recognition of his initiatives in promotion of international peace. ... UNITED AIRLINES has placed a $22 billion order with BOEING for 128 widebody jets. ... IBM net income for the third quarter jumped 26% to $1.95 a share, slightly below expectations. ... PEPSICO reports a 25% earnings increase in the third quarter. ... GENERAL MOTORS reports a 13.3% gain in early-October car sales, but overall Big Three auto sales fell 5.8%.

WHAT'S AHEAD:

FEDERAL RESERVE BOARD CHAIRMAN ALAN GREENSPAN addresses the American Stock Exchange Conference this morning. ... FED GOVERNOR MARTHA SEGER addresses the National Economists Club on the U.S. Banking system.

FROM THE BULLS:

A big rally ahead to confound the bears? JAMES DINES of the "Dines Letter" believes recent market action indicates a bottom. "The market is so oversold ... we would not be surprised to see an extremely sharp rally." Dines says a move to 2560 would be encouraging, with a gain to 2605 suggesting a rally above 2700. "Some bargains are opening up that make us drool ... [but] we don't see much harm in waiting a bit longer [to buy]." (CNBC "World Business" 10/16)

FROM THE BEARS:

"I don't think there is a sustainable upward move yet," says DAN WILLIAMS, manager of institutional trading at DILLON READ. "We're getting a technical bounce off some lows, but the trend is still lower." (WSJ, 10/16)

"I wouldn't make much of this rally," says RICK ASTER, manager of the MERIDIAN FUND. "The market is still in a downtrend and is being steered by the latest rumors on the budget and what is happening in the Middle East." He says the market should bottom within six months. ("Investor's Daily", 10/16)

Stocks are in the midst of a primary bear market, says RICHARD EVANS of "Dow Theory Forecasts." Evans says his indicators point to a rebound rally in the bear market, but adds: "Investors must assume that prospects for stocks will deteriorate." (CNBC "World Business" 10/16)

The bear market "has not yet run its course," says noted Wall Street bear H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & COMPANY. On a more positive note he adds, "Now is the time for portfolio managers to plan for economic recovery next year. The pessimism is overdone. You've got to start planning for a recovery." (NYT, 10/16)

STOCK MARKET:

"We'll probably have a flat opening and maybe an attempt to rally later," says WILLIAM RAFTERY, a technical analyst at SMITH BARNEY, HARRIS UPHAM. Overall, he believes the market will head higher today. (Reuters, 10/16)

"We will get rallies," says HILDEGARDE ZAGORSKI of PRUDENTIAL-BACHE. "We do get some pretty nice rallies in bear markets and this could be the beginning of a fairly good one. We don't know. ... Our advice, basically, is to sell on these rallies because we think the market has further to go on the downside." (CNBC's "Market Wrap-Up", 10/15)

PAUL HENNESSEY, head equities trader at BOSTON CO. says that selling pressure is easing. "We're still rebounding from last week's 100- point drop." He is cautious and doesn't think it's party time yet. (WSJ, 10/16)

KENNETH TOWER, technical analyst at DELAFIELD HARVEY, TABELL INC., thinks the market is near a bottom, but adds that "very bottom or the very end of the market can be very volatile, so I'm cautious as far as jumping in with both feet here for short-term investors." (CNBC's "Market Wrap-Up", 10/15)

"The stock market is once again moving inversely to oil prices, but there are other factors here" says MICHAEL METZ at OPPENHEIMER & CO. "Steady bonds is one and although IBM earnings came in a little below expectations, there was no disaster. The stock is holding fairly well partly because of optimistic statements about future business." ("The Washington Post", 10/16)

"People have been burnt by several rallies already and are learning that you sell on these advances and buy on the retreats," says A. MARSHALL ACUFF JR., portfolio strategist at SMITH BARNEY, HARRIS UPHAM. He says there is no evidence that the latest advance is anything more than a "bear market rally." (WSJ, 10/16)

Many institutions are holding off until the crush of earnings reports of the next couple of weeks to decide whether to put money to work in stocks. Among the most anticipated reports are a flurry from drug companies and regional telephone companies. "If they come out poor, it's strong confirmation that we are heading into recession," says CHRIS PEDERSEN at STOVALL/TWENTY-FIRST ADVISERS. Analyst MELISSA BROWN at PRUDENTIAL-BACHE says she is worried about overly high expectations for drug company earnings. ("USA Today", 10/16)

STOCK TIPS:

JAMES STONE of LADENBURG, THALMANN & CO. says the IBM earnings report "was a slight disappointment. ... The major disappointment was that the product sales were down year-over-year." However, he says he views that as "a very short-term phenomenon awaiting the outcome of the new system 390s which will just begin shipping." (CNBC's "Market Wrap-Up", 10/15)

Poor earnings announced by IBM are a harbinger of things to come from other companies, says EDWARD MATLUCK of ZACKS INVESTMENT SERVICES. Earnings will be down for the third quarter and "the fourth quarter is not looking well at all " according to Matluck. He says analysts tend to be overly optimistic and slow to lower earnings estimates. "Now that it's clear the economy is falling into a recession, the revisions are coming in hot and heavy." Earnings estimates are rising in the energy sector and holding up well in the cosmetics, personal care and medical areas. (CNBC "World Business", 10/16)

Stock in POLAROID CORP. dropped 22% on news of lower damages than the market expected in its patent suit against EASTMAN KODAK. "We're not recommending that people use the weakness of the stock as a buying opportunity because earnings will continue to flag," says ALEX HENDERSON, an analyst at PRUDENTIAL-BACHE SECURITIES INC. PETER ENDERLIN, an analyst at SMITH BARNEY, HARRIS UPHAM, disagrees: "Now that the stock has gotten massacred, I think it's a good buy." He does concede theat "I'm probably the only person who does." (WSJ, 10/16)

The defense industry is undergoing a period of consolidation as the U.S. adjusts it's military strategies. HOWARD RUBEL, defense analyst at C.J. LAWRENCE, says a House bill calling for greater numbers of fast supply ships would primarily benefit AVONDALE INDUSTRIES. His favorite stocks in the defense group are MCDONNELL DOUGLAS, where management is reorienting itself away from defense, and BOEING which continues to launch new, advanced aircraft programs. (FNN "World Market Update", 10/16)

WALTER F. LOEB, president of LOEB ASSOCIATES, New York financial consultants, is certain that WAL-MART STORES "will gain market share during the Christmas season whether it is good or bad, as will TOYS R US." He adds, "I think HOME DEPOT stands to do well no matter what because if offers ego-satisfaction merchandise to people who like to use their hands." In stock prices, he sees Wal-Mart rising to $34 a share from the current $29 and Home Depot going to $32 from $29. (NYT, 10/16)

Insurance issue CINCINNATI FINANCIAL was up 5 1/4 to 71 1/4, but "it just looks like a lot of people covering shorts," according to FIREMARK INSURANCE RESEARCH's WILLIAM DOLSON. He says Cincinnati has recovered from heavy payouts after Hurricane Hugo, and should meet or exceed earnings estimates. ("Investor's Daily", 10/16)

"Investors should use any rallies in the weeks ahead to pare back positions," says a bearish RICHARD EVANS of "Dow Theory Forecasts." However, Evans suggests that investors hold GENERAL ELECTRIC, PEPSICO and WESTINGHOUSE. (CNBC "World Business", 10/16)

-30- 8708

#90289m0002 10/16/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (OCT. 16) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"Although only one currency [the Australian dollar] had selling news, the high-yield currencies [including the pound, the Canadian dollar and the New Zealand dollar] tended to move in tandem," says THOMAS BENFER, senior marketing representative at BANK OF MONTREAL in New York. (WSJ, 10/16)

"Most of the [currency] activity was in cross-trading, with movement out of high - yielding currencies ... and movement mostly on yen," says RONALD HOLZER of HARRIS TRUST & CO. ("Investor's Daily", 10/16)

"The bond market is poised for a major rally," says H. ERICH HEINEMANN, chief economist for LADENBURG, THALMANN & COMPANY. That, he adds, "could create a tide that will lift all Wall Street boats." (NYT, 10/16)

"I'm disappointed we haven't had a bigger [bond] rally," says MICHAEL ROSEN, vice president of FIRST INTERSTATE BANK LTD. in Los Angeles. "Oil is down, gold is down, the CRB index is down. We should be a lot higher." He adds, "Concern over the budget and the prospects for war are holding people back. People are still very cautious and very tentative." (WSJ, 10/16)

"The last few weeks [the long-bond yield] has fluctuated around the 9% yield level. It seems to have found an equilibrium and doesn't seem willing to go too far one way or the other until we get some resolution" of the standoff in the Middle East and the budget, says ROBERT McGEE, economist at TOKAI BANK LTD. in New York. (WSJ, 10/16)

THE ECONOMY:

"The oil shock now suggests it's going to be difficult for the economy to grow ... until the middle of next year," says MICHAEL BOSKIN, chairman of the White House COUNCIL OF ECONOMIC ADVISERS. (FNN "Marketwrap", 10/15)

"Lack of confidence, lack of investment, lack of spending [and] a defensive attitude on most people's parts" are the factors which are hurting the economy according to JEFFREY CHANDOR of MERRILL LYNCH. (FNN "Marketwrap", 10/15)

According to the COMMERCE DEPARTMENT, business inventories increased by 0.5% which was more than offset by the 2.1% rise in total business sales. "Overall I think the inventory situation has been very well contained," says JOAN SCHNEIDER, senior domestic economist with CONTINENTAL BANK NATIONAL TRUST & CO. in Chicago. (WSJ, 10/16)

Early October car and light truck sales declined by 2.1%. "This is the sort of weakness that I expected to see develop much earlier," said TOM WEBB, chief economist of the NATIONAL AUTOMOBILE DEALERS ASSOCIATION. "People simply don't have the money or confidence to buy in the present market." (WSJ, 10/16)

In retail sales "customer confidence is the problem," says JOHN SCHULZ, president of the New York services division of the NATIONAL RETAIL FEDERATION. "No one at this stage knows if there will be a war or what the price of oil will be in December. The deficit- reduction program helped to shore up confidence in the financial markets. Still, the consumer is very concerned. But if the Mideast situation is resolved without a war, we could have a very fair Christmas season." (NYT, 10/16)

"The gulf crisis and the subsequent upheavals in the oil and stock markets have combined with the warnings of recession and higher interest rates in many countries to repress the M. and A. [mergers and acquisitions] market," says HERBERT ADLER, international mergers and acquisitions partner for accounting firm KPMG PEAT MARWICK in New York. (NYT, 10/16)

IN WASHINGTON:

"They're in fact, simply calling for the redistribution of wealth," says House Minority Leader BOB MICHEL (R. - Ill,), commenting on the budget plan proposed by Ways and Means Chairman DAN ROSTENKOWSKI (D. - Ill.), which would increase tax rates for the wealthy. Michel criticizes the plan, saying, "A policy of simply taxing the rich won't create one new job." A floor fight is expected

today when Democrats try to amend the current package to include those increases. (FNN "Marketwrap", 10/15)

The budget conciliation talks are "where Members put their money where their mouth is," says REP. LEON PANETTA (D. - Calif.), who chairs the House Budget Committee. He says, "Those who have talked a lot about deficit reduction" must now act to bring about meaningful reduction. ("Nightly Business Report", 10/15)

"The single most important thing we can do to take out some insurance to improve our short- and medium-term [economic] performance is to get a good, multi-year, credible, enforceable, growth-oriented deficit reduction package now," says MICHAEL BOSKIN, chairman of the president's COUNCIL OF ECONOMIC ADVISERS. He says the White House is sticking to its forecast that the economy is not in or heading for a recession, partly because he sees declining oil prices. (CNBC's "Market Wrap-Up",)

#90289p5148 10/16/1990 ~PR Newswire

IRVINE, CALIF. (OCT. 16) PR NEWSWIRE - Rainbow Technologies Inc. (NASDAQ: RNBO) today reported that its net income during the nine- month period ended Sept. 30 rose 33 percent compared to earnings for the first three quarters of last year.

Net income totaled $1,509,000 for the first nine months of Rainbow's current fiscal year, up from 1989's total of $1,133,000. Revenues for the period climbed above the $10 million mark to $10,149,000, a 27 percent increase compared to revenues of $8,015,000 reported for the same period last year.

Income per share for the first three quarters of 1990 reached $0.38 based on 3,975,000 shares outstanding, also a 27 percent increase compared to $0.30 per share based on 3,797,000 average shares outstanding for the comparable period in 1989.

For the three-month period ended Sept. 30, Rainbow reported net income of $336,000, a 3 percent increase over earnings of $326,000 for last year's comparable period. Revenues rose 14 percent to $3,234,000 compared to $2,830,000 for 1989's third quarter.

Income per share for 1990's third quarter totaled $0.09 based on 3,850,000 average shares outstanding, unchanged from the $0.09 reported last year based on 3,808,000 average shares outstanding.

#90289p5151 10/16/1990 ~PR Newswire

SAN FRANCISCO (OCT. 16) PR NEWSWIRE - X/Open Company Ltd., the international open systems consortium, today said that Amdahl Corp. (AMEX: AMH) has become a full corporate member of X/Open. At the same time, X/Open said that five major U.S. and European corporations and governement agencies have become members of X/Open's User Council.

Amdahl's UTS and UTS Multilevel Security (UTS/MLS) Unix systems are designed to meet the requirements of large data center operations with respect to reliability, capacity, performance, and security. They are the only standalone UNIX systems for System/370 processor. "The UTS system represents a key strategic direction for Amdahl and one that is consistent with X/Open's goals and directions," said Francesconi.

The new U.S. members of the User Council are Boeing Computer Services, the U.S. Department of Agriculture-Farmers' Home Administration, and the U.S. Treasury Department. The new European members are the Swedish Telecom Group and Union Bank of Switzerland.

The X/Open User Council is responsible for specifying open systems requirements and priorities to other X/Open stakeholders -- member companies, system vendors and ISVs. The basis for determining these requirements is X/Open's Xtra market research process, whereby major computer systems users, as well as systems and software companies, have direct involvement in defining the open systems of the future. The User Council's input is highly valued and influences X/Open and member companies in product development and sales.

The Swedish Telecom Group is Sweden's largest investor and employs 50,000 people. Its areas of activity include voice and data communications services and products, cable TV, broadcast radio and mobile telecommunications.

The Union Bank of Switzerland is a $3.7 billion financial group with interests and offices throughout the world. The company spent approximately $150 million on mainframes, terminal systems, telecommunications and software in 1989.

Amdahl Corp. is a major supplier of large-scale, general-purpose mainframe computers, data storage subsystems and data communications products. With annual sales in excess of $2 billion, the company also develops software and provides educational and consulting services.

X/Open Company Ltd., founded in 1984, is an independent, non-profit corporation made up of international computer system vendors who are investing business, marketing and technical resources in the specification of the X/Open Portability Guide (XPG), a vendor- independent, open operating environment based on de facto and international standards. Specification of the XPG is

achieved through close cooperation with users, independent software vendors and standards organizaitons worldwide.

#90289p5152 10/16/1990 ~PR Newswire

SAN FRANCISCO (OCT. 16) PR NEWSWIRE - Wells Fargo & Co. (NYSE: WFC) today reported that earnings per share in the third quarter of 1990 were $3.03, an increase of 7 percent from $2.83 in the third quarter of 1989. Net income in the third quarter of 1990 totaled $162.6 million, an increase of 6 percent from $153.7 million in the third quarter of 1989.

Earnings in the third quarter of 1990 benefited from an increase in net interest income, which resulted mostly from an increase in loans and lower funding costs. This increased net interest income was offset partially by higher non-interest expense.

Net interest income on a taxable-equivalent basis was $589.9 million in the third quarter of 1990, compared with $544 million a year ago. The company's net interest margin was 5.14 percent, compared with 4.96 percent a year ago.

For the first nine months of 1990, net income was $554.8 million, or $10.48 per share, compared with $442.6 million, or $8.07 per share, a year earlier.

Earnings for the first nine months of 1990 benefited from a $116.5 million pre-tax gain that resulted from the establishment of Wells Fargo Nikko Investment Advisors (WFNIA), Wells Fargo's joint venture with Nikko Securities Co. Ltd. Without the after-tax effect of the WFNIA gain, earnings for the first nine months of 1990 would have been $486.2 million, or $9.14 per share.

Return on average assets (ROA) was 1.26 percent and return on average common equity (ROE) was 21.93 percent in the third quarter of 1990, compared with 1.25 percent and 24.42 percent, respectively, a year ago.

Non-interest income in the third quarter of 1990 was $195.3 million, compared with $191.9 million a year ago. Non-interest expense totaled $426.4 million, compared with $393.4 million a year ago.

The provision for loan losses in the third quarter of 1990 was $75 million, compared with $75 million in the second quarter of 1990 and $82 million in the third quarter of 1989. Net charge-offs for the third quarter of 1990 totaled $45.8 million, or 0.41 percent of average loans. At Sept. 30, 1990, the allowance for loan losses equaled 1.90 percent of total loans.

The ratio of common equity to total assets at Sept. 30, 1990, was 5.54 percent

compared with 4.97 percent at Sept. 30, 1989; primary capital was 8.37 percent, compared with 8.09 percent; and total capital was 11.91 percent, compared with 11.94 percent.

In July, Wells Fargo entered into a definitive agreement with Great American Bank for the purchase of 130 branches in California, with $6.4 billion in deposits. Great American is headquartered in San Diego. The first stage of the acquisition is expected to be completed by the end of 1990.

#90289p5153 10/16/1990 ~PR Newswire

SPOKANE, Wash. (OCT. 16) PR NEWSWIRE - Golden State Capital Corp., manufacturer of the Future Flush(TM) water-saving device for toilets, announced today a Distributorship Agreement with Centurion International, an importer/exporter in Mexico City.

Con-Tech Industries has received governmental approval to sell Future Flush into Mexico and passed the Mexican federal research committee testing. In addition, a contract has been signed for the exclusive distribution of Future Flush to the Mexico City area. This contract, subject to a 30-day cancellation provision, requires a minimum purchase of over 500,000 units within the first 12 months, to be paid for upon delivery by letter of credit.

Future Flush is a dual flush mechanism that saves water in toilets and operates by separating the functions of removing liquid wastes and paper from the removal of solid wastes. This is accomplished by a dual-handle system. A shorter inset handle triggers a low-volume flush for liquids and paper while the longer handle initiates a full flush for solids.

Con-Tech Industries has signed documents with U.S., Canadian and Mexican Plumbing Products manufacturers to begin the development of Original Equipment Manufacturer (OEM) supplier relationships.

The company has also announced its entrance into the retail market with products in 300 regional and national stores and distribution centers, which represents availability of Future Flush in 36 states, three territories and two foreign countries. The most recent addition to the list of retail accounts is the sale of 15,000 units to Sam's Wholesale Clubs, a division of Wal-Mart, the largest retailer in the United States, and an order to Builders Square, a subsidiary of K-Mart. Future Flush is also available at participating Ace, True Value and Servistar dealers as well as Hardware Home Center Stores and United States Military Exchanges.

Future Flush has recently received approval by the International Association

of Plumbing Mechanical Officials (IAPMO), the agency in charge of writing various national and international plumbing and mechanical codes, and issuing its world-wide recognized stamp of approval - the UPC symbol or Uniform Plumbing Code stamp. In addition, Future Flush has passed tests independently conducted by the U.S. Testing Laboratories according to standards set for functional operation, durability and hydraulic performance. This makes Future Flush the first and only dual flush or water-saving device for toilets to receive an IAPMO listing and pass the test criteria as set forth in the American Society of Mechanical Engineers (ASME) and the American National Standard Institute (ANSI) draft creating a national standard for dual flush devices for toilets.

In a move to coordinate the Future Flush product name with its manufacturing arm, Con-Tech Industries Inc., Golden State Capital Corp., a publicly held company, has approved a name change from Golden State Captial Corp. to Con-Tech Systems Inc. (OTC Bulletin Board).

#90289p5158 10/16/1990 ~PR Newswire

ATLANTA (OCT. 16) PR NEWSWIRE - Garland P. Castleberry, the Federal Aviation Administration's southern region administrator, will cut a ribbon here on the morning of Oct. 30, sending aloft three six-foot balloons in front of the

Georgia International Convention & Trade Center.

He will officially open the Inter Airport '90 exhibition and conference program.

The balloons symbolize three pillars of the aviation industry's growing role in transportation:

1) Improved airport services for passenger satisfaction and security; 2) Greater cargo handling efficiency; 3) Higher standards of maintenance.

What this comes down to, according to Julia Milne, exhibition director of International Airport Exhibitions, is a global conference and exhibition inside and adjacent to the center, featuring hundreds of ground-support products and services that keep both the commercial airlines and general aviation aircraft flying safely and efficiently.

The products on display include big things like boarding bridges and baggage conveyors and carousels; powerful things like tow tractors, runway snowblowers and terminal and hangar construction equipment; critical things like maintenance tools and instruments, plane refuelers and de-icers, and lavatory servicing vehicles; deceptively simple-looking but highly engineered things like cargo containers and wheel chocks; high-tech things like communication systems -- and more.

The balloons will loft banners identifying the three major ground support groups being emphasized at Inter Airport '90, namely airport facilities, air cargo, and aircraft maintenance. Suppliers to these sectors began showcasing their respective innovations in 1983, at a joint exhibition in Frankfurt, Germany, organized by the U.K.-based company represented by Milne and by Heckmann GmbH, of Germany.

Because the United States has the largest ground-support industry of any country, Milne says, the annual exhibition was unveiled in Atlanta in 1988, and put on an alternate-year schedule with Frankfurt. And since FAA resources and policies play such an important role in international aviation, Castleberry agreed to launch this year's event -- and to provide the opening address and welcome some 147 exhibitors from nine countries in the world's air network.

#90289p5159 10/16/1990 ~PR Newswire

MIAMI (OCT. 16) PR NEWSWIRE - AT&T today announced it will donate computer equipment valued at nearly $1.2 million to the University of Miami for use in the university's medical school. When combined with other computer equipment

donated to the university in recent years, AT&T's gifts total more than $3 million.

"This grant of AT&T's latest technology, training and technical support provides researchers with badly needed additional computing power and networking capabilities for applying the latest technological advancements to the search for a better understanding of medical conditions and diseases, such as high risk pregnancies and AIDS," said Robert Rubin, Ph.D., vice provost for research at the University of Miami Medical School. "We are extremely grateful for AT&T's generosity."

The equipment includes a UNIX (A) networked computing platform for clinical research, involving AT&T Starlan -- an easy-to-install local network, AT&T 6386 SX UNIX WorkGroup Systems and AT&T 3B2 computers -- powerful midrange computers.

"This state-of-the-art computing equipment, when combined with the talent of researchers at the University of Miami, provides a tremendous research advantage," said Barry E. Johnson, regional manager of corporate affairs for AT&T. "Hopefully, these technological tools will allow university researchers to win the battle against deadly diseases."

The AT&T computers employ open standards and open architecture to allow systems integration to provide the university with a flexible research database. AT&T's computer donation is part of the company's University Equipment Donation Program, which will give $16.2 million in computer and data networking products to 52 colleges and universities across the United States. The program has been offered by AT&T since 1984.

WICHITA, KS (OCT. 16) PR NEWSWIRE - Air Midwest, Inc. (NASDAQ-NMS: AMWI) has entered into an agreement with USAir to provide USAir Express service connecting its midwestern cities with Kansas City and Denver, beginning Jan. 15, 1991.

USAir Express service provided by Air Midwest will operate between Kansas City and 14 other smaller cities. At Kansas City connections will be available to USAir's 30 daily jet flights to other major cities throughout the nation.

Seven communities will be linked with Denver by the new USAir Express service. USAir has daily jet service between Denver and its three largest connecting hubs, Pittsburgh, Charlotte and Baltimore/Washington International.

Air Midwest currently operates 52 daily flights at Kansas City, more than any other carrier. At Denver, Air Midwest provides six daily flights.

Air Midwest will become the 10th regional airline to fly under the USAir Express name. Four are wholly-owned subsidiaries of USAir Group (NYSE: U), the parent firm of USAir, while the remainder are independent firms like Air Midwest which operate under contract.

USAir developed the concept of joint operating and marketing agreements with regional airlines in 1967 and has seen it subsequently emulated by most other major airlines.

The nine current USAir Express operators serve 133 airports across the USAir route system. In 1990 they will carry a total of approximately 6 million passengers.

DALLAS (OCT. 16) PR NEWSWIRE - Mary Kay Corporation announced today that it had extended to midnight, Oct. 16, the period during which the holders of its 15 percent discount debentures could consent to certain proposed amendments to the terms of the debentures and receive a cash payment of $10 per $1,000 principal amount of debentures.

The consent solicitation is being made in connection with Mary Kay's offer to purchase at par up to 64 percent of its outstanding debentures, which commenced Sept. 28. The company also extended to midnight, Oct. 16, the period during which tendered bonds would be given priority for purchase in the tender offer. Both the solicitation period and the priority period were previously scheduled to expire at midnight on Oct. 15. The tender offer remains scheduled to expire at midnight on Oct. 30.

The tender offer is conditioned, among other things, upon the receipt of all the necessary financing and the consent of the holders of a majority of the outstanding debentures to the proposed amendments. The tender offer is not conditioned on any minimum amount of debentures being tendered.

Dewe Rogerson Inc. is acting as information agent for the company in the tender offer.

MENASHA, WI (OCT. 16) PR NEWSWIRE - Wisconsin Tissue, a wholly owned subsidiary of Chesapeake Corp. (NYSE: CSK), will celebrate the completion of its Eagle II expansion with a dedication ceremony today.

The $160 million expansion is the largest single expenditure in the history of Wisconsin Tissue and Chesapeake Corp.

Honored guests expected at the dedication include: Tommy Thompson, governor of Wisconsin; Michael Ellis, state senate minority leader; David Prosser, state assembly minority leader; Bob Trunzo, head of the state department of development in Madison, Wis.; and Jim Asmuth, former president of Wisconsin Tissue and member of the founding family.

Carter Fox, president and chief executive officer of Chesapeake, will also be attending. Other representatives from Chesapeake include: Paul Dresser Jr., executive vice president and chief financial officer; Fred Ernst, executive vice president and president, West Point Operations; J.P. Causey Jr., vice president, secretary and general counsel; Tom Smith, vice president - human resources and assistant secretary; and Frank Royal, George Mueller and John Hoyt Stookey, members of Chesapeake's board of directors.

The multi-phase Eagle II project expanded Wisconsin Tissue's converting, distribution, storage areas, water plant, wastepaper recycling facilities and added a fourth paper machine.

June 24 marked the early completion of the expansion with the start-up of the No. 4 paper machine. The project was originally scheduled to be completed in December. Wisconsin Tissue's production capability will increase by approximately 80,000 tons annually.

The first phase of the Eagle II project was completed in April of 1989, when an addition to the Automatic Storage and Retrieval System (AS/RS) began. This computerized distribution center utilizes the most advanced technology in the industry. Additional storage cranes and automated guide vehicles help Wisconsin Tissue process the increased flow of converted products.

Wisconsin Tissue offers more than 2,500 quality tissue products including napkins, facial tissue, toilet tissue, toweling, placemats, tray covers, tablecovers and wipers.

CONTACT: Bryce Adie, vice president - Human Resources of Wisconsin Tissue, 414-725-7030, ext. 3709.

#90289p5167 10/16/1990 ~PR Newswire

WHITE PLAINS, N.Y. (OCT. 16) PR NEWSWIRE - A&W Brands, Inc. (NASDAQ: SODA), today announced net earnings of $2,894,000 or $.32 per share, on net sales of $33,318,000 for the three-month period ending Sept. 30, 1990. In the third quarter of 1989, A&W reported net earnings of $2,446,000 or $.26 per share, on net sales of $31,880,000. Operating cash flow for the third quarter of 1990 was $6,594,000 compared with $6,238,000 in the third quarter of last year.

For the first nine months of 1990, A&W reported net earnings of $8,782,000 or $.96 per share, on net sales of $94,616,000. For the same period in 1989, A&W reported net income of $7,199,000 or $.78 per share, on net sales of $87,710,000. Operating cash flow for the first three quarters of 1990 was $21,298,000 compared with $20,439,000 for the same period of 1989.

"Our 1990 third quarter sales show a continuation of steady growth increasing 5 percent over the comparable 1989 period," said M.L. Lowenkron, president and chief executive officer. "On the strength of these sales, our net earnings of $2,894,000 were 18 percent higher than our third quarter of 1989.

"For our domestic business, bottler-reported sales grew 4 percent with concentrate shipments up 2 percent. While conversion to a new bottler system in New York hurt third quarter sales, recent trends in that market are quite positive and we expect full benefits from the relicensing in 1991."

Lowenkron continued, "Our international bottlers report continued sales increases during the third quarter while shipments, due to the timing between quarters, were soft. For the nine months of 1990 our international business remains a robust 28 percent ahead of last year."

"The company's strong cash flow enabled us to repay $8.5 million of senior debt in the third quarter," added Lowenkron. "Additionally, the company repurchased the 1,800,000 shares outstanding of its Class A senior preferred stock ($1.00 par value) for $1,710,000 with the seller waiving accrued and unpaid dividends (effective repurchase rate, 92.5 percent)."

Lowenkron concluded, "The company is extremely pleased with its nine-month results. We strengthened our distribution in two key markets (New York and Florida) and we maintained our growth purely on the strength of our base businesses. We expect 1990 to be another successful year and for 1991 our brands are well-positioned for growth in new and existing markets. Adding to our bright outlook is our strong balance sheet which provides the company with broad investment opportunities."

A&W Brands, Inc., headquartered in White Plains, markets nine soft drinks in five flavor categories. The brands include A&W Root Beer, diet A&W Root Beer, A&W Cream Soda, A&W diet Cream Soda, Squirt, Diet Squirt, Vernors, diet Vernors and Country Time Lemonade in ready-to- drink form.

(A) -- In September 1990, the company bought all preferred shares outstanding and the preferred shareholders waived their rights to receive accrued and unpaid dividends. Preferred dividends were payable semi-annually, May 31 and Nov. 30.

Accordingly, in computing net earnings per share for the third quarter 1990, net earnings was not affected by preferred dividends as compared to third quarter 1989 whereby net earnings was reduced by $36,000 for scheduled dividend payments.

In computing net earnings per share for the nine month period 1990, net earnings was reduced by scheduled dividend payments of $60,000 as compared to $108,000 for the same period 1989.

#90289p5169 10/16/1990 ~PR Newswire

AKRON, OH (OCT. 16) PR NEWSWIRE - The BFGoodrich Company's (NYSE: GR) third quarter net income increased 26 percent to $50.6 million from $40.1 million last year. Earnings per share were $1.91, compared with $1.50 a year ago. Sales increased 6 percent to $634.5 million, from $601.3 million in the previous third quarter.

The increased earnings reflected the favorable net effect of these previously announced one-time items:

-- The resolution of a tax issue with the Internal Revenue Service, which reduced tax expense and benefited net income by $30.8 million.

-- The sale of the company's off-highway braking systems business, which increased Aerospace business segment operating income by $4.7 million and net income by $3.7 million.

-- A charge related to the closing of two vinyl resin production operations in Canada. This reduced operating income for the Geon Vinyl segment by $15.2 million and lowered net income by $9.5 million.

Excluding these unusual items, net income from continuing operations totaled $25.6 million or 93 cents a share, compared with $39.1 million or $1.46 per share in the 1989 quarter. Earnings gains in the Specialty Chemicals and Aerospace business segments were more than offset by a decline in the Geon Vinyl Products segment.

BFG's Geon Vinyl Products business segment reported operating income for the quarter of $1.5 million, including the previously reported charge ($15.2 million pretax) for closing two resin operations in Canada. The reduction in operating income compared with the third quarter of 1989 was also due to lower margins. The beneficial effect of higher volumes and lower raw material prices was more than offset by lower selling prices.

Currently, raw material prices are increasing due to the Middle East crisis. The company is attempting to offset these increases through increased product pricing. Compared to the second quarter, third quarter results were hurt by both higher raw material costs and the effects of a reduction in finished goods inventories.

Operating profits for Specialty Chemicals were up 10 percent to $26.7 million on sales of $220.3 million, an increase of 14 percent. Strong performances by several businesses, including hydrophilic additives, latex products and Tremco's Swiggle Strip tape, adhesives and domestic roofing businesses were partially offset by a decline in polymer chemicals.

Aerospace operating income totaled $20.4 million, including the previously announced gain ($4.7 million pretax) from the off-highway braking systems sale. Excluding this gain, operating profits increased about 5 percent. The evacuation systems and instruments and avionics businesses and Tramco, the company's aircraft maintenance, repair and overhaul business, all reported strong results. Results from Aerospace's largest single unit, commercial wheels and brakes, were weaker than in past quarters because of reduced demand for replacement parts. Also, income from the operation of the off-highway braking systems unit was less than last year.

For the first nine months of 1990, BFGoodrich's net income totaled $122.2

million or $4.57 per share, compared with $145.4 million or $5.50 per share in 1989. Results for 1990 include a $20.5 million after-tax gain related to the purchase of The Uniroyal Goodrich Tire Company by Michelin. BFG-owned warrants to purchase equity in Uniroyal Goodrich and surrendered those warrants when Michelin purchased Uniroyal Goodrich in May.

Sales for the first nine months of 1990 were $1.86 billion, compared with $1.85 billion a year ago.

BFGoodrich produces vinyl resins and compounds, specialty chemicals and provides aerospace components and services.

The following table summarizes sales and income results for BFGoodrich and for the company's business segments for the third quarter and first nine months of 1990. It compares them with results for the same periods in 1989.

FONTANA, CA (OCT. 16) PR NEWSWIRE - The financial excesses of the 1980s will be partially remedied for nearly 7,000 retired steel workers on Oct. 16 when Kaiser Steel Resources Inc. re-enters the public stock market. The company will be listed on NASDAQ under the symbol "KSRI." This is the latest move for the company, the restructured successor to Kaiser Steel Corp., which emerged from Chapter 11 bankruptcy in 1988.

The company, founded during World War II by industrialist Henry J. Kaiser, succumbed to increased foreign competition and stopped producing steel in the early 1980s. Like many companies, Kaiser became caught up in the financial whirlwind of the 1980s. After an unsuccessful leveraged buyout and debt-for-equity exchange offer, the company filed for Chapter 11 in 1987. The bankruptcy left in jeopardy the medical benefits of thousands of Kaiser retirees. Now, nearly four years after the company filed for bankruptcy, the new Kaiser Resources Voluntary Employees Beneficiary Association (VEBA) Trust, Kaiser's largest shareholder (48 percent) will have a chance to continue to provide medical benefits to its nearly 7,000 participants.

Houlihan, Lokey, Howard & Zukin provides financial advisory services to companies of all sizes. These services include fair market value, fairness, and solvency opinions that are provided for the purposes of mergers and acquisitions, restructurings, ESOPs, estate taxes, and litigation. The firm also provides investment banking services to middle-market companies. These services include mergers and acquisitions, structuring and financing management and ESOP leveraged buyouts, private placements, corporate partnering, and restructuring troubled companies. Houlihan Lokey has offices

in Los Angeles, New York, Chicago, and San Francisco.

#90289p5180 10/16/1990 ~PR Newswire

SAN JOSE, CA (OCT. 16) PR NEWSWIRE - Radius Inc. (NASDAQ: RDUS) today announced the Radius Pivot(TM) IIsi Interface and the Radius Two Page Display(TM) IIsi Interface; two new products for the Apple Macintosh IIsi. Current Radius products announced as compatible with the new Apple CPU include the Radius Color Display(TM), the Radius Gray Scale/Color Interface(TM), the Radius DirectColor(TM) Series of Interfaces and the Radius PrecisionColor(TM) Calibrator.

New Radius business productivity products for the Macintosh IIsi include interface cards for the Radius Pivot and the Radius Two Page Display. The Radius Pivot is the only display for the Macintosh that provides both portrait (vertical) and landscape (horizontal) orientation in a single display. To accommodate the new Macintosh IIsi slot structure, all Radius Pivot IIsi interface cards will be bundled with an 030 Direct Slot Adapter card eliminating the need to purchase the Apple Direct Slot Adapter card.

The Radius Two Page Display/19 and Two Page Display/21 provide a flicker-free, two full page view. The flat-screen technology, superior geometry and calibration capabilities of the Two Page Display/21 make it the premier visual computing system for business productivity and publishing. Radius Two Page Display Interfaces for the Macintosh IIsi will also be bundled with an 030 Direct Slot Adapter providing IIsi compatibility and eliminating the need for the Apple Direct Slot Adapter.

The Radius DirectColor/GX Interface is a particularly attractive component for a Macintosh IIsi system. Configured with an Apple 13" RGB Color Monitor and the Apple NuBus adapter card, the Radius DirectColor/GX provides an accelerated 24-bit solution that includes NTSC rate RGB output. The Macintosh IIsi on-board video does not provide 24-bits and is not accelerated.

The Macintosh IIsi, Radius PrecisionColor Calibrator, Radius Color Display and a Radius Gray Scale/Color Interface are the core elements of an entry level Radius visual computing system. For those who require an upgrade path, the Radius DirectColor/8 Interface may be substituted for the Radius Gray Scale/Color Interface. When used with a Radius Gray Scale or Color System, the Radius PrecisionColor Calibrator provides color accuracy, consistency and display calibration. An Apple Desktop Bus (ADB) device, the PrecisionColor Calibrator is a logical choice for a Macintosh IIsi system.

The single slot architecture of the Macintosh IIsi precludes the configuration of multiple NuBus cards in a system design. Macintosh platforms suitable for

more demanding visual computing applications are the powerful, six-slot Macintosh IIfx and the recently price reduced three-slot IIci. Radius system products optimized for the Macintosh IIfx and IIci platforms include the Radius QuickColor Graphics Engine which provides graphics acceleration, the Radius QuickCAD Graphic Engine for computer-aided design and RadiusTV, an integrated computer/television subsystem. Price and Availability

The Radius Pivot IIsi Interface carries a suggested list price of $695. The Radius Two Page Display IIsi Interface lists for $595. Both are available immediately. The Radius Gray Scale/Color Interface is currently shipping at a suggested list price of $1,395, while the upgradable Radius DirectColor/8 Interface, also currently shipping, lists for $1,895. The Radius DirectColor/GX Interface for the Apple 13" RGB Color Monitor lists for $1,095. The DirectColor/GX has been shipping since July. The Radius Color Display lists for $4,295, while the Radius PrecisionColor Calibrator carries a suggested list of $695.

Radius Inc. is the leading supplier of high performance visual computing systems for personal computers. Radius products are available through a worldwide network of Radius Authorized Resellers and System Integrators. Public since August 1990, Radius trades under the NASDAQ symbol RDUS.

ANAHEIM, CA (OCT. 16) PR NEWSWIRE - Distributed Logic Corp. (NASDAQ: DLOG) announced today it has been granted an unlimited VAXBI license by Digital Equipment Corp., (NYSE: DEC).

The license permits DILOG to employ Digital's VAXBI interconnect technology in host computer adapters used for attaching disk and tape storage subsystems to Digital Equipment computer systems.

The first product to be marketed under the new agreement is DILOG's RTS 3480 series of IBM 3480-compatible cartridge tape subsystems, for use with high performance VAX computer systems. They package one or two tape drives with a DILOG VAXBI tape controller to provide as much as four gigabytes of formatted data storage capacity per subsystem, for high speed, high capacity and high reliability disk backup operations. The new subsystems use industry standard IBM 3480 and DEC TA90-compatible half-inch tape media.

The RTS 3480 tape units give users of VAX 6000, VAX 8000 and VAX 9000 systems new configuration flexibility for use in both clustered and non-clustered applications. In addition to providing the only VAXBI access to 3480 technology, they offer higher speed and greater capacity at lower cost than any other system on the market. They can handle disk backup applications at

speeds from five to nine times faster than typical 4mm or 8mm cartridge tape subsystems.

DILOG will introduce additional products that utilize the VAXBI bus during the next few months, Wilson added.

ANAHEIM, CA (OCT. 16) PR NEWSWIRE - Odetics (AMEX: OA, OB) today announces the sale of a TCS2000 large library management video cart machine with two-external MII-format VTRs and expansion tower to WXYZ-TV, an ABC affiliate serving the Detroit, Mich. market. The Odetics Cart Machine is a computerized system that manages, records and plays-to-air all forms of spots and programs.

The External VTR Controller is a combination hardware and software package that allows the Cart Machine to control and switch VTRs that are external to the Cart Machine. The Library Expansion Module multiplies the TCS2000 on-line capacity to several day's worth of events.

WXYZ, owned by Scripps Howard Broadcasting Co., (NASDAQ: SCRP), maintains a heavy schedule of news operations on a local level. The TCS2000, which replaces WXYZ's current TCR100 two-inch cartridge system, will be used immediately in commercial spot playback and ultimately in program playback.

Celebrating its 21st year, Anaheim-based Odetics is a leading manufacturer of large library management video cart systems. There are more than 115 Odetics large library management cart machines playing directly to air throughout the world.

PRINCETON, N.J. (OCT. 16) PR NEWSWIRE - Bristol-Myers Squibb Company Inc. (NYSE: BMY) and the Liposome Company, Inc. (NASDAQ: LIPO) announced today the initiation of Phase II clinical trials with Amphotericin B Lipid Complex (ABLC) for cryptococcal meningitis, a potentially life-threatening fungal infection that attacks AIDS and other immunocompromised patients.

The cryptococcal meningitis studies will involve 120 patients at 15 major AIDS centers in the United States. The first patients have already been treated with ABLC.

"We are gratified to see this important expansion of Bristol-Myers Squibb's clinical studies with ABLC," said Charles A. Baker, chairman and chief executive officer of the Liposome Company. "We believe that ABLC will be an important new drug for treating the opportunistic fungal infections that attack both AIDS and cancer patients."

ABLC is a proprietary new drug formulated with amphotericin B in a lipid complex. In pre-clinical studies, ABLC has been shown to have acute toxicity levels that are eight to 20 times lower than conventional amphotericin B. This enhanced margin of safety is expected to allow the administration of much higher doses of ABLC than are possible with conventional amphotericin B.

Bristol-Myers Squibb also has undertaken ongoing studies using ABLC against coccidioidomycosis, a serious fungal infection which occurs in both immune-suppressed and normal patients. Additional large studies in the treatment of disseminated candidiasis and invasive pulmonary aspergillosis, other opportunistic fungal infections common in cancer and organ transplant patients, are also planned.

In addition to offering hope for many patients suffering from systemic fungal infections, the ABLC project is a landmark in the development of lipid-based drugs. ABLC is being regularly produced in 150-liter batches in a plant in New Brunswick, N.J., designed by the two companies and operated by Bristol-Myers Squibb with assistance from the Liposome Company. The joint effort is believed to be the first time lipid complexes or liposomes have been produced successfully on large- scale equipment.

"We're excited about this opportunity for our two firms to work together on a project of so important a nature," said Dr. Zola P. Horovitz, vice president, licensing, Bristol-Myers Squibb.

The Liposome Company has licensed worldwide marketing rights for ABLC to Bristol-Myers Squibb, which is funding the research and joint manufacturing development work. Bristol-Myers Squibb is responsible for conducting all ABLC clinical trials and for registering the drug with regulatory authorities around the world.

The largest company dedicated exclusively to the development of liposome-based pharmaceuticals, the Liposome Company is primarily focused on developing advanced liposomal drugs for the treatment of cancer and serious infectious diseases.

Bristol-Myers Squibb Company, with headquarters in New York, is a global leader in the development, manufacture and marketing of pharmaceutical, allied healthcare, consumer and nutritional products.

#90289p5187 10/16/1990 ~PR Newswire
PURCHASE, NY (OCT. 16) PR NEWSWIRE - Nestle Foods Corporation and K mart Corporation (NYSE: KM) are announcing their Second Annual "Feeding America's Hungry" Event to support the Second Harvest National Food Bank Network. The event will take place the week of Nov. 4. It will be announced on Nov. 4 in all K mart stores, and in a full page, 4 color ad in USA Today on Nov. 5.

As a result of last year's "Feeding America's Hungry" program, Nestle and K mart contributed $30,000 to Second Harvest. This Thanksgiving season, consumers will once again be asked to visit K mart stores the week of Nov. 4 to purchase six-packs of Nestle Confections including Nestle Crunch, Butterfinger, Baby Ruth, Milk Chocolate, Milk Chocolate with Almonds, Alpine White with Almonds, Raisinets, and Chunky, as well as Nestle Toll House Semi-sweet chocolate morsels, Butterscotch morsels, Milk Chocolate morsels, and the new Merry Morsels. For every purchase, 5 cents (up to 600,000 purchases) will be donated by Nestle Foods and K mart to the Second Harvest National Food Bank Network.

"We are very pleased to be in partnership with Nestle for the second year, especially knowing how far last year's contribution went," commented Don Williams, K mart buyer. "Our $30,000 donation resulted in $4,140,000 worth of food being distributed through the Second Harvest Network of 200 food banks in 46 states."

"This donation reached nearly 40,000 soup kitchens, church pantries, senior centers, shelters, day care centers and other non-profit agencies throughout the country," remarked Joseph C. Dobson, K mart buyer.

According to Dorothy Stowell, Nestle Foods national account manager, this year promises even greater success. "We are confident that K mart customers will help us once again this Thanksgiving season to reach out to those less fortunate."

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating over 2,300 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse Clubs and the Sports Authority.

SEATTLE (OCT. 16) PR NEWSWIRE - IMRE Corp. (NASDAQ: IMRE) today announced

completion of a $2.6 million private placement arranged by Allen & Co. Inc. The proceeds will be used for clinical trials to secure approval for additional indications for its PROSORBA(R) column and for working capital. Release of the funds to the company is subject, among other things, to approval of an increase in the number of authorized shares of the company at its annual shareholders meeting on Nov. 9.

IMRE Corp. is a Seattle-based medical products company that is considered a pioneer and the leader in the field of immunoadsorption, a process of treating a diseased patient's blood outside the body. The company's first product, the PROSORBA column, has been approved for commercial distribution by the Food and Drug Administration for treatment of idiopathic thrombocytopenic purpura, an immune-related bleeding disorder.

#90289p5190 10/16/1990 ~PR Newswire

PHILADELPHIA (OCT. 16) PR NEWSWIRE - CoreStates Financial Corp (NASDAQ: CSFN) today reported net income applicable to common stock of $62,672,000 or $1.15 per share for the third quarter and $185,230,000 or $3.39 per share for the first nine months of 1990.

The third quarter earnings reflected a return on average assets of 1.10 percent and a return on average common equity of 16.89 percent.

Normalized net income applicable to common stock for the first nine months of 1989 was $3.22 per share. The 1989 quarterly and nine month results reflecting the March 5, 1990, acquisition of First Pennsylvania Corp., accounted for as a pooling of interests.

On a formally restated basis, also reflecting the retroactive adoption of FAS 96, Accounting for Income Taxes, 1989 results were $1.15 per share for the quarter and $3.89 per share for nine months. The effect of the FAS 96 adoption is to recognize in 1989's results previously unbooked First Pennsylvania tax benefits.

Non-performing assets increased from $264.3 million at June 30 to $318.5 million at Sept. 30 with most of the increase in the real estate sector. International non-performing loans were reduced from $46.2 million to $44.4 million, which is less than the current market value of the loans.

The increase in domestic non-performing assets brought that total to $274.1 million, or approximately 1.2 percent of total assets.

Net charge-offs for the quarter were $34.0 million, of which approximately $13.7 million were in real estate loans. The loan loss provision was

increased to $39.5 million from $30.5 million in the first quarter and $30.6 million in the second quarter. As a result of the increased provision, the loan loss reserve grew to $232.2 million, or 1.33 percent of total loans.

Consolidated total assets at Sept. 30 were $23.3 billion, including consolidated net loans of $17.4 billion. Consolidated total deposits were $15.4 billion, and common shareholders' equity was $1.5 billion at the end of the quarter.

WILMINGTON, DE (OCT. 16) PR NEWSWIRE - Du Pont (NYSE: DD) and Merck & Co. Inc. (NYSE: MRK), have signed the principal agreements to establish The Du Pont Merck Pharmaceutical Co.

Execution of ancillary agreements is expected before the end of the year, with operations of the new company to begin Jan. 1.

Merck and Du Pont on July 25 announced they had signed a letter of intent to create an independent, research-driven, worldwide pharmaceutical firm.

Du Pont will contribute its pharmaceutical and radiopharmaceutical imaging agents businesses to the joint venture. Merck will provide research and development expertise, development funds, certain marketing rights to several of its prescription medicines, international industry expertise, and cash. The company's product line will be marketed under the DuPont Pharmaceuticals trade name.

When it begins operations, The Du Pont Merck Pharmaceutical Co. will have a research staff of about 1,500, including more than 400 doctoral- level scientists, a first-year research and development budget of $230 million, a professional sales staff of 600 people, and first-year sales of an estimated $700 million.

Joseph A. Mollica will be president and chief executive officer of the new company. Mollica is vice president-medical products for Du Pont, with responsibility for its pharmaceutical business.

#90289p5194 10/16/1990 ~PR Newswire

PITTSBURGH (OCT. 16) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) today reported net income of $66 million, or $1.19 per common share, for the third quarter of 1990, compared with net income of $63 million, or $1.16 per common share, in the third quarter of 1989.

For the first nine months of 1990, Mellon earned $199 million, or $3.64 per common share, excluding a second quarter gain of $74 million on the sale of the corporation's consumer finance company. This compares with income, before extraordinary gains, of $175 million, or $3.47 per common share, in the first nine months of 1989.

Service fee revenue for the third quarter of 1990 was $162 million, compared with $160 million in the third quarter of 1989. The corporation lost $2 million in its trading activities in the third quarter of 1990, compared with trading revenue of $4 million in the prior year period. Other revenue for the quarter was $10 million, compared with $40 million in the third quarter of 1989, when the corporation realized a $27 million gain on the sale of Mellon InvestData Corp. Operating expense for the quarter was $282 million, compared with $269 million in the third quarter of 1989. The increase from the prior year primarily reflected the effect of the PSFS acquisition.

The provision for credit losses was $45 million in the third quarter of 1990, compared with $65 million in the third quarter of 1989, when the corporation provided $30 million for loans to certain Lesser Developed Countries. Net credit losses totaled $41 million in the third quarter of 1990, compared with $145 million in the third quarter of 1989, which included $110 million of net

credit losses on LDC loans.

Nonperforming assets were $705 million at Sept. 30, 1990, compared with $603 million at June 30, 1990, primarily reflecting an increase in nonperforming real estate assets of $86 million. Slightly more than half of that increase resulted from an examination of the corporation's real estate lending operations completed during the quarter by the Office of the Comptroller of the Currency.

Annualized return on assets and return on common equity were .85 percent and 15.29 percent, respectively, in the third quarter of 1990, compared with .80 percent and 17.48 percent, respectively, in the third quarter of 1989.

With assets of $29.4 billion at Sept. 30, 1990, Mellon Bank Corp. is one of the largest bank holding companies in the United States. Through its subsidiaries, it provides wholesale, middle market and retail banking, as well as numerous service products including trust and investment, cash management and financial data processing.

#90289p5195 10/16/1990 ~PR Newswire

NASHVILLE, TENN. (OCT. 16) PR NEWSWIRE - Metropolitan Federal Savings and Loan Association (NASDAQ-NMS: MFTN), through its Board of Directors, announced today that it has entered into an agreement with the Office of Thrift Supervision (OTS) in Cincinnati. As a a result of previously announced negotiations with the OTS, the Association has consented to an order to cease and desist which compels the Association to observe in the future certain lending restrictions.

These restrictions apply to the further extension of credit in the areas of (1) land acquistion, development and commercial construction loans, (2) letters of credit, (3) joint ventures, (4) multifamily loans when the aggregate indebtedness by the borrower to Metropolitan Federal exceeds $1.0 million, (5) commercial loans when the aggregate indebtedness by the borrower to Metropolitan Federal exceeds $500,000, and (6) commercial real estate loans when the aggregate indebtedness by the borrower to Metropolitan Federal exceeds $1.0 million. In addition, Metropolitan Federal has agreed not to increase the total amount of its commercial loans and commercial real estate loans above the amount reported at September 30, 1990.

Edwin W. Moats, Jr., chairman and chief executive officer of Metropolitan Federal, noted that many of the steps being required by the OTS have already been independently implemented by the Association, and that the Association is

in concurrence with the OTS in taking all necessary steps in an effort to reduce its level of nonperforming assets and to otherwise minimize the risk in its portfolio. Realizing that maintaining viability depends on a reduction in nonperforming assets, internal procedures have been designed to strengthen underwriting and internal loan review, and the division that manages nonperforming assets has been enlarged.

Metropolitan Federal also announced today that because of continuing deterioration in the real estate markets, preliminary information indicates that the Association will experience a substantial increase in its nonperforming assets and a sizeable loss for the quarter ended September 30, 1990, primarily as a result of additional reserves for possible loan losses and reduced net interest income. Until final results are complete, Metropolitan Federal indicated the exact amounts cannot be determined but estimated that the loss could reach $13 million. Adjustments to this figure can be expected upon release of final September 30 results.

Moats also noted that as of June 30, 1990, Metropolitan Federal remained in compliance with current regulatory capital requirements with a tangible capital to asset ratio of 3.7 percent, against a minimum requirement of 1.5 percent, a core capital ratio of 5.1 percent against a minimum requirement of 3 percent, and a risk-based capital ratio of 7.0 percent, with the current minimum requirement being 6.4 percent. However, Moats added that because of the expected loss for the first quarter, the Association is unlikely to continue to comply with the risk-based capital requirement. In addition, the OTS has announced its intention to increase the current minimum core capital requirements in line with recent actions taken by commercial bank regulators.

In the event of noncompliance with the minimum capital requirements, Metropoilitan Federal will be required to submit a capital plan to the OTS which would result in additional restrictions on lending activities other than residential lending.

Metropolitan Federal, Tennessee's largest publicly-traded savings and loan with 19 offices, operates throughout the state. Metropolitan Federal's common stock is traded on the over-the-counter market in the National Market System under the NASDAQ symbol MFTN.

CINCINNATI (OCT. 16) PR NEWSWIRE - The E.W. Scripps Company (NASDAQ: EWSCA) today reported third quarter net income of $17.4 million vs. $18 million in the year ago quarter. Net income per share was 23 cents, the same as a year ago.

Consolidated operating income was up 4.7 percent to $48.1 million, and operating cash flow (operating income plus depreciation and amortization) increased 4.7 percent to $75.1 million.

"Despite a very difficult advertising revenue environment, we were able to produce an improvement in operating income and operating cash flow," said Lawrence A. Leser, president and CEO of The E.W. Scripps Company. "Contributing to the improvement was a strong increase in cable television income, the result of our investments earlier this year to improve market penetration.

"The advertising slump continues to hinder progress at the newspapers, but our broadcast group performed well, especially in the Fox Network markets," Leser said.

Publishing Operating income declined 14.5 percent to $28.8 million and operating cash flow was off 9.7 percent to $37 million, primarily the result of weak newspaper advertising revenues. Also affecting operating income was a 6.9 percent increase in costs for newsprint and ink, to $33.1 million, and a decline in operating income from character licensing.

Publishing's depreciation and amortization increased 13.0 percent to $8.2 million due to the completion of new production facilities for The Evansville Courier and Denver's Rocky Mountain News, and the acquisition of Sundance Publishing in the fourth quarter of 1989.

Total publishing division revenues improved 3.8 percent to $212 million. Total newspaper advertising increased 1.2 percent to $129 million. Broken down by source:
-- Local decreased 0.5 percent to $58.9 million;
-- Classified increased 1.6 percent to $47.2 million;
-- Preprints increased 0.3 percent to $15.1 million;
-- National increased 15.2 percent to $7.8 million.

Newspaper circulation revenues improved 4 percent to $35.7 million and character licensing decreased 15 percent to $15 million.

Broadcasting Operating income improved 43 percent to $14.1 million and operating cash flow was up 24.9 percent to $17.9 million. Total operating costs were up only 2.1 percent, to $41 million. Depreciation and amortization decreased 15.2 percent to $3.8 million.

Revenues increased 10.2 percent to $55.2 million. Ratings and revenues continue to improve at the Fox Network affiliates in Tampa, Phoenix and Kansas City. Also boosting revenues in the quarter was a $1.6 million increase in political advertising.

Cable television Operating income from cable television increased 59.4 percent to $8.1 million and operating cash flow moved up 21.1 percent to $22.8 million. Total operating expenses increased 7.3 percent to $42.5 million.

Revenues were up 13.3 percent to $50.6 million on strong subscriber growth. The company's total subscriber base has grown 10.5 percent in the last year. Basic subscribers at Sept. 30 totaled 595,600, an increase of 19,900 in the quarter and 56,700 in the last 12 months. At the Sacramento system, 9,500 subscribers were added in the third quarter and 24,900 in the past 12 months for a total of 188,600.

Year-to-date Net income declined 53.7 percent to $27 million, including a non-recurring pre-tax charge of $36.4 million which reduced net income by $23.7 million, or 31 cents per share. Excluding the charge, net income decreased 13.1 percent to $50.6 million, and net income per share declined 10.8 percent to 66 cents per share.

The charge, announced June 8, is related to payments the company will make to Persis Corporation as a result of an agreement to terminate joint operations between the company's Knoxville News-Sentinel and The Knoxville Journal, owned by Persis. Under the joint operating agreement, which will terminate in

December 1991, the News-Sentinel provides sales, production and distribution for The Journal.

Consolidated operating income, excluding the charge, decreased 5.1 percent to $138 million, reflecting a decline in operating income from the publishing division. Consolidated revenues increased 3.4 percent to $951 million. Revenues from publishing, broadcasting and cable television increased in the first nine months.

Operating cash flow, excluding the charge, was down slightly to $220 million.

The E.W. Scripps Company is a diversified media company which operates 19 daily newspapers, nine television stations, five radio stations and cable television systems with 595,500 basic subscribers. The company also is a worldwide syndicator and licensor of news features and comics, including "Peanuts" and "Garfield."

#90289p5200 10/16/1990 ~PR Newswire

NEW YORK (OCT. 16) PR NEWSWIRE - Merrill Lynch & Co., Inc. (NYSE: MER), today reported third quarter net earnings of $46.1 million, or $.38 per common share compared with $41.0 million or $.34 per common share in the year earlier period.

The 1989 period included a net loss of $2.2 million, or $.02 per common share, from the discontinued operations and disposal of the corporation's real estate

subsidiary, which was divested in the 1989 third quarter.

Revenues for the quarter were $2.87 billion compared with $2.83 billion in the 1989 third quarter. In specific revenue categories, principal transaction, asset management and custodial fee, insurance and other revenues advanced while commission and investment banking revenues declined compared with the 1989 third quarter.

Asset management and custodial fee revenue advanced 11 percent over the year-ago period, indicating the continued success of the company's asset gathering and fee-based revenue strategy.

The 5 percent decline in commission revenues reflected the adverse market conditions and low levels of investor participation, while the 39 percent decline in investment banking revenues resulted from industry- wide weakness in equity underwritings and merchant banking activity, as many issuers postponed new issues and other transactions in the face of global market and economic weakness. Nevertheless, Merrill Lynch retained its position during the quarter as the top underwriter of total debt and equity securities, both domestically and globally.

Total expenses rose slightly to $2.79 billion from $2.76 billion in the prior year's quarter, with insurance expense increased by $120 million. This reflected the consolidation of Tandem Financial Group, Inc.'s results in the 1990 quarter. Further, other operating expenses declined, primarily reflecting lower compensation and benefit expense -- down 3 percent, and communication and equipment rental expense -- down 14 percent. Moreover, operating expenses excluding insurance decreased 3 percent from those of the 1989 nine-month period.

Net earnings for the nine months advanced 9 percent to $161.5 million, or $1.36 per common share, compared with $148.4 million or $1.27 per common share a year ago.

The 1989 nine-month period includes earnings of $4.0 million, or $.04 per common share, from discontinued operations.

#90289p5202 10/16/1990 ~PR Newswire

CINCINNATI (OCT. 16) PR NEWSWIRE - Scripps Howard Broadcasting Company (NASDAQ: SCRP) today reported third quarter net income of $6.5 million, 63 cents per share, compared to $2.9 million, 28 cents per share, in the year ago quarter.

The strong increase was the result of improved operating income from both broadcast and cable television, and a $1 million decrease in interest expense.

Consolidated operating income increased 50 percent to $17.9 million as revenues increased 11.8 percent to $78.2 million.

Operating income from television and radio increased 42.8 percent to $14.5 million. Total operating costs increased just 1.9 percent to $40.7 million. Depreciation and amortization decreased 15.8 percent to $3.7 million.

Television and radio revenues increased 10.2 percent to $55.2 million. Ratings and revenues continue to improve at the Fox Network affiliates in Tampa, Phoenix and Kansas City. Also boosting revenues in the quarter was a $1.6 million increase in political advertising.

Operating income from cable television increased 65.5 percent to $4.5 million on a 15.8 percent revenue increase to $23 million. At the company's largest system in Sacramento, CA, 9,500 subscribers were added in the third quarter and 24,900 in the past 12 months for a total of 188,600 at Sept. 30.

The company had a total of 248,000 cable television subscribers at Sept. 30, an increase of 30,000 in the last 12 months.

For the first nine months of 1990, net income improved 57.6 percent to $19 million, $1.84 per share, vs. $12.1 million, $1.17 per share, in the first nine months of 1989. Consolidated operating income increased 24.2 percent to $53.7 million, and revenues increased 7.9 percent to $234 million.

Scripps Howard Broadcasting, an 80.4 percent owned subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA), operates nine television stations, five radio stations and cable television systems with 248,000 basic subscribers.

#90289p5205 10/16/1990 ~PR Newswire

OAKBROOK TERRACE, ILL. (OCT. 16) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP) announced today the completion of its acquisition of National Telephone Services, Inc. (NTS), a regional telephone company based in Rockville, Md. The combined companies will become one of the largest long-distance telephone companies in the United States.

Telesphere said that the Chase Manhattan Bank, Citibank N.A. and Bell Atlantic Tricon Leasing Corporation are providing a $120 million credit facility to the company. The commitment provides both term and revolving credit financing to support the NTS acquisition and for other corporate activities.

Harry Thompson, chairman of Telesphere, commented, "We are delighted by the commitment of these three outstanding institutions, and this evidence of their faith in our corporate future."

Telesphere purchased NTS for $45 million, consisting of $21 million in cash, $14 million in notes and about 3.3 million shares of Telesphere common stock.

Eugene Ruiz, executive vice president, stated, "NTS is an excellent strategic fit for Telesphere, complementing our mix of long-distance related businesses. NTS is a leading provider of operator services to hotels, hospitals and pay phones, which fits well with Telesphere's already significant position in serving the hospitality industry. Conversely, Telesphere's national fiber optic network will handle the NTS traffic at much reduced costs with significant savings. Further savings will be realized due to Telesphere's use of the NTS operator centers."

Telesphere Communications, Inc. operates a nationwide, state-of-the-art digital fiber optic network, over which it provides long distance, operator, interactive 900 and other enhanced telecommunications services.

#90289p5210 10/16/1990 ~PR Newswire

LOS ANGELES (OCT. 16) PR NEWSWIRE - National Mercantile Bancorp (NASDAQ: MBLA) today reported net income of $726,000, or $.23 per share, for its third quarter ended Sept. 30, 1990. Net income for the third quarter a year ago equalled $909,000, or $.34 per share.

For the nine months ended Sept. 30, 1990, the company reported net income of $392,000, or $.13 per share. In the corresponding year-earlier period, net income was $2,634,000, or $1.00. The current nine-month earnings include $3.1 million in charges to pretax earnings in the second quarter, which included a significant provision for loan losses and a one-time payment related to the April resignation of the company's former president.

Net income per share for the 1990 periods was determined using approximately 16 percent more weighted average shares outstanding, resulting principally from a private placement of common stock earlier in the year.

"While net earnings are down, it is important to note that this quarter's results include a sizable addition to the company's provision for loan losses in the amount of $965,000, as compared with $120,000 for the same period last year," said William T. Hughes, president and chief operating officer. "We have increased our reserves in light of current uncertainty regarding the national economy and to keep pace with healthy growth in our loan portfolio. The benefits of our conservative management and lending philosophies, however, are reflected in non-accruing loans of $1.9 million, or 0.64 percent of the total loan portfolio as of September 30, 1990."

Hughes noted that the bank's recent investments in its commercial and

entertainment banking divisions helped in achieving the quarter's strong operating revenues.

National Mercantile Bancorp is the holding company for Mercantile National Bank, member FDIC, an independent commercial bank with offices in Century City and Irvine, Calif. The bank offers a wide range of financial services to middle market companies, the entertainment industry, the real estate community professionals, high net worth individuals and the escrow and title industries.

#90289p5213 10/16/1990 ~PR Newswire

STAMFORD, CT (OCT. 16) PR NEWSWIRE - GTE Corp. (NYSE: GTE) today reported that consolidated net income for the third quarter of 1990 increased 11 percent to $409 million, compared with $368 million in the third quarter last year.

Earnings per share also were up 11 percent, increasing to 59 cents per share from the 53 cents earned in the year-ago quarter. Earnings per share for both periods reflect the two-for-one stock split which became effective on May 23.

Consolidated revenues and sales rose 5 percent to $4.6 billion, compared with $4.4 billion the previous year.

For the first nine months of 1990, consolidated net income increased 10 percent to $1.1 billion, compared with $1 billion in the first nine months of last year. Earnings per share were $1.65, also 10 percent higher than the $1.50 earned a year ago. Consolidated revenues and sales for the nine months totaled $13.6 billion, a 7 percent increase over the $12.8 billion reported for the first nine months of 1989.

As previously announced, GTE and Contel Corp. have entered into an agreement to merge the two companies in a tax-free exchange, subject to the approval of the stockholders of both companies as well as various regulatory agencies. Special stockholders' meetings are expected to be held in December to vote on the merger. If approved, the merger will result in an organization that ranks as the largest U.S.-based, local- exchange telephone company and the second-largest, cellular-telephone operator.

Telephone revenues in the third quarter totaled $3.2 billion, compared with $3.1 billion reported in the third quarter last year. Minutes-of-use of local-exchange networks for long-distance calling were up 12 percent, and access lines in service increased by 4.1 percent over last year. The revenues from these volume gains were largely offset by lower, more competitive rates

charged long-distance carriers to access GTE's local-exchange network, as well as reduced revenues from billing and collection services and the leasing of long-distance facilities.

#90289p5215 10/16/1990 ~PR Newswire

RICHMOND, Va. (OCT. 16) PR NEWSWIRE - Reynolds Metals Company (NYSE: RLM) today reported third quarter earnings of $100.8 million or $1.70 per common share, compared with $123.7 million or $2.10 per share in the same quarter a year ago.

Revenues for the latest quarter were $1.536 billion versus $1.525 billion in the third quarter of 1989.

William O. Bourke, chairman and chief executive officer, said, "Aluminum shipments for the quarter were up over a year ago. The lower reported earnings for the quarter are due principally to lower prices.

"Although the price of aluminum ingot has improved recently, our average metal prices during the third quarter were significantly below those of a year ago."

Mr. Bourke noted that fabricated product price improvements are still lagging those for ingot.

"While the company shipped a higher than normal tonnage of ingot during the quarter," he said, "more than 90 percent of the company's net sales are in the form of fabricated or finished products."

The company's packaging and consumer products businesses continue strong, he stated, "but the slump in construction, automotive, electrical cable and other markets has slowed the demand for aluminum in North America. Demand abroad continues to grow but at a lesser rate than earlier in the year.

"Despite what, in mid-October, appears to be a worsening economy, we are still looking for earnings improvement from the third to the fourth quarter," Mr. Bourke said.

For the nine months ended September 30, Reynolds Metals reported earnings of $281.5 million or $4.76 per share on revenues of $4.478 billion. This compares with earnings of $398.9 million or $6.80 per share, fully diluted, on revenues of $4.656 billion for the comparable 1989 period.

The company's aluminum shipments totaled 363,100 metric tons in the third quarter and 1,037,600 metric tons for the nine months, compared with 329,600

and 1,002,700 metric tons in the respective year ago periods.

Following is a tabulation of the company's results (in millions, except per share data):

#90289p5217 10/16/1990 ~PR Newswire

MURFREESBORO, TN (OCT. 16) PR NEWSWIRE - Pricor Incorporated (NASDAQ: PRCO) announced today it has signed a contract with Starr County, Texas to operate and manage a 766-bed adult detention facility.

Pricor Chairman Hubert L. McCullough made the announcement saying, "We have signed a contract to operate a detention facility designed to house minimum and medium security inmates to be constructed near Rio Grande City, Texas. The facility's construction is contingent upon the successful completion of a bond offering being underwritten by Kirchner Moore, a division of George K. Baum & Company, on behalf of a non-profit corporation formed by and on behalf of Starr County."

McCullough said the initial term of the contract is from Pricor's services commencement date through September, 1994, with a renewal option for an additional two years. Pricor's operation of the facility could begin within the next 12 to 15 months contingent upon construction completion. Annualized revenues to Pricor could reach approximately $8 million.

Pricor Incorporated is the nation's leading for-profit private provider of special educational and treatment services for youth. The company is also one of the country's oldest and largest private adult correctional services companies.

Pricor has contracts in Alabama, California, Tennessee, Texas, and Virginia. Pricor has over 4,100 adult correctional facility beds under contract or management. Pricor's common stock is traded under the NASDAQ symbol: PRCO.

#90289p5218 10/16/1990 ~PR Newswire

PITTSBURGH (OCT. 16) PR NEWSWIRE - PNC Financial Corp (NYSE: PNC) reported third quarter consolidated net income of $55.9 million and fully diluted earnings per share of $.58.

These results compare with $126.9 million and $1.31, respectively, in the third quarter of 1989. The provision for possible credit losses was $147.8 million compared with $38.3 million in the comparable quarter of 1989.

Thomas H. O'Brien, chairman, president and chief executive officer, said, "As we have indicated in the past, we continue to aggressively address the problems facing PNC and the entire banking industry. The weakening economy has resulted in an increase in nonperforming assets. We are identifying problem loans, writing down real estate to market values and adding reserves in accordance with internal policies."

Consolidated net income for the nine months of 1990 totaled $239.3 million, or $2.49 per share on a fully diluted basis. This compares with $376.0 million and $3.89, respectively, for the comparable period of 1989.

O'Brien said, "PNC's overall financial condition remains very strong as a

result of the significant earnings capacity of our core businesses. Proof is our ability to set aside $330 million in loan loss reserves in the first nine months and still earn $239 million. At the present time, we anticipate no change in our dividend."

On an annualized basis, return on average total assets was .69 percent for the nine months and return on average common shareholders' equity was 11.37 percent. These results compare with 1.21 percent and 18.38 percent, respectively, for the same period in 1989.

The allowance for credit losses was $563.3 million at September 30, 1990, or 2.02 percent of total loans. This compares with 1.87 percent at June 30, 1990 and 2.19 percent at year-end 1989.

On Sept. 30, 1990, total nonperforming assets were $965.9 million, compared with $837.9 million at June 30. This included nonaccrual loans, restructured loans and other real estate owned ("OREO"). The ratio of nonperforming loans to total loans was 2.61 percent at Sept. 30, 1990, compared with 2.31 percent at June 30, 1990 and 1.74 percent at Dec. 31, 1989.

On a taxable-equivalent basis, net interest income for the nine months was $1.1 billion, a 3.9 percent increase from a year ago. Average earning assets increased 11.3 percent to $42.7 billion in the nine months of 1990 principally related to purchases of U.S. government agency securities. The net interest margin was 3.41 percent, compared with 3.65 percent a year earlier.

Total noninterest income increased 17.2 percent to $494.8 million in the nine months of 1990. This included trust revenues of $162.0 million, 10.7 percent higher than 1989, and service charges, fees and commissions of $258.2 million, a 15.0 percent increase over 1989. "Other" noninterest income was $23.5 million higher than 1989, primarily attributable to a third quarter gain on the settlement of certain pension liabilities.

Noninterest expenses of $884.4 million for the nine months increased 12.9 percent over the same period in 1989, including a 4.0 percent increase in staff expense. The comparison was adversely impacted by higher expenses related to OREO and an increase in FDIC assessments. OREO expenses in the aggregate totaled $32.4 million, which included $26.5 million of valuation adjustments.

PNC Financial Corp, headquartered in Pittsburgh, is the nation's 15th-largest bank holding company with assets of $45.7 billion. PNC was formed in 1983 with the consolidation of Pittsburgh National Corp., Pittsburgh, and Provident National Corp., Philadelphia. Its principal banking affiliates include: Bank of Delaware Corp., Wilmington, Del.; The Central Bancorporation, Inc., Cincinnati (includes banks in Ohio and Kentucky); Citizens Fidelity Corp., Louisville, Ky. (includes banks in Kentucky and Indiana); The First Bank and Trust Co., Mechanicsburg, Pa.; The Hershey Bank, Hershey, Pa.; Marine Bank,

Erie, Pa.; Northeastern Bank of Pennsylvania, Scranton, Pa.; Pittsburgh National Bank, Pittsburgh; Provident National Bank, Philadelphia; PNC National Bank, Wilmington, Del.; and PNC National Bank of New Jersey, Cherry Hill, N.J. PNC currently operates 535 community banking offices in Pennsylvania, Kentucky Indiana, Ohio, Delaware and New Jersey. It also conducts business through additional offices in 15 states.

MINNEAPOLIS (OCT. 16) PR WIRE - Inter-Regional Financial Group, Inc. (IFG), (NYSE: IFG) parent of Dain Bosworth Incorporated and Rauscher Pierce Refsnes, Inc., today reported results for the third quarter and nine months ended Sept. 30, 1990.

For the third quarter, IFG had a loss before extraordinary items of $204,000 compared with net earnings before extraordinary items of $1,205,000 for the same period last year. Net earnings including extraordinary items were $11,739,000, or $1.25 per share, for the quarter versus $1,446,000, or $.18 per share, last year.

The 1990 results include an extraordinary gain of $12,135,000 from the previously announced settlement of a lawsuit with Touche Ross & Co. related to audit services provided to IFG's discontinued leasing subsidiary in 1980 and 1981. Net revenues (revenues less interest expense) for the 1990 third quarter totaled $56,349,000 versus $59,392,000 in 1989.

For the first nine months of 1990, IFG reported earnings before extraordinary items of $1,130,000, or $.30 per share, compared with $2,669,000, or $.33 per share, last year. Net earnings, including extraordinary gains, were $13,380,000, or $1.59 per share, versus $3,277,000, or $.41 per share, in the comparable 1989 period. Net revenues for 1990 were $177,029,000 versus $173,171,000 last year.

Weiser also stated, "IFG will from time to time make additional open market purchases of up to $10 million of its outstanding 10 percent and 11.5 percent convertible subordinated debentures. This is consistent with the company's strategy to reduce long-term debt.

"We have the strongest balance sheet we have had in almost 10 years, due mainly to the settlement of our litigation. Our significantly improved equity and capital position will greatly help us weather these difficult times."

Inter-Regional Financial Group provides full-service securities and investment banking services in 20 states through its subsidiaries, Dain Bosworth Incorporated, Minneapolis, and Rauscher Pierce Refsnes, Inc., Dallas. The parent company's common stock is traded on the New York Stock Exchange under the symbol IFG.

WOODBURY, N.Y. (OCT. 16) PR NEWSWIRE - Comverse Technology, Inc. (NASDAQ: CMVT) announced today that its distributor in the United Kingdom, GEC Plessey Telecommunications (GPT) has now purchased over 40 TRILOGUE systems from Comverse. These systems have been installed in major U.K. enterprises.

John Witham, GPT business manager, stated that, "The list of Companies now owning TRILOGUE systems, known as the iSMM (Integrated Services Message Manager) in the U.K., now includes the names of some of the largest British companies. These include Atlantic Container, Apple Computer, Bass, British Aerospace, British Petroleum, Ernst & Young, Midland Bank, Robert Bosch, Premier Brands and Trustee Savings Bank to name a but a few." Witham continued, "We are delighted with this progress and the contribution the iSMM is making to our revenues and profits. We have recently strengthened our sales, marketing and support efforts and look forward to significant results in 1991."

Kobi Alexander, president and chairman of the board of Comverse, stated that, "The GPT relationship is proving to be very fruitful. The market for TRILOGUE in the U.K. and the rest of Europe is at the beginning of a major growth curve. We are, therefore, very pleased and proud to have this partnership with the number one company in the U.K. telecommunications arena."

Comverse, located in Woodbury, N.Y., develops, manufactures and markets high performance computer systems for commercial and defense communications applications, including multi media message management systems under the name of TRILOGUE.

#90289p5228 10/16/1990 ~PR Newswire

MINNEAPOLIS (OCT. 16) PR NEWSWIRE - Honeywell Inc. (NYSE: HON) said today that net income from continuing operations in the third quarter of 1990 was $86.8 million, compared with $67.8 million a year ago. Earnings per share from continuing operations were $2.30, compared with $1.58 in third-quarter 1989. Company orders in third-quarter 1990 increased strongly. International orders rates were particularly good, aided by currency translation benefits.

"Honeywell continues to deliver on the commitments we made to shareholders in 1989. The divestiture of our defense business with the spin-off of Alliant Techsystems Inc. completes another important step in our five-point

shareholder value enhancement program.

"Overall, we are pleased with our results for the first nine months of the year, and we look forward to a good fourth quarter," said Honeywell Chairman and Chief Executive Officer James J. Renier. "While we are concerned about the economic outlook, especially in the United States, our order rates remained positive in the third quarter."

Honeywell's worldwide sales from continuing operations in third-quarter 1990 were $1.562 billion, compared with $1.500 billion in 1989. Operating profit from continuing operations in the third quarter was $172.5 million, compared with $133.8 million in 1989.

A net loss from discontinued operations totaled $3.3 million, or $.09 per share, compared with net income of $6.6 million a year ago. Discontinued operations comprises the major portion of the defense business included in the Alliant Techsystems spin-off. The net loss from discontinued operations was due to Honeywell's costs related to the spin-off.

Total sales for the first nine months of 1990 were $4.636 billion, compared with $4.449 billion in 1989. Nine-month net income from continuing operations was $262.6 million, compared with $178.8 million in the first nine months of 1989.

Nine-month earnings per share from continuing operations were $6.82, compared with $4.15 last year. Nine-month 1990 figures include an after-tax gain of $18.1 million, or $.46 per share, from the sale of Yamatake-Honeywell shares in the first quarter.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.059 billion.

MARLBOROUGH, MA (OCT. 16) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced the applicationDEC 433MP, its most expandable system for small and medium businesses.

The system, developed and manufactured by Digital, is based on the popular Sco Unix System V and the Intel 486 processor, and was designed specifically to be sold through Value Added Resellers.

"With the addition of the applicationDEC 433MP, Digital's line of SCO/Intel based systems for small and medium businesses becomes one of the most comprehensive in the industry," said Gary Eichhorn, Digital's vice president, General Systems Business.

The new system joins the applicationDEC 3XX family of smaller multi-user systems, formerly called the DECsystem 3XX family introduced in April. The applicationDEC family complements Digital's complete range of offerings for small and midsized businesses. Digital's strategy to increase its share of the small-to-medium sized enterprise (SME) market is based on four key components:

- a complete line of Digital products;
- business practices which make it easy and attractive for Value Added

Resellers to establish and maintain business relationships with Digital;
- business services which generate end user demand for the VARs' products and services while reducing their business costs; and
- customer services which include traditional product support as well as innovative services which support and complement the VARs' expertise.

In addition to the applicationDEC 433MP, today's announcement also addressed the business services and customer services components of Digital's SME strategy. The company announced an extension to its Gold Key Program, which enables its resellers to sell Digital's high quality service portfolio to their customers.

"For our small business VARs, we will be offering a subset of the existing 140 Gold Key services, including: maintenance services, warranty services, recovery services, desktop services and self-maintenance services," said Eichhorn.

In addition, Digital announced the availability of several business services to these small business VARs, including technical support services, new product introduction kits, a demo/development program, a software loan program and joint business planning.

Digital Equipment Corporation, headquartered in Maynard, Mass., is the leading worldwide supplier of networked computer systems and services. Digital offers a full range of computing solutions and systems integration for the entire enterprise - from desktop to the data center.

FORT LAUDERDALE, FLA. (OCT. 16) PR NEWSWIRE - CarePlus, Inc. (NASDAQ-NMS: CPLS) announced today continued earnings improvement with third quarter ended Sept. 30, 1990 earnings of $1,088,000, up 81 percent from the $600,000 posted in the same period last year. Third quarter revenues were $12 million vs. $9.1 million in 1989. Fully diluted earnings per share were $.16 compared to $.10 last year.

Earnings from operations increased 62 percent to $1.9 million, and operating margins improved to 15.9 percent for the quarter, compared to 12.9 percent for the same period in 1989. Year-to-date, operating margins were 15.3 percent up from 10.5 percent in the prior year.

"Our DSO's (Days Sales Outstanding) have decreased to 135 days, down 12 days from last quarter. Strong earnings growth, combined with continued improvement in receivables collection, will allow us to continue growing by

geographic expansion, acquisition and increased market penetration," remarked Bob L. Wood, chairman and CEO of CarePlus.

Nine month earnings were up 103 percent at $2.9 million, compared to $1.4 million for the same period in 1989. Fully diluted earnings per share for the nine months were $.44, vs. $.27 for 1989.

CarePlus is a national provider of high-tech infusion therapy, treating patients requiring Chemotherapy, nutritional feeding through either a vein or a tube, intravenous (I.V.) antibiotic therapy, pain treatment, fluid administration and other home infusion therapies.

CarePlus, Inc. common stock is traded on the National Market System under the symbol: CPLS.

#90289p5238 10/16/1990 ~PR Newswire

KALAMAZOO, MI (OCT. 16) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) announced today that a preliminary injunction has been granted in its patent infringement suit against a New York-based hair growth clinic.

In a suit filed in 1987, Upjohn charged Medtron Laboratories, Inc., with infringing Upjohn's patents on minoxidil, the active ingredient in Upjohn's hair growth prescription drug, Rogaine Topical Solution.

Following a decision in U.S. District Court in New York, Medtron is now prohibited from manufacturing, selling and distributing products which contain minoxidil and would therefore infringe the Upjohn patents.

Lawrence T. Welch, senior patent counsel at Upjohn, said, "We are very pleased by the court's decision. Upjohn has a firm policy of vigorous enforcement of its patent rights and will not tolerate any infringement."

Upjohn has since 1987 aggressively and successfully defended its minoxidil patents. To date Upjohn has filed 52 suits against companies, clinics or individuals. Of the 49 suits settled thus far, all have been decided in Upjohn's favor.

Rogaine, cleared for marketing in the United States by the Food and Drug Administration in 1988, is currently marketed in more than 65 countries worldwide.

The Upjohn Company is a worldwide, research-based provider of human health care products, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

MORRIS PLAINS, NJ (OCT. 16) PR NEWSWIRE - Warner-Lambert Company (NYSE: WLA) announced today that sales for the three months ended Sept. 30, 1990, were a record for any quarter. Sales increased seven percent to $1.19 billion from $1.11 billion a year earlier. At constant currency rates, sales grew 5 percent. During the third quarter, Warner- Lambert's earnings per share (EPS) increased 18 percent to 93 cents. Net income rose 17 percent to $125 million compared to $107 million during the third quarter of 1989. EPS and net income were records for a third quarter.

Joseph D. Williams, chairman and chief executive officer, said the strength of

the company's worldwide pharmaceutical business helped fuel Warner-Lambert's record sales.

During the quarter, worldwide sales of the company's prescription pharmaceuticals increased to $390 million, up 15 percent from the same period a year earlier. Growth in the segment was led by the cholesterol-regulating drug Lopid, whose sales for the first nine months were ahead by 22 percent to $261 million. Also helping drive quarterly segment sales were the cardiovascular drug Dilzem and the analgesic Ponstan. The company's line of prescription pharmaceuticals includes the anticonvulsant Dilantin, the cardiovascular drug Accupril and the anti-infectives ERYC, Doryx and Penetrex.

Worldwide sales of non-prescription health care products rose 11 percent, paced by the continuing strong performance of Listerine antiseptic mouthwash and Halls cough tablets. For the first nine months, sales of Listerine were ahead by 16 percent and sales of Halls increased by 19 percent. Other products in the segment include Rolaids antacid, Benadryl antihistamine, Lubriderm skin lotion, Benylin cough syrup, Tucks medicated pads, Sinutab sinus medication and Anusol hemorrhoidal preparation.

Worldwide sales of the company's other products increased by 4 percent to $133 million. The segment includes Schick razors and blades, Capsugel empty hard gelatin capsules and Tetra home aquarium products.

MINNEAPOLIS (OCT. 16) PR NEWSWIRE - Alliant Techsystems Inc. (NYSE: ATK) today announced that it has received a $75 million contract with the U.S. Army for the production of AT4 Lightweight Anti-armor Weapons and a $53.6 million contract for production of the Area Denial Artillery Munition (ADAM).

Alliant Techsystems, which was formerly the Defense and Marine Systems Business, Signal Analysis Center and test Instruments Division of Honeywell Inc., was officially launched as an independent company in September 1990.

The company said the AT4 units will be produced at its production facility in Joliet, Ill. Alliant Techsystems, as Honeywell's Defense and Marine Systems Business, has been a supplier of the AT4 to the Army since 1985. Deliveries under the contract announced today will continue through October 1992.

The lightweight, recoilless AT4 is a one-shot, fully self-contained, shoulder-fired anti-armor weapon that can defeat more than 80 percent of all armored vehicles. The AT4 is used world-wide by the U.S. Army, Navy, Air Force and Marines.

Alliant Techsystems has been a manufacturer of ADAM for 15 consecutive years. ADAM is a 155MM artillery-delivered antipersonnel mine activated by deployed trip lines. Deliveries under the contract announced today will continue through November 1991.

Alliant Techsystems Inc. supplies high-quality precision armament, ordnance, marine and information storage systems to the United States Government and its allies. In 1989, the company had revenues of $1.3 billion and net income of $42 million. Headquartered in Minnesota, Alliant Techsystems employs 8,000 people throughout the United States.

PITTSBURGH (OCT. 16) PR NEWSWIRE - Scientists at the Westinghouse Electric Corp.'s (NYSE: WX) Science & Technology Center here have received a U.S. Nuclear Regulatory Commission contract to further develop a knowledge-based artificial intelligence system that assesses the decisions humans make while at the controls of nuclear power plants.

The $400,000 contract extends by 18 months a successful five-year NRC-funded effort to develop the Westinghouse Cognitive Environment Simulation (CES) system. The new effort will increase the capability of the the basic system and also convert it from a specialized computer to a more commonly available one, yet to be selected.

"We are going to put in more psychological features to further improve modeling of the operators' behavior," said Dr. Emilie Roth, human sciences manager at Westinghouse.

The ultimate goal, Roth said, is to produce a tool that can be widely used both to evaluate and improve human reliability in existing plants and to simplify the design of new plants, such as the Westinghouse AP600, from the perspective of the human operator.

"Nuclear technology is now so highly developed that it's generally recognized that as many problems are likely to be caused by human error as by equipment failure," Roth said. "To study how these errors might occur our system uses an information base, comprised of what power plant employees know, incorporated with programming that represents the problem solving and decision making of human operators."

CES now runs on a Symbolics Inc. 3650 workstation, a highly specialized artificial-intelligence computer expressly designed for the Lisp programming language. It uses as its core engine an expert-system shell called Eagol

developed in Lisp by consultant Dr. Harry E. Pople Jr., a University of Pittsburgh professor. Pople's company, Seer Systems Inc., will also serve as a subcontractor to Westinghouse under the new NRC contract.

SWIFTWATER, PA. (OCT. 16) PR NEWSWIRE - Connaught Laboratories Inc. (CLI) announced today the signing of research and development and marketing agreements with MedImmune Inc. (formerly Molecular Vaccines Inc.) of Gaithersburg, Md.

The first agreement involves research collaboration on recombinant BCG vector vaccine technology. MedImmune licensed to CLI worldwide exclusive rights to products resulting from the technology for the prevention and/or treatment of selected infectious diseases in humans.

An attenuated strain of Mycobacterium bovis (Bacillus Calmette and Guerin (BCG)) is utilized. Genes for the production of the desired antigen are removed from a disease-causing organism and inserted into the BCG bacteria. BCG then expresses the protein antigen on its surface. The BCG organisms, which are now expressing the antigen, are injected into the vaccinee where they will continue to produce the antigen, thereby stimulating antibody production. These antibodies then confer immunity to the disease.

"This approach provides a unique and promising technology for improving current vaccines and developing new ones," commented David J. Williams, president of CLI. "We are looking forward to our collaboration with MedImmune Inc."

The second agreement involves marketing rights to Cytomegalovirus Intravenous Immune Globulin. This product, which has been licensed by the FDA and is designated an Orphan Drug, is indicated for the attenuation of primary cytomegalovirus (CMV) disease associated with kidney transplantation. Specifically, the product is indicated for all kidney transplant recipients who are seronegative for CMV and who receive a kidney from a CMV-seropositive donor or from a donor whose CMV status is unknown. CLI has exclusive worldwide marketing rights to this product, with the exception of countries in the Pacific Rim, as well as the commonwealth of Massachusetts and the state of Maine. In the United States, it is estimated that there are about 9,000 kidney transplants annually. Of these, approximately 3,000 patients are expected to benefit from this treatment. It is anticipated that this product will be commercially available in the United States during the first quarter of 1991.

MedImmune Inc., founded in 1988 and located in Gaithersburg, Md., is a

biotechnology company focused on the development, production and marketing of new subunit vaccines and immunotherapeutic products for the prevention and treatment of infectious diseases and cancer.

Connaught Laboratories Inc., A Pasteur Merieux Co., provides the broadest range of vaccines and biologicals commercially available in the United States from a single company.

DENVER (OCT. 16) PR NEWSWIRE - Apache Corp. (NYSE: APA) today announced that strong third quarter results led to record earnings in the first nine months of 1990, exceeding those in the full year 1989. The company attributed the gain to rising gas and oil production, coupled with higher oil prices.

In the third quarter, net income increased 86 percent to $9.5 million from $5.1 million in the comparable 1989 quarter. Earnings per share advanced 40 percent to 21 cents on 11.1 million more shares outstanding.

In the first nine months of 1990, net income increased 91 percent to $28.6 million from $15.0 million in the first nine months of 1989. Earnings per share of 64 cents increased 42 percent over the comparable 1989 reporting period and equalled those for all of 1989.

Cash from operations increased to $40.8 million in the quarter and $117.9 million in the first nine months, increases of 37 percent and 27 percent, respectively, over the comparable 1989 periods.

Chairman and Chief Executive Officer Raymond Plank said, "Increased oil and gas production in each quarter this year, plus recent increases in oil prices, enabled earnings through September 30 to eclipse 12-month earnings for the second year in a row."

The continued effect of the company's aggressive drilling program increased quarterly gas production 16 percent to an average 266 million cubic feet per day. Oil production during the quarter increased 21 percent to an average 9,931 barrels per day, largely the result of a previously announced property acquisition. Both gas and oil production set record highs for any quarter in the company's 36 years.

Apache realized an average oil price of $22.31 per barrel during the quarter, up $5.40 from a year ago. This helped offset the impact of a 7 cents decline

in the company's average gas price, which averaged $1.52 per thousand cubic feet. The drop in the company's average gas price reflected deterioration of spot market prices from third quarter 1989.

Apache is an independent energy company engaged in exploration, development, production and marketing of natural gas and crude oil. The company's securities are traded on the New York and Midwest Stock Exchanges (symbol APA).

LITTLE ROCK, AR (OCT. 16) PR NEWSWIRE - AllTel Corporation (NYSE: AT) announced today its third quarter financial results.

AllTel's net income advanced 14 percent to $46,796,000 from the $40,902,000 reported in the third quarter last year. Third quarter earnings were 57 cents per share, up 16 percent from 49 cents a year ago on one percent fewer average common shares outstanding. Revenues and sales were $397,137,000, up eight percent from $368,158,000 in the corresponding quarter of 1989.

For the nine months ended Sept. 30, 1990, AllTel earned $1.66 per share, an increase of seven percent over last year's $1.55 on one percent more average common shares outstanding. Net income was $137,064,000, up eight percent from $127,009,000 for the first nine months on 1989. Revenues and sales were $1,170,255,000, up ten percent from $1,061,944,000 last year.

Earnings per share for the 12 months ended Sept. 30, 1990 were $2.24, up 20 percent from $1.87 a year ago. Net income was $184,770,000, up 21 percent from $152,162,000 last year on revenues and sales of $1,558,954,000, up from $1,390,307,000 in the corresponding period last year. The 12-month results of 1989 include a fourth quarter 1988 net, after tax, charge of $17.5 million representing gain/loss on investments and merger costs.

Joe T. Ford, AllTel president and chief executive officer, said, "While the third quarter results reflect continued modest growth in telephone revenues, AllTel's non-regulated operations made a strong contribution to the company's overall earnings growth rate.

"Systematics, AllTel's recently acquired information services subsidiary, made the biggest impact during the quarter - posting a sharp increase in higher margin software sales and continuing its 20 percent growth rate in recurring facilities management revenues.

"HWC Distribution also showed improved results despite construction slowdowns that continue to put pressures on margins. Our cellular operations enjoyed a good quarter, increasing the number of customers served to 40,000, an 88

percent increase in the past year." This includes the acquisition of the Augusta, Ga., system, which added 3,800 customers.

AllTel Corporation (AT) provides telephone service to more than 1.1 million customers in 25 states and has subsidiaries or investments in companies that provide cellular telephone, long-distance and information services, communications products and other related services.

BOSTON (OCT. 16) PR NEWSWIRE - NCR (NYSE: NCR) today released Open Networking Environment(TM), a set of superior networking products that provides end-to-end OSI networking solutions unmatched in the industry.

NCR's Open Networking Environment consists of four general categories of products.

The first category is a comprehensive suite of OSI networking products that includes:

- Open Network System, a free-standing OSI-based backbone network that implements all seven layers of the OSI reference model. ONS also provides network application services such as X.400 Message Handling Services - OSI software that provides OSI networking capability for the NCR System 3000 - Communication subsystems compatible with Micro Channel Architecture The second category is a full suite of SNA and TCP/IP software products for the System 3000 providing coexistence between existing and OSI networks.

The third category is a set of transitioning products that allow customers to access their old and new network environments while in the process of moving to standards-based networking.

The fourth category is an OSI-based network and systems management software product that extends across the Open Networking Environment to help customers manage their systems and networks.

NCR's Open Networking Environment is supported worldwide by over 20,000 people in 122 countries. Support options include network planning and design, network integration, and network management. NCR also provides a broad range of service offerings, including consulting, systems integration, project management, installation, and training.

NCR Corporation, based in Dayton, Ohio, develops, manufactures, markets, and supports business information processing systems for worldwide markets.

#90289p5256 10/16/1990 ~PR Newswire

CASS CITY, MICH. (OCT. 16) PR NEWSWIRE - L.E. Althaver, chairman, president, and chief executive officer, Walbro Corporation (NASDAQ-NMS: WALB), reported net sales of $45,127,000 for the third quarter ended Sept. 30, 1990, compared with $29,392,000 for the same period in 1989. (Third-quarter 1990 sales include $5,385,000 from the recently acquired Sharon Manufacturing Company.)

The company reported net income from continuing operations of $512,000 for the quarter compared with a net loss of $1,877,000 for the third quarter of 1989.

Income per share from continuing operations was $.12 for the third quarter, based on an average of 4,289,161 shares outstanding. This compares with a net loss of $.44 per share for the third quarter of 1989, based on 4,289,436 shares outstanding.

"Demand for electric fuel pumps for automotive original equipment applications was high during the third quarter, and the Automotive Division's Caro, Mich., facility set a fuel pump production record in August," Althaver said in announcing the results.

He also noted that a major fuel module program has now reached production at the Automotive Division's Meriden, Conn., facility, significantly increasing sales from that operation.

Althaver said that Sharon Manufacturing Company, Lambertville, Mich., has several major fuel rail projects under way that should contribute positively to Walbro's bottom line by year-end.

"Future orders for automotive fuel system products are strong at this time," Althaver said. "However, uncertainty over recent developments in the Middle East could have a negative effect on shipments of automotive products in the fourth quarter and in 1991," he cautioned.

"Shipments of diaphragm carburetors by Walbro's Small Engine Division were somewhat above last year's levels during the third quarter," the chief executive said. "Demand for float-feed carburetors for outboard engines and lawn-and-garden equipment was low, however, due to continued softness in consumer sales of those products. But float- feed carburetor shipments should increase significantly next year as a major new carburetor program reaches production," he added.

Walbro Corporation is a designer and manufacturer of automotive and small engine fuel system components. Walbro is headquartered in Cass City, and has

subsidiaries and joint ventures throughout the world, including the United States, Japan, Singapore, West Germany, Mexico, Korea and Hong Kong. Walbro common stock is traded on the NASDAQ National Market System under the symbol WALB.

BRANFORD, CONN. (OCT. 16) PR NEWSWIRE - Branford Savings Bank (NASDAQ-NMS: BSBC) today reported that it made a special addition to its loan loss reserve in the amount of $8.7 million for the third quarter ended Sept. 30, 1990. The addition resulted in an after-tax loss of $7,765,000 ($4.99 per share) for the first nine months of 1990 and a third-quarter after-tax loss of $7,972,000 ($5.12 per share). This resulted in an increase in the banks' loan loss reserves from $1,917,000 on June 30, 1990, to $9,556,000 as of Sept. 30, 1990, which represents 32 percent of non-accruing loans.

Non-accrual loans and foreclosed real estate as of Sept. 30, 1990, stood at $29,839,000 and $4,787,000, respectively. The bank's primary capital ratio (which includes loan loss reserves) stood at 8.27 percent, which is above regulatory minimum requirements. Shareholders' equity as of Sept. 30, 1990, was $16,526,000 or the equivalent of a $10.61 book value per share.

Harry F. Whittemore Jr., president and chief executive officer, indicated that the addition to the loan loss reserve was made due to the continuing decline of the local economy and its impact on the banks' loan portfolio. He added that it was prudent to take this decisive action to respond to the deepening uncertainty of today's economic environment and to put the bank in a stronger position to deal with the challenges now confronting the banking industry.

Branford Savings Bank is an FDIC-insured, state-chartered savings bank founded in 1889. Five offices are located in Branford (two), North Branford and East Haven (two).

DALLAS (OCT. 16) PR NEWSWIRE - Vinland Property Trust (NASDAQ: VIPTS) today announced operating results for the third quarter and nine months ended Aug.

31, 1990.

For the three months ended Aug. 31, 1990, the trust recorded a net loss of $149,000, or 2 cents per share on revenues of $1.1 million, compared with a net loss of $1.1 million, or 19 cents per share, on revenues of $1.7 million in the third quarter of the prior year.

For the nine months ended Aug. 31, 1990, the trust recorded net income of $713,000, or 12 cents per share, on revenues of $7.7 million, compared with a net loss of $3.4 million, or 57 cents per share, on revenues of $4.8 million in the first nine months of 1989.

Rental income for the third quarter and nine months ended Aug. 31, 1990, decreased to $700,000 and $2.4 million, respectively, as compared with $1.0 million and $3.2 million for 1989's third quarter and first nine months.

"Rental income was lower this year because we lost a shopping mall through foreclosure in June 1989, sold an apartment complex in January 1990 and gave back to the senior lien holder another apartment complex in February 1990," said a spokesperson for the trust.

Vinland Property Trust is a combination mortgage and equity real estate investment trust which operates primarily in Texas and Oklahoma.

#90289p5266 10/16/1990 ~PR Newswire

CHICAGO (OCT. 16) PR NEWSWIRE - Freddie Mac (NYSE: FRE) today announced it will begin purchasing balloon/reset mortgages through Gold Cash and swapping them for Gold Mortgage Participation Certificates (PCs) under the Guarantor program. The announcement was made during the Mortgage Bankers Association annual convention this week.

Gold Balloons are conventional, fixed-rate mortgages due in five or seven years with monthly payments based on a 30-year amortization schedule. At the end of five or seven years, the borrower has the option to either repay the loan or reset the interest rate and extend the mortgage for 25 or 23 years, respectively, provided the borrower meets certain conditions.

"Freddie Mac's Gold Balloons offer unparalleled flexibility to match borrower and investor needs," said Rich Bryan, senior vice president of operations and acting national sales director of the marketing and sales division.

"Balloon/reset mortgages appeal to homebuyers because they're tailored to their lifestyles. Borrowers who plan to stay in a home between five and seven years find the balloon/reset mortgage to be a great alternative because it

provides flexibility and generally lower start rates than the 30-year mortgage."

Bryan emphasized that investors holding Freddie Mac Gold PCs backed by balloon/reset mortgages get a double advantage. The securities backing them offer a shorter term and a more predictable maturity range than traditional 15- or 30-year mortgage-backed securities and, consequently, a very competitive price. They also offer the shortest investor payment delay of any conventional mortgage pass-through security available today.

Lenders will now be able to use Freddie Mac's Gold Cash and Gold PCs when selling balloon/reset mortgages to the corporation. Both offer Freddie Mac's competitive secondary market pricing and will give lenders the ability to offer homebuyers a lower start rate and investors an attractive short-term security.

For a borrower to reset the loan, the new note rate cannot be more than five percentage points over the original rate, the property securing the mortgage must be owner-occupied and have no additional liens, encumbrances or defects against the property, and the mortgage must not have been delinquent during the 12 months prior to the maturity date. The borrower must also make a written request of the note holder to reset the mortgage.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of home ownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer.

#90289p5267 10/16/1990 ~PR Newswire

BOSTON (OCT. 16) PR NEWSWIRE - NCR's (NYSE: NCR) release of OSI communications software is the industry's first implementation of OSI across an entire range of systems.

This set of networking software for the NCR System 3000 allows users to implement the seven layers of the Open Systems Interconnection (OSI) Reference Model across their entire enterprise, from a single workstation to a large, enterprise-level processing system.

As a result, users can run current industry-standard OSI applications immediately and add other OSI capabilities as they become available, allowing them to migrate to OSI at their own pace.

NCR delivers the core of this communications software set to provide compatibility with OSI layers 2 - 7 as a standard feature of the UNIX V.4 operating system for the NCR System 3300, 3400, and 3500 at no extra cost.

This software makes the System 3000s OSI-Ready, that is, able to participate in an OSI network and run OSI applications. Because the system 3000 is scalable, users have the flexibility to expand their systems to meet growing application and communication requirements.

Along with the standard layers provided with the UNIX V.4 operating system, users can add new OSI application services for X.400 Message Handling System, X.500, Directory Services, File Transfer Access and Management (FTAM), Virtual Terminal, and the X.400-based NCRMail application so that users can run network applications after they have established their OSI-based network.

By making OSI a standard feature today in the System 3000, users can install the System 3000 to run their existing applications today, whether or not those existing applications are OSI-compatible, and can implement OSI at their own pace without obsoleting or requiring additional software for the System 3000.

General customer availability is first quarter 1991 for the UNIX V.4 operating system on the System 3300, 3400, and 3500. U.S. license fees for the OSI application services range from $800 to $44,700 depending on application and model. OSIready is a trademark of NCR Corporation. UNIX is a registered trademark of AT&T.

#90289p5268 10/16/1990 ~PR Newswire

OSLO, NORWAY (OCT. 16) PR NEWSWIRE - The DnB Group's results for the second four-month period of 1990 were presented today by group Managing Director Egil Gade Greve. He stated that the results for the second four-month period are a definite step in the right direction. "Den norske Bank is on schedule with respect to both the results for the second interim and the merger."

"Den norske Bank Group showed a positive trend from the first to the second interim this year. Profits before loan loss provisions and taxes increased from NOK 928 million for the first four months of the year to NOK 1,021 million in the May to August period. Furthermore, the net loss of NOK 491 million in the first interim has been turned round to a net profit of NOK 137 million in the second interim. The bank's net loss for the first eight months of the year has thus been brought down from NOK 491 million at end-April to NOK 354 million at end-August.

Cost Reductions According to Plan

Operating expenses for the first eight months of the year have been cut by

NOK 166 million compared with the same period last year in spite of the fact that merger costs totalling NOK 150 million have been charged to the accounts.

"Staff reductions have progressed according to plan. This is a decisive factor as personnel expenses represent the major part of our total costs," Gade Greve said. He stated further that on a full-time basis the DnB Group had reduced the number of employees by 865 as at Oct. 1, while the target figure for the current year is 985. Further staff reductions are planned for 1991.

Gade Greve drew attention to the swift implementation of cost reductions in the DnB Group's international network.

Reduced Loan-Loss Provisions
Loan-loss provisions in the second four-month period amounted to NOK 884 million as against NOK 1,369 million in the first period. Loan-loss provisions for the first eight months of 1990 were NOK 120 million below those in the corresponding period last year.

Prospects For the Rest of 1990
"In the final months of the year, developments may to some extent be influenced by conditions beyond the bank's control. Uncertainty prevails with regard to both international developments and the Norwegian economy. Domestic developments have not yet provided the desired stimulus to that part of the business community which depends on the Norwegian market."

"It is our opinion that the net result for the final period can be expected to be at least on a level with the result for the second four- month period. Den norske Bank anticipates further cost reductions in the September-to-December period, partly because the substantial staff cuts will not be reflected in the accounts until towards the end of the year."

Meets Current Capital Adequacy Requirements with a Comfortable Margin
According to Gade Greve, Den norske Bank satisfies the minimum legal requirement for capital adequacy with a comfortable margin. The equity capital of the units for which the bank is required to maintain a minimum capital ratio, was 7.7 percent, while the minimum requirement is 6.5 percent. According to new capital adequacy requirements which are expected to be introduced from January 1991, the bank's capital ratio, based on equity as at Aug. 31 1990, will be 5.6 percent. By the end of 1992, the minimum capital ratio will have to be increased to 8 percent.

NEW YORK (OCT. 16) PR NEWSWIRE - John R. Stafford, chairman and chief executive officer of American Home Products Corporation (NYSE: AHP), today

reported sales and record earnings for the third quarter and nine months ended Sept. 30, 1990.

Net sales for the 1990 third quarter declined two percent from prior year levels to $1,743,463,000 although sales of continuing operations increased for the quarter. Net sales for the nine months ended Sept. 30, 1990 increased one percent to $5,161,962,000.

The prior year periods and the 1990 nine month period included results from the company's worldwide household products and related businesses, which were sold effective June 29, 1990. Had these results been excluded, reported net sales would have increased five percent for the third quarter and three percent for the nine months ended Sept. 30, 1990.

Third quarter 1990 net income increased 14 percent to $317,551,000. Net income per share increased 13 percent from $.89 to $1.01. Net income for the nine month period increased 13 percent in 1990 to $902,389,000, while net income per share increased 12 percent from $2.56 to $2.87.

Net sales of health care products increased six percent for the third quarter and three percent for the nine months ended Sept. 30, 1990. Worldwide pharmaceutical sales increased ten percent for the third quarter and four percent for the first nine months of 1990.

Consumer health care sales declined four percent worldwide in the 1990 third quarter and were flat compared with 1989 levels for the nine months ended Sept. 30, 1990. Medical supplies and diagnostic product sales increased ten percent in the third quarter and seven percent in the nine month period.

Net sales of food and household products declined in the 1990 third quarter and nine month periods due to the sale of the company's worldwide household products and related businesses effective June 29, 1990. Food product sales were one percent higher for the 1990 third quarter and three percent higher for the nine month period.

ROCHESTER, N.Y. (OCT. 16) PR NEWSWIRE - Eastman Kodak Company's (NYSE: EK) Consumer Imaging Division has donated 15 professional movie projectors, model AV1000 to U.S. troops in Saudi Arabia. The projectors, which retail for $1,885 each, will be used during operation Desert Shield to entertain the U.S. troops.

"Despite all of the electronic advances with VCR projection," said Jim Tait, director of military sales for the Consumer Imaging Division, "conventional

movie projection still offers the easiest way to reach large numbers of people quickly with a minimum of fuss."

NEWARK, NJ (OCT. 16) PR NEWSWIRE - The Prudential officially entered the life insurance business in Taiwan today. Taking another important step in its international expansion, the company formally inaugurated its new Taiwanese life insurance organization with a ceremony in the capital city of Taipei.

The new unit, which was licensed in 1989 and built from scratch over the past two years, commences operations with more than 70 employees working out of a headquarters and four field offices in Taipei.

The Prudential will sell and underwrite in Taiwan a range of individual whole life and term insurance products, as well as endowment plans, targeted mainly to middle- and upper-income residents.

Unlike Taiwanese insurers, who primarily market short-term, savings-oriented endowments through part-time agents, The Prudential initially plans to emphasize long-term protection products and personal service through a full-time, highly trained professional sales force. In the future, the company will introduce and market a full range of innovative products and services.

"We see Taiwan as one of the most attractive life insurance markets in Asia," said Kenneth J. O'Dea, president of Prudential's Asian Region, at the ceremony today.

"Total premium income throughout Taiwan has increased by more than 20 percent annually over the past five years, and prospects for future growth are extremely promising," he said. The country has had one of the world's fastest-growing economies in recent years, O'Dea noted, and its relatively young population still owns very little life insurance.

"Quality service, provided by a sales force of full-time, professional sales and service representatives, is what really will differentiate us from the competition in Taiwan," said Prudential President Joseph J. Melone at the Taipei ceremony. "As we do throughout The Prudential, we will be placing significant emphasis on ensuring complete customer satisfaction both before and after each sale is made."

President and Chief Executive Officer of Prudential's Taiwan organization is Li-Chieh Chen, a Taiwan native with more than 15 years of insurance industry experience, both in Taiwan and the U.S. Chief actuary and financial officer is Shirley H. Shao, also a Taiwan native and an experienced insurance executive.

Calvin Y.Y. Wong of hong Kong is chief marketing officer.

Taiwan is the third country outside of North America in which The Prudential has begun selling insurance. The company has been operating in Japan for nearly ten years, and started selling insurance products in Spain earlier this year.

#90289p5275 10/16/1990 ~PR Newswire

AUGUSTA, GA. (OCT. 16) PR NEWSWIRE - Bankers First Corp. (NASDAQ-NMS: BNKF) today announced third quarter earnings per share of $.30, a 3.4 percent increase over the $.29 per share earned for the 1989 period.

Net income for the 1990 quarter was $1.303 million compared to $1.243 million for the 1989 quarter, an increase of 4.8 percent.

Year-to-date earnings totaled $.90 per share for 1990 compared to $.86 per share for 1989. Net income year-to-date was $3.894 million for 1990 compared to $3.685 million for 1989. Tangible book value per share rose 9.3 percent to $14.77 at Sept. 30 from $13.51 at Sept. 30, 1989. Book value per share rose 4.0 percent to $19.36 at quarter end compared to $18.62 at Sept. 30, 1989.

H.M. Osteen Jr., chairman and chief executive officer, commented: "The continued improvement in the interest spread combined with our ongoing efforts to reduce general and administrative expense has resulted in net interest income exceeding overhead by $.9 million for the third quarter which continues the trend established in the prior quarter.

"We are also pleased that through the hard work and dedication of our employees, repossessed assets decreased by $4.2 million during the third quarter to reach their lowest level since June 1988."

Third quarter results included non-recurring gains of $1.3 million related to the sale of two branch offices and a $.9 million gain on sale of a portion of the credit card portfolio. These gains were substantially offset by a $2.9 million charge to the provision for loan losses. This represents a $2.2 million increase to the provision over 1990 quarterly amounts.

The company also declared its regular quarterly dividend of $.07 per share. The dividend will be paid to stockholders of record on Oct. 31. The payments will be made on Nov. 15.

Bankers First Corp. is a financial services company principally serving the Augusta, Athens, Rossville (Chattanooga, Tenn.) and Savannah, Ga., markets with 36 banking offices and 34 automated teller machines. The company's

common stock is traded on the NASDAQ National Market System using the symbol BNKF. The abbreviation found in most newspaper listings is "Bankers First."

#90289p5277 10/16/1990 ~PR Newswire

SCHAUMBURG, IL (OCT. 16) PR NEWSWIRE - The W.T. Grimm & Co. unit of Merrill Lynch Business Brokerage and Valuation said today the total value of announced merger and acquisition transactions disclosing a purchase price dropped 61 percent in the 1990 third quarter to $28.2 billion from $71.9 billion in the 1989 third quarter, and was relatively flat versus the 1990 second quarter announcements of $29.7 billion.

The number of mergers and acquisitions announced in the 1990 third quarter fell 13.1 percent to 584 from the 672 announced a year earlier, and 2.5 percent from the 599 announced in the 1990 second quarter.

For the first nine months of 1990 announced mergers and acquisitions declined 12 percent to 1,745 from 1,977 a year earlier. The total value of announced transactions disclosing a purchase price was $91.3 billion, less than half last year's $188.1 billion.

As a result of decreased activity and lower total value, the average

transaction price announced in the 1990 nine months fell 38.8 percent to $127.8 million from $208.7 million in the 1989 nine month period and the median price offered was down 31.8 percent to $24 million from $35.2 million a year earlier.

The total value of the ten largest transactions announced in the 1990 nine months is almost 60 percent lower than the value of the ten largest in the comparable 1989 period, $27.1 billion versus $66.7 billion, and less than the total of the two largest deals announced in the 1989 nine months.

The two largest deals announced in the 1990 nine months are the acquisition of Contel Corporation by GTE Corporation for $6.4 billion and the purchase of UAL Corporation by a private group for $4.4 billion. These potential deals, which are uncertain to close, are dwarfed by the two top 1989 nine month deals: the statutory merger of Beecham Group Plc and Smithkline Beckman Corp. valued at $16.1 billion and the acquisition of Squibb Corp. by Bristol-Myers Co. for $12 billion.

The number of announced divestitures was down 13 percent in the 1990 nine months to 772 from 887 in the comparable 1989 period. Despite the decrease, divestitures continue to play a significant role in merger and acquisition activity in 1990, accounting for about 44 percent of the announced deals in the 1990 nine months.

Headquartered in Schaumburg, Merrill Lynch Business Brokerage and Valuation specializes in business interest valuations as well as the purchase, sale and merger of middle market companies. Its W.T. Grimm & Co. unit is the publisher of Mergerstat Review and its merger data bank is one of the oldest and most extensive of its kind having recorded approximately 80,000 transactions since 1963.

PRINCETON, N.J. (OCT. 16) PR NEWSWIRE - Cytogen Corp. (NASDAQ: CYTO) today announced the appointment of Martin D. Cleary to the newly created position of group vice president and chief financial officer effective immediately.

Previously, Cleary was vice president of finance and administration and CFO for the company which specializes in the development of monoclonal antibody-based delivery systems for diagnostic and therapeutic applications in human healthcare.

In this new position, Cleary will be responsible for marketing and corporate communications in addition to his current responsibilities in finance and

personnel. Cleary, who joined Cytogen in 1986, has more than 18 years of managerial experience including a number of senior management positions at Johnson & Johnson. Prior to joining Cytogen, Cleary was vice president of operations at Iolab Corp., a Johnson & Johnson subsidiary in Claremont, Calif.

In making the announcement, Chairman and Chief Executive Officer George W. Ebright said, "Marty brings with him management expertise which gives Cytogen tremendous strength in planning the successful commercialization of our OncoScint (R) and OncoTc cancer imaging franchise products."

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

#90289p5286 10/16/1990 ~PR Newswire

NEW YORK (OCT. 16) PR NEWSWIRE - In its most recent filings with the federal government, Grace Specialty Chemicals Co. reported that it reduced its reportable emissions in 1989 compared with 1988 by nearly 8 percent. These are the first results announced since the company said it planned to reduce emissions by 50 percent over the next five years.

Grace Specialty Chemicals is the largest operating unit of W. R. Grace & Co. (NYSE: GRA), an international specialty chemical company with interests in energy, manufacturing and service businesses with sales exceeding $6 billion.

"We have stated publicly that Grace Specialty Chemicals plans to cut its emissions by half over the next five years, and this puts us in a strong position to do so," said Donald H. Kohnken, president of Grace Specialty Chemicals Co. "This performance is due to the work of our environmental specialists who continually develop new methods for waste minimization and who look to employ the latest technology." He added that the reduction was important because it was achieved even though manufacturing volume increased.

The company's results are reported to the federal government under the SARA Title III requirements whereby emissions of certain chemicals must be tabulated. Grace reported a reduction of 47 percent in 1988 as compared with 1987.

Grace Specialty Chemicals Co. employs more than 100 specialists in the area of environmental safety and has budgeted to spend more than $80 million on those

efforts this year, 25 percent higher than 1989 spending.

BALTIMORE (OCT. 16) PR NEWSWIRE - Loyola Capital Corp. (NASDAQ: LOYC), the holding company for Loyola Federal Savings and Loan, today announced net income of 53 cents per share for the three months ended Sept. 30, compared with third quarter 1989 earnings of 51 cents per share.

Net income was $2.5 million for the quarter, as compared with $2.6 million earned during the comparable period in 1989.

Year-to-date net income was $7.5 million ($1.56 per share). During the first nine months of 1989, the corporation earned $7.9 million ($1.56 per share).

Net interest income was $12.5 million for the third quarter, up 12.7 percent from $11.1 million earned during the third quarter of 1989. Year-to-date net interest income of $36.7 million rose 6.3 percent over the $34.5 million earned in 1989. The corporation benefited from a wider spread between the cost of deposits and the yield on loans and investments.

The provision for loan losses was increased by $1.4 million, increasing the general loan loss reserve to $9.7 million. The increase was necessary to recognize the effect on the automobile loan portfolio of the continuing decline in the mid-Atlantic regional economy.

Non-interest income increased by $1.6 million primarily as a result of a $2 million one-time gain received in connection with a real estate project in South Carolina.

Non-interest expenses increased by $1.7 million including a provision for losses on investments in real estate of $750,000.

Asset quality remained high at Loyola, with non-performing assets now constituting only 1.5 percent of total assets, which is considered favorable by industry standards.

Continuing a two-year stock buyback program, Loyola Capital repurchased 136,464 shares of its common stock during the quarter. "Like many strong financial institutions, the value of our franchise is not reflected in the price of our stock due to the drumbeat of negative press coverage," said Joseph W. Mosmiller, chairman and chief executive officer. Mosmiller said the board of directors authorized the repurchase program to support the stock and increase book value and earnings per share. Primarily as a result of the buyback, average shares outstanding during the third quarter declined to

4,698,286 from 5,074,114 in 1989.

Book value of the common stock reached $29.50 per share and stockholders' equity grew to $135.2 million at Sept. 30. Total deposits of $1.54 billion were up 1.4 percent over $1.52 billion one year ago.

Loyola Capital Corp., headquartered in Baltimore, is the holding company for Loyola Federal Savings and Loan Association. Loyola's 32 retail branches are located throughout the state of Maryland and in the Washington metropolitan area. With more than a century's experience in retail services and mortgage lending, Loyola has diversified through subsidiaries into real estate appraisal, auto and boat financing, insurance and real estate development.

ERIE, PA (OCT. 16) PR NEWSWIRE - Spectrum Control, Inc. (NASDAQ-NMS: SPEC), a worldwide manufacturer of electronic components, today reported results for the 39 weeks and third quarter ended Aug. 31, 1990.

For the third quarter, the company sustained a net loss of $963,000 or ten cents per share on sales of $7,472,000, versus a loss of $744,000 or 14 cents per share on sales of $7,258,000 for the same period last year.

Net loss for the first 39 weeks of 1990 was $2,298,000 or 28 cents per share on sales of $23,965,000, compared to a net loss of $665,000 or 12 cents per share on sales of $23,175,000 for the like period of the prior year.

"These results do not reflect the substantial progress achieved in refocusing operations on our core electromagnetic filtering technology and business and implementation of extensive cost reduction programs," Jack Johnston, president and chief executive officer, said.

"While the previously announced consolidation of our west coast manufacturing facility into our Fairview, Pa., plant negatively impacted third quarter results, benefits from the move will become apparent in fiscal 1991," he added.

"The reorganization of sales and marketing activities also is designed to reduce costs beginning next year, while increasing our contact with customers and enhancing our responsiveness to their needs," Johnston continued.

"We continue efforts to divest ourselves of Spectrum Polytronics, which will enable us to concentrate all of our efforts in the growing electromagnetic compatibility marketplace where we have earned and maintain a strong niche position," he concluded.

Spectrum Control designs, manufactures and markets a broad line of electromagnetic compatibility (EMC) products designed to protect electronic equipment against interference form random electromagnetic waves and to fulfill other electronic circuit needs.

Spectrum provides an integrated approach to EMC problem solving by offering customers a broad range of consulting, diagnostic testing, and manufacturing services.

These services include testing for EMC problems (at the company's facilities or on location), analyzing test results, proposing design solutions, producing the required components, and supplying these components to over 1,300 customers for use in communications systems, data processing, telecommunications, process control, and other equipment.

#90289p5294 10/16/1990 ~PR Newswire

COLUMBUS, OH (OCT. 16) PR NEWSWIRE - Banc One Corporation, Columbus, Ohio (NYSE: ONE) reported third quarter earnings of $109.1 million or $.68 per share. Earnings per share were 6.3 percent higher than 1989 third quarter earnings of $.64.

For the nine month period ending Sept. 30, 1990, Banc One's net income was $314.9 million or $2.08 per share. This represents an increase of 10.6 percent over 1989 earnings of $1.88 per share.

Third quarter net income was a record, representing an increase of 18.8 percent over third quarter 1989, and 4.9 percent over the previous record level of net income reported last quarter.

During the third quarter, Banc One completed a $200 million subordinated debt offering. The proceeds of this offering, along with Banc One's $325 million common stock offering and repayment of certain loans to subsidiaries, have enabled the corporation to reduce its commercial paper borrowings from $1 billion to less than $300 million.

John B. McCoy, chairman and chief executive officer of Banc One, said, "We are very pleased to have successfully issued at our own discretion both stock and debt during the last six months, especially in the current environment for banks."

He noted that Banc One has raised over 20 percent of all new capital publicly raised by United States banks this year. McCoy continued, "As of Sept. 30, 1990, Banc One's primary capital exceeded $3 billion and was 10.86 percent of assets, the highest ratio in our history."

Banc One's provision for loan and lease losses in the third quarter was $76.2 million, an increase of 24.5 percent over the second quarter and 33 percent above the third quarter of 1989. This increased provision covered net charge-offs of $66.6 million in the third quarter and funded the increase in the loan loss reserve to 1.47 percent of ending loans.

Non-performing assets, including other real estate owned totalled $405 million as of Sept. 30, 1990 compared to $340 million at the end of June, and $291 million one year ago. This represented 2.04 percent of loans and leases compared to 1.77 percent at the end of June, and 1.64 percent a year ago.

Annualized third quarter net charge-offs of 1.36 percent compare to 1.19

percent recorded in the third quarter of 1989. McCoy said, "The increased provision reflects the continued deterioration of the economy." He added, "We expect no significant adverse results from the normal annual regulatory examination now in process."

STATE COLLEGE, PA. (OCT. 16) PR NEWSWIRE - Richard E. Perry, chairman, president and chief executive officer of C-COR Electronics Inc. (NASDAQ-NMS: CCBL), today announced the financial results for the first quarter ended Sept. 28, 1990.

C-COR reported net loss of $244,000 on sales of $10,144,000. This compares to net income of $1,113,000 on sales of $13,227,000 for the first quarter of the previous year. Loss per share for the quarter ended Sept. 28, 1990, was $.06. This compares to earnings per share of $.26 for the same quarter of the previous year. C-COR's fiscal year ends on June 30.

As reported in an earlier release on the anticipated first quarter results, Perry stated, "If cable legislation is settled quickly and Congress attacks the deficit problem, we expect market conditions to improve dramatically. We are well-prepared for a return to pre-slowdown production levels once legislation is settled and market conditions improve."

C-COR, founded over 35 years ago, designs and manufactures high quality electronic equipment used in cable television and data communication systems. C-COR's headquarters is in State College, Pa., with production facilities in Tipton and State College, Pa. C-COR Electronics Canada Inc., a subsidiary of C-COR Electronics Inc., is located in Ontario, Canada. C-COR/COMLUX Inc., C-COR's newest subsidiary manufacturing digital fiber optic products, is located in Mountain View, Calif. C-COR Europe B.V., C-COR's European marketing arm, is located in The Netherlands. C-COR's common stock is listed in the NASDAQ National Market System under the symbol CCBL.

#90289p5297 10/16/1990 ~PR Newswire

ADDISON, ILL. (OCT. 16) PR NEWSWIRE - Hako Minuteman, Inc. (NASDAQ-NMS: HAKO) said today that results for the third quarter ended Sept. 30, 1990, appear to signal a halt from the downward trend experienced earlier in the year.

Net income in the 1990 third quarter was $607,000, or 17 cents per share, down 16.5 percent from the $727,000, or 20 cents per share, earned in the 1989 period. Net sales were $7,852,000, compared to $8,003,000 a year earlier.

For the nine months, net income was $1,749,000, or 48 cents per share, down 25 percent from $2,331,000, or 64 cents per share, for the nine months ended Sept. 30, 1989. Net sales were $23,073,000, compared to $24,754,000.

Jerome E. Rau, president and chief executive officer, said that while sales continue to be adversely affected by the severe downturn in the asbestos abatement industry, this was offset somewhat by the introduction of new products which have been well received.

"Our customers have shown an enthusiastic reception for our competitively-priced compact automatic scrubbers which were recently introduced and we expect the same response to our new two-motor upright vacuum which we will showcase at the International Sanitation and Supply Show in Atlanta later this month," Rau said.

"We hope in spite of the sluggish economy that the introduction of these new products and initial new business will help our 1990 fourth quarter and that sales and income will compare favorably to 1989 fourth quarter results. The orders we have in house should help sales and income considerably in the 1991 first quarter."

Dividend Declared The board of directors has declared a dividend of 5 cents per share on the company's common stock, payable Nov. 15, 1990, to shareholders of record on Oct. 31, 1990. Hako Minuteman paid an initial dividend of 5 cents per share on Nov. 15, 1988, and has paid quarterly dividends of 5 cents per share since that time.

Headquartered in Addison, Hako Minuteman, Inc., manufactures one of the most complete lines of commercial and industrial vacuums, floor and carpet care equipment and chemical cleaning and coating products in the United States and Canada.

ST. PAUL, MINN. (OCT. 16) PR NEWSWIRE - Northwest Airlines today said it would raise fares 5.8 percent on tickets purchased on or after Oct. 31.

The price increase is designed to further combat higher operating costs resulting from fuel prices that have more than doubled since Iraq invaded Kuwait Aug. 2.

Northwest and other airlines already have raised fares 9.5 percent in two steps since late August.

Northwest, America's fourth largest airline, uses more than 5 million gallons of fuel a day.

CHARLOTTE, N.C. (OCT. 16) PR NEWSWIRE - CCAIR, Inc. doing business and USAir Express (NASDAQ-NMS: CCAR) (the "Company"), through its President, Roy H. Hagerty, announced that it intends to remain part of the USAir Express system and will present its position to the courts within a few days.

Mr. Hagerty's statement came in response to USAir's (NYSE: U) filing of a motion on Monday to terminate its Agreement with CCAIR.

"CCAIR was surprised and disappointed by USAir's action," Hagerty said. "We were working in good faith with USAir in an effort to better serve our respective and mutual passengers in the communities which we serve. We are shocked by this action."

"We are in full compliance with the terms of the Agreement with USAir and stand by our position that we are not in default under the terms of the agreement," Hagerty said. "We are considering several alternatives and will be in a position later this week to present our positions to the courts."

"It is our intention to remain part of the USAir Express system and to continue to provide the same safe and reliable service to our pasaengers that has been our hallmark over the years. We will maintain the highest safety standards required and expected of us," he said.

Hagerty also noted that the Agreement cannot be terminated without the express approval of the Bankruptcy Court. A hearing on this matter before the Bankruptcy Court has been set for November 5, 1990.

DAYTON, OHIO (OCT. 16) PR NEWSWIRE - Huffy Corporation (NYSE: HUF) today announced record sales and profits for the third quarter and for the nine months ended Sept. 30, 1990. Net sales for the quarter were $118,425,000, surpassing last year's third quarter net sales of $103,359,000 by $15,066,000, or 15 percent. Net earnings for the quarter of $3,888,000 exceeded last year's earnings for this same period of $3,499,000 by more than 11 percent. Fully diluted earnings per share for the third quarter of 1990 were $.41, compared to the $.39 earned for the same period in 1989.

Net sales for the nine months ended Sept. 30, 1990 were $395,355,000, up 14 percent over sales of $346,448,000 for the comparable nine month period in 1989. Net earnings through Sept. 30, 1990 were $16,993,000, or $1.76 per common share, compared to $13,135,000, or $1.47 per common share, for the same period in 1989.

Richard L. Molen, president and chief operating officer, said, "Our results through Sept. 30, 1990 established new third quarter and nine month records for both sales and net earnings, and represent the sixth consecutive quarter in which we have established record performances. Third quarter results for all three business segments exceeded sales and operating earnings for the same period last year. The most notable improvements were made by the Huffy Bicycle Company in the Recreation and Leisure Time Products segment, and Gerry Baby Products Company in the Juvenile Products segment. In the Services for Retail segment, we believe that the investments which we have made over the last 18 months, particularly at Washington Inventory Service, are beginning to generate positive results."

Harry A. Shaw III, chairman and chief executive officer, continued, saying, "In addition to our outstanding operating results, on Oct. 4, 1990, Huffy Corporation announced that it had reached agreement with the Black & Decker Corporation to acquire for cash the U.S. and Canadian assets of its True Temper Hardware business and the capital stock of True Temper Limited

(Ireland). This transaction is expected to close within the next four weeks. True Temper is a major manufacturer of long handled garden tools, wheel goods, lawn spreaders, cutting tools and related products. We are very excited to add the True Temper Hardware business and its management team to Huffy. Acquisitions are an integral part of our long term strategy, and we believe that True Temper is an excellent strategic fit that will contribute to our future success. We anticipate that True Temper will increase both Huffy's earnings per share and return on equity during both 1990 and 1991."

Shaw also commented on the company's fourth quarter, saying, "Results for the next three months are highly dependent upon the condition of the U.S. economy, and the optimism of both retailers and consumers. Thus far, we have not experienced a widespread deterioration in orders or backlog."

Huffy Corporation is a major manufacturer of bicycles, juvenile and basketball products, and a nationwide supplier of assembly and inventory services to retailers.

#90289p5323 10/16/1990 ~PR Newswire

PITTSBURGH (OCT. 16) PR NEWSWIRE - Mellon Bank Corp. (NYSE: MEL) said today that its board of directors has increased the number of shares authorized to be repurchased under a limited stock repurchase plan announced last October.

Mellon Bank has repurchased 500,000 of its outstanding shares of common stock to date under the stock repurchase plan, in connection with benefit plan requirements. The board today authorized the repurchase of up to 250,000 additional shares of common stock.

The stock repurchase plan authorizes the corporation to make repurchases from time to time in the open market or through privately negotiated transactions. Repurchased common shares will be added to the corporation's treasury shares and will be used to meet the corporation's current and near-term common stock requirements for its benefit plans. At Sept. 30, 1990, the corporation had 44.1 million shares of common stock outstanding.

In a separate action, the board of directors also authorized the corporation to make repurchases from time to time of any or all of the corporation's 2.6 million outstanding warrants to purchase common stock. The warrants, which are not listed on any exchange or actively traded, become available in the private market from time to time. A committee of the board will approve the terms of such repurchases as they may occur.

Each warrant is exercisable for one share of common stock at any time until

August 1994 for an exercise price of $25 per share. Three million warrants were issued as part of the corporation's 1988 capital financing plan. Approximately 400,000 warrants were tendered to the corporation through an exchange offer for Mellon common stock conducted earlier this year.

With assets of $29.4 billion at Sept. 30, 1990, Mellon Bank Corp. is one of the nation's largest bank holding companies. Through its subsidiaries, it engages in wholesale, middle market and retail banking, as well as numerous service products including trust and investment, financial data processing and cash management.

#90289p5325 10/16/1990 ~PR Newswire

NEW YORK (OCT. 16) PR NEWSWIRE - McGraw-Hill, Inc. (NYSE: MHP) reported net income of $67,354,000 for the third quarter, an increase of 5.1 percent from the same period last year. Revenue for the third quarter climbed 11.2 percent to $502,785,000. Earnings per share were $1.38 vs. $1.31 a year ago.

For the first nine months of 1990, net income was $121,046,000, a decline of 17.1 percent. Revenue for the period increased 8.6 percent to $1,380,577,000. Earnings per share for the first nine months were $2.48 compared with $2.99 last year.

"We successfully overcame several obstacles to produce third-quarter growth," said Joseph L. Dionne, chairman and chief executive officer of McGraw-Hill, Inc. "We had to contend with a non-repetitive gain of 20 cents per share last year from the sale of magazines and newsletters and a nearly $4 million increase in interest expense, the result of financing acquisitions made late in 1989 and at the beginning of 1990.

"Still, all four operating segments in the third quarter produced revenue gains and operating profits increased by 20.4 percent which includes an estimated $10 million of pre-tax savings from the realignment of operations in 1989.

"In Financial Services, a fine performance by MMS International, growth in Standard & Poor's Ratings business overseas and a surge in the ratings of mortgage-backed and asset-backed securities were all factors in the 40 percent increase in operating profits. The segment also benefited from the absence of losses at Numerax, which was sold earlier this year, and the shutdown of McGraw-Hill News.

"In Educational and Professional Publishing, our International Book operations the health care group, TAB Books and Shepard's, our legal publisher, all contributed to the 36.5 percent increase in the segment's operating profits. The College division had a promising start in July, but results for the quarter were disappointing.

"Broadcasting, aided by political advertising and good national business in September, finished the quarter strongly, but year-to-year profit comparisons were hurt by the 1989 sale of syndicated programming.

"Information and Publications Services profits were off 7.1 percent because of the adverse impact of economic uncertainty on advertising in Business Week and costs incurred in connection with the automation of F.W. Dodge.

"We realized a substantial gain in profits from our joint venture, the Macmillan/McGraw-Hill School Publishing Company. Our share of profits from this venture was $40.8 million, a 35 percent increase over last year. That is a notable achievement by a company formed only 15 months ago.

"At the start of the year, we said McGraw-Hill would earn between $3.50 and $4 per share in 1990. Despite a deteriorating economic outlook, we still believe we will achieve the lower end of that scale, another indication that the realignment of operations completed last year is working."

#90289p5327 10/16/1990 ~PR Newswire
TAMPA, FL (OCT. 16) PR NEWSWIRE - Poe & Associates Inc. (NASDAQ-NMS: POEA) announced continued growth in revenues for the three and nine months ended Sept. 30.

Total revenues for the nine months ended Sept. 30 were $34,470,000, as compared to $30,361,000 for the corresponding nine months in 1989. Net income for the nine months ended Sept. 30 was $3,203,000, as compared to $3,574,000 reported in 1989. Net income per share for the 1990 period was $.82, compared to $.93 reported in 1989.

Total revenues for the quarter ended Sept. 30 were $11,598,000, vs. $11,179,000 for the same period in 1989. Net income for the third quarter of 1990 was $1,103,000 compared to $1,553,000 for the same period in 1989. Net income per share for the quarter ended Sept. 30 was $.28, compared to $.40 reported in 1989.

Chairman Bill Poe indicated that the increase in total revenues for the third quarter resulted from recent acquisitions. The decrease in third quarter net income was principally as a result of investments and acquisition costs.

Poe & Associates Inc., a general insurance agency headquartered in Tampa, is among the nation's leading independent insurance agency organizations. The company has offices throughout Florida, and in Arizona, California, Colorado, Connecticut, Georgia, New Jersey, North Carolina, and Texas.

CONTACT: William F. Poe, chairman of the board, or Donald E. Howery, vice president and treasurer of Poe & Associates, (813) 222-4100.

#90289p5328 10/16/1990 ~PR Newswire
NORTHBROOK, IL (OCT. 16) PR NEWSWIRE - Idex Corporation (NYSE: IEX) today reported its third quarter 1990 earnings per share before an extraordinary credit matched its year-ago third quarter performance despite incurring costs associated with new product and new process introductions and encountering sluggish conditions in the industrial sector of the economy.

Net income for the quarter ended Sept. 30, 1990, before an extraordinary credit for utilization of net operating loss carryforwards, declined four percent from $3,523,000 in the comparable 1989 quarter to $3,380,000. Net income per share before the extraordinary credit was equal to the 31 cents achieved a year earlier.

Net income after the extraordinary credit was $3,942,000, or 36 cents per share, in this year's third quarter compared to $4,212,000, or 37 cents per share, in the comparable 1989 quarter. Sales for this year's third quarter

increased two percent to $55,209,000 from last year's $54,336,000.

Donald N. Boyce, chairman and president of Idex, said that third quarter results were in line with expectations given conditions in the industrial sector of the economy. He noted that Idex was able to turn in this very respectable performance because the company serves diverse markets and sells to thousands of customers.

He added that operating profit margins slipped somewhat in the third quarter of this year because of new product and new process introductions at some of the company's business units and the sluggish sales pace. However, margins remained very handsome compared to those of most industrial products companies. Boyce noted that results in the company's fluid handling segment were stronger than in the industrial products segment.

Boyce said third quarter interest expense declined by ten percent from the comparable quarter of the prior year due to a reduction in outstanding debt. Boyce added that in the 33 months since Idex acquired its six operating units, $54 million or one-third of its long-term debt has been repaid from operating cash flow.

In the nine months ended Sept. 30, Idex reported that net income before the extraordinary credit was $10,900,000, or $1.01 per share, compared with $11,914,000, or $1.02 per share, recorded in the 1989 period when there were on average 21 percent fewer shares outstanding. Sales were a record $170,478,000 in the nine months of 1990 compared with $167,141,000 in the same period in 1989.

CONTACT: Wayne Sayatovic, vice president and treasurer of Idex, (708) 498-7070 or Audrey Lowe, (312) 266-6800, or Lillian Armstrong, (212) 661-8030, both of the Financial Relations Board for Idex.

#90289p5331 10/16/1990 ~PR Newswire

RICHMOND, VA (OCT. 16) PR NEWSWIRE - Media General, Inc. (AMEX: MEG) today reported higher revenues, net income, and earnings per share for the third quarter and first nine months of 1990, compared with year-earlier results.

Revenues for the third quarter increased to $152.1 million, or 6.9 percent, from $142.3 million in the third quarter of 1989. Paced by the broadcast division, revenues increased in each of the company's three principal operating segments during the quarter, compared with a year ago.

Third quarter net income rose to $7.3 million, versus $3.9 million in the comparable year-earlier period, and earnings per share were $0.28 compared with $0.15 a year ago. For the first nine months of 1990 revenues increased to $458.2 million, up 3.8 percent from $441.5 million in the comparable 1989 period.

Net income for the first nine months of 1990 rose to $22.4 million from $21.9 million the year earlier and earnings per share were $0.86 compared with $0.84 in the comparable 1989 period. Earnings of 0.86 per share reflected an after-tax gain of $4 million ($0.15 per share) from the sale of the company's West Coast weekly newspapers.

For the first nine months of 1989 earnings per share of $0.84 included an after-tax gain of $5.7 million ($0.22 per share) from the sale of a newsprint mill in California. Thus, earnings from continuing operations increased significantly during the first nine months of 1990, the company said.

Revenues and operating income for the third quarter reflected increases over prior year levels for the company's daily newspapers, largely the result of improved cost control and selective advertising and circulation price increases.

Advertising rates were increased modestly at The Tampa Tribune at mid-year, and circulation price increases were implemented in September at both the Richmond and Winston-Salem newspapers. Newspaper advertising remained generally sluggish, but The Tampa Tribune benefitted significantly from strong national account campaigns.

At the company's three broadcast television stations in Tampa and Jacksonville Florida, and Charleston, South Carolina, revenues and operating profit increased at each location during the quarter, led by a strong performance from Tampa's WFLA-TV. While national spot advertising levels for the group

remained under pressure, political and local advertising reflected modest gains.

The Fairfax, Virginia, cable television operation also continued to show strong year-over-year gains, and the subscriber count approached 181,200 with a penetration rate of nearly 65.2 percent.

NEW YORK (OCT. 16) PR NEWSWIRE - Sir Gordon White, chairman of Hanson Industries, the U.S. arm of Hanson PLC (NYSE: HAN), today announced that Hanson had entered into arrangements whereby it will acquire all of the outstanding stock of General Oriental Securities Limited (GOSL) and Hornwood Barbados Limited, which have as their principal asset 99.5 percent ownership of Cavenham Forest Industries, for $1.3 billion in cash. Cavenham is the sixth-largest private owner of U.S. timberlands and the 12th-largest U.S. lumber producer.

Hanson also announced that subject to the existing standstill agreement with Newmont Mining Corporation (NYSE: NEM) it will sell its 49 percent stake in Newmont to the owners of GOSL and Hornwood for $1.111 billion in cash and $189 million in notes.

As part of the terms of the standstill agreement, Newmont has the right to match the cash portion of the transaction within 60 days. Hanson acquired its stake in Newmont as part of its August 1989 acquisition of Consolidated Gold Fields.

Hanson's obligation to purchase Cavenham is conditioned upon either Newmont exercising its right of first refusal or consummation of the sale of Hanson's interest in Newmont to the owners of GOSL and Hornwood. These arrangements are also subject to customary conditions, including the obtaining of appropriate approvals.

Additionally, as a result of this transaction, Hanson announced it is terminating its previously announced public offering of 8.4 million Newmont shares and six million warrants.

Cavenham owns or controls approximately 1.7 million acres of U.S. timberland in Oregon, Washington state, Mississippi and Louisiana. Cavenham also operates five timber saw mills, four in the Southeastern United States and one in Oregon, as well as oil- and gas-producing properties in Louisiana.

For the fiscal year ended March 31, 1990, Cavenham reported sales of

approximately $275.5 million and pretax trading profits of approximately $97 million. GOSL and Hornwood had pro forma combined net assets of approximately $1.6 billion as of Sept. 30, 1990.

White stated, "Hanson is delighted to acquire this well-established timber business. Cavenham, with its excellent profit record and strong cash flow, will further enhance our position in natural resources, recently strengthened by our purchase of Peabody Coal."

ROSEMONT, ILL. (OCT. 16) PR NEWSWIRE - Lindberg Corporation (NASDAQ: LIND) operating results for the nine months ended Sept. 30, 1990, were announced today by George H. Bodeen, chairman and chief executive officer.

Sales for the nine month period were $57,620,864 compared to $60,245,111 for 1989. Net earnings for the period of $2,232,407 compared to nine month 1989 earnings of $2,210,226. Nine month earnings per share of $.47 in 1990 compared to per share earnings of $.47 for the same period last year.

Third quarter sales of $18,464,439 compared to $18,375,442 in 1989; net earnings were $778,061 as compared to $291,350 last year. Earnings per share were $.16 for the third quarter 1990 compared to $.06 for the same period of 1989.

During the third quarter, earnings from U.S. domestic operations were $.13 per share, up from $.04 in the same period of 1989. Lindberg do Brasil, the company's 50 percent owned subsidiary in Brazil, reported earnings of $.03 in the third quarter as its operations improved from the severely depressed levels of the second quarter of this year.

Lindberg is the nation's largest commercial heat treating company, serving the metalworking industry from 21 plants located in major industrial centers throughout the United States and Brazil. Lindberg also owns and operates Harris Metals, a producer of precision intricate aluminum castings; Arrow-Acme a producer of aluminum and zinc die castings; and Alloy Wire Belt, a producer of conveyor belting products.

HARRISBURG, PA. (OCT. 16) PR NEWSWIRE - Dauphin Deposit Corp. (NASDAQ: DAPN) today announced net income of $12,086,000 for the third quarter ended Sept. 30 1990, compared with $12,171,000 in 1989.

Net income per share for the third quarter of 1990 amounted to $.95 on 12,704,189 average shares outstanding compared with $.94 on 13,006,305 average shares for that same period in 1989.

Net income for the nine months ended Sept. 30, 1990, was $33,708,000 compared with $32,982,000 for the comparable period of 1989. Net income per share for the nine months of 1990 amounted to $2.63 on 12,831,928 average shares outstanding compared with $2.54 on 12,982,099 average shares for that same period in 1989.

William J. King, chairman and chief executive officer, commented, "Despite a slowing in the economy and all of the problems currently plaguing the banking industry, I am pleased to report that our core earnings remain strong, and the credit quality of our loan portfolio is steady and at a very good level."

Core earnings per share for the third quarter increased 13 percent. Net income for the third quarter of 1990 included a net after-tax increase of $863,000, or $.07 per share, from gains in mortgage banking activities, compared with

the gains of a year ago. For the nine months, this net increase, when compared with the same period of 1989, amounted to $634,000, or $.05 per share. Additionally, net income for both periods of 1989 included a non-recurring after-tax gain of $1,908,000, or $.15 per share, relating to the Pennsylvania Bank Shares Tax. This was the result of new tax legislation passed last year.

The corporation's total assets at Sept. 30, 1990, were $3,414,150,000 compared with $3,238,531,000 at that time in 1989. Deposits totalled $2,656,856,000 compared with $2,590,815,000 at Sept. 30, 1989. Total loans at Sept. 30, 1990, were $1,760,291,000 compared with $1,634,317,000 at Sept. 30, 1989.

#90289p5341 10/16/1990 ~PR Newswire

ST. LOUIS (OCT. 16) PR NEWSWIRE - Boatmen's Bancshares, Inc. (NASDAQ-NMS: BOAT) today reported third quarter net income of $34.7 million, or $1 per share, up 8.2 percent from the year before.

For the nine months, net income rose 4.4 percent to $100.3 million, or $2.89 per share, from $96.0 million, or $2.77 per share, a year ago.

"We are pleased with our earnings performance in the past quarter," said Andrew B. Craig III, chairman, president and chief executive officer. "Our earnings continue to be bolstered by an expansion of the net interest margin and improvements in noninterest income."

Loan demand remained soft during the quarter, reflecting continued sluggish economic conditions. Loans increased about 2.5 percent for the third quarter over the year-earlier period.

The provision for loan losses in the third quarter increased slightly to $16.7 million from $16.4 million the year before.

Domestic nonperforming loans at the end of the quarter were $191.7 million, or 2.06 percent of loans outstanding, compared with $177.3 million, or 1.97 percent the year before, and $196.6 million, or 2.12 percent at June 30, 1990. At Sept. 30, 1990, the reserve for domestic loan losses represented 1.65 percent of loans outstanding, compared with 1.49 percent a year earlier.

Net loan charge-offs in the third quarter totaled $13.6 million, compared with $17.1 million the year before and $10.2 million in the 1990 second quarter. Net loan losses for the first nine months were down $7.6 million and totaled $35.3 million, versus $42.9 million a year ago. Craig pointed out the corporation's lending policies served Boatmen's well during recent

examinations by federal and state regulatory agencies. Those now-completed examinations had no significant impact on the corporation's financial position.

Net interest income in the third quarter increased 8.9 percent to $122.4 million from $112.4 million the year before, as the net interest margin of 4.02 percent improved from 3.82 percent a year ago. Effective asset/liability management policies coupled with recent declines in short-term interest rates had a positive impact on that margin.

The chief executive noted, "We continue to be pleased by the contribution of noninterest income, which increased 11.8 percent for the quarter, with trust fees up 10.5 percent."

Noninterest expense increased 3.4 percent over the second quarter of this year. The comparison with the third quarter a year ago was less favorable and included approximately $4 million of such noncomparable items as higher Federal Deposit Insurance Corporation premiums, increased advertising and promotion expenses and costs associated with foreclosed real estate. On a year-to-date basis, noninterest expense increased 5.4 percent, less than 4 percent after adjustment for noncomparable items.

Boatmen's is the largest bank holding company in Missouri with 31 full-service banks in Missouri, Illinois and Tennessee; mortgage and insurance companies; and a credit card bank in Delaware.

WASHINGTON (OCT. 16) PR NEWSWIRE - The American Insurance Association released the following statement by AIA President Robert E. Vagley in response to the Public Citizen study on insurer solvency.

The report on insurer solvency issued by Public Citizen is an irresponsible manipulation of highly complex information. Those acquainted with insurance accounting and finances are appalled by the study's methods and misrepresentation of information.

The Public Citizen study's authors are not insurance financial analysts and have distorted data to suit their own purposes. There is no logical connection between the study's findings that certain companies are "financially vulnerable" and the changes proposed in the report. The findings are a muddled attempt to justify calling for unrelated changes in insurance law and regulation.

Ironically, in recent years, these very consumer advocates have called for insurance rate reductions, irrespective of the underlying economics. The regulatory system cannot adhere to the principles of solvency - adequate pricing, adequate reserve levels, and reliable reinsurance - while requiring that premiums be set below costs. The false alarm sounded by Public Citizen is

a gross disservice to the public.

The American Insurance Association is a trade organization representing 240 major companies providing all lines of property/casualty insurance. Headquartered in Washington, the association has representatives in every state.

DENVER (OCT. 16) PR NEWSWIRE - AMDURA Corp. (NYSE: ADU) announced today that it has completed the sale of certain operating assets of its subsidiary, AMDURA National Distribution Co. (ANDCO), to United Hardware Distributing Co.

Under the terms of the sale, United Hardware has acquired ANDCO's inventory and its distribution center in Milbank, S.D. Receivables and various other assets of ANDCO were not purchased in the transaction.

The purchase price, including cash received at closing and assumption of liabilities, was approximately $21.5 million, based on asset values at the time of closing.

Of the cash proceeds received at closing, approximately $1 million will be placed in escrow to pay employee benefit claims, not previously covered, and rebates due ANDCO's customers. Proceeds from the sale, held for the benefit of the estate of ANDCO, will remain in escrow pending settlement of the company's bankruptcy case or appropriate orders of the Bankruptcy Court.

On April 2, 1990, AMDURA and its hardlines distribution subsidiaries, including AMDURA National Distribution, filed for protection under Chapter 11 in the United States Bankruptcy Court, Denver. AMDURA's manufacturing subsidiaries, the Crosby Group Inc. and Harris Waste Management Group Inc., were not included in the filing.

ANDCO is a hardlines distributor supplying independently-owned hardware retailers operating under the Trustworthy name in 11 upper-midwestern and western states. ANDCO has 270 employees including 120 in Minnesota.

United Hardware Distributing is a Plymouth, Minnesota-based, dealer-owned hardware distributor, serving approximately 600 independently-owned, Hardware Hank stores.

COATESVILLE, PA. (OCT. 16) PR NEWSWIRE - Lukens Inc. (NYSE: LUC) today reported record third quarter earnings of $12,304,000 or $1.42 per share, an increase of six percent over 1989 third quarter earnings of $11,648,000, or $1.31 per share.

Sales for the third quarter increased to $175,884,000 over third quarter 1989 sales of $166,805,000. Results of this quarter were second only to the fourth quarter of 1989, which included a one-time gain of $3.6 million, or $.43 per share, on the sale of steel assets.

W.R. Wilson, chairman and chief executive officer of Lukens Inc. remarked, "Record sales in the first two quarters of the year, combined with an excellent third quarter, enabled Lukens to achieve record earnings of $34,895,000, or $4.01 per share, through the third quarter of 1990. This is 26 percent higher than the earnings of $27,700,000, or $3.17 per share, posted through the third quarter of 1989." Sales through the first three quarters have increased seven percent to $525,373,000, compared to $489,063,000 in 1989.

On a fully diluted basis, 1990 third quarter earnings were $1.29 per share and year-to-date earnings were $3.67 per share. This compares to 1989 third quarter earnings of $1.20 and year-to-date 1989 earnings of $3.08 on a fully diluted basis.

Wilson said, "Demand for plate steel continues to drive the company with strong sales and earnings. Our pipe coating operations had an outstanding third quarter and the profitability of the Safety Products Group is higher."

Third quarter sales for the Steel Group of $118,920,000 and operating earnings of $17,751,000 compare to 1989 third quarter sales of $122,251,000 and operating earnings of $19,021,000 for the group. "Steel sales reflect the expected and previously publicized reductions in sales of defense-related steels and the results of a 10-day maintenance outage at our Conshohocken, Pa. rolling mill. The average price-per-ton declined slightly in the quarter, due to shifts in product mix.

Plate steel shipments for the third quarter were 173,000 tons, which is essentially unchanged from the previous year. "Seasonal customer shutdowns resulted in a slower order book in early summer, but the underlying level of demand provided good sales opportunities for the quarter."

Steel Group backlog was $105.3 million at the end of the quarter, compared to $157.1 million a year ago. "The reduced backlog is indicative of two items," Wilson said. "A large 1988 military order had inflated our steel backlog. As we continue to ship steel to complete this order, the backlog approaches a more realistic perspective. In addition, the backlog reflects a positive trend of an improved shipped- on-time performance in the Steel Group.

"Improvements in Electric melt shop productivity continue to be achieved in our steelmaking operations as further refinements occur in the ladle refining system installed in 1989," Wilson said. "Steel activity continues to be strong and should maintain present levels through the remainder of the year."

The Corrosion Protection Group had a record quarter. Third quarter sales of $31,341,000 were 58 percent improved over 1989 third quarter sales of $19,880,000. Operating earnings of $3,371,000 for the same period were more than double 1989 operating earnings of $1,567,000. The third quarter backlog of $16.3 million compares to a $13.9 million backlog in the third quarter of 1989.

"This group continues to benefit from increased activity in the natural gas industry. Fears of gas shortages in high-user areas, such as the Northeast and West, have resulted in a concentration on connector lines for gas networks. On a year-to-date basis, the Corrosion Protection Group has more than tripled earnings on sales that are about 50 percent higher than the comparable period of 1989," said Wilson. "Even though this group is entering its slower season, we expect the overall business to continue to be strong for the next few years. The start of a number of large diameter pipeline projects is expected to have a positive impact on next year. We can supply any of the coatings and cathodic protection needed to protect those lines."

The Safety Products Group third quarter earnings of $1,183,000 improved 18 percent over earnings of $1,001,000 recorded in the same period last year. Sales of $18,154,000 were slightly improved over 1989 third quarter sales of $17,423,000.

"The improved profit margin reflects lower glass bead production costs achieved by phasing out outmoded facilities. In 1991, a new, technologically efficient glass bead plant near Lexington, Kentucky will become operational, providing advantages in production and shipping costs. During the seasonal winter slow down, we are concentrating on measures to further improve productivity in our highway safety products lines," said Wilson.

The Safety Products Group backlog at the end of the quarter was $4.3 million in 1990, compared to $3.7 million in 1989.

The Diversified Group had third quarter sales of $7,469,000 and operating earnings of $126,000. By comparison, sales were $7,251,000 and operating earnings were $165,000 in the same quarter last year. The backlog at the end of the quarter was $2,846,000 compared to $3,300,000 one year ago.

Wilson said, "Current reports on business activity levels in our steel, corrosion protection and safety products operations build continued optimism that Lukens will post record results again in 1990. Steel industry plate shipments should continue to be strong through the remainder of the year.

Service centers, our largest steel customers, are maintaining a cautious buying trend relating to replenishment of inventories.

"Our industrial products operations, such as corrosion protection and safety products, are establishing positions in industrial businesses that offer opportunities to offset the cyclical impacts inherent in steel."

Lukens Inc. is a FORTUNE 500 company whose subsidiaries supply plate steel, reflective and industrial glass beads, highway safety products, pipe coating and cathodic corrosion protection services, woven wire cloth, heavy materials handling equipment and transportation services to industrial, energy, construction, defense and transportation markets.

#90289p5351 10/16/1990 ~PR Newswire

PHILADELPHIA (OCT. 16) PR NEWSWIRE - Scott Paper Co. (NYSE: SPP) today reported that its third quarter 1990 earnings per share decreased 15 percent to $0.88 from $1.03, excluding special items in 1989.

Net income for the third quarter of 1990 also declined 15 percent to $64.8 million from $75.9 million, excluding special items in 1989. Dollar sales for the third quarter increased 7 percent to a record $1.33 billion from $1.25 billion a year ago. The third quarter of 1989 included special items of $0.96 that resulted in total reported earnings per share of $1.99.

Philip E. Lippincott, Scott's chairman and chief executive officer, commented that "the primary factor impacting the year-to-year comparison of third quarter results was the significantly lower earnings of S.D. Warren, Scott's printing and publishing papers business. Earnings from this business were about $0.25 per share below the same period of the prior year. Warren, which has been undergoing a major capacity expansion program, continues to experience high manufacturing and operating costs. The earnings of Scott Worldwide, our personal care and cleaning business, showed improvement over the third quarter of last year."

For the nine months, earnings per share, excluding special items in 1989, declined 11 percent to $2.71 from $3.03. Net income, excluding special items in 1989, was down 13 percent to $199.5 million in 1990 from $230.4 million a year ago. Sales grew 4 percent to $3.9 billion, a nine-month record. The nine-month earnings per share for 1989 included special items of $0.97 that resulted in total reported earnings of $4 per share.

Lippincott indicated that third quarter 1990 sales revenue for the total consolidated Scott Worldwide personal care and cleaning business increased 8 percent, and income from these operations, excluding special items in 1989, rose 4 percent.

The U.S. tissue portion of Scott Worldwide's personal care and cleaning business achieved an all-time quarterly record for dollar sales, and unit volume was a third quarter record. Earnings from normal operations were almost at the same level as the record third quarter of 1989. While the U.S. tissue business overall had an excellent third quarter, costs were negatively impacted by general inflationary pressures and higher marketing expenses related to strong competitive activity.

FALLS CHURCH, VA. (OCT. 16) PR NEWSWIRE - Williams Industries, Incorporated (NASDAQ-NMS: WMSI) today reported financial results for the fiscal year which ended July 31, 1990.

Net profits were $1,453,999, or 60 cents per share, on total revenues of $118,766,459. For the prior fiscal year, net profits were $349,574, or 15 cents per share, on total revenues of $101,829,874.

For the fourth quarter, net profits were $533,346, or 22 cents per share, on revenues of $26,862,980. For the corresponding quarter last fiscal year, revenues of $26,372,716 produced net profits of $582,980, or 25 cents per share.

Frank E. Williams Jr., chairman of the board, said profits and revenues were in line with company projections. He noted that backlogs of work on hand, while down from recent record levels due to some softness in the commercial building market, remain strong reflecting the company's increased involvement in the bridge and industrial construction markets. Looking at the current fiscal year, he said company projections indicate FY1991 will be a bit more profitable than last year despite the fact that revenues will be lower. Due to the timing and mix of contracts, most profits will be generated during the final six months of the fiscal year with the first six months being about breakeven.

#90289p5355 10/16/1990 ~PR Newswire

ROGERS, CONN. (OCT. 16) PR NEWSWIRE - Rogers Corporation (AMEX: ROG) reported third quarter sales of $46,838,000, 9 percent above the corresponding 1989 period's volume of $43,045,000. Earnings of $733,000, or 24 cents per share, were appreciably higher than the net profits of $240,000, or 8 cents per share a year ago.

Year-to-date sales of $141,719,000 were 10 percent above shipments of $128,462,000 in the first nine months of 1989. Excluding the one-time pre-tax charge of about $7 million, taken in June, year-to-date after-tax profits wre $1,341,000, or 44 cents per share. After the charge, the net loss for nine months was $3,329,000, or $1.09 per share, compared with the profit of $959,000, or 32 cents per share, in the 1989 period.

Norman L. Greenman, president of Rogers, said, "The bulk of the one-time charge was accounted for by the costs of an early retirement program and terminations in the salaried group. These actions, which included department and division consolidations, were mainly done by the end of August, and will be essentially completed when we start the new year."

Greenman stated, "Significantly higher TAB (Tape Automated Bonding) production is expected in the fourth quarter." He went on to say, "Because of technical problems, the critical production ramp of our multimetal layer TAB components was slower than desired during the third quarter and remained costly."

"Our financial position remains strong, and inventories relative to sales were at a record low in the third quarter," Greenman said. He concluded by saying, "At this time it is not possible to predict the impact on Rogers' business of the downturn in the economy and of events in the Middle East. In the immediate future, however, we expect that the benefit of our major expense reduction will make it possible to continue the favorable earnings trend in the closing months of the year."

Headquartered in Rogers, Conn., Rogers Corporation manufactures a broad range of engineering materials and components for the electronics and other selected industrial markets.

#90289p5357 10/16/1990 ~PR Newswire
LAWRENCEVILLE, N.J. (OCT. 16) PR NEWSWIRE - American Reliance Group, Inc. (NASDAQ: ARIG) today reported higher revenues and net income for the third quarter and nine months ended Sept. 30, 1990.

Revenues for the third quarter were $22,139,000, compared with $18,409,000 for the 1989 third quarter. The company earned $1,903,000 or $.75 per share, compared with $1,633,000 or $.64 per share a year earlier.

For the first nine months of 1990, the company earned $5,099,000 or $2.00 per share on revenues of $62,608,000. This compares with net income of $4,581,000 or $1.80 per share on total revenues of $52,536,000 for the same period of 1989.

"The 20 percent increase in revenues and 16 percent increase in net income for the third quarter were primarily the result of higher sales of commercial insurance products -- which now account for 66 percent of our business -- as well as a 30 percent increase in investment income," said Bruce W. Herrick, chairman and chief executive officer of American Reliance.

Herrick said a significant part of the increased commercial volume represented further gains in Virginia and Maryland, where the company has expanded operations.

The third quarter combined ratio was 102.0 percent, compared with 102.3

percent a year earlier. The nine months combined ratio was 104.1 percent, compared with 100.6 percent a year earlier. The combined ratio reflects combined results of the pooling arrangement between the company and its parent American Reliance Insurance Company.

The charge to operations for New Jersey's insurance legislation, the Fair Automobile Insurance Reform Act ("FAIRA"), was $413,000 for the third quarter and $722,000 for the nine months. FAIRA expenses added 3.3. percent to the combined ratio for the quarter and 3.4 percent for the nine months.

American Reliance Group, Inc. is a regional property and casualty insurance holding company that specializes in providing coverage for small to medium size businesses and individuals in rural and suburban locations.

NEW YORK (OCT. 16) PR NEWSWIRE - ICM Property Investors Incorporated (NYSE: ICM), a real estate investment trust, announced today its declaration of a distribution of $.12 per share for the third quarter of 1990, which ended on Sept. 30. This distribution, payable on Nov. 21, 1990, to stockholders of record on Nov. 1, is the same as that paid for the preceding five quarters.

The company reported that it incurred a net loss of $3,551,000 in the third quarter, which includes a provision for loss, for financial reporting purposes representing its net investment of $2,409,000, as of Sept. 30, in a joint venture partnership that owns Maitland Colonnades, an office building in Maitland, Fla. This compares with a net loss of $1,172,000 in the same period last year. For the first nine months, the net losses were $7,184,000 in 1990 and $2,145,000 in 1989.

The company reported that the mortgage loan on Maitland Colonnades had matured on Aug. 31. Since negotiations with the mortgagee have not produced a financial arrangement acceptable to ICM Property Investors, the company said, it has reduced its net investment in the property to zero.

CLEVELAND (OCT. 16) PR NEWSWIRE - Computer Remarketing Corporation (CRC), an industry leader in remanufactured hardware, has acquired the service company assets of CFR Systems/Service of Haverhill, Mass.

The acquisition is viewed as an important step in CRC's aggressive regionalization strategy for Wang and Honeywell maintenance, now focused on New England. CRC has targeted New England for the establishment of a Regional Business Center which would house a full remanufacturing facility, onsite inventory of products and spare parts, and customer service representatives.

Michael Alick, executive vice president of CRC, outlined how his company's hand was strengthened in the transaction. "We now have all of CFR's

maintenance contracts, inventory as well as spare parts, all test beds and test equipment, the lab and the service team. We are very excited to gain a strong presence in the New England market."

CRC specializes in Wang, Honeywell-Bull, Ultimate, Hewlett Packard, Prime, Data General and NCR equipment. Its already broad reach into computer hardware remanufacturing is expected to provide it with a chance to have a significant impact on the industry in New England.

"CRC's commitment to quality and service should enable us to continue on a fast growth track throughout the region," Alick said.

#90289p5373 10/16/1990 ~PR Newswire

PHOENIX (OCT. 16) PR NEWSWIRE - A novel computer-based learning experiment is bringing new knowledge and skills into the homes of factory workers and their families in the Phoenix area. Known as Project SALSA - Southwest Advanced Learning System for Adults - the program is a collaborative effort of education and business.

The project is being carefully watched by executives in business, government and academia because it represents the first significant alliance between higher education and industry to apply satellite links and computers to adult education in the home on both a cost and teaching efficient basis.

Project SALSA employs sophisticated earth satellite and telecommunications technology to link personal computers in the home with a large library of interactive educational software located at the University of Illinois. Employees of Motorola, Inc., at its Mesa and Tempe, Ariz., semiconductor plants are participating in the six month pilot project using Macintosh SE(R) computers provided Apple Computer, Inc. The participants use the educational software at these high-tech learning stations in their own homes, supplementing traditional classroom instruction.

Researchers at Rio Salado Community College, one of the Maricopa Community Colleges, are conducting a study of the participants and a matched control group to see what effect the home-based learning environment has on the rate of improvement of the workers' reading skills directly applicable to their jobs at Motorola.

Program participants were selected from a pool of volunteers following a screening test and personal interviews. The 53 active participants received two hours of training in use of the Macintosh computer, followed by another 10 hours of training in using the instructional software. A "family day" was held for training interested members of the workers' families, who are also

being encouraged to use the home learning stations. Project SALSA began in July, and will continue through December.

In addition to Motorola, Apple and Rio Salado, project sponsors include the University of Illinois, which is providing free access to NovaNET(SM), the U of I's satellite-based network for delivery of educational services; University Communications, Inc., providing training in use of NovaNET and equipment for access to the network; Businessland, Inc., providing surge protectors, special private home phone lines for the computer link. Motorola has also supplied, through its Universal Data Systems division, over one hundred 2400-baud modems that are being used on the private telephone lines to the homes of the participating Motorola employees. Motorola University has provided guidance and overall project coordination within the sponsor group.

#90289p5375 10/16/1990 ~PR Newswire

PHILADELPHIA (OCT. 16) PR NEWSWIRE - Laventhol & Horwath, the nation's seventh largest accounting and consulting firm, today announced it has reorganized its management consulting group into a new subsidiary to better serve national accounts and to allow its consulting partners to operate more independently.

The new entity, Horwath Consulting Inc., will operate as an independent national practice under the direction of David E. Arnold, national managing director. Previously, Laventhol's consulting services were organized at the local office level, and consulting partners and staff reported to local office managing partners. Laventhol's key consulting services serve the real estate and hospitality industries. Arnold noted that there are three reasons for the reorganization.

"First, the marketplace we serve has changed. A much larger share of our services are now purchased by national and international institutional buyers rather than local developers as in the past," said Arnold. "After careful consideration, we decided a different approach to client service -- a national organization -- was needed."

Arnold also pointed out that there is a growing trend toward "globalization" in the real estate and hospitality industries the firm serves. Reorganization will permit much greater service in foreign markets. Horwath Consulting Inc. will expand its consulting activity in Asia via Horwath Asia Pacific and invest in consulting practices in Eastern Europe.

"The reorganization is more than a strategic positioning move," explained Arnold. "Our second reason for the change is entrepreneurial. We simply need to operate more flexibly than in the past, and provide our senior professionals with greater upside. Real estate is an entrepreneurial business and we need to offer greater opportunities to our key people.

"Organizationally, the firm has established regional and national practice units which will allow the group to operate more efficiently," he said. "New separate performance-based compensation procedures are being studied for Horwath Consulting personnel.

"The third reason is focus -- to do what we do best," explained Arnold. "Many large organizations have become too diversified. Those of us at Horwath Consulting can now devote our full energies to serving our clients as the consulting specialists we are."

Horwath Consulting Inc. will now operate out of 25 offices in the United States. Its parent organization, Laventhol & Horwath, has 50 U.S. offices. Both are represented in 70 countries through affiliation with Horwath International.

#90289p5377 10/16/1990 ~PR Newswire

FORT WORTH, TX (OCT. 16) PR NEWSWIRE - The board of directors of Sunbelt Nursery Group, Inc. (AMEX: SBN) today announced that, upon the unanimous recommendation of the special committee of the board, consisting of two independent directors, the board has determined to express no opinion as to whether the company's stockholders should accept or reject the previously announced offer by a subsidiary of Pier 1 Imports, Inc. (NYSE: PIR).

Pier 1 has offered to acquire, through a cash tender offer at a price of $12.00 per share, all of the outstanding common stock of the company not owned by such subsidiary.

In reaching this determination, the board considered a number of factors, including the recommendation of the special committee and the opinion of the financial advisor to the special committee that the value of the common stock held by stockholders other than Pier 1 and its subsidiary is between approximately $11.00 and $15.00 per share.

A more detailed description of such matters is contained in the company's Schedule 14D-9 Solicitation/Recommendation Statement filed today with the Securities and Exchange Commission.

Sunbelt Nursery Group, Inc. is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States, with 96 stores that feature nursery stock and lawn and garden supplies. The company's common stock is traded on the American Stock Exchange.

CONTACT: Robert L. Broadhead or David O. Martin of Sunbelt Nursery Group, (817) 738-8111.

KIRKLAND, WA (OCT. 16) PR NEWSWIRE - Geosafe Corp., a Pacific Northwest-headquartered hazardous waste remediation company formed in 1988, today announced it has received its first large-scale contract from Region 5 of the U.S. Environmental Protection Agency for treating a Superfund site near Grand Ledge, Mich.

The location is known as the Parsons Chemical/ETM Enterprises site where Parsons Chemical, the former owner, mixed, manufactured and packaged agricultural chemicals from 1945-1979. Soil at the site is contaminated with pesticides (chlordane, DDT, and dieldrin) and mercury. The cost of remediating the approximately 2,000 cubic yards (2,600 tons) of contaminated soils will be in excess of $1,000,000.

Phase one of the project involves the staging of materials which is to begin immediately. The actual treatment, involving Geosafe's proprietary "in situ vitrification" (ISV) technology, is expected to be accomplished in the first half of 1991.

ISV is able to treat 100 tons or more of contaminated soils per day. It is a process that melts contaminated soils by means of electricity which is accessed from a regular utility source. Four carbon and molybdenum electrodes are used to form an approximate 1,000 square-foot melt, 16 feet deep, and weighing about 400 tons. Initially 4,000 volts are applied at 400 amps, generating temperatures up to 3,600 degrees F. Organic contaminants are destroyed and the inorganic materials are incorporated into the molten mass that, when cooled, resembles natural volcanic obsidian. Off gases from the melt are captured under a hood and are treated to conform with air quality standards.

ISV is a permanent in-place process for treating contaminated soils and will destroy, remove, or permanently immobilize hazardous substances. ISV reduces the toxicity, mobility and volume of contaminated soil, and eliminates the need to transport wastes.

Geosafe is a private company, majority owned by Battelle Memorial Institute.

CLEVELAND (OCT. 16) PR NEWSWIRE - BP Oil Company today announced that it will withdraw from the crude oil lease acquisition business and will solicit bids for the purchase of its pipeline gathering facilities in Illinois, Indiana, Kentucky, Louisiana, Oklahoma and Texas.

BP Oil did an extensive study and review of the future prospects for the crude oil lease acquisition business within the company. It concluded that this business no longer is strategic and would fit better with companies that see this activity as more central to their aims.

This decision will affect a total of 108 employees based in Cleveland; Centralia and Carmi, Illinois; and Houston and Longview, Texas. BP Oil expects the sales of its facilities to require several months. Employees not placed with new owners or in other positions within BP will be offered appropriate severance terms.

HOUSTON (OCT. 16) PR NEWSWIRE - Global Natural Resources Inc. (AMEX: GNR) announced today that its wholly owned subsidiary, GNR International (Argentina), Inc., has acquired a 25 percent working interest from the Argentine National Oil Company in the El Chivil concession area located in Formosa Province, N.W. Argentina. The property will be operated by Compania General de Combustibles, an Argentine-based company. The purchase was made through the program of privatization of state-owned energy companies in Argentina.

According to the terms of the purchase, GNR International (Argentina), Inc. acquired the right to produce oil and gas from this 65,000-acre concession for 25 years, with a possible 10-year extension. The purchase price was $500,900. The estimated reserves attributable to Global's net interest in El Chivil Field are 353,000 barrels proved with more than 3 million barrels undeveloped. In addition, four exploratory prospects have been identified within the concession.

Global Natural Resources Inc. is a Houston-based energy company engaged in the exploration, development and production of oil and gas in North America; owns an interest in long-term oil and gas production sharing contracts in Indonesia; and has a joint venture project in Tataria-U.S.S.R.

#90289p5383 10/16/1990 ~PR Newswire

CANTON, OH (OCT. 16) PR NEWSWIRE - Diebold, Incorporated (NYSE: DBD), which recently announced a new corporate organization after finalizing its InterBold(TM) automated teller machine (ATM) joint venture with IBM Corporation (NYSE: IBM), today reported results for the first nine months of 1990 and for the third quarter ended Sept. 30.

For the nine-month period, Diebold had net income of $17,848,000, or $1.35 per share, on revenues of $347,795,000, compared with net income of $25,281,000, or $1.92 per share, on revenues of $341,522,000 in the first nine months of 1989. The nine-month results were impacted by one- time expense items and the ongoing manufacturing restructuring expenses, as well as by a continuing decline in the market for Diebold physical security products. While orders for physical security products were down 27 percent for the nine months, ATM orders were up 15 percent.

Third quarter net income was $2,247,000, or $.17 per share, on revenues of $115,212,000, compared with net income of $8,853,000, or $.67 per share, on revenues of $110,218,000 in the 1989 third quarter. Pretax income in the third quarter was impacted by approximately $6.4 million in one-time costs for (1) legal investment banker and other professional fees in the formation and completion of InterBold; (2) outside consultant fees for the restructuring of the customer service group; and (3) write-offs of plant and equipment and reserves for employee severance costs associated with the decision to close the Hamilton, Ohio, plant.

Also affecting third-quarter results were start-up costs for a new manufacturing facility in Sumter, S.C., which will absorb the majority of the Hamilton production. Additionally, the decline in the banking industry impacted orders for Diebold's physical security and facility products. ATM orders for the quarter were up 10 percent over 1989, while orders for physical security products were down 16 percent for the same period.

Robert W. Mahoney, chairman and chief executive officer, said, "Despite the decline in the U.S. financial industry for physical security products, our U.S. ATM orders are up for the quarter and the nine months.

Diebold, Incorporated is a world leader in the automation of self- service transactions, security products, software and service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

#90289p5402 10/16/1990 ~PR Newswire

EDMONTON, Alberta (OCT. 16) PR NEWSWIRE - Chieftain International Inc. reports revenue of U.S. $28,732,000 (Cdn. $33,229,000), funds from operations of U.S. $20,436,000 (Cdn. $23,634,000) and net income of U.S. $4,838,000 (Cdn. $5,595,000) for the nine month period ended Sept. 30, 1990.

Funds from operations per common share for first nine months of 1990 were U.S. $2.15 (C$2.49) and net income per common share was U.S. $0.51 (Cdn. $0.59). The company has no long-term debt and working capital amounted to U.S. $35,400,000 (Cdn. $40,900,000) as at Sept. 30, 1990.

Chieftain International commenced operations on April 20, 1989. Therefore, information for the 1989 period relates to 163 days during which the company had revenues of U.S. $8,401,000 (Cdn. $9,899,000), funds from operations of U.S. $4,056,000 (Cdn. $4,779,000) and net income of U.S. $840,000 (Cdn. $990,000). Funds from operations per common share for the 1989 period were U.S. $0.43 (Cdn. $0.50) and net income per common share was U.S. $0.09 (Cdn. $0.10).

During the first nine months of 1990, natural gas sales averaged 40.8 million cubic feet (mmcf) per day, an increase from 6.2 mmcf per day in the 1989 period, while sales of oil and natural gas liquids averaged 1,804 barrels per day (bpd) compared with 1,647 bpd in the 1989 period.

The company reports financial information in U.S. dollars. For convenience, Canadian dollar amounts have been provided using the exchange rates as at Sept. 30, 1990 and 1989.

#90289p5412 10/16/1990 ~PR Newswire

NEW YORK (OCT. 16) PR NEWSWIRE - W. R. Grace & Co. (NYSE: GRA), the world's leading specialty chemical company, reported a 14 percent increase in third quarter operating income. Net income was lower than in the 1989 quarter, when the company posted a non-recurring after-tax gain of $61.8 million on the restructuring of Grace's natural resource operations. Grace's worldwide specialty chemicals operations, as well as its other three major business groups, all showed quarter-to-quarter improvements.

Net income for the third quarter ended Sept. 30, 1990 amounted to $45.2 million, or 52 cents per share, versus $97.9 million, or $1.15 per share, in the 1989 period, which included the $61.8 million, or 73 cents per share, net gain from the restructuring of Grace's energy-related operations. Sales and revenues for the third quarter of 1990 totalled $1.7 billion, up 12 percent over 1989 quarterly sales and revenues of $1.5 billion.

For the first nine months of 1990, net income was $129.1 million, or $1.50 per share, compared with $171.4 million, or $2.01 per share, in 1989, which includes the significant non-recurring gain. Excluding this gain, net income for the 1990 nine months rose to $129.1 million from $109.6 million, or 18 percent ahead of the prior year. Sales and revenues for the 1990 nine months increased 9 percent to $4.8 billion, compared to 1989's $4.4 billion.

J. Peter Grace, chairman and chief executive of W. R. Grace & Co., in making the announcement, said: "We are encouraged by the strong operating results of all four of Grace's operating groups and expect higher income from operations to continue in the fourth quarter, despite widespread economic and political uncertainties."

Grace Specialty Chemicals continued to contribute the largest portion of Grace's earnings in the third quarter of 1990. Operating income after taxes for the 1990 quarter was $62.2 million, a 7 percent rise above last year's period, reflecting, in particular, the continued strong performance of the company's packaging business and improved results in fluid cracking catalysts. In addition, international businesses were favorably influenced by foreign exchange. Quarterly sales of specialty chemical products rose 13 percent to $890 million.

Grace Specialty Businesses, which includes leading positions in niche businesses, posted a 28 percent increase in third quarter operating income, to $13.6 million. Sales and revenues for these diverse business units amounted to $434 million.

#90289p5413 10/16/1990 ~PR Newswire

STUART, FLA. (OCT. 16) PR NEWSWIRE - Seacoast Banking Corporation of Florida (NASDAQ-NMS: SBCFA), whose subsidiary is First National Bank, announced that net income for the quarter improved to $1,264,000, or $0.36 per share, the highest quarterly earnings in the company's history. In the third quarter of 1989, the previous best quarter, the company earned $1,261,000, or $0.36 per share.

The annualized return on average assets was 1.00 percent for the quarter and book value per share increased 7.0 percent to $10.36 from the previous year's $9.68. Return on average equity was 13.64 percent for the third quarter compared to 14.73 percent for 1989.

For the third quarter, the company returned to traditional performance measures for return on assets and return on equity, following lower performance for the second quarter which was impacted by increased reserves against loan losses. Net income through the first three quarters was $2,850,000 or $0.81 per share, compared with $3,325,000 or $0.95, for the year-earlier period, a decline of 14.3 percent.

The company's nonperforming assets (nonaccrual loans and other real estate owned) increased slightly to $6,474,000, or 1.91 percent, from $6,366,000, or 1.82 percent, at the end of the second quarter. Nonperforming assets are comprised primarily of loans secured by real estate for which the appraised values exceed their recorded values. Accruing loans past due 90 days or more declined from $3,910,000 at the end of the last quarter to $3,053,000 for the third quarter.

In announcing earnings, Chairman Dennis S. Hudson Jr. said that there is growing evidence that the bank's service area is entering a period of slower growth.

He added that the strengthening of the reserves for possible loan losses in the second quarter, a slower growth in the company's lending portfolio, and increased capital, places the company at a competitive advantage during a period of slower growth in the bank's market, which has been determined to be the third-fastest growing Metropolitan Statistical Area among the nation's 319.

Deposits at Sept. 30, 1990 were $451.7 million compared the year earlier figure of $445.9 million, and total assets were $492.7 million compared to $486.2 million, both showing a year-to-year increase of 1.3 percent. Net loans were $331.4 million, a decline of 3.7 percent from $344.1 million at the end of the third quarter a year ago.

Seacost's banking subsidiary serves the Treasure Coast region of Florida,

which is located just north of Palm Beach County.

#90289p5417 10/16/1990 ~PR Newswire

NEW YORK (OCT. 16) PR NEWSWIRE - Citicorp (NYSE: CCI) today reported third quarter net income of $221 million, or $0.56 per share, compared with $358 million, or $0.99 per share, in last year's third quarter. This brought net income for the first nine months of the year to $700 million, or $1.81 per share, compared to $1,282 million, or $3.62 per share, last year.

These results continue to reflect the trends first discussed twelve months ago:

-- Continued strength of the consumer business. -- Solid business in International Banking and Finance in developing economies.

-- Continued slowdown of the U.S. corporate banking business revenues, offset by good revenue performance with world corporate names, the Financial Institutions business and in Europe.

-- Significant credit write-offs and "cost to carry" in the domestic U.S. real estate portfolio and in Australia.

-- Continued progress in the LDC portfolio. Agreements in principle were reached with Venezuela, Chile and Uruguay, and Brazil has begun to negotiate with its Bank Advisory Committee.

Market issues and the economic and political environment in the U.S. have put pressure on bank stocks and other securities. Citicorp's broadly based business franchises and funding position have been an important strength under the circumstances, and Citicorp believes that its strategic concentration on the global consumer, international banking, and Global Finance (Japan, Europe and North America) remains appropriate and fundamental to its growth.

The company has continued to be pro-active in recognizing loan losses and has been building its corporate reserve position to provide for possible further deterioration.

Citicorp believes that it has aggressively responded to deterioration of domestic real estate values while continuing to support its customers but that this market has not yet stabilized; continued write-offs and "cost to carry" will extend into 1991. Resolution of the Gulf Crisis and stabilization of the

financial markets will have an important bearing on the outlook for the U.S. economy, Citicorp noted, and hence on the real estate business.

Citicorp's domestic leveraged finance (LBO) business has been impacted by write-offs during the first part of this year but is currently thought to be satisfactory from a credit perspective. Its business in Australia has been affected by the economic downturn in that country.

Citicorp continues to build its capital ratios, though market conditions have made it difficult to complete some transactions intended for this calendar year -- particularly in insurance.

Among other developments and factors: -- Citicorp's Board declared a quarterly common stock dividend of $0.445 per share, the same as last quarter, payable November 13 to shareholders of record October 26.

-- Consumer earnings advanced 34 percent and 30 percent over last year's third quarter and nine months, reaching $293 million in the quarter and $829 million for the nine months. This included $32 million after tax from the sale of the Diners Club franchise in Japan. Worldwide consumer earnings are running at a record $1 billion annual rate. Consumer revenues are up 19 percent versus a year ago, 24 percent when adjusted for asset securitizations.

-- Operating expenses were 12 percent higher than for last year's quarter. Most of the increase comes in businesses with solid performances and revenue growth (Global Consumer and International Banking and Finance). Global Finance (Japan, Europe and North America) is focussing its businesses and balancing expenses to meet more difficult revenue prospects, pricing and competition.

-- Earnings from International Banking and Finance in developing economies advanced 14 percent year-to-date over last year, reaching $353 million for the nine months. Earnings for the quarter were $99 million, flat to last year.

-- The commercial loan loss provision, excluding the cross-border refinancing portfolio was $283 million for the quarter and $654 million for the nine months, up from $59 million in the third quarter and $141 million in the first nine months of last year. Included in the provision for the quarter was $201 million of net write-offs and an $82 million additional provision to build the commercial loan loss reserves.

-- The net commercial write-offs, excluding the cross-border refinancing portfolio, of $201 million in the quarter, compared with $228 million for the first two quarters together and $27 million in the third quarter of 1989. Domestic real estate write-offs were $61 million in the third quarter, compared with $98 million for the first two quarters and $11 million a year ago. Leveraged transaction net write- offs were $42 million in the quarter compared with $108 million in the first two quarters together.

-- The commercial loan loss reserve ratio in Global Finance (Japan, Europe and North America) increased to 163 basis points in the quarter, up from 144 basis points in the second quarter and 119 basis points at year end 1989. Total commercial loan loss reserves, excluding the cross-border refinancing portfolio, were $829 million, or 145 basis points at quarter end, up 15 basis points for the quarter and 35 basis points since year end.

-- Commercial cash-basis loans, excluding the cross-border refinancing portfolio, increased by $780 million during the quarter, to $4.6 billion. Domestic real estate accounted for $573 million of this increase, bringing cash-basis real estate loans to $2.2 billion. Other commercial real estate owned (OREO) also increased to $1,045 million, up $336 million from the second quarter.

-- Venture capital revenues of $62 million in the third quarter compared with $80 million in the second quarter of 1990 and $93 million a year ago. Trading revenues, including foreign exchange, totaled $294 million in the third quarter, compared with $204 million in the second quarter of 1990 and $152 million a year ago.

-- Asset securitizations and consumer deposits continued to grow in importance in Citicorp's funding structure, sustaining the trend of the past several years. Securitizations totaled $5.3 billion in the third quarter and $19.1 billion year to date, versus $15.8 billion in full year 1989. Global Consumer deposits increased $2.5 billion in the third quarter and $9.7 billion year to date. Since asset balances have declined by approximately $3 billion since year end 1989, the growth of consumer deposits has displaced purchased funds. Federal funds purchased declined to $3.7 billion at quarter end and commercial paper outstandings fell to $4.1 billion, versus $5.3 billion and $4.6 billion at June 30 and $8.9 billion and $7.1 billion at Dec. 31, 1989. The decline in purchased funds motivated Citicorp to terminate its weekly commercial paper auction in September.

#90289p5418 10/16/1990 ~PR Newswire

VERNON, CONN. (OCT. 16) PR NEWSWIRE - Tolland Bank (NASDAQ: TOBK) today reported net income of $24,000, or $.02 per share in the third quarter of 1990 versus $230,000, or $.20 per share, in the third quarter of 1989. For the first nine months of the year, net income was $357,000, or $.31 per share, versus $784,000, or $.68 per share, for the comparable period in 1989.

The board of directors has declared a cash dividend of $.04 per share to stockholders of record at the close of business Oct. 31, 1990 which will be payable on Nov. 13, 1990. A dividend of $.12 had been paid in the prior

quarter and dividends have been paid each quarter since August 1987. The dividend reduction for the third quarter reflects the need to preserve the institution's capital and permit the bank to take advantage of attractive expansion opportunities that may present themselves. The board will carefully monitor the quarterly dividend in relation to current and prospective circumstances in the best interest of the shareholders.

Chairman Guy Cambria, Jr., said that "although third quarter results are disappointing, they are a reflection of the region's deteriorating economic condition. Management is focused on protecting asset quality through daily attention to existing and potential problems. We expect to return to traditional levels of profitability when the economy recovers."

Highlights of the most recent quarter include: Total deposits at Sept. 30, 1990, were $156.7 million, up 5.3 percent from June 30 and 12.9 percent from year-end 1989. The nine month rate of growth is one of the highest among Connecticut savings institutions and reflects the success of the bank's marketing of ValuePlus Checking and Savings accounts and other key customer products. The bank's ability to continue to attract stable, low-cost, core funds will further improve the structure and profitability of the balance sheet.

Net interest income for the third quarter and first nine months of 1990 were virtually unchanged from the same periods in 1989. The spread between the yield on earnings assets and the cost of interest-bearing liabilities improved to 3.26 percent in the third quarter of 1990 from 3.10 percent for the comparable period in 1989; for nine months in 1990 the spread was 3.16 percent versus 3.24 percent in 1989. The spread, adjusted for an increased reliance on interest-bearing deposits and lower taxable income, produced a third quarter net interest margin of 3.68 percent versus 4.36 percent in 1989. The nine-month net interest margin was 3.70 percent in 1990 compared to 4.38 percent in 1989.

Net loan chargeoffs for the third quarter were $52,000, an annualized rate of just over one-tenth of one percent of average loans, versus $29,000 in the third quarter of 1989. Net charge-offs of $137,000 for the first nine months, which were also at this low annualized percentage, were $99,000 for the comparable period in 1989. The provision for loan losses was $66,000 in the third quarter of 1990, increasing the allowance for loan losses to 0.63 percent of loans at Sept. 30, up from 0.59 percent of loans at Sept. 30, 1989.

At Sept. 30, total non-performing assets of $4.4 million amounted to 2.33 percent of total assets. This ratio is one of the lowest in New England for publicly traded savings institutions. Loans delinquent 90 days or more were $2.5 million, or 1.73 percent of loans, at Sept. 30, up from $1.0 million at June 30. The allowance for loan losses equaled 37 percent of non-performing loans at Sept. 30. Foreclosed real estate dropped to $1.9 million at Sept. 30 from $2.1 million at June 30.

Higher non-interest expenses continue to reflect last year's expansion of the branch system, the installation of ATMs and a "state- of-the-art" computerized tellers' system. In addition, third quarter expenses included more than $50,000 of loan collection and other costs related to delinquent loans and foreclosed real estate.

Other operating income was up 38 percent in the third quarter and 30 percent for nine months versus the comparable periods in 1989.

Shareholders' equity was 8.38 percent of total assets at Sept. 30. The ratio decreased from 8.88 percent at June 30 because the quarterly dividend exceeded net income for the third quarter and the market value of the bank's equity portfolio declined in the latter half of the quarter. The depreciation in the equity portfolio is reported as a direct reduction of shareholders' equity. Management will continue to closely monitor the investment outlook for each stock in the $2.2 million portfolio and will manage the portfolio in an effort to enhance shareholder value.

Tolland Bank is a Connecticut-chartered, savings bank located in Tolland, Conn., with executive offices in Vernon, Conn. The bank's assets at Sept. 30, 1990 were $189.2 million, an increase of 5.9 percent over Sept. 30, 1989.

#90289p5424 10/16/1990 ~PR Newswire

DALLAS (OCT. 16) PR NEWSWIRE - Republic Health Corporation (NASDAQ: REPH) today announced earnings and revenues for its first full quarter of operations following its emergence from Chapter 11 proceedings on April 30, 1990. For the fourth quarter ended Aug. 31, 1990, the company reported net income of $1,419,000, or $.24 per share, on net revenue of $117,542,000 compared to a net loss of $24,355,000 on net revenue of $112,325,000 for the same period in 1989. The company also reported revenues and results of operations for the year ended Aug. 31, 1990.

At the same time, the company announced that Jack O'Callaghan, founder of the O'Callaghan Company, and Jay Rodney Reese, formerly chairman and CEO of Primefax, Inc., have been elected to its board of directors.

Commenting on the company's fourth-quarter earnings, Bryan P. Marsal, president and CEO of Republic, said: "Our results for this period clearly demonstrate that Republic has emerged from Chapter 11 as a strong organization positioned for continued positive performance. I have a great deal of confidence in this company due to our proven strategy, management team, and in light of the opportunities in the acute care hospital industry."

For the year ended Aug. 31, 1990, the company reported a net loss of $101,245,000 including non-recurring charges of $80,544,000 on net revenue of $481,254,000. This compares with a net loss of $69,620,000 on net revenue of $466,591,000 for the year ended 1989. The non- recurring charges included losses of $74,299,000 related to the sale and anticipated sales of certain facilities, and $6,245,000 associated with Republic Health's recapitalization.

Republic Health filed for a "pre-packaged" bankruptcy plan in December 1989 in order to reduce its level of indebtedness and interest burden. The reorganized company emerged from Chapter 11 as a publicly traded company less than five months later.

"During 1990, we achieved our goal of recapitalizing and are pleased that the associated charges and expenses are now behind us. We believe that in the year to come, investors will recognize the earnings potential of this company " Marsal said.

New Board Members The appointments of O'Callaghan and Reese increase

Republic's total number of directors to seven.

In February 1988, O'Callaghan was appointed chairman and oversight member of the board by the court and the creditor committee in the American Healthcare Management bankruptcy. His duties were completed on Dec. 31, 1989. He founded the O'Callaghan Company in 1979 after two years as president of the North Texas Commission. Earlier, he was with the Xerox Corporation for 17 years and retired as a senior vice president.

O'Callaghan has been a director for more than 20 public and private companies. He currently sits on the boards of the Savin Corporation and EDC, Inc.

Prior to becoming chairman and CEO of Primefax, Reese was president and CEO of Recognition Equipment Incorporated and manager of Network Security Corporation. He was with Texas Instruments Corporation from 1955 to 1973, where he held numerous senior management positions including president, Texas Instruments Supply Company.

Reese has been a board member for several companies and universities. He is currently a director of the North Texas Radio for the Blind and the Edna Gladney Center in Fort Worth, Texas.

Republic Health owns or leases and operates 14 acute care hospitals with 3,166 licensed beds and one surgery center in six states.

NEW ORLEANS (OCT. 16) PR NEWSWIRE - Robert E. Howson, chairman of the board and chief executive officer of McDermott International, Inc. (NYSE: MDR), announced that Robert W. Page has been named executive vice president and group executive of McDermott's newly formed engineering and industrial group, effective Nov. 1. He will report to Howson.

In his new position, Page will be responsible for overseeing the management of Hudson Engineering and Project Management, Diamond Power Specialty Corporation Hudson Products Corporation, as well as McDermott's Worldwide Marketing and Government Operations.

Page has been Assistant Secretary of the Army for Civil Works and chairman of the Panama Canal Commission since 1987. He was president and chief executive officer of PM Company from 1986 to 1987. Between 1981 and 1986, he was with Kellogg Rust Incorporated, first as president and chief executive officer of M. W. Kellogg Company, then as president and chief executive officer of Kellogg Rust, and, finally as chairman of the board and chief executive officer. Before that, from 1976 to 1981, he was president and chief executive officer of Rust Engineering Company.

Prior to these positions, Page had been president and chief executive officer of the George A. Fuller Company, a construction company, from 1972 to 1976; vice president of construction for Rockefeller Family and Associates from 1967 to 1972; assistant general manager, Bechtel Corporation, from 1962 to 1967; vice president of construction, Southeast Drilling Company, from 1961 to 1962; and manager of construction for the Arabian American Oil Company, from 1955 to 1960. He was an assistant professor of Engineering at the American University of Beirut from 1952 to 1954.

Page holds a Bachelor of Science degree in Architectural Engineering from Texas A&M University. He has served in the United States Navy during World War II and with the Central Intelligence Agency from 1950 to 1952.

McDermott International, Inc., is a leading worldwide energy services company. The company and its subsidiaries manufacture steam- generating equipment, defense products, and tubular products. They also provide engineering and construction services for industrial and utility facilities onshore, and to the oil and gas industry offshore.

#90289p5428 10/16/1990 ~PR Newswire
TAMPA, FLA. (OCT. 16) PR NEWSWIRE - First Florida Banks, Inc. (NASDAQ: FFBK) today reported net income for the three months ended Sept. 30, 1990 of

$3,357,000 ($.21 per share) as compared with $13,210,000 ($.83 per share) for the third quarter of 1989. These results produced returns on assets and equity for the third quarter of 1990 of .24 percent and 3.18 percent, respectively, as compared with 1.02 percent and 12.95 percent for the third quarter of 1989.

As was previously reported, First Florida's third quarter earnings reflect a $21.7 million provision to the loan loss reserve, compared with a $7.0 million provision in the second quarter of 1990, and a $3.4 million provision in the third quarter of 1989.

Net income for the nine months ended Sept. 30, 1990 was $21,663,000 ($1.37 per share) as compared with $38,817,000 ($2.44 per share) for the same period in 1989. Returns on assets and equity for the nine months ended Sept. 30, 1990 were .52 percent and 6.99 percent, respectively, as compared with 1.00 percent and 12.99 percent for the first nine months of 1989.

First Florida Chairman A. Bronson Thayer said, "The growth trend for operating revenues remained on a positive track during the third quarter. The bank realized increases in net interest income and non-interest income over the third quarter of 1989. Net interest income was 5 percent higher than for the same period last year and non-interest income increased by 28 percent." Significant sources of non-interest income, including service charges, credit card discounts and fees, trust income and data processing fees, have experienced increases over the past year, he added.

The net interest margin for the third quarter of 1990 was 4.59 percent compared with 4.64 percent for the third quarter of 1989, and 4.68 percent in the second quarter of 1990. Earning assets continued to grow to $4,872.9 million at Sept. 30, 1990 compared with $4,573.4 million at Sept. 30, 1989.

First Florida's capital ratios also remain strong. The company's equity to asset ratio at Sept. 30, 1990 was 7.37 percent compared with 7.84 percent at Sept. 30, 1989 and 7.51 percent at June 30, 1990. The primary capital ratio at Sept. 30, 1990 was 8.31 percent compared with 8.63 percent at Sept. 30, 1989, and 8.47 percent at June 30, 1990. First Florida's book value per share at Sept. 30, 1990 was $26.39 compared with $25.95 at Sept. 30, 1989, and $26.41 at June 30, 1990.

The increased provision to the loan loss reserve was made as a result of a rise in non-performing assets as well as an increase in net loan losses during the quarter. Non-performing assets at Sept. 30, 1990 were $79 million, or 2.03 percent of net loans plus other real estate, compared with $65 million at June 30, 1990 and $36 million at Sept. 30, 1989. The ratio of non-performing assets to net loans plus other real estate was 1.72 percent at June 30, 1990 and .98 percent at Sept. 30, 1989.

Of total non-performing assets at Sept. 30, 1990, non-performing loans were

$63 million, compared with $58 million at June 30, 1990, and $28 million at the end of the third quarter of 1989. The ratio of non-performing loans to net loans at Sept. 30, 1990 was 1.61 percent compared with 1.53 percent at June 30, 1990 and .76 percent at Sept. 30, 1989. Of total non-performing loans at Sept. 30, 1990, 70 percent were real estate loans, 27 percent were commercial loans, and 3 percent were consumer loans.

Net charge-offs were $21.5 million in the third quarter of 1990 compared with $4.4 million in the second quarter of this year and $3.4 million in the third quarter of 1989. Of the total charge-offs for the third quarter of 1990, commercial loan charge-offs were $11.5 million, consumer loan charge-offs were $8.5 million, and real estate loan charge-offs were $1.5 million.

Thayer further stated that the decision to increase the provision for loan losses replenishes the loan loss reserve for charged off loans, primarily installment and commercial loans. "Charge-offs of installment loans this quarter were higher than in prior periods due in part to the consolidation of our loan systems this quarter," he said. Thayer added that a continued softening of the Florida economy precipitated the increase in commercial loan charge-offs as well as the increase in non-performing assets.

Thayer said, "The immediate cause for concern remains the stability of both the state and national economies. Fortunately, we believe Florida is better prepared to weather a short-term decline."

While First Florida is intent on meeting the credit needs of the communities it serves, Thayer said the Bank's loan quality review committee is also taking steps to strengthen its credit review process through a rigorous monitoring of the loan portfolio on a continuous basis. "Uppermost in our minds must remain the critical need to protect the financial standing of First Florida," he said.

First Florida's total loans outstanding as of Sept. 30, 1990 were $3.88 billion, an increase of $218 million over the same date in 1989. The allowance for possible loan losses was $57.3 million at Sept. 30, 1990 compared with a Sept. 30, 1989 amount of $45.2 million. The ratio of the allowance for possible loan losses to net loans outstanding was 1.48 percent at Sept. 30, 1990, compared to 1.24 percent at Sept. 30, 1989.

The ratio of the allowance for loan losses to non-performing loans was 91 percent at Sept. 30, 1990 compared with 98 percent at June 30, 1990. The ratio of the allowance for loan losses to non-performing assets was 73 percent at Sept. 30, 1990 compared with 87 percent at June 30, 1990.

At quarter end, total assets for the company were $5.65 billion compared with $5.26 billion at Sept. 30, 1989. Total deposits were $4.67 billion at Sept. 30, 1990, compared with $4.26 billion on the same date in 1989.

First Florida continued to pursue its supermarket banking strategy with an

additional store opening during this quarter. These retail branches are located inside Kash n' Karry supermarkets. Supermarket banking has become a significant trend across the country and has allowed First Florida to emerge as a leader in providing non-traditional banking options for improved customer convenience. Additional in-store branches will continue to open during the year.

First Florida Banks, Inc., a Tampa-based company with $5.7 billion in assets, operates 155 banking offices along Florida's West Coast from Pensacola to Naples/Marco Island and across the central Florida corridor to the Atlantic Coast.

First Florida Banks' common stock is traded in the national over-the-counter market under NASDAQ symbol FFBK.

#90289p5429 10/16/1990 ~PR Newswire

SEATTLE (OCT. 16) PR NEWSWIRE - The Brazilian airline, Varig, has ordered 14 Boeing aircraft in a major fleet expansion move, Boeing Commercial Airplane Group confirmed today.

Varig ordered six Boeing 747-400s with five options and eight Boeing 737-300s with seven options. Total value of the order is about $2.6 billion, of which about $1.3 billion is for the 14 on firm order. This is the largest single order in the airline's history and the largest aircraft order in dollar terms by a Latin American carrier.

In a signing ceremony yesterday in Rio de Janeiro, Boeing Commercial Airplane Group President Dean Thornton noted Varig's strong association with Boeing: "Our latest count shows that Varig operates 63 Boeing airplanes, owned and leased. If we include the 747-400s and 737-300s ordered today and total options, Varig has an additional 42 Boeing airplanes on order directly from Boeing and through leasing companies. We appreciate Varig's confidence in Boeing as expressed in the composition of its fleet and this latest order."

Varig's 747-400s will be powered by General Electric CF6-80C2-B1F engines. The airline also will lease two 747-400s from International Lease Finance Corp. of Beverly Hills, Calif.

Varig's new 737-300s will be powered by CFM56-3B2 engines built by CFM International, a joint venture of General Electric of the United States and SNECMA of France.

This is the second major Boeing order announced by Varig this year. In February the carrier confirmed orders for 15 Boeing 737-300s valued at $450 million.

The Boeing 747-400, the world's largest, most modern and longest range jetliner, boasts technical advances in aerodynamics, structural materials, avionics and interior design. It can be distinguished from earlier 747 versions by upturned six-foot-high (1.8 m) "winglets" at the tip of each wing. Capable of ranges up to 8,400 statute miles (13,518 km), the new superjet consumes 11 percent to 15 percent less fuel than 747-300s.

The 737-300 is the mid-sized member of a family of three new jetliners -- along with the larger 737-400 and the smaller 737-500 -- designed to be among the quietest and most fuel-efficient aircraft in the world. All three offer many of the features developed for the original, highly successful 737-200, but consume up to 25 percent less fuel per seat.

PHILADELPHIA (OCT. 16) PR NEWSWIRE - Prime Bancorp Inc.'s (NASDAQ-NMS: PSAB) announced today that its consolidated financial results continue their steady upward trend despite the current economic conditions.

The first quarter figures continue to indicate the company's strength and soundness as a quality bank. With the conclustion of the stock repurchase program, the company's book value per share has increased to $28.68 per share at Sept. 30, 1990.

Net income was $954,369 or 72 cents per share compared to $921,195 for the comparable period in 1989. Net interest income before provision for loan losses increased by 19.7 percent to $3,345,365 for the quarter compared with $2,793,191 for the same period in 1989. The company's net interest rate margin has advanced to an all-time high of 4.23 percent. This constant improvement demonstrates the company's commitment toward strong earnings.

The company has maintained a 1.14 percent return on average assets for the respective quarters ended Sept. 30 1989, and 1990. Prime's return on avergage equity at quarter end was 10.18 percent. Assets grew to $336,490,057 at Sept. 30, 1990. The company's ratio of non- performing loans to loans receivable, net, was 1.1 percent for the first quarter ended Sept. 30, 1990.

Prime Bancorp Inc.'s common stock is listed on the NASDAQ National Market System. Its price as of the close of business yesterday was $11.25. Prime Bancorp Inc. is headquartered in Philadelphia. Prime Savings Bank fsb is a federally chartered savings bank which conducts operations in Philadelphia, Bucks and Montgomery counties through nine full-service offices. The bank's deposits are federally insured by the Savings Association Insurance Fund, a fund administered by the Federal Deposit Insurance Corp.

#90289p5432 10/16/1990 ~PR Newswire

DALLAS (OCT. 16) PR NEWSWIRE - Joseph F. McKinney, chief executive officer of Tyler Corp. (NYSE: TYL), announced today that earnings per share from continuing operations for the third quarter of 1990 grew to 7 cents from 2 cents in the year-earlier period. Operating profit advances at Tyler Pipe combined with reductions in corporate expense to produce this improvement. Sales rose 15 percent to $59.5 million for the quarter, and income was $1.4 million.

For the nine months ended Sept. 30, earnings per share from continuing operations were 17 cents compared to a loss of 2 cents in the same period last year. Sales increased 17 percent to $169.7 million.

"Tyler Pipe's operating performance has shown substantial improvement over last year," stated McKinney. "This advance has been achieved through better tonnage and marginally higher prices despite deteriorating construction markets.

"The outlook for construction expenditures is pretty grim," McKinney continued "and this will definitely influence future earnings. Because of market share gains, operating improvements and our strong balance sheet, we feel in

comfortable shape, however, and expect to over-participate when conditions improve."

Results from continuing operations consist principally of the operations of Tyler Pipe. Atlas Powder and Reliance Universal are included in discontinued operations along with expenses related to these divestitures.

Tyler Corp., with national headquarters in Dallas, provides cast iron pipe and fittings for drain, waste and vent and waterworks applications.

ROLLING MEADOWS, IL (OCT. 16) PR NEWSWIRE - Arthur J. Gallagher & Co. (NYSE: AJC) today announced its third quarter results. Total revenues increased 14 percent from $48,192,000 to $54,794,000. Net income for the third quarter of 1990 was $7,738,000, an increase of 8% from net income of $7,187,000 reported for the third quarter of 1989. Quarterly earnings per share were $.63 for 1990 compared to $.57 for 1989, an 11 percent increase.

Revenues for the nine months ended Sept. 30, 1990, were $146,344,000, compared to $130,766,000 last year, an increase of 12 percent. Net income was $12,799,000, down $1,155,000 for the first nine months from $13,954,000 last year. Earnings per share for nine months were $1.04, down 7 percent from $1.12 in 1989.

Robert E. Gallagher, chairman and chief executive officer, stated that market conditions remain very competitive; however, strong new business and an intensified effort to keep our existing clients resulted in a 14 percent revenue growth for the quarter.

Arthur J. Gallagher & Co., an international insurance brokerage and risk management services firm, is headquartered in Rolling Meadows, Ill., and is traded on the New York Stock Exchange under the symbol AJG.

#90289p5440 10/16/1990 ~PR Newswire

DALTON, GA (OCT. 16) PR NEWSWIRE - In ceremonies today, Shaw Industries, Inc. (NYSE: SHX) will be awarded the highest honor given by Philip B. Crosby, The Quality Fanatics Award. The award will be presented to Robert E. Shaw, president and CEO, at the Annual Quality Awards Banquet this evening by Crosby founder and chairman of the world's largest educational and consulting firm dealing specifically with quality management, Philip Crosby Associates, Inc. (PCA).

Shaw Industries, Inc. is the number one carpet manufacturer in the world with $1.5 billion in sales. Shaw Industries, Inc. became involved in the Quality Improvement Process due to its desire to maintain and enhance its position as a leader in all aspects of the carpet industry. Now over 15,000 employees work toward a common goal, and the potential is tremendous with documented millions saved.

The Quality Fanatics Award honors select companies who have made a total corporate commitment to the quality process. To be so honored, a company must demonstrate over a period of time the following: First, decide you want a Zero Defects strategy and; Announce a clear, specific quality policy; Next display management commitment through action, and; Assure that everyone is educated so they can perform; Then eliminate opportunities to compromise performance, and; Insist that every supplier do the same; Convince everyone that we are dependent on each other and; Satisfy the customer first, last and always.

Crosby is the sole judge as to who may become a Quality Fanatic Award winner. The awards are given on a very selective basis.

CONTACT: James M. Bram of Philip Crosby Associates, 407-623-3613.

#90289p5444 10/16/1990 ~PR Newswire

SCOTTSDALE, AZ (OCT. 16) PR NEWSWIRE - Kroy Sign Systems, a major manufacturer and distributor of interior architectural sign products, has announced its new Sign Dealer Program.

The new program will develop and manage a nationwide dealer network to expand its existing distribution channel of Architectural Sign Consultants.

Product demand has inspired the dealer program, which will allow Kroy Sign Systems to even better serve its customers in local markets, according to Kroy Sign Systems Marketing Manager Hjordy Johnston.

Kroy Sign Systems is known for innovative products and services that create and support comprehensive, cost-effective sign solutions. Dealers are expected to be attracted by the wide range and many advantages of Kroy's sign products, including the strong aesthetic appeal and efficient production

process.

"We are committed to developing and supporting a dynamic network of dealers to service the rapidly expanding interior signage market," said Johnston.

Kroy's unique program provides comprehensive support in marketing and sales for the new sign dealer to ensure a successful introduction of Kroy's products into the interior architectural sign market.

Existing Kroy Architectural Sign Consultants will work with dealers by identifying, developing and securing new projects. The consultants will evolve into a field management and support network for the sign dealer.

Kroy Sign Systems is a division of visual communications products manufacturer Kroy Inc. The Kroy Sign Dealer program was rolled out Oct. 1 by special invitation.

#90289p5448 10/16/1990 ~PR Newswire

GREENSBURG, PA (OCT. 16) PR NEWSWIRE - Jeffrey S. Ratner, chairman of Sulcus Computer Corp. (NASDAQ: SULC) announced today that its board of directors has approved the terms of a definitive agreement callin for the merger of Lodgistix Inc. (NASDAQ: LDGX) into Sulcus's hospitality subsidiary.

The Lodgistix board had approved the transaction earlier.

Ratner also stated that, after further discussions and investigation, the exchange ratio was changed. The exact number of units to be issued is to be based on an agreed value of $3,100,000 for all of the issued and outstanding shares of capital stock of Lodgistix divided by the average price of the Sulcus units (SULCU) as quoted on NASDAQ for a period of time prior to the completion of the registration statement to be filed in accordance with this transaction, subject to the further requirement that Sulcus will not be required to issue more than one whole unit for each 7.5 shares of Lodgistix capital stock. The Sulcus unit consists of two shares of common stock and two redeemable stock purchase warrants.

In making the announcement, Paul Hammar also stated the Cardinal Investment Co. sold its entire one million share equity position in Lodgistix to a Lodgistix distributor in Switzerland and to certain key managers at Lodgistix.

The combined operations will represent the only software development company in the industry offering automation in both the UNIX and IBM/DOS/Network environments. The respective boards cited improved opportunities in consolidating research and development and their combined world-wide sales and

service networks as major factors in approving the agreement.

"We"re putting together techologies that will create the leading developer of hotel automation systems worldwide," Ratner said. "We like the Lodgistix LANmark product's open architecture, and want to add to the product by seamlessly integrating new capabilities."

LANmark is the high-performance hotel automation system designed to operate on both a local and a wide area network (LAN and WAN, respectively).

Ratner added, "Through our Phoenix-based Hospitality Management Systems subsidiary, we shall also offer UNIX-based products for automating front office, back office, point of sale, sales and catering, yield management, central reservations, and credit card authorization -- providing all major technolgies on a variety of operating systems to the hospitality industry."

When the merger is completed, the combined operations will hold approximatley 32 percent of the hospitality market, according to the principals.

#90289p5450 10/16/1990 ~PR Newswire

CHICAGO (OCT. 16) PR NEWSWIRE - Whitman Corporation's (NYSE: WH) third quarter results, announced today, reflect the restructuring plan the company announced September 28. The plan includes the tax-free distribution of Pet Incorporated shares to Whitman shareholders.

The spin-off, which is subject to market conditions and a tax-free ruling by the Internal Revenue Service, is hoped to be completed in the first quarter of 1991. Whitman's third quarter financial results now show Pet in discontinued operations. All 1989 numbers have been restated to reflect Pet as discontinued as well.

The plan also includes an after-tax charge against third quarter earnings of $150 million, which is also reflected in this report. The special charge will facilitate an annualized after-tax reduction in total operating costs of $54 million.

On this basis, Whitman's income from continuing operations for the third quarter, excluding the special charge, was $33 million (23 cents per share), up 10 percent from last year's restated $30.1 million (20 cents per share). Sales were $639.7 million, up 5 percent from last year's $607.7 million.

For the third quarter, operating income of Pepsi-Cola General Bottlers was up 24 percent over last year, and Midas was up 19 percent. Hussmann, which has

continued to improve after a slow start in the first half, reported a decline of 18 percent in operating income.

Pet's third quarter income, excluding the special charge, was $45 million, down 28 percent from last year's $63 million. Pet's sales were $419 million, up 1 percent from last year's restated $415 million.

Including the special charge and Pet's results, Whitman reported a net loss of $102.8 million ($1.09 a share) compared to earnings of $53.6 million (43 cents a share) in 1989.

James W. Cozad, chairman and chief executive officer, said "It is clear from these results that Whitman, after the spin-off of Pet, will be a very strong company with market-leading brands. Midas and Pepsi General continue to set records, and Hussmann's results are improving month by month. After the spin-off, an independent Pet should also be more fairly valued in the market, serving to unlock the value of our assets for the benefit of our shareholders."

HANCOCK, MICH. (OCT. 16) PR NEWSWIRE - D&N Financial Corp. (NASDAQ-NMS: DNFC) Chairman and Chief Executive Officer Kenneth D. Seaton said today that third-quarter earnings have been delayed pending a review of allowances for loan loss provisions. In other actions, the company announced a workforce reduction plan designed to reduce annual expenses $1.5 million.

"We currently are conducting a review of the adequacy of our loan loss reserves," said Seaton. "This review should be completed and earnings announced the week of Oct. 22. While no specific additional problems have been identified on our loan portfolio, with the declining state of the national real estate market and the likelihood of a recession, we felt it prudent to conduct such a review at this time."

Commenting on operational results, Seaton stated that net interest income is expected to be $9.5 million, which is in line with the bank's business plan for the year. This reflects strong core operations plus the continued positive impact of an ongoing cost containment program. The company's workforce reduction plan culminated this week in the elimination of 21 existing staff positions. These, along with about 30 positions eliminated since the beginning of the year, combined to achieve a $1.5 million annual compensation expense reduction. After the position eliminations, the D&N workforce stands at 549.

"Since the beginning of the year, we have eliminated 9 percent of our total workforce through attrition, retirement and terminations. The current

reductions concentrated on management and supervisory positions. We have made no cutbacks in direct customer service positions, assuring our customers no change in our traditionally high customer service levels," said Seaton.

Commenting on the plan, Seaton stated that a comprehensive evaluation of bank and mortgage company operations and workforce was conducted with the specific goal of increasing shareholder return on investment. One result of that evaluation was the staff reduction plan. Other results include organizational and systems changes to improve operating efficiency.

"These changes are consistent with recent trends in the financial services industry to consolidate and reduce the costs of administrative and staff support functions," noted Seaton.

Employees whose positions have been eliminated are receiving as part of their severance package the services of an outplacement firm contracted by D&N to assist in a job search and re-employment program.

D&N reported earnings of $1.2 million or $.33 per share and $1.6 million or $.43 per share for the first and second quarters, respectively, of this year. For the 1989 third quarter, D&N reported $1.1 million or $.30 per share.

D&N Financial Corp., through its subsidiary, D&N Savings Bank, FSB, has financial services offices throughout Michigan's Upper Peninsula and mid-Michigan, as well as mortgage banking operations in Arizona, Illinois, Michigan, North Carolina and Texas. D&N is the fourth-largest thrift institution in Michigan based on asset size. D&N Financial Corp.'s stock is traded over the counter and is quoted on the NASDAQ National Market System under the symbol DNFC.

WETHERSFIELD, CONN. (OCT. 16) PR NEWSWIRE - Shared Technologies, Inc. (NASDAQ: STCH) reported record sales of $2,067,000 for the month of August. This level of revenue is a milestone and sets a solid foundation for continued growth. STI also reported record profits of $103,000 and cash flow of $321,000 both on an operating basis (before corporate overhead and interest expense). Anthony D. Autorino, STI chairman and chief executive officer, stated "we have achieved these results in difficult economic times but since our business provides real economic benefit and improved productivity to our customers, the outlook for STI has never been better. I think we can all look forward to continued growth in revenue, cash flow and profits as we move into the fourth quarter of 1990 and begin the planning process for 1991."

DALLAS, (OCT. 16) PR NEWSWIRE - Dresser Industries Inc. (NYSE: DI) today announced that its board of directors has approved a stock repurchase plan that authorizes the company to buy Dresser common stock from time to time in the open market.

John J. Murphy, Dresser chairman and president, said: "This action represents prudent utilization of the company's cash balances for the long-term enhancement of shareholder values. Management feels the stock is currently undervalued and that purchasing it as appropriate will not only be an attractive investment for the company but a very positive indication of our confidence in the future of Dresser."

Headquartered in Dallas, Dresser is a major supplier of highly engineered products and services primarily utilized in energy-related activities throughout the world.

NEW YORK (OCT. 16) PR NEWSWIRE - A complete set of Essence magazines chronicling two decades of African-American women's history will be donated by Coca-Cola USA to New York's Schomburg Center of Research in Black Culture.

The donation is being made in conjunction with this week's 20th anniversary celebration of Essence magazine and the fourth Annual Essence Awards.

Essence magazine, covering a diverse range of topics, has extensively profiled the life and experiences of African-American achievers and celebrities.

"In its short 20-year history, Essence has become the nation's premier lifestyle magazine for African-American women," said Mike Steele, director, African-American Consumer Markets, Coca-Cola USA. "The information it has offered needs to be preserved and shared, and what better way to do that than working with the Schomburg."

Located in the famed Harlem district, the center, devoted to the preservation of materials on African-American life, is one of the most widely used research facilities in the world. The facility houses more than 5 million items, including a general reference collection ranging from literary masterworks by African-American authors to the U.S. Census records from 1790 to 1900.

It also has special collections of resource material that include rare books, manuscripts, sheet music, art, photographs and audiovisual materials.

GRAND CAYMAN ISLANDS, British West Indies (OCT. 16) PR NEWSWIRE - General Oriental Investments Limited (''GOIL'') announces that it proposes to acquire from an affiliate of Hanson Industries an effective 42 percent stake in Newmont Mining Corporation (''Newmont'') for U.S. $1.111 billion. The stake, which is subject to an existing standstill agreement, will first be offered to Newmont which has the right to match GOIL's cash offer within 60 days.

GOIL also announces that it has agreed to sell all the outstanding stock of General Oriental Securities Limited (''GOSL'') to a subsidiary of Hanson PLC (''Hanson''), for U.S. $1.111 billion in cash. GOSL's principal asset is an 85 percent interest in Cavenham Forest Industries (''CFI''), which is a large private owner of U.S. timberlands and a substantial U.S. lumber producer. Hanson's obligation to purchase the GOSL stock is conditioned upon either Newmont or GOIL buying the 42 percent Newmont stake for U.S. $1.111 billion in cash.

A subsidiary of St. James's Place Capital plc, subject to any necessary approvals, has offered to acquire Hanson's remaining effective 7 percent stake in Newmont for U.S. $189 million in the form of a Note and has entered into an arrangement to sell to Hanson their indirect 15 percent interest in CFI for U.S. $189 million in cash.

The result of this transaction is that GOIL will dispose of its only operating subsidiary and will transform itself into an investment company. GOIL's intention will be to reduce, in due course, its holding in Newmont so as to further diversify its investments. It is intended that any disposal of the Newmont shares would be carried out in cooperation with Newmont's management and in accordance with the applicable terms of the existing standstill agreement. GOIL looks forward to a supportive and constructive relations hip with Newmont's management.

Salmon Brothers Inc. has acted as financial advisor to GOIL in this transaction.

#90289p5473 10/16/1990 ~PR Newswire

DETROIT (OCT. 16) PR NEWSWIRE - Comerica Incorporated (OTC: CMCA) today reported quarterly earnings of $33.3 million, or $1.96 per share. This compares with a net loss of $9.1 million, or $0.63 per share, in the third quarter 1989. Third-quarter 1989 results included the effect of a $59 million or $2.46 per share, addition to the loan loss reserve for Latin American loans. Without the additional reserve, earnings for the third quarter 1989 would have been $29.8 million, or $1.83 per share. Return on common shareholders' equity was 18.10 percent for the third quarter of 1990, and return on assets was 1.11 percent.

Net income for the nine-month period ended Sept. 30, 1990, was $97.1 million, or $5.72 per share, compared to $48.6 million, or $2.88 per share, for the same period in 1989. Without the additional reserve, earnings would have been $87.4 million, or $5.34 per share, for the nine months ended Sept. 30, 1989.

The increase in quarterly earnings was due primarily to growth in the corporation's net interest income. This growth was caused by both a higher level of earning assets and a change in their mix. "Consumer loans increased $400 million and investment securities increased $450 million," according to Eugene A. Miller, chairman, president and chief executive officer. These increases were offset in part by lower time deposits. The growth in loans was largely unrelated to acquisitions.

Nonperforming assets were $121 million at Sept. 30, 1990, up from $109 million at year-end 1989, but down from $135 million at June 30, 1990. As a percentage of period-end loans, nonperforming assets were 1.51 percent at Sept. 30, compared with 1.67 percent at June 30 and 1.37 percent at Dec. 31, 1989. Net charge-offs for the quarter were $12.7 million, compared with $9.5 million for the third quarter last year.

At Sept. 30, 1990, assets totaled $13.3 billion compared with $11.4 billion last year, and loans totaled $8.0 billion compared with $7.5 billion at Sept. 30, 1989. Deposits were $10.8 billion compared with $9.4 billion a year earlier, and shareholders' equity was $770 million compared to $657 million in 1989. The acquisition in late September of the Michigan operations of Empire Federal Savings Bank added $974 million in deposit balances at Sept. 30, 1990. Less than $1 million in loans were assumed as part of this acquisition.

(a) The primary earnings per share computation is based on the weighted average number of shares outstanding during each period. The fully diluted earnings per share computation is based on the conversion of the corporation's convertible subordinated debentures into its common shares and the elimination of the interest expense, net of income tax effect, related to these debentures. Cash dividends declared are calculated on the number of shares

outstanding as of the record date.

JACKSON, Miss. (OCT. 16) PR NEWSWIRE - Mobile Telecommunication Technologies Corp. (NASDAQ-NMS: MTTL) announced today that it has agreed to form a joint venture company with COMPTA, S.A. to develop nationwide and international paging in Portugal. COMPTA, S.A. is a diversified telecommunications and data processing company based in Lisbon.

The joint venture will apply for authorization to provide paging, voice messaging and alert notification services using Mtel's proprietary software and hardware technology. Mtel will own a 25 percent equity interest in the joint venture, the maximum currently permitted under Portuguese law.

"Our partnership with COMPTA is an excellent vehicle for providing paging and related services to a broad market in Portugal and gives Mtel another important foothold in the emerging European communications market," said Alexander H. Good, president of Mtel International. "We look forward to offering the most sophisticated paging and alert notification technology through our new Portugal-based company."

According to Good, the Portuguese joint venture is another step forward in Mtel's long-term strategy to develop an international messaging network. Mtel's current international interests include ownership of a nationwide paging operator and paging hardware manufacturer in the United Kingdom (Mtel U.K.); a joint venture with Singapore Telecom International (STI) to develop national and international paging and voice messaging services in certain countries in the Asia Pacific region; and an ownership position in a nationwide paging company in Thailand.

"COMPTA, with its almost 20 years experience in the Portuguese market, is a strong complementary partner and is very pleased to join Mtel in this venture " said Vitor Assuncao, president of COMPTA, S.A.

Mtel, headquartered in Jackson, is engaged in businesses that include nationwide paging and voice messaging services in the U.S.; nationwide paging services and paging system manufacturing in the U.K.; interests in other satellite-based telecommunication systems; air-to- ground and marine telecommunication systems; telephone answering service operations; and a

digital microwave system serving southern California.

#90289p5485 10/16/1990 ~PR Newswire

BEAVER, PA (OCT. 16) PR NEWSWIRE - Michael Baker Corp. (AMEX: BKR) announced today that the backlog of work to be performed by the company reached a new record high of $130.2 million for the period ended Sept. 30, 1990.

This compares with a backlog total of $88.1 million at the same date a year ago, and $76.5 million as recently as July 1, 1990.

According to Vice Chairman, President and CEO Richard L. Shaw, the current $130.2 million backlog is comprised of signed contracts for which the necessary funding has already been allocated and released by the clients, and for which notice to proceed has been given.

"Our funded backlog consists of projects that have a green light to go forward and the money to pay the bill," said Shaw. "Beyond this, however, there is still a larger backlog represented by other projects for which Baker has already been selected, but for which contract negotiations are yet to be completed."

Baker reported that total backlog -- including as-yet unfunded projects and the company's portion of joint venture project backlog -- climbed to $217.3 million as of Sept. 30, 1990, compared to $165.3 million at the end of the same period one year ago.

According to Shaw, approximately $32 million of the current funded backlog is associated with the recently announced acquisition of the MO Companies of Houston. The MO backlog itself is a new record for these acquired entities, aided substantially by the addition of approximately $13.6 million of new contracts to provide offshore oil and gas production platform services for PSI Inc.

Among the major new contracts comprising the increase in the Baker funded backlog are: the renewal of the base year contract to provide technical evaluation services to FEMA for the National Flood Insurance Program; the renewal and expansion of the base year contract with the Department of Defense Dependent Schools for asbestos abatement in overseas school facilities; a contract for final design services associated with the new $600 million Greater Pittsburgh International Airport terminal; a contract to provide construction management services for the rehabilitation of a Philadelphia regional high-speed transit line; and various renewals of contracts held by Intelcom Support Services Inc., a Baker subsidiary, for operation and

maintenance services at several locations.

The company anticipates that third quarter earnings, which are expected to be released within the week, will show increased revenues and net income in comparison with the corresponding 1989 period, although earnings per share will be relatively flat as a result of a larger number of outstanding shares.

DES MOINES, IOWA (OCT. 16) PR NEWSWIRE - McDonald's, the world's largest fast food retailer, has decided to help America's pork producers celebrate National Pork Month for the second year in a row by making the McRib (TM) sandwich available nationally as a limited time promotion beginning the week of Oct. 22.

Last fall's six week promotion resulted in the sale of over 80 million McRib sandwiches. It was estimated that $1.60 per cwt of the market price of hogs during the six weeks of the promotion was attributable to McRib sales. That meant a $46 million return to producers in prices they were paid during the promotion period.

This year's promotion entitled, "McRib Is Back," will again be supported by McDonald's with extensive national advertising. "This is another instance where aggressive use of checkoff dollars in development and marketing is paying off for pork producers," said Mike Wehler, president of the National Pork Producers Council (NPPC).

The initial technology that resulted in development of the McRib sandwich was made possible by producer checkoff funds. The foodservice department of NPPC works closely with McDonald's on development and marketing of pork-based menu items at its some 10,000 restaurants in this country and overseas.

McDonald's serves over 20 million people every day in its restaurants around the world.

#90289p5497 10/16/1990 ~PR Newswire

ROANOKE, VA (OCT. 16) PR NEWSWIRE - Dominion Bankshares Corporation (NASDAQ-NMS: DMBK) announced today that during the third quarter of 1990, the reserve for loan losses was increased to $179 million. This increase places Dominion's reserve to nonperforming loans at 75 percent at quarter end and follows a more conservative evaluation of the Company's total loan portfolios.

The review reflects management's determination to maintain a prudent, conservative loan loss reserve in light of ongoing economic uncertainties.

As a result of the higher reserve, Dominion reported a $14.7 million net loss, or 40 cents per share, for the third quarter of 1990 compared to net income of $23.6 million, or 62 cents per share, in the third quarter of 1989. For the first nine months of 1990, Dominion recorded a net loss of $8.3 million or 25 cents per share compared to net income of $70.2 million or $1.83 per share for the same period in 1989.

ASSETS INCREASE Dominion's balance sheet reflected moderate growth during the past 12 months. At September 30, 1990, the Corporation's total assets were $10.4 billion, up 10.6 percent, consolidated deposits of $7.8 billion were 5.7 percent higher and loans, net of unearned income, totaled $7.0 billion, an increase of 3.4 percent over September 30, 1989. Shareholders' equity was $590.7 million on September 30, 1990 producing a primary capital ratio of 8.0 percent, a risk-based capital ratio in excess of 9.0 percent and a consolidated leverage ratio of 5.4 percent. These ratios are well above regulatory requirements and reflect the Corporation's strong capital position. Per share book value was $15.20 at September 30, 1990. An expanded table of key financial data follows.

At the close of the third quarter of 1990, nonperforming assets were $294 million, up $74 million from the end of the second quarter. On September 30, 1990 nonperforming assets consisted of $235 million of nonaccruing loans, $54 million of foreclosed properties and $5 million of renegotiated loans. Loans included in the 90-day past due category were $52 million at September 30, 1990 compared to the $33 million reported at mid-year. Net charge-offs for the first nine months of 1990 were $57.3 million or 1.09 percent of average loans.

RESERVES INCREASED Warner N. Dalhouse, Dominion's Chairman and Chief Executive Officer, said, "The increases in our nonperforming assets and the additional reserves we have provided largely reflect our continued conservative evaluations of real estate and commercial loans based on regulatory guidelines. The slower economy and weaker real estate markets in our trade area justify such policies. We believe these prudent actions now serve the purpose of enhancing the fundamental strengths of the Company. Based on our current projections and barring further deterioration in economic conditions, we expect the growth in problem loans to peak in the near future."

DIVIDEND DECLARED The Board of Directors declared a fourth quarter cash dividend of 22 cents per share of common stock at its meeting today. The dividend is payable December 10, 1990 to shareholders of record at the close of business on November 9, 1990.

STRATEGIC PLAN OUTLINED Dalhouse also stated that "last November the Corporation initiated the most thorough and comprehensive evaluation of our

strategies and our ways of doing business ever conducted in the Company's history. We wanted to be sure those things that made us so successful in the last decade would still work as well in the 1990s. Obviously, the need for such a study has been reinforced by the rapid changes that have taken place in our industry this year. Now the fundamental elements of our new strategic initiatives are in place." The Corporation's new strategic plan calls for sweeping changes on four primary fronts: 1) combination of the five Virginia banking affiliates into one bank, 2) reorganization of the entire Company around four primary lines of business, 3) an expanded emphasis on centralization, standardization and efficient delivery of services and, in the accomplishment of these initiatives, 4) a new management-driven focus on substantially improving productivity, efficiency and cost containment.

Dominion Bankshares Corporation is a $10.4 billion, multi-state bank holding company with 335 offices located throughout Virginia and in Tennessee, Maryland and Washington, D.C.

DALLAS (OCT. 16) PR NEWSWIRE - Old Spaghetti Warehouse, Inc. (AMEX: OSW), which is traded on the American Stock Exchange, today announced record results for the first quarter. Revenues for the 13- week period ended September 29, 1990 were $10.3 million, a 23.5 percent increase over revenues of $8.3 million for the 13-week period ended Sept. 30, 1989. Net income for the quarter was up 38.9 percent from $569,448 last year to $791,218 this year. Both primary and fully- diluted earnings per share increased to $0.24 this year compared to $0.23 last year. This was achieved in spite of primary and fully diluted shares outstanding increasing by 35.0 percent and 34.6 percent respectively.

The company's newest restaurant opened Sunday, Oct. 14, 1990 in Little Rock, Ark. The 450-seat restaurant occupies the much publicized Choctaw Station, a 90-year Old Rock Island train station now on the National Register of Historic Places.

The 18 year old company operates a chain of 16 restaurants in Texas, Ohio, Florida, Tennessee, Georgia, New York, Pennsylvania, Oklahoma and Arkansas. Construction is now underway on a new unit in downtown Charlotte, N.C., for scheduled opening in January 1991. New units are currently being planned for Philadelphia, Pennsylvania; Providence, R.I.; and Tulsa, Okla. The restaurants, which operate under the name "The Spaghetti Warehouse," feature a menu of inexpensive Italian food served in a family oriented, nostalgic and casual atmosphere.

#90289p5501 10/16/1990 ~PR Newswire
DALLAS, (OCT. 16) PR NEWSWIRE - Oryx Energy Co. (NYSE: ORX) today announced that it expects to replace 300 percent of its production in 1990 at an average finding cost of $4.35 per barrel, making this the sixth consecutive year the Dallas-based independent will have improved both production replacement rate and finding cost per barrel.

"Including the impact of our overseas acquisition in January, we expect to replace three times our total prouction this year," said Robert P. Hauptfuhrer chairman and chief executive officer. "Excluding the international properties, production replacement is expected to be about 100 percent. That's excellent performance from our drilling operations."

Oryx Energy estimates that the associated finding, development and acquisition (FD&A) cost to add these reserves will be about $4.35 per barrel. Excluding the purchased reserves and investment associated with the international acquisition, the FD&A cost will be slightly higher, or about $4.60 per barrel.

"Our strategies are paying off," said James E. McCormick, president and chief operating officer. "We have had excellent results from the overseas properties that we acquired this year. And domestically, with programs such as our horizontal drilling operations in the Austin Chalk, we are adding substantial reserves with the drill bit at very competitive costs."

McCormick updated the company's performance in the Austin Chalk, noting that through Sept. 30 there had been 55 wells completed and proved reserve

additions of 68 million equivalent barrels. Oryx Energy expects to complete 75 wells by the end of this year. McCormick estimated that gross production from the Pearsall Field would rise to more than 38,000 barrels of oil per day with the completion of 150 wells.

Oryx Energy has updated its financial forecasts for the fourth quarter of 1990 and for 1991. Using a $30 per barrel West Texas Intermediate (WTI) spot price the company would expect its fourth- quarter operating cash flow to be about $291 million. After adding expected net after-tax divestment proceeds of $200 million, and subtracting $166 million for capital investment and dividends, Oryx Energy estimates fourth-quarter debt repayment of approximately $325 million. This would bring the total debt down to slightly below $2.9 billion at year-end.

Edward W. Moneypenny, vice president of finance and chief financial officer, said, "We have been very successful in accelerating our divestment program. We have signed agreements that represent $160 million of net proceeds since our buy-back announcement in September; and we are currently negotiating other sales that should add another $40 million of net proceeds by the end of 1990. Altogether, by September 1991, we plan to raise $750 million for debt repayments through the sale of assets."

Moneypenny presented financial forecasts for 1991 based on two WTI spot price scenarios. In its $23 per barrel WTI scenario, Oryx Energy estimates an operating cash flow at $784 million and a 1991 year-end debt level of about $2.1 billion. In its $27 WTI scenario, estimated operating cash flow rose to $914 million and the year-end debt level decreased to approximately $2.0 billion.

While fundamentally bullish on oil prices, Oryx Energy has begun hedging activities to protect against a downturn in crude oil prices. In October, the company hedged 12 million barrels of its production for the first six months of 1991, using option puts with a net realized price of $23 per barrel. Unlike a futures contract, the put option allows the company to participate in price increases while establishing a "floor" in the event of price decreases.

Dallas-based Oryx Energy Co. is the world's largest independent oil and gas company, with assets in excess of $5 billion and proved reserves of more than one billion equivalent barrels. Oryx Energy conducts its domestic operations through Sun Energy Partners, L.P., of which it is the managing general partner and 98 percent owner. Oryx Energy trades on the New York Stock Exchange with the symbol ORX and the partnership with the symbol SLP.

#90289p5505 10/16/1990 ~PR Newswire

HOUSTON (OCT. 16) PR NEWSWIRE - American Capital Management & Research, Inc. (NYSE: ACA) today reported net income of $5.8 million, or $0.24 per share, for the third quarter of 1990, up from $4.5 million, or $0.18 per share, for the same period a year ago. Third quarter 1990 revenues totaled $24.8 million, down from $25.3 million during the third quarter of 1989.

For the nine months ended Sept. 30, 1990, net income was $15.9 million, or $0.65 per share, compared to $14.6 million, or $0.60 per share for the 1989 period. Revenues for the first nine months were $73.7 million, compared with $76.5 million a year ago.

Assets under management as of Sept. 30, 1990 were $11.8 billion, down from $13.7 billion a year earlier. Excluded from the comparison are assets of affiliated insurance companies, which totaled $1.3 billion at the end of the third quarter of 1989. As reported previously, these assets are no longer being managed by the company as of Jan. 1, 1990.

Sales of fund shares, at net asset value, were $302.5 million in the third quarter, down from $307.8 million a year earlier. Such amounts include sales of the family of funds under the Common Sense Trust of $156.0 million and $138.8 million for the respective periods.

Higher earnings in the third quarter of 1990 were the result of expense control measures and higher equity in earnings of the Common Sense Trust joint venture with The A.L. Williams Corporation, a wholly owned subsidiary of Primerica Corporation (NYSE: PA). These higher earnings were partially offset by lower management fees due to a decline in assets under management despite management fee increases on selected funds effective mid-year.

Stockholders of American Capital are currently being asked to vote upon a proposal to approve a merger agreement whereby Primerica Corporation, which owns approximately 83 percent of the outstanding common shares of American Capital, would acquire the publicly held shares of American Capital it does not presently own. A special meeting of stockholders will be held on Oct. 29, 1990 in Houston to vote on approval of the merger.

American Capital is a Houston-based investment management and marketing organization which provides investment advisory services to 34 mutual funds and closed-end investment companies.

#90289p5507 10/16/1990 ~PR Newswire

INDIANAPOLIS (OCT. 16) PR NEWSWIRE - Today at its regular meeting the board

of directors of INB Financial Corporation (NASDAQ: INBF) declared a quarterly cash dividend of 30 cents per share payable Dec. 21, 1990 to shareholders of record Dec. 7, 1990.

The corporation also announced today that its board of directors adopted a shareholder Rights Plan (the Plan) designed to enhance the ability of all the corporation's shareholders to realize the long-term value of their investment in the corporation and to permit the board of directors to play a role in the event of an unsolicited acquisition proposal. The Plan was adopted in response to the general development of takeover activity in the financial services industry and was not adopted because of any specific takeover proposal.

Thomas M. Miller, chairman of the board of the corporation, stated, "The adoption of the Plan is intended to assist the board of directors in continuing to play a role in shaping the corporation's future. The Plan should encourage those who might seek control of the corporation to deal with the board of directors prior to attempting a takeover, although it is not intended to prevent an acquisiton of the corporation on terms that are favorable and fair to the corporation, all of its shareholders and the other constituencies served by the corporation."

Pursuant to the Plan, the board of directors declared a dividend to shareholders of record on Oct. 31, 1990 of one Right for each of their shares. Initially the Rights, which will expire in ten years, will not be exercisable and will not be transferable apart from the common stock. The Rights will become exercisable only if a person or group acquires 20 percent or more of the corporation's common stock or the corporation's board of directors determines, pursuant to the terms of the Plan, that any person or group which has acquired 10 percent or more of the corporation's common stock is an "Adverse Person." Each Right would then enable the holder (other than the person triggering exercisability of the Rights) to purchase, at the Right's then-current exercise price, shares of the corporation's common stock having a value of twice the Right's exercise price. In addition, if after any person or group has become a 20 percent or more shareholder, the corporation is involved in a merger or other business combination transaction with another person in which its common stock is changed or converted, or sells 50 percent or more of its assets or earning power to another person, each Right will entitle its holder to purchase, at the Right's then-current exercise price, shares of common stock of such other person having a value of twice the Right's exercise price. The board of directors will be entitled to redeem the Rights at one cent per Right under certain circumstances specified in the Plan.

Further details of the Plan will be provided in a letter that will be mailed to all shareholders in the near future.

INB Financial Corporation is a multi-bank holding company based in Indianapolis. The corporation's bank affiliates provide a full range of

banking and trust services to individuals, businesses, other institutions and government agencies located primarily in Indiana and the central Midwest. Through its bank-related affiliates, the corporation also provides a diverse portfolio of financial services, including mortgage banking, insurance and brokerage services.

CHARLOTTE, NC (OCT. 16) PR NEWSWIRE - The board of directors of First Union Corporation today declared quarterly cash dividends for both its common stock (NYSE: FTU) and its series 1990 cumulative adjustable rate perpetual preferred stock (NYSE: FTUpr).

The common stock dividend of 27 cents per share is payable December 14 to stockholders of record as of November 30.

The dividend rate for the preferred stock for the quarter ending December 31, 1990, is 9.95 percent per annum, applied against $50 ($1.2438 per share), and is payable December 31 to shareholders of record as of December 14.

The preferred stock was issued in connection with the January 29, 1990 acquisition of Florida National Banks of Florida, Inc. by First Union.

As of September 30, 1990, First Union Corporation had assets of $39.1 billion and operated 763 banking offices in North Carolina, South Carolina, Georgia, and Florida, one in Tennessee and 277 nonbanking offices in 36 states.

INDIANAPOLIS (OCT. 16) PR NEWSWIRE - Merchants National Corporation (NASDAQ: MCHN) today announced earnings for the quarter and nine month period ending Sept. 30, 1990.

The corporation recorded a net loss of $9.1 million, or $.63 per share, compared to net income of $12.7 million, or $.87 per share in last year's third quarter. Earnings for the nine months through Sept. 30, 1990 were $5.1 million, or $.34 per share, compared to $38.0 million, or $2.59 per share recorded last year. On Sept. 18, 1990, the board of directors declared a $.30 fourth quarter dividend, payable Dec. 21, 1990 to shareholders of record Nov.

30, 1990.

"We look for earnings to be restored in the fourth quarter," stated Otto N. Frenzel III, chairman and chief executive officer. "The early announcement of the fourth quarter dividend reflects our confidence in Merchants underlying operating earnings and strong balance sheet."

As previously reported, third quarter 1990 results include a $35 million provision for losses due to continued deterioration in midwestern real estate markets. The allowance for credit losses totalled $78.5 million, or 2.16 percent of loans on Sept. 30, 1990, compared to $58.5 million, or 1.63 percent of loans on June 30, 1990 and $59.6 million or 1.81 percent of loans at Sept. 30, 1989.

Nonperforming assets totaled $119.3 million on Sept. 30, 1990 versus $95.8 million on June 30, 1990 and $54.4 million on Sept. 30, 1989. Nonperforming assets as a percentage of loans and other real estate owned were 3.29 percent on Sept. 30, 1990 and 2.68 percent on June 30, 1990. At Sept. 30, 1990, nonperforming real estate assets totaled $100.0 million. Reserves as a percentage of nonperforming loans were 109.1 percent on Sept. 30, 1990 and 81.7 percent on June 30, 1990. Accruing loans past due 90 days or more totalled $23.4 million on Sept. 30, 1990, which included $6.5 million of U.S. government guaranteed student loans. On June 30, 1990, accruing loans past due 90 days or more totaled $19.7 million, of which $5.7 million were U.S. government guaranteed student loans.

Total assets at Sept. 30, 1990 were $5.5 billion, compared to $5.3 billion at the same time last year, an increase of 5.6 percent. Net loans at Sept. 30 were $3.5 billion, up 9.5 percent from $3.2 billion a year ago. Deposits at quarter end were $4.1 billion, up 9.4 percent from $3.7 billion at the same time last year.

Merchants National Corporation, an Indiana multibank holding company headquartered in Indianapolis, is the second largest publicly held bank holding company based in the state. A network of 17 subsidiary banks with 138 banking locations serves the banking and financial needs of customers in Indiana and contiguous states. The corporation, through its subsidiaries, offers a broad range of commercial, retail and mortgage banking services, as well as trust and investment services. Additionally, under a contract with the U.S. Department of Defense, the corporation's lead bank, Merchants National Bank & Trust Company of Indianapolis, provides retail banking services to military personnel through 181 military banking facilities in Germany, the Netherlands, Greece, the United Kingdom, Iceland, Philippines, Diego Garcia and the Republic of Korea.

MIAMI (OCT. 16) PR NEWSWIRE - Eastern Airlines today said it will offer new fall weekend fares, ranging from $79 to $129 each way, for domestic travel from 13 Florida cities beginning Oct. 17.

The airline said its fares from Florida to all destinations east of the Mississippi, plus Texas, Kansas City and St. Louis will be $79 each way, based

on a round trip, and travel to points west of the Mississippi will be $129 each way. Tickets can be purchased at any time through Oct. 31 and travel must be completed by Dec. 18.

"Although fares throughout the industry are generally increasing, Eastern has been successful recently in generating more leisure travel by offering fares at great prices," said George Brennan, senior vice president-marketing.

The fall fares are available for travel from Miami, Fort Lauderdale, Daytona Beach, Fort Myers, Gainesville, Jacksonville, Melbourne, Orlando, Pensacola, Sarasota, Tallahassee, West Palm Beach, and Tampa. Travel from Florida must originate Wednesday through Saturday; return flights to Florida must be taken the following Sunday through Wednesday.

Eastern said its tickets are fully refundable, with no penalty for cancellations or change. The airline said the special fares are not available during the peak holiday travel days, Nov. 20, 21, 25, 26, 27.

NEWPORT NEWS, VA. (OCT. 16) PR NEWSWIRE - The Flight International Group, Inc. (NASDAQ: FLTI) announced today the Federal Aeronautics Administration (FAA) had certified the company's operation in Newport News, Va. as a Class I-IV instrument repair facility (FAA repair station BHKR451C).

The new Class I-IV instrument repair certification, which allows Flight International to perform repairs on all mechanical, electrical, gyroscopic and electronic aviation instruments, makes the Flight International facility one of the few such facilities on the East Coast and the only such facility servicing the Richmond FAA district.

Arthur Mann, executive vice president and chief operating officer of Flight International said, "The FAA certification reflects the first- rate technical skills of our staff and the state-of-the-art capabilities of our avionics labs...We are proud of winning this certification, and look forward to new opportunities to serve the aviation industry."

The Flight International Group, Inc. is a leader in aviation services with interests in government and military contracts as well as commercial flight operations.

ATLANTA (OCT. 16) PR NEWSWIRE - American Business Products Inc. (NYSE: ABP) today reported earnings were up for the third quarter and the first nine months of the year.

For the three months ended Sept. 30, sales increased to $95.0 million with net income of $3.2 million or $.44 per share of common stock compared with sales of $94.5 million and net income of $3.0 million or $.43 per share for the third quarter last year.

Sales for the nine months were flat at $290.2 million with net income of $10 million or $1.40 per share of common stock compared with sales of $290.5 million and net income of $9.5 million or $1.33 per share last year.

"These results reflect the concerted efforts of our people to achieve growth in the face of a continuing sluggish economic environment and softened industry-wide market conditions," said Thomas R. Carmody, president and chief executive officer. "We are continuing our program of cost reductions and expanded marketing in this difficult period."

During the third quarter ABP absorbed some costs associated with the acquisition of Jen-Coat Inc., a specialty extrusion coater based in Westfield, Mass. The transaction which will be accounted for as a purchase, was closed on Oct. 1. Jen-Coat's operations will be included in ABP's consolidated financial statement beginning with the fourth quarter.

Jen-Coat, with sales of $49 million for the fiscal year ended June 30, provides extrusion coating and laminating of papers, films and nonwoven fabrics for industrial flexible packaging used for such products as sugar, salt and pepper, sugar substitute packets, medical/pharmaceutical products and release liner papers for pressure sensitive products.

ABP in 1989 had its 51st consecutive year of record sales at $387 million. The company is a leading supplier of forms for computers and other electronic equipment; envelopes and specialty mailers; book printing, and other business supplies with 46 production facilities in the continental United States and Hawaii.

ABP's major operating companies, in addition to Jen-Coat, which is an independent unit, are Curtis 1000 Inc., Vanier Graphics Corp., BookCrafters USA Inc. and American Fibre-Velope Mfg. Co. A joint venture company, Curtis 1000 Europe GmbH, is based in Neuwied, Germany.

#90289p5525 10/16/1990 ~PR Newswire

BRENTWOOD, NY (OCT. 16) PR NEWSWIRE - Allou Health & Beauty Care, Inc. (AMEX: ALU), premier distributor of health and beauty aids on the Atlantic Seaboard, "expects to report sharply higher revenues for the second quarter and first half ended Sept. 30, 1990, in part reflecting the bulk of Christmas ordering, some of which would normally have occurred next quarter," David Shamilzadeh, chief financial officer, told a meeting of security analysts today. "We anticipate revenues for the second quarter will exceed $23 million compared to $17 million last year, and for the first half will be in excess of $43 million against $35 million in the first half last year. This is a result of increasing our customer base, vertical growth and rapidly expanding our nationwide sales of fragrances through our catalogs. The anticipated revenues for the second quarter and first half exceed our internal forecasts," Shamilzadeh said.

"Historically, our business has been recession-resistant, and these results reconfirm this, since we are operating at record levels despite declines in traditional retailing in Metropolitan New York City and the Northeast corridor where we are the dominant health and beauty distributor. In times such as these consumers of health and beauty aids seek better buys in nationally branded products, which is our precise market niche," Shamilzadeh added.

The company recently announced that it is expanding into distribution of non-perishable food items. "This is a large marketplace that permits us to use our existing base of 3,500 customers," Shamilzadeh stated.

The company's sales for the first quarter increased 11 percent to $19,988,855 from $17,947,256 in the same period last year. Earnings were $268,738, or $.10 per share on 2,580,000 shares outstanding, an increase of 14 percent over the $235,437, or $.09 per share earned on 2,580,000 shares restated for the effect of the public offering for the same quarter a year earlier.

The company has virtually no long term debt and its credit line was recently expanded to $25 million from $18 million, Shamilzadeh noted. "Our excellent balance sheet, expanded credit lines and record earnings allow us to finance this continuing growth," he said.

BEVERLY HILLS, CA (OCT. 16) PR NEWSWIRE - In a restructuring that has been spawned by the impending retirement of Twentieth Century Fox's Domestic Distribution Vice President, Southern Division Manager, Dick King, the appointment of Bert Livingston to King's post when it is vacated at the end of the year was announced today by Bruce Snyder, president, domestic distribution.

Livingston, who is currently vice president, Mid-Western Division manager, operating out of Fox's regional Chicago office, will be relocating to Dallas for the new position.

Livingston first joined Fox in 1982 and worked his way up the ranks at Fox, having held positions as the Detroit branch manager, the Jacksonville branch manager and the Dallas branch manager. Prior to working at Fox, Livingston worked for five years at Columbia Pictures, where he last held the position of Seattle branch manager.

With the appointment of Livingston, the Southern Division will be restructured to include the Kansas City/St. Louis branch in addition to the existing branches of Dallas, Oklahoma City, New Orleans/Memphis, Atlanta, Charlotte and Jacksonville. The Kansas City/St. Louis responsibilities will be transferred to the Southern Division from the Mid-Western Division.

Rejoining Fox as branch manager for the Kansas City/St. Louis branch will be distribution veteran Jerry Smith, reporting directly to Livingston.

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

ROCHESTER, NY (OCT. 16) PR NEWSWIRE - When a team of Xerox Corp. (NYSE: XRX) employees sought new ways to minimize solid wastes at the Plant Engineering and Maintenance unit of the Joseph C. Wilson Center for Technology in Webster, N.Y., they literally moved mountains. More specifically, mountains of trash.

The Xerox Central Waste Minimization team launched a movement which spread companywide and resulted in 6,500 tons of materials that, in 1989, were recycled instead of sent to a landfill.

The accomplishment is among the more than 200 team victories highlighted in Teamwork '90, an annual event held today simultaneously in Rochester, Dallas, and Los Angeles, and shared, via a closed-circuit television broadcast, with Xerox employees in more than 60 locations scattered across the country.

According to Richard Blum, central waste minimization team leader, the primary group goal is to set up recycling programs in all Xerox facilities throughout Monroe County, N.Y.

"We set up a team network to communicate our message," Blum said. "Core groups are set up in each facility, and these core groups relay the plan to every employee."

The results of team communication and cooperation are a proven success. "We have found a home for several high-quality waste streams," Blum said. "We burn them in a solid waste-to-energy power plant in place of fossil fuel."

Other programs that have materialized from team efforts include sorting, bailing and recycling of corrugated containers, and an office paper recycling program.

"Our program requires every Xerox employee to become a member of the team," said Blum. "And without the Xerox total commitment to teamwork, the programs would never fly."

This year, the Teamwork '90 closed-circuit television broadcast originates for the first time from three cities - Rochester, Dallas, and Los Angeles - and is viewed by Xerox people in more than 60 other locations. The day includes formal group sessions, as well as seminars and trade show-style booth displays.

HOUSTON (OCT. 16) PR NEWSWIRE - Continental Airlines today announced that it will begin service to a fifth continent, South America, as part of an expansion to three new Latin American destinations. The expansion stems from

Continental's Houston hub, which is an ideally situated gateway to the Latin America region.

On Dec. 19, Continental will inaugurate flights to Guayaquil, Ecuador, four times each week. The Boeing 727 flight will stop at Panama City, an existing Continental destination, in each direction. Ecuador service is subject to routine government approval.

On the same date, service will begin to Merida, Mexico, capital of the state of Yucatan. Operating daily, this route will give Continental its eighth Mexican destination. The Merida route will operated in conjunction with existing service to Belize City, Belize.

Also on Dec. 18, Continental will inaugurate daily service to Tegucigalpa, Honduras, following completion of runway improvements at the capital city's Toncontin Airport. This flight will stop at the existing destination of San Pedro Sula, Honduras, as it returns to Houston. Continental provides frequent service throughout North America and to Europe, Asia and Australia.

#90289p5540 10/16/1990 ~PR Newswire

DETROIT (OCT. 16) PR NEWSWIRE - Manufacturers National Corporation (NASDAQ-NMS: MNTL) announced third-quarter 1990 net income of $29.1 million, up 6.5 percent from the third-quarter 1989 results of $27.4 million. On a per-share basis, net income for the quarter was $1.91, or 6.1 percent higher than the $1.80 reported in the same period last year.

Third-quarter earnings were the highest of any quarter in the corporation's history, according to Chairman Gerald V. MacDonald. "This was achieved in spite of slowing economic conditions which weakened loan demand and slowed growth in certain non-interest categories," he said. "Also in the quarter, the federal banking regulators completed their annual examination of the corporation and its banks with no significant impact to the financial statements."

Net income for the first nine months of 1990 was $78.2 million, 1.0 percent below nine-month 1989 net income of $79.0 million. On a per-share basis, net income for the first nine months of 1990 was $5.15 compared to $5.20 in the first nine months of 1989, a 1.0-percent decline. Nine-month 1990 results remained behind the prior year due to lower first-quarter net income which included a $6.0 million provision for consolidation costs of the corporation's Illinois operations.

Net Interest Income Net interest income improved 11.2 percent in the third quarter of 1990, compared to the similar period in 1989. Excluding acquisitions affecting comparability, net interest income improved 7.5 percent due to a slight improvement in interest margins and moderate earning asset growth, principally from purchases of investment securities.

Non-interest Income Non-interest income increased 14.2 percent in the third quarter of 1990, compared to the comparable period in 1989. Excluding acquired companies that affect comparability, non-interest income would have increased 11.6 percent.

Third-quarter 1990 income from fiduciary activities and service charge income were up 11.0 percent and 8.2 percent, respectively, from the third quarter of 1989. Customhouse broker fees were up 18.5 percent from the third quarter of 1989; however, excluding acquired companies affecting comparability, the increase would have been 8.6 percent. Other non-interest income in 1990 increased 20.0 percent. The third quarter of 1990 benefited from a $2.4 million gain on the exchange of LDC debt; however, the third quarter of 1989 benefited from $1.3 million of interest received with a federal tax refund from 1981.

Non-interest Expenses Non-interest expenses increased 13.5 percent in the third quarter of 1990, compared to the third quarter of 1989. Excluding expenses of acquired companies affecting comparability, non-interest expenses would have increased 8.8 percent. Included in other non-interest expenses in the third quarter of 1990 was $2.2 million of interest in connection with

settling a federal tax examination relating to 1985 and 1986.

The provision for loan losses was $9.5 million in the third quarter of 1990, compared to $8.7 million in the third quarter of 1989.

The allowance for loan losses was $134.8 million, or 1.91 percent of total loans, at Sept. 30, 1990, compared to $120.0 million at Sept. 30, 1989, and $132.9 million at June 30, 1990. Net charge-offs for the three months ended Sept. 30, 1990, were $8.7 million, compared to $4.2 million in the comparable 1989 period.

Nonaccrual loans were $68.6 million at Sept. 30, 1990, compared to $62.8 million at Sept. 30, 1989, and $68.6 million at June 30, 1990. Reduced-rate loans, including $8.1 million of reduced-interest rate Mexican bonds received in exchange for Mexican loans, were $9.9 million at Sept. 30, 1990, compared to $118,000 at Sept. 30, 1989, and $11.2 million at June 30, 1990. Other real estate was $23.7 million at Sept. 30, 1990, compared to $23.7 million at Sept. 30, 1989, and $26.6 million at June 30, 1990. Non-performing assets were 1.45 percent of total loans at Sept. 30, 1990.

Manufacturers National Corporation is a bank holding company headquartered in Detroit. It operates four subsidiary banks in Michigan, including its principal bank subsidiary, Manufacturers National Bank of Detroit, and seven banks in the metropolitan Chicago area through Affiliated Banc Group, Inc. The corporation also operates other financial subsidiaries in Delaware, Florida and Illinois.

MONROEVILLE, PA. (OCT. 16) PR NEWSWIRE - Parkvale Financial Corp. (NASDAQ: PVSA) reported net income for the quarter ended Sept. 30, 1990, of $844,000 or 49 cents a share, up 19.9 percent compared to net income of $704,000 or 41 cents per share for the quarter ended Sept. 30, 1989.

The increase in net income was derived from operations and was due to an increased net interest margin. Net interest income for the quarter ended Sept. 30, 1990, increased to $4.3 million from $2.9 million for the quarter ended Sept. 30, 1989.

Parkvale Financial Corp., a unitary savings and loan holding company, is the parent company of Parkvale Savings Bank. The bank, which operates 23 offices in the Greater Pittsburgh area, had assets of $732 million at Sept. 30, 1990. Parkvale's capital was $34.7 million or $20.89 per share at Sept. 30, 1990, up from $32.7 million or $19.18 per share at Sept. 30, 1989.

KING OF PRUSSIA, PA. (OCT. 16) PR NEWSWIRE - Universal Health Services Inc. (NASDAQ: UHSIB) announced today that net income for the third quarter ended Sept. 30, 1990, was $1.4 million, an increase of $831,000 over the prior year's third quarter.

Earnings per share were $.12 in the third quarter of 1990 compared to $.05 in the third quarter of the prior year. Gross revenues for the quarter increased by 10 percent to $246.5 million and net revenues increased by 7 percent to $150 million.

Net income for the nine months ended Sept. 30, 1990, was $10.5 million, an increase of 31 percent over the prior year's first nine months. Earnings per share were $.76 in the first nine months of 1990 compared to $.55 in the first nine months of 1989. Gross revenues advanced 9 percent to $762.5 million and net revenues advanced 6 percent in the first nine months of 1990 to $468.2 million.

The strong improvements in earnings for the third quarter and the first nine months of 1990, as compared to the prior year periods result from the growth in revenues, effective expense control and decreased interest charges.

The company repurchased 577,000 shares of its Class B common stock during the first nine months of 1990.

Universal Health Services Inc. is a hospital management company which owns and operates 21 acute care and 13 psychiatric hospitals. It acts as the advisor to Universal Health Realty Income Trust a REIT (NYSE: UHT).

HARTFORD, CT (OCT. 16) PR NEWSWIRE - A study by Public Citizen, citing ITT Hartford Insurance Group as one of five property-casualty insurance companies that could be potentially at risk in a severe economic downturn, is "absolutely preposterous," said Donald R. Frahm, The Hartford's chairman, president and chief executive officer.

"The Hartford's management and board of directors are incensed at these preposterous accusations, and outraged that such unqualified individuals would attempt and promote such an examination," said Frahm.

"These charges are not only highly irresponsible, they are based on invalid methodology and aimed only at furthering Public Citizen's own legislative agenda," he said.

"Reputable and experienced rating organizations continue to evaluate The Hartford as one of the finest and most responsible organizations in the industry."

Frahm noted that The Hartford has an A+ rating from A.M. Best, an AAA rating from Standard & Poor's, and an AA2 rating from Moody's.

He also said his company has passed all financial tests administered by the National Association of Insurance Commissioners, and that the highly respected Connecticut Department of Insurance just gave The Hartford a superb report following an extensive nine-month financial review.

Additionally, The Hartford has the backing of its $20 billion (revenue) parent ITT Corp (NYSE: ITT).

"Public Citizen's self-serving study is especially questionable given the organization's new-found concern for the financial well-being of our industry " said Frahm. "Until recently, this same group criticized insurance companies for their excessive rates."

As for Public Citizen's tests themselves, Frahm said they are inappropriate and have no proven ability to predict financial vulnerability. For example,

the test regarding premium swings penalizes a company for the sound strategy of decreasing market share when rates are inadequate.

"As recognized by valid measures -- by the quality of its investment portfolio by superior ratings from independent professional agencies and by the support of its parent -- The Hartford, which has been in business 180 years, will remain one of the finest and most financially sound companies in the insurance industry," Frahm said.

#90289p5566 10/16/1990 ~PR Newswire

ATLANTA (OCT. 16) PR NEWSWIRE - C&S/Sovran Corp. (NYSE: CVN) today reported third quarter net income available to common stock of $30.2 million or $.23 per share.

For the nine months ended Sept. 30, net income available to common stock was $210.8 million or $1.59 per share.

The board of directors, at its first meeting following the Sept. 1 merger of The Citizens and Southern Corp. and Sovran Financial Corp., declared a quarterly dividend of $.39 per share, payable Dec. 15 to shareholders of record Nov. 28.

"The dividend confirms our belief in the earnings strength of this company and the opportunities we see before us," said Chairman and Chief Executive Officer Bennett A. Brown.

Third quarter earnings were reduced by approximately $90 million in nonrecurring charges, including: restructuring costs of $69 million; direct merger expenses of $10 million; and a valuation adjustment of $11 million related to a 1989 acquisition, Brown said.

"Substantially all of the restructuring costs result from the integration of the two companies and are tied to achieving benefits in future earnings," Brown said. "The payback from these actions is impressive -- we expect to improve 1991 pretax earnings by approximately $50 million, 1992 pretax earnings by approximately $90 million and substantial continuing benefits after 1992."

The integration costs include the consolidation of line and staff functions, the upgrading of systems and the consolidation of some 50 branch offices. The process will reduce the number of positions by approximately 1,200 across the seven-state region over the next 15 months, but Brown said the number of

employees affected will be substantially lower due to normal job turnover and attrition.

C&S/Sovran had $50.1 billion in assets at Sept. 30. Headquartered in Atlanta and Norfolk, C&S/Sovran has 1,015 banking offices and serves more than 5 million individual and business customers throughout its principal banking region -- Florida, Georgia, Maryland, South Carolina, Tennessee/Kentucky, Virginia and the District of Columbia. LOWELL, MASS. (OCT. 16) PR NEWSWIRE - Wang Laboratories (AMEX: WAN) announced today that James J. Hogan will join the company as senior vice president, effective Oct. 29, 1990. Hogan will also be president-personal computer systems and will be responsible for Wang's worldwide personal computer systems business, including design, manufacturing, marketing, sales, distribution and service. Hogan will report to Jospeh M. Tucci, executive vice president-operations.

Hogan was formerly vice president-Audio and Communications Division, Americas for Thomson Consumer Electronics--C.V. In that role, he had general management responsibility for RCA and GE audio and communications products.

"With 13 years of experience in the electronics industry, Jim Hogan has an outstanding record of success," stated Tucci. "He possesses a hands-on understanding of how to win in a highly competitive commodity market, and has led the businesses for which he was responsible to record sales, market share, and profitability."

Hogan began his career in 1964 with the General Electric Company in it Financial Management Program. After holding several positions in finance and financial analysis, he moved into marketing in 1975, and, in 1985, was named product general manager audio/video systems operations for General Electric's consumer electronics business. In 1988, he was named vice president-Audio and Communications Division, Americas for Thomson Consumer Electronics, when that company acquired the consumer electronic business from General Electric.

Hogan was graduated from Manhattan College with a bachelor of science degree in mathematics.

LAKE WORTH, FLA. (OCT. 16) PR NEWSWIRE - Cenvill Development Corp. (AMEX: CVL) announced today the appointment of Stuart Reich as president and chief executive officer. Reich will also join Cenvill's board of directors.

The company also announced the resignation of Richard Siemens as president and chief executive officer. Siemens will retain his interests in the Polo Club (including Polo Trace) and Gleneagles Joint Ventures. It is anticipated that Siemens will remain with Cenvill as a special advisor for certain of the company's other key projects.

Craig Dougherty and James Paul shall continue in their capacities as chief operating officer and chief financial officer, respectively.

Reich brings extensive experience in the home building industry to his new position. From 1980 to 1988 he served as president of Gulfstream Homes of South Florida, a major South Florida residential developer and builder. In 1988, Homes of South Florida, Inc., of which Reich is the chief executive officer, acquired Gulfstream's home building division. Reich will concurrently oversee the completion of Homes of South Florida's three remaining subdivisions in Plantation, Fla., with the assumption of his duties for Cenvill.

Martin Taplin, Cenvill's chairman, said that, "Richard Siemens' departure was on an amicable basis. The company looks forward to utilizing Stuart Reich's residential development experience, as well as his experience with major lenders in its contemplated dealings with Cenvill's lenders and its operations."

ROCHESTER, N.Y. (OCT. 16) PR NEWSWIRE - To some it was only a bothersome box, a cranky crate, a cantankerous container. But for a team of Xerox employees, it was a challenge that required an innovative solution.

"If our employees see a production problem, we'll find a way to make it work," says Ron Klawitter, team captain for the National Distribution Parts Planning team from Xerox Corporation's (NYSE: XRX) United States Marketing Group. That philosophy has helped Klawitter's team pull together to solve manufacturing predicaments of all shapes and sizes. The achievements of more than 200 such groups were shared and celebrated at Xerox Teamwork '90. The event, held simultaneously in Rochester, Dallas and Los Angeles, was seen via closed circuit television at more than 60 locations natiownide.

One of the distribution team's jobs is forming cartons to contain large copier parts. The team saw an opportunity to automate the process. Team members, which include maintenance and industrial staff, machine operators and parts distribution staff, modified an existing machine to fold the boxes.

"When we began using the new machine, we noticed an additional problem," explains Klawitter. "The pre-formed lines, or crimps, on the boxes were not designed to fold easily. So we worked with engineering to change the crimps into a fold that was much simpler and more effective."

With the mechanized means of forming boxes linked to the new design, two people were moved from the production line to another area. This increased productivity, and reduced the backlog for this particular parts product to zero.

"Our group is working on several projects right now," says Klawitter. "A real sense of accomplishment comes from knowing that what one group does can help all our customers by helping the whole company."

BOSTON, (OCT. 16) PR NEWSWIRE - Joseph L. Petrillo today was appointed president of Stone & Webster Environmental Services. This division of Boston-based Stone & Webster Engineering Corporation focuses corporate resources on the expansion environmental services market. Stone & Webster (NYSE: SW) has over 1,500 technical and engineering experts involved in environmental efforts.

Since joining Stone & Webster in 1968, Petrillo has served in several technical and managerial positions.

He is an expert in environmental issues associated with conventional and advanced energy technologies; refineries, petrochemical, and chemical complexes; pulp and paper mills; and municipal water and wastewater treatment facilities. Petrillo's assignments have also focused on environmental restoration programs at Department of Energy and defense facilities. Internationally, he has provided environmental consulting services to Stone & Webster clients in Canada, Egypt, Italy Mexico, New Zealand, Pakistan, the People's Republic of China, Taiwan and the United Kingdom.

Petrillo is a graduate of Tufts University where he earned his BS and MS degrees in chemical engineering. He is a registered professional engineer in Massachusetts, New York, Wisconsin, Colorado and Texas and has served as an expert witness before state regulatory agencies, public service commissions,

and the federal Environmental Protection Agency.

Petrillo resides with his wife and two children in Duxbury, Mass. Stone & Webster provides a wide range of environmental services to federal, state and municipal agencies; electric and gas utilities; and industrial and manufacturing companies. The company is currently applying its environmental expertise to the clean up of Boston Harbor, New York City's sludge management program, Tennessee Gas Pipeline Company projects to bring new supplies of natural gas to the Northeast, and execution of hazardous waste management projects from coast to coast. In addition to Boston, Stone & Webster has offices in Aiken, S.C.; Cherry Hill, N.J.; Chicago; Decatur, Ala.; Denver; Fort Lauderdale, Fla.; Houston; New York; Oak Ridge, Tenn.; Richland, Wash.; San Francisco, and Tampa, Fla.

ATLANTA (OCT. 16) PR NEWSWIRE - The Georgia Public Service Commission (PSC) approved today a plan proposed by Southern Bell that will provide incentives for businesses locating or expanding in rural Georgia.

The plan was proposed in May in response to concerns expressed by the state legislature, PSC, Georgia Municipal Association and the Association County Commissioners, for the need to develop ways to stimulate rural Georgia's economy.

The state legislature passed a bill during the 1989 session which created a Job Tax Credit Program that offers incentives for industry to locate or expand in Georgia's 40 most economically disadvantaged counties.

"In our effort to support economic development, we feel it is appropriate for Southern Bell to offer some major incentives to stimulate growth," said Ted Lawrence, Southern Bell's director-Economic Development. "The incentives we will provide offer considerable discounts on a variety of telecommunications services to new and expanding industries who choose to locate or expand in any of those disadvantaged counties."

Southern Bell's incentives will include: -- 100 percent waiver of all normal deposits; -- 100 percent waiver of service connection/installation charges; and -- 50 percent discount on monthly recurring charges for 12 months on all tariffed items, excluding Message Toll Service and WATS. To be eligible for these incentives, businesses must locate or expand in any of the counties served by Southern Bell that are on the list of 40 most economically disadvanted counties identified by the Georgia Department of Community Affairs in relation to the Job Tax Credit Act.

"We are pleased that the commission has approved our proposal," said Lawrence. "We are anxious to move forward and work with industry to stimulate economic growth in rural Georgia."

Other BellSouth subsidiaries plan to offer a similar package of incentives for non-regulated products and services to qualifying industries locating within any of Georgia's 159 counties. This package includes significant discounts on yellow pages advertising, a free mobile phone and usage and discounts on premises-based equipment and training. It also offers discounts on BellSouth's enhanced network services. Southern Bell's Economic Development Organization will individually design and offer this package to qualified businesses.

"These packages call upon the depth of resources available throughout our BellSouth companies to provide a total solution to each business's communications needs," added Lawrence. "We believe that these significant economic incentives will encourage the creation of new jobs and will stimulate the economies of a number of Georgia's most disadvantaged counties."

ATLANTA (OCT. 16) PR NEWSWIRE - The Department of Transportation yesterday awarded Delta Air Lines (NYSE: DAL) new authority for service between Los Angeles and Tokyo and between Portland and Nagoya.

"We are gratified that the Department of Transportation has granted Delta the authority to begin service on these two important new routes," said Al Kolakowski, Delta's vice president - sales. "We look forward to bringing Delta's traditional high standards of service and reliability to these new markets.

"The success of our Portland, Oregon, gateway to the Pacific basin, as well as the continued development of our Los Angeles hub, were important factors in Delta's receipt of this new international authority," added Kolakowski.

The new route to Nagoya, coupled with recently announced service from Los Angeles to Hong Kong beginning in May 1991, will bring to six the number of cities served by Delta in the Pacific. Tokyo, Seoul, Taipei and Bangkok already are served by Delta from the Portland, Ore., gateway.

Delta said it will begin immediately to finalize plans for operating these routes and will announce inaugural dates soon. Delta will operate the new MD-11 on the Los Angeles-Tokyo route and the international-range Lockheed L-1011 TriStar jets between Portland and Nagoya.

A major world airline, Delta operates more than 2,400 flights each day to 177 cities in 13 foreign countries.

NEEDHAM, MA (OCT. 16) PR NEWSWIRE - LoJack Corp. (NASDAQ: LOJN), President, C. Michael Daley reported today that LoJack is in the process of installing tracking devices in Chicago Police Department squad cars as part of the city's program to activate the LoJack Stolen Vehicle Recovery System.

The company also reported that consumer marketing executive, Frederick A. Dial had been named head of LoJack of Illinois, the company's distributor in the state.

At a press conference held in Chicago yesterday, Oct. 15, at which it was reported that activation would soon take place, Chicago police Superintendent LeRoy Martin said that the LoJack tracking devices would be installed in marked, "select" squad cars as well as other police vehicles including Gang Crimes, Auto Theft and vehicles used by the Chicago Airport Police Unit at O'Hare International Airport.

At the press conference it was reported that vehicle theft had risen 5 percent in the first nine months of 1990 in Chicago. Last year 45,898 vehicles were stolen in the city. Statistics indicate that approximately 4.2 million are stolen nationally. Superintendent Martin said that he was looking forward to using LoJack's technology to combat car thefts, citing their enormous negative economic impact.

LoJacks' new head of operations in Illinois, Dial, was most recently director of corporate consumer marketing for G.D. Searle Inc., a division of Monsanto Corp. Before that he was responsible for the marketing of Nutri Sweet, also owned by Monsanto Corp. Dial recieved a B.S. degree from Duke University and an M.B.A. degree from Columbia University. LoJack of Illinois' offices are located at 655 West Grand Ave., Elmhurst, Ill.

#90289p5586 10/16/1990 ~PR Newswire

LANDOVER, MD (OCT. 16) PR NEWSWIRE - Applied Research Corporation (PHLX: ARL, ARLX, ARL X, ARL.X) today released its results of operations for the first quarter ended Aug. 31, 1990.

The results are summarized below:

	3 Months Ended Aug. 31, 1990	3 Months Ended Aug. 31, 1989
Contract Revenue	$1,527,168	$1,791,988
Operating Income	25,584	128,337
Net Income (Loss)	(30,815)	39,463
Net Income (Loss) Per Common Share	$ (0.01)	$ 0.01

Managements focus during late 1990 and the first quarter of 1991 has been to fill contract vacancies for direct charging personnel and to identify and reduce indirect cost inefficiencies within the company. The positive impact of these actions was not fully realized during the first quarter of fiscal 1991 as the company was adversely affected by reduced direct labor and increased overhead costs as compared to the same period of the previous year.

Management anticipates an increase in the company's direct labor base during the second quarter as first quarter efforts to increase utilization of direct personnel take effect and several contract awards move into the start-up phase.

In addition, management has taken positive steps in the first quarter at reducing some of the fixed costs of doing business in the areas of rent, travel and insurance that should provide reduced operating costs in the third and fourth quarter of fiscal 1991. In addition, the company increased the use of a $350,000 line of credit activated during the quarter. The credit arrangement bears interest at prime plus 3 percent and will generate a substantial interest savings to be realized over the remainder of fiscal 1991.

Although the first quarter ended Aug. 31, 1990, represents a net loss of $30,815, the company has begun to feel some of the benefit of its recent efforts by maintaining a level of revenue for the quarter equivalent (on an annualized basis) to that of fiscal 1990, while incurring an annualized net loss of less than half of the loss sustained in fiscal 1990. The company feels that the combination of a stronger director labor base and reduced operating costs coupled with the more favorable credit arrangement will yield positive results in future quarters.

FIRST COMMERCIAL BANCSHARES INC. EARNS $1.89 MILLION IN THIRD QUARTER

JASPER, ALA. (OCT. 16) PR NEWSWIRE - First Commercial Bancshares (NASDAQ: FSCB) Inc. (Jasper, Ala.) today announced per share earnings of $0.50

(unaudited) for the third quarter of 1990, representing an increase of 11.1 percent over earnings per common and diluted common equivalent shares of $0.45 for the same period in 1989.

Earnings for the third quarter were $1.89 million compared to $1.72 million for the third quarter of 1989.

The company's total assets on Sept. 30, 1990 were $746 million as compared to $624 million on Sept. 30, 1989, representing an increase of 19.6 percent. Total stockholders' equity at Sept. 30, was $62.1 million, or $16.76 on a per share basis.

John T. Oliver Jr., chairman and chief executive officer of First Commercial stated that: "We are proud to be able to report such strong results for the quarter and for the year. Despite the bad news that has seemed to plague the banking industry throughout 1990, First Commercial should have a successful year, both in terms of earnings growth and asset growth."

First Commercial Bancshares Inc. and Citizens Independent Bancorp have executed a merger agreement under the terms of which the shareholders of Citizens Independent Bancorp will receive .9 shares of First Commercial common stock for each Citizens Independent Bancorp share they own. The transaction is subject to the receipt of all necessary regulatory approvals and approval by Citizens Independent Bancorp Shareholders. Citizens Independent is a one-bank holding company with total assets of $56.7 million as of Sept. 30.

First Commercial Bancshares Inc. has four banking subsidiaires: First National Bank of Jasper (Jasper), First Commercial Bank (Birmingham), The Bank of Tuscaloosa (Tuscaloosa), and Sterling Bank (Montgomery).

SAN FRANCISCO (OCT. 16) PR NEWSWIRE - Dr. Chang-Lin Tien, 55, chancellor of the University of California at Berkeley, has been elected to the board of Wells Fargo & Co. (NYSE: WFC), parent company of Wells Fargo Bank.

Tien was appointed earlier this year by the University of California Board of Regents as the seventh chancellor to head UC's Berkeley campus. An internationally recognized engineer, scientist, research scholar and award-winning teacher, Tien has spent 29 years of his academic career at UC Berkeley.

Carl E. Reichardt, chairman of the board of Wells Fargo & Co., said of Tien, "We are pleased to welcome Dr. Tien, whose presence continues Wells Fargo's long tradition of having talented people from the educational field on our board of directors."

Prior to his appointment as chancellor, Tien was executive vice chancellor at UC Irvine.

Tien's distinguished career of academic, professional and public service has brought him numerous honors, including election to the National Academy of Engineering and Berkeley's Distinguished Teaching Award.

In 1989, he was named "Most Distinguished Chinese Scholar" by the Society of Hong Kong Scholars, citing his eminence in the field as an educator and researcher and his concern for social affairs throughout the world, particularly in China.

Chosen by unanimous vote of UC's regents, Tien is the first Asian- American to head a major research university in the United States. His principal goals as chancellor, he has said, are to preserve and enhance the excellence of Berkeley's faculty and educational programs, to achieve diversity at all levels, to improve undergraduate education, and to strengthen many relationships (including one with the California business community and throughout the Pacific Rim).

Born in China, Tien studied at a private school in Shanghai and graduated in mechanical engineering from National Taiwan University in 1955. In 1956, he came to America, where he became a naturalized citizen. He earned a master's degree from the University of Louisville in 1957, then master's and Ph.D. degrees in 1959 from Princeton University.

Tien and his wife, Di-Hwa, have three grown children, a son and two daughters.

#90289p5591 10/16/1990 ~PR Newswire

GAITHERSBURG, MD (OCT. 16) PR NEWSWIRE - Life Technologies, Inc. (NASDAQ: LTEK) reported that net income for the third quarter ended Sept. 30, 1990 was $3.6 million, an increase of 11 percent over the same period last year. Third quarter earnings per share of $0.26 exceeded $0.24 per share for the quarter a year earlier.

Net sales for the quarter ended Sept. 30, 1990 were $38.2 million, an increase of $6.1 million, or 19 percent, over the same quarter last year. Higher unit sales of life science research and industrial products, other than fetal bovine serum (FBS), increased by $3.9 million, or 16 percent, when compared with the third quarter of 1989. Sales for Molecular Diagnostics products represented less than $1 million in the third quarter of 1990, or about the same as the quarter a year earlier. Changes in currency exchange rates benefited third quarter 1990 sales by $2.3 million, or 7 percent, when compared with the same quarter last year. Higher FBS unit sales in the third quarter 1990 of almost $1 million were offset by lower FBS unit selling prices. FBS accounted for 19 percent of net sales in the quarter ended Sept. 30, 1990 compared with 21 percent in the same quarter last year.

Gross margins as a percentage of sales were slightly lower than the third quarter of 1989, mostly as a result of product mix changes. Changes in FBS costs increased the LIFO reserve $0.5 million in the current year's third quarter compared with a $1.7 million reduction in the LIFO reserve in the same period last year. Marketing and administrative expenses increased 22 percent as LTI strengthened its organization. Investment in research and development programs increased $0.5 million, or 17 percent over the same period last year. The additional investment in research and development was directed towards the company's core life science research and industrial businesses.

Operating income was $4.7 million in the third quarter of 1990, a 7 percent increase over the same period last year. Investment income increased primarily because of higher levels of investable cash balances.

Life Technologies, Inc. develops, manufactures and supplies more than 2,000 products used principally in life science research, commercial manufacture of genetically engineered products and human diagnostics. The company believes it is a leading supplier of sera and other cell growth media, as well as enzymes and other biological products necessary for recombinant DNA procedures.

WOODBURY, NY (OCT. 16) PR NEWSWIRE - More than 50,000 illegal cable television and MMDS (wireless) descramblers/decoders were seized in Brooklyn and Long Island by Cablevision Systems Corporation (AMEX: CVC), the Long Island-based operator of cable television systems, the company announced today. This is the largest seizure to date of equipment capable of illegally receiving cable television signals, and it represents a potential $150 million loss to the cable industry according to National Cable Television Association estimates.

The seizure is the result of a 16-month investigation conducted by Cablevision in cooperation with the Federal Bureau of Investigation. Cablevision began civil proceedings in the U.S. District Court, Eastern District of New York, and was granted an order of civil seizure and an injunction directed at Can Muneyyirci (a/k/a Jon Neyir), Rita DeGirmenci, Stargaze Satellite Systems, Inc., Video-Link Enterprises, Inc., Atlantic Distributing Center, Inc. (doing business as AC/DC) and their affiliates.

The order prevents the defendants from, among other things, purchasing, selling, manufacturing and distributing devices capable of descrambling encrypted cable television transmissions. The seizure of the illegal descramblers/decoders began at two sites in Brooklyn and one in Syosset, N.Y., on Oct. 4, 1990; and due to the large quantities involved took four days to complete.

Robert J. Astarita, Cablevision's corporate director of security, stated, "Muneyyirci's operations included wholesale, retail and mail order sales of these devices throughout the U.S. via a network of companies which we believe were established to circumvent the law.

"Theft of cable service is estimated at well over $1 billion annually and our seizure is just the tip of the iceberg. This successful operation represents our commitment to protecting the cable industry and its programming suppliers, as well as legitimate cable TV subscribers."

"This is the most extensive civil seizure of cable piracy equipment ever," observed Jim Allen, director of the National Cable Television Association's Office of Cable Signal Theft. "Cablevision is the industry leader in combating theft of cable service. Their continued success reinforces the need for serious commitment, on the part of all multiple-system operators, to the anti-piracy effort."

Prior to the events of Oct. 4, the FBI arrested Muneyyirci on federal criminal charges on Aug. 23, 1990, and confiscated illegal equipment and extensive

records.

Cablevision Systems Corporation and affiliated systems serve more than 1.5 million subscribers, of which over 1.3 million subscribers are served by Cablevision Systems Corporation and an additional 200,000 are served by affiliated systems.

#90289p5606 10/16/1990 ~PR Newswire

NEWPORT NEWS, VA. (OCT. 16) PR NEWSWIRE - Noland Company (NASDAQ-NMS: NOLD) today reported net income of $762,000, or 20 cents per share, for the third quarter of 1990. This represents a 25.8 percent decline from the year-earlier earnings of $1,027,000, or 28 cents per share.

As previously reported, the wholesale distribution firm's third- quarter sales totaled $110,515,000, 4.8 percent less than third-quarter 1989's $116,107,000.

Chairman Lloyd U. Noland III said demand for the company's products and services weakened further in the third quarter, reflecting worsening conditions in the construction industry and a slowdown in factory production in many parts of the South. "Of our four product departments, only Air Conditioning/Refrigeration improved sales -- a 2 percent gain that was attributable to the reasonably strong demand for replacement air conditioning equipment during the hot summer months."

Noland said the company achieved a slight improvement in its gross margin of profit on sales, and was successful in keeping operating expenses nearly even with those of the year-earlier quarter. "Still, expenses were too high in relation to our lower sales volume, and that led to a 48.7 percent decline in operating profit compared to the year- earlier period."

"On the plus side," he added, "we continue to benefit from better management of our trading assets. Lower investments in account receivable and inventory, coupled with lower short-term interest rates, allowed a 20.5 percent reduction in interest expense for the quarter." Total borrowings as of Sept. 30 were $8.8 million less than the Sept. 30, 1989, level.

For the first nine months of 1990, net income totaled $3,193,000, or 86 cents per share, 4.2 percent less than the year-earlier period's $3,331,000, or 90 cents per share. Sales were down 3.7 percent from 1989's $342,548,000, at $330,025,000.

Noland said sales are likely to remain at relatively low levels in the fourth quarter, based on current economic projections and a 10 percent decline in the company's future delivery business bookings at the end of September, compared

to the year-earlier date. "Our challenge now is to aggressively strive for increased market penetration while building on our recent success in eliminating waste and excesses within the company."

Noland has 93 branches in 13 Southeastern states. The company distributes products in the plumbing, heating, electrical, air conditioning, refrigeration and industrial fields, as well as water well drilling equipment.

RALEIGH, NC (OCT. 16) PR NEWSWIRE - Microwave Laboratories, Inc. (MLI) (NASDAQ: MWAV) announced today that its T1073 Traveling Wave Tube has

completed all governmental required life and environmental qualification testing. The successful completion of qualification is still dependent, however, upon the approval by the U.S. Government of the First Article Test Report.

The government has up to 90 days to approve the First Article Test Report at which time the company would be awarded qualified vendor status for the T1073 Tube and would be entitled to begin production and shipment of the tubes at that time. The company currently has contracts totalling approximatley $9.3 million to manufacture the T1073 Traveling Wave Tube for sale to the Navy for its AN/ALQ-99 program. Although no assurances can be given, management believes the government will award them qualified vendor status for the T-1073 Tubes.

On September 10, 1990, the company announced that the government had approved the First Article Test Report for the T1062 Traveling Wave Tube and the company was entitled to begin production and shipments of the tube at that time. The company currently has a contract for approximately $4.4 million to manufacture the T1062 Traveling Wave Tube for sale to the Navy for its AN/ALQ-99 program. The company shipped its first lot of production T1062 Tubes in September.

The company is currently qualified to manufacture three (the T1056, T1059 and T1062 Tubes) of the five tubes used in the AN/ALQ-99 system. Although no assurance can be given, management believes the government will award the company qualified vendor status on the fourth AN/ALQ-99 Traveling Wave Tube; the T1073 Tube. The AN/ALQ-99 system is presently being used in the Persian Gulf to protect the U.S. Fleet.

ST. PAUL, MN (OCT. 16) PR NEWSWIRE - AmClyde Engineered Products, Inc. announced today that it has been awarded a contract in excess of $11 million by Shell Offshore Inc. to design and furnish high technology equipment for producing oil in record offshore ocean depths. The world's largest lateral mooring system, cranes and winches will be part of an over $1 billion Auger Project which includes a tension leg platform (TLP) Shell will operate in 2,860 foot water depths in the Gulf of Mexico. This will eclipse the previous record deepwater producing depth of 1,760 feet.

"We are proud to continue to be part of the developing deepwater production technology for which this project opens yet another frontier in the world's quest for petroleum," stated Wallace K. Fisk, Jr., president and chief executive officer of AmClyde. "Winning this highly sought after contract allows us to further demonstrate the design and building talents of our people " Fisk said.

Emphasizing the world's current energy crisis in the Middle East, Fisk stated that 35 percent of all new oil leases in the past five years in the Gulf are in water depths exceeding 2,000 feet.

AmClyde is the world's premier designer and builder of large specialty equipment for lifting, pulling, moving and mooring the heaviest loads in the offshore oil and gas market, for shipyards, for material handling and for U.S. government installations. AmClyde's work force of over 200 highly technical

and experienced people support its worldwide leadership position in the custom engineered crane and winch business. Since 1892, customers, with over 10,000 cranes and winches in their operating "fleets," are being served by AmClyde on a worldwide basis.

DENVER (OCT. 16) PR NEWSWIRE - Newmont Mining Corp. (NYSE: NEM) today was informed that Hanson PLC has entered into arrangements whereby it proposes to dispose of its 49.1 percent interest in Newmont to firms associated with Sir James M. Goldsmith, principally his General Oriental Investments Ltd.

Gordon R. Parker, chairman, president and chief executive officer of Newmont said that "if the transaction occurs, we would look forward to as constructive a relationship with our new shareholder as we have had with Hanson," adding that Newmont assumed that the customary pre-conditions to completion of the arrangements between the two parties could be met.

Parker noted that under the terms of the stockholding agreement between Newmont and the affiliates of Hanson which hold the 49.1 percent Newmont stake Newmont--or an assignee of Newmont's--has a 60 day right of first refusal in which to match the $1.111 billion cash portion of the proposed transaction. The right thus relates to 42 percent of Newmont's shares.

Newmont Mining recently concluded a successful restructuring program which has transformed it into a pure gold company with a sound financial basis and bright prospects for the future. Newmont Mining owns 90.1 percent of Newmont Gold Co., the largest producer in North America with the largest announced proven and probable gold reserves on the continent.

CLEVELAND (OCT. 16) PR NEWSWIRE - Bearings, Inc. (NYSE: BER) today reported lower net income for the quarter ended Sept. 30, 1990.

Chairman of the Board and Chief Executive Officer George L. LaMore reported that net income was $1,068,000 or $.15 per share, on sales of $206,013,000 for the quarter ended Sept. 30, 1990. Net income in the same quarter last year was $4,163,000 or $.57 per share on sales of $156,585,000.

LaMore commented, "As expected, our operations were adversely affected during the quarter by a number of factors relating to the acquisition of King Bearing Inc. on June 29, 1990, as well as the recent slowdown in the industrial economy. Our sales increased by 32 percent principally from the acquisition of King. We are currently in the process of restructuring, combining many Bearings, Inc. locations with those of King in the West, Northwest and Southwestern United States. We expect this process to be substantially completed by the end of the March 1991 quarter."

LaMore added, "During the quarter, the company reduced its outstanding short-term borrowing by over $20 million. The company's goal is to achieve further reductions from asset management during the remainder of the fiscal year."

On Oct. 16, 1990, the board of directors declared a regular quarterly dividend of $.16 per share, payable Nov. 30, to shareholders of record Nov. 15, 1990. The board also increased the company's authorization to acquire additional shares of its common stock from 252,000 shares to 350,000 shares in open market and negotiated transactions, from time-to-time, depending on market conditions.

Bearings, Inc. is the nation's leading independent distributor of bearings and power transmission components with over 340 branches in 37 states.

REDWOOD CITY, CALIF. (OCT. 16) PR NEWSWIRE - VeriFone Inc. (NASDAQ: VFIC), a leading supplier of Transaction Automation systems worldwide, today reported its results for the quarter ended Sept. 28, 1990.

Revenues for the quarter totaled $39.7 million, an increase of 14 percent over revenues of $34.8 million during the like period in 1989. Net income was $2.36 million, down 10 percent from earnigns of $2.61 million during the year-earlier period. Earnings per share for the quarter were $.10, compared to $.13 per share earned in the 1989 quarter. This reflects lower net income and an 11 percent increase in shares outstanding that followed the company's initial public offering in March 1990.

VeriFone's revenues for the first nine months of 1990 were $113.9 million, an increase of 31 percent over revenues of $87.0 million for the like period of 1989. Net income totaled $8.6 million, an increase of 15 percent over the $7.5 million earned in the 1989 period. Earnings per share for the three quarters in 1990 were $.39, compared to $.38 in the 1989 period, while average shares outstanding increased 11 percent.

"During the quarter, we continued to expand the boundaries of Transaction Automation with the introduction of three new value-added communications products," said Hatim Tyabji, president and chief executive officer of VeriFone. "These include the TRANZceiver wireless local area network (LAN) unit, the OMNI 330 synchronous/asynchronous transaction system, and the VeriCast data broadcasting option for fast, low-cost credit authorization. In addition, we formed a strategic marketing alliance with International Verifact Inc. (IVI) of Toronto which makes IVI the exclusive distributor of VeriFone products in Canada and gives VeriFone worldwide distribution rights to IVI banking automation and data security products outside Canada."

VeriFone Inc., based in Redwood City, is a leading supplier of Transaction Automation systems used to deliver payment processing and other financial services to the retail and petroleum industries worldwide. In addition, VeriFone is developing new market segments for Transaction Automation, such as fast food, health care and government. The company has 30 offices located throughout North America and in London; Paris; Madrid; The Hague; Sydney; Taipei; Singapore and Bangalore, India. VeriFone has shipped more than 1.6 million Transaction Automation systems to date.

OLDSMAR, Fla. (OCT. 16) PR NEWSWIRE - International Systems and Technology, Inc. (INSAT) (NASDAQ: INWN, INWNU) today reported the establishment of a new division with the sole purpose of developing a recently acquired patented technology and the worldwide marketing of that technology.

The new division, incorporated as Thermal Transfer Technology, will be headed by Donald Harrison, a nationally known and recognized heat transfer engineer. Harrison was a key member of the New York Power Authority team which developed the technology which resulted in the issuance of the patent. The new technology, specially designed for nuclear reactor cooling systems, is easily adaptable for service to the petroleum industry refinery operation, chemical plants, fertilizer plant operations, and pipelines. In addition, the new division has expertise in a full spectrum of heat treating application, which may cover a large span of industrial uses.

An agreement has been negotiated with the patent holders assigning worldwide exclusive rights to develop and market the technology. Patent holders are Thomas Butler and David Sancic, employees of the New York Power Authority. The full rights agreement between the patent holders and INSAT was signed Oct. 4, 1990. The INSAT chief engineer and Thermal Transfer Technology Division president stated his division has already received requests for bids on three separate situations involving heat treating and heat transfer applications.

#90289p5638 10/16/1990 ~PR Newswire

DECATUR, GA. (OCT. 16) PR NEWSWIRE - DFSoutheastern Inc. (NASDAQ: DFSE), the Decatur, Ga.-based holding company for Decatur Federal Savings and Loan Association, today announced the results of operations for the third quarter ended Sept. 30, as well as declared a dividend in the amount of five (5) cents per share for shareholders of record as of Oct. 31.

The dividend will be paid on Nov. 9. Net earnings for the third quarter were $549,000, or 12 cents per share, decreasing from $3,331,000, or 72 cents per share, for the same period last year. Operating earnings, which are net earnings other than gains or losses on sale or valuation of assets, decreased by 38 cents per share to $693,000, or 15 cents per share, for the third quarter of 1990, from $2,472,000, or 53 cents per share, during the same period in 1989.

Net interest income after provision for possible loan losses for the third quarter of 1990 was $13,218,000, compared to $12,020,000 for the same quarter last year, a 10 percent increase. The net interest margin for the three months ended Sept. 30 was 2.72 percent compared to 2.22 percent for the same period last year. Operating earnings per share were three cents higher than net earnings per share as a result of a valuation reserve of $1.4 million on real estate held for investment, which is included in other operating expenses.

For the first nine months of 1990, net earnings were $6,814,000, or $1.47 per share, compared to $8,460,000, or $1.82 per share for the same period in 1989. Operating earnings for the current nine month period were $6,529,000, or $1.41 per share, compared to $6,131,000, or $1.32 per share in 1989. The net interest margin for the nine months ended Sept. 30 was 2.73 percent compared

to 2.24 percent for the same period in 1989.

During the third quarter of 1990, the company's management continued its systematic increases to the reserves for possible loan losses as a prudent and conservative measure for dealing with uncertain real estate markets. As a result, the reserve increased by $1.8 million to $7.4 million from $5.6 million as of the close of the quarter ended Sept. 30. Nonperforming assets increased $13.3 million to $71.4 million as a result of loans to one borrower becoming 90 days past due.

According to Robert C. McMahan, chairman of the board and chief executive officer: "While maintaining our conservative approach to building our reserves, we have adopted an aggressive posture in dealing with our nonperforming assets. These aggressive measures include developing innovative methods of selling our real estate owned, restructuring certain loans and adhering to more stringent underwriting standards on new residential construction loans. During the third quarter, net charge offs to average loans outstanding were low at just two basis points. We are sensitive to possible increases in nonperforming assets during the coming quarter and are making plans with continued systematic additions to the reserves for possible loan losses."

At Sept. 30, DFSoutheastern Inc. (DFSE) had consolidated assets of $2.5 billion and deposits of $1.8 billion. Decatur Federal Savings and Loan Association, the wholly owned subsidiary of DFSoutheastern Inc., has 29 branch offices and five Mortgage Loan Offices serving metropolitan Atlanta and north Georgia. Fairfield Mortgage Services Inc., a wholly owned mortgage subsidiary of Decatur Federal, operates 15 mortgage loan offices in Georgia, Tennessee, North Carolina, South Carolina, Alabama and north Florida. DFSoutheastern's common stock is traded in the NASDAQ Over-the-Counter Securities Exchange under the symbol "DFSE."

#90289p5670 10/16/1990 ~PR Newswire

NEW YORK, (OCT. 16) PR NEWSWIRE - CrossLand Savings FSB (NYSE: CRL) today reported a net loss of $75.4 million for the quarter ended Sept. 30, 1990, compared with a net loss of $175.5 million for the quarter ended Sept. 30, 1989. Net losses for the nine months ended Sept. 30, 1990, were $251.8

million compared with net losses of $160.0 million for the nine months ended Sept. 30, 1989.

Contributing to the 1990 third quarter net loss were the following charges aggregating $80.8 million:

-- $57.9 million provision for possible loan losses, -- $16.7 million for writedowns of certain real estate assets to estimated net realizable value,

-- $6.2 million in charges resulting from the planned discontinuation of certain branch operations outside of New York State and net expenses from the restructuring of certain funding arrangements and interest rate swaps so as to reduce CrossLand's interest rate risk.

Net interest income before provisions for possible loan losses was $24.4 million for the third quarter ended Sept. 30, 1990, compared with $35.6 million in the 1989 third quarter. For the nine months ended Sept. 30, 1990, net interest income totalled $91.5 million (before provisions for possible loan losses of $158.9 million) compared with $170.2 million (before provisions for possible loan losses of $43.4 million) for the nine months ended Sept. 30, 1989.

The decreases in net interest income are primarily attributable to two factors. First, the reduction of CrossLand's interest-earning assets, primarily mortgage-backed securities, to improve its regulatory capital ratios that are required under the Financial Institutions Recovery, Reform and Enforcement Act (FIRREA), and second, the effects of the continued increases in loans 90 days or more past due and investments in real estate.

CrossLand's investments in real estate (which include acquisition, development and construction (ADC) arrangements, joint ventures and real estate owned (REO) through foreclosure, including deed-in-lieu of foreclosure and in-substance foreclosure) totalled $862.4 million at Sept. 30, 1990, compared with $475.7 million at Sept. 30, 1989. CrossLand's loans 90 days or more past due and REO increased to $320.8 million and $231.8 million, respectively, at Sept. 30, 1990 from $312.5 million and $163.4 million, respectively, at June 30, 1990. For the most part, the increases in loans 90 days past due and REO have resulted from the continued deterioration of the New York City metropolitan area real estate markets.

Loan originations for the three-month and nine-month periods ended Sept. 30, 1990, were $419.5 million and $1.5 billion, respectively, compared with $663 million and $2.2 billion, respectively, for the comparable 1989 periods.

Stockholders' equity totalled $395.0 million at Sept. 30, 1990 (or 3.4 percent of total assets) compared with $678.6 million (or 4.5 percent of total assets) at Sept. 30, 1989.

Total assets were $11.7 billion at Sept. 30, 1990, compared with $14.9 billion at Sept. 30, 1989. Deposits were $8.0 billion at Sept. 30, 1990, compared with $9.2 billion at the end of the 1989 third quarter. The decrease in deposits is primarily attributable to a $1.1 billion decrease in brokered deposits, which totalled $27.1 million at Sept. 30, 1990.

CrossLand's interest rate sensitivity, as measured by the one year gap, was estimated at -19 percent at Sept. 30, 1990, down from -22.6 percent at June 30 1990. At Sept. 30, 1990 its non-investment grade securities when acquired (high yield) portfolio was $15.7 million, down from $452.9 million at Sept. 30 1989.

Other operating income was $16.0 million for the quarter ended Sept. 30, 1990, compared with $17.5 million for the comparable 1989 period. Gain on sales of securities and loans was $7.0 million, resulting primarily from the sale of mortgage-backed securities during the 1990 third quarter. Other operating expenses were $53.3 million in the 1990 third quarter, down from $56.3 million in the 1989 third quarter. For the nine months ended Sept. 30, 1990, other operating expenses were $165.3 million, down from $166.9 million for the nine months ended Sept. 30, 1989.

CrossLand's previously announced strategy to downsize and divest itself of certain operations has resulted in a 1990 reduction of over 650 employees, or 19 percent of its staff, to 2,850 employees at Sept. 30, 1990.

Established in 1860 and based in New York City, CrossLand Savings is among the largest savings institutions in the United States serving over one million customers through over 100 retail banking offices in seven states.

LAFAYETTE, LA. (OCT. 16) PR NEWSWIRE - Offshore Logisitcs Inc. (NASDAQ: OLOG) has agreed to sell the company's marine assets to Gulf Applied Technologies Inc. of Houston.

This sale should be completed within 30 days.

The marine assets of Offshore Logistics produced revenues of $8.5 million in the fiscal year ended June 30, 1990 and include 12 vessels operating in the North Sea, Brazil and Southeast Asia.

The disposal of these marine assets represents another step in the company's shift of its business focus to aviation related activities in the oil service industry. OLOG has been reducing its commitment to marine related activities over the past several years.

Offshore Logistics Inc., through its subsidiary Air Logistics, is the second largest supplier of helicopters to the Gulf of Mexico exploration, production and offshore construction activities. Air Logistics which currently operates 145 aircraft, has taken delivery of eight new helicopters since June 30, 1990, and will add an additional 26 aircraft in fiscal 1991 and 1992.

PASADENA, CA. (OCT. 16) PR NEWSWIRE - Avery International Corp. (NYSE, PSE: AVY) and Dennison Manufacturing Co. (NYSE: DSN) announced today that they have completed the merger of the two companies. The combined company is now known as Avery Dennison Corp. (NYSE, PSE: AVY).

The merger was completed following the conclusion by the United States Department of Justice of its review of the transaction under the federal anti-trust laws. There was no requirement that either company divest any of its operations or assets.

The board of directors of Avery and Dennison agreed to the merger on May 24, 1990, and the merger was approved by the shareholders of each company on Sept. 11, 1990.

The completion of the merger agreement resulted in the exchange of 1.12 shares of Avery common stock for each share of Dennison common stock in a tax-free

transaction.

In addition, Avery's board of directors has approved changing Avery's fiscal year to coincide with the calendar year. Avery Dennison's fiscal year end will be Dec. 31.

"We are pleased that we can now begin aggressively to identify and implement the opportunities for cost savings and market alignment," said Charles D. Miller, chairman and chief executive officer of Avery Dennison. "Efficiency studies are underway and we have begun the structural and operational changes that should result in significant added value for our new company.

"As we have said from the outset, in addition to our worldwide pressure-sensitive materials business, Avery Dennison will have a strong, worldwide presence in office supplies, industrial systems and packaging and labeling. We are enhancing our ability to compete against other global companies. We look forward to the future with confidence."

Avery, headquartered in Pasadena, is a leading worldwide Fortune 300 manufacturer of self-adhesive base materials, labels, tapes, office products and specialty chemicals.

Dennison, based in Framingham, Mass., is a diversified Fortune 500 manufacturer serving worldwide markets for stationery and office products, systems for identification and control and package decoration systems.

NEW YORK (OCT. 16) PR NEWSWIRE - Thomson Advisory Group L.P. (NYSE: TAG) today announced earnings for the three months ended Sept. 30, 1990, of $3.6 million or $.36 per unit. Revenues for this period were $9.2 million. This compares with 1989 third quarter earnings of $3.8 million or $.38 per unit on revenues of $8.8 million.

For the nine months ended Sept. 30, 1990, earnings were $10.9 million on revenues of $27.0 million. For the same period in 1989 earnings were $10.9 million on revenues of $25.4 million.

Thomson Advisory Group L.P. also declared a third quarter distribution of $.32 per unit. The record date for this distribution will be Nov. 1, 1990, with the ex-dividend date being Oct. 26, 1990. Payment date will be Nov. 9, 1990.

Thomson Advisory Group L.P. also announced today that the U.S. Bankruptcy Court approved the previously announced proposed acquisition by Thomson Advisory Group Inc. of Thomson McKinnon's general partnership interest in Thomson Advisory Group L.P. and its interest in its affiliated distributor. A closing by month-end is anticipated. Manufacturers Life Insurance Company of Toronto, Canada withdrew its competing bid which had been submitted in late September.

Thomson Advisory Group L.P. manages a group of Thomson mutual funds, and serves as an advisor to private accounts through its Columbus Circle Investors and Foxhall Investment Management divisions. As of Sept. 30, 1990, Thomson Advisory Group L.P. managed over $6.5 billion in assets.

#90289p5690 10/16/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (OCT. 16) PR NEWSWIRE - La Teko Resources Ltd. is pleased to announce the results, that are available, of the 1990 Exploration work at the Ryan Lode and to update shareholders on other aspects of the companies' activities.

Ryan Lode Mine, Fairbanks, Alaska Exploration

1990 Exploration can be broken into two distinct programs. Firstly, exploration on the Main Ryan Shear for heap-leach ore. And secondly, the 3-stage program primarily concerned with the underground potential which will culminate in a series of 2,000-foot probes looking for intrusive contacts with the shear zone.

Main Ryan Shear - Heap Leaching Reserves

We have 3 active pits in the Main Ryan Shear. The North Pit, Hilltop Pit, and the South Pit. Since 1987 we have extracted 320,000 tons of ore that has averaged .11 ounces of gold per ton of ore (opt Au). We expect to mine to a depth of 200 feet from the original surface. Exploration to determine reserves to this depth has not been completed but this year's work indicates we should not have difficulty in maintaining a grade of .10 opt Au on heaps in the future. In addition, we are not mining in and have not yet explored the full length of the shear. In the past we have estimated 1,200,000 tons of

ore. So far in 1990, approximately 3,500 feet of trenching has been completed across the shear. 45 Vertical holes spotted at 50-foot intervals along the strike have been drilled through the shear at varying lengths to 120 feet. The following are some of the holes. The North Pit is in the area where most of the underground exploration in the past were carried out. The best grades in the shear zone are encountered here and it is here that Hole LN-2 returned a spectacular 4.256 opt Au over 60 feet. Also in this area it is reported 1,460 tons was mined underground running .43 opt Au and a trench in our last lift mined, ran 120' of .20 opt Au. The signficance of Hole LN-2 and the other information in the area remains to be determined but the presence of a high grade ore shoot is indicated.

Underground Exploration and Additional Open Pit Reserves
This consisted of a 3-stage program. The first 2 stages were near surface exploration of the intrusive that was found in the fall of 1989 to the southeast of the Main Ryan Shear. Work consisted of 15,000 feet of VLH-EM survey, 2,900 feet of trenching and 15 reverse circulation holes. As reported earlier, the intrusive is more massive and closer to the surface than expected and mineralized.

The third stage of the underground program was to drill a series of deep holes 1,000, 1,500 and 2,000 feet deep stepping back from the 65 degree dipping shear, to follow the Main Ryan Shear zone down to it's hoped-for contact with the intrusives. This is the first deep probe ever done at the Ryan Lode. The first three 1,000 foot holes are completed.

#90289p5694 10/16/1990 ~PR Newswire
SACRAMENTO, CA (OCT. 16) PR NEWSWIRE - Ironstone Group Inc. (NASDAQ: IRON) today announced that the Texas Supreme Court has ruled in favor of its affiliate, American National Petroleum Co. (NASDAQ: ANPC) on its appeal from a lower court ruling in suit against Transcontinental Gas Pipe Line Corp. (Transco). ANPC is also announced that it has agreed to settle a securities lawsuit, which had been pending against the ANPC since 1985.

In 1986, ANPC filed suit against Transco, alleging that Transco has breached contracts to take certain volumes of gas and it tortiously interfered with other contractual relations with the ANPC. After a trial in 1987, ANPC received a judgment against Transco for approximately $4.7 million in actual damages, $16 million in exm?plary damages and $1 million in attorney's fees. In 1988, the Court of Appeals substantially reduced the actual damages award, deleted the exemplary damages award entirely, and remanded the amount of attorney's fees to the lower court for rehearing. The Texas Supreme Court reversed the Court of Appeals by finding that the procedures for the tortious

interference were sufficient and that there was evidence at the trial that would have supported the court's finding of damages for tortious interference. ANPC is at this time unable to determine the amount that may ultimately be recovered. ANPC, however, believes that the Texas Supreme Court's ruling may provide the basis to reinstate all or a portion of the $16 million award for exemplary damages.

The ANPC securities lawsuit stems from a 1985 action where the plaintiffs sued ANPC and other persons alleging misrepresentations in the sale of partnership interests in three oil and gas limited partnerships. The settlement, which is subject to court approval, provides for the purchasers of the limited partnership interests to be certified as a class and for the company to pay $500,000 in cash to the class members. The company will contribute to a new partnership, proved development and proved undeveloped oil and gas properties which an independent petroleum engineering firm has estimated to have future net revenues, discounted at 10 percent using escalated pricing, of $1,008,271. ANPC will take a $1,225,000 charge relating to the settlement in its third quarter earnings. The settlement, however, will not be finalized until early 1991.

Ironstone Group Inc., through its majority-owned subsidiaries, Iron- Oak Supply Corp., Tyler-Dawson Supply Division and American National Petroleum Co. is engaged in wholesale distribution of plumbing and mechanical supplies and equipment; pipe, valves and fittings, for the energy services business and in oil and gas exploration and production. Its common stock is traded on the NASDAQ National Market System under the symbol IRON.

#90289p5695 10/16/1990 ~PR Newswire

CHICAGO (OCT. 16) PR NEWSWIRE - Illinois Central Corporation (NASDAQ: ICRR) and its wholly-owned operating company, Illinois Central Railroad Company, today announced improved earnings for the third quarter ended Sept. 30.

Operating income for the third quarter was $29.2 million compared to $25.4 million a year ago, and net income was $8.9 million compared to a net loss of $1.0 million in 1989. Income after preferred dividends was $8.3 million ($.37 per share) versus a loss of $3.4 million ($.18 per share) in 1989.

Revenues of $130.3 million were 3.6 percent greater than last year's. Gross freight revenue increased $4.1 million in the third quarter. A shift to higher revenue commodities, particularly chemicals (up 1.2 percent), offset the decline in grain and coal traffic (down 4.1 percent) from 1989 levels. The seasonal decline in revenue from the second quarter was 5.9 percent, compared to 6.3 percent in 1989.

For the nine months ended Sept. 30, operating income was $101.9 million in 1990 and $53.9 million in 1989. Net income was $33.8 million ($1.43 per share) compared to $1.7 million last year. Revenues for the first nine months were $416.2 million, an increase of 2.2 percent from 1989's $407.2 million.

Earnings per share are based on the weighted average of common shares and common share equivalents outstanding during the period. Prior to July 27, the calculations give effect to preferred dividend requirements.

As of Oct. 1, the company had repaid $83 million of the debt incurred when the Illinois Central Railroad was acquired by the Prospect Group, Inc. The repayments reduced interest expense in the quarter to $18.1 million, compared to $27.5 million in the third period a year ago. Proceeds from the sale of non-operating properties and surplus rolling stock and cash from operations were used to make these debt repayments.

On July 27 the company exchanged all outstanding shares of preferred stock and accrued dividends thereon for 4.9 million shares of common stock, and on Aug. 21 the company's common stock began trading independently on the NASDAQ National market System under the symbol ICRR. At Sept. 30, Shearson Lehman Brothers held 28 percent and company management held 7 percent of the 23,744,117 shares outstanding.

Illinois Central Corporation's operating subsidiary operates a 2,900 freight railroad between the Great Lakes and the Gulf of Mexico.

#90289p5706 10/16/1990 ~PR Newswire

NORWOOD, MA (OCT. 16) PR NEWSWIRE - Microcom, Inc. (NASDAQ: MNPI) today reported financial results for the company's second quarter of fiscal year 1991.

For the three months ended Sept. 30, 1990, revenues were $13,706,000 as compared to $17,768,000 for the second quarter of last year. Operating loss for the period was $6,337,000 vs. operating income of $3,727,000 in the comparable period one year ago. Net loss per share was 43 cents for the period, compared to net income per share of 30 cents for the second quarter of last year.

The operating loss for the three months ended Sept. 30, 1990 included a one time restructuring charge of approximately $2.5 million. This restructuring charge reflects costs attributable to the company's planned reduction of its worldwide workforce by approximately 15-20 percent and the consolidation and reorganization of the sales/marketing, general and administrative, research and development and manufacturing activities of the company.

Microcom, Inc., is a workstation connectivity company headquartered in Norwood Mass., with offices in Danbury, Conn.; Wilmington, Del.; Durham, N.C.; Caguas Puerto Rico, and international offices in France, Hong Kong, and the U.K. Principal product lines include Protocol Modems(tm); LAN bridging products; Carbon Copy(tm), RELAY Gold(R) and Virex(R) software packages; and ISDN products.

MILPITAS, Calif. (OCT. 16) PR NEWSWIRE - Linear Technology Corp. (NASDAQ: LLTC), a leading, independent manufacturer of high-performance linear integrated circuits, today announced that net sales for its first quarter ended Sept. 30, 1990, were a record $21,140,000, an increase of 19 percent over net sales of $17,811,000 for the first quarter of the previous year. The company also reported record net income for the quarter of $3,627,000 or $0.21 per share, an increase of 47 percent over $2,459,000 or $0.15 per share reported for the first quarter of last year.

According to Robert H. Swanson, president and CEO, "Despite the cautious external business environment, Linear Technology Corporation grew its business

and its profits. Our operating profit reached a record 23 percent of net sales. In this uncertain economy we will continue emphasizing both consistent financial performance and aggressive new product introductions and positioning.

Linear Technology Corporation was founded in 1981 as a manufacturer of high performance linear integrated circuits. Linear Technology products include operational, instrumentation and audio amplifiers; voltage regulators, references, comparators and converters; switched- capacitor filters; communications interface circuits; one-chip data acquisition systems; pulse-width modulators and sample-and-hold devices. Applications for Linear Technology's high performance circuits include lap top and desk top computers, computer peripherals, cellular telephones, electronic testers, industrial and medical electronic instruments, automotive controls, process controls, factory automation products, and avionics.

#90289p5713 10/16/1990 ~PR Newswire

WASHINGTON (OCT. 16) PR NEWSWIRE - The Student Loan Marketing Association (Sallie Mae) (NYSE: SLM) today issued the following statement in response to news reports about allegations by disgruntled former employees of its Loan Servicing Center/Kansas.

The allegations of two former employees about improprieties at Sallie Mae's Loan Servicing Center/Kansas are totally without merit.

The plaintiffs are disgruntled former employees who initially sought a large cash settlement from Sallie Mae in exchange for not filing a RICO-based lawsuit. Their allegations are baseless and we rejected their overtures.

We believe the plaintiffs' complaint is nothing more than a garden-variety employee discharge case sensationalized with spurious charges of fraud. RICO claims are often used to generate publicity and exert settlement leverage. We intend to defend against it vigorously.

The corporation maintains a system of internal procedures to assure the integrity of our operations. The corporation has looked into the alleged improprieties, which relate to internal reporting practices, the manner in which the federal government was billed for interest payments on guaranteed student loans, and various employee-management issues. In every instance, the corporation's investigation has found the allegations to be without merit.

The FBI has been reported in the media as having undertaken an investigation of Sallie Mae's Loan Servicing Center/Kansas because of the alleged improprieties involving various federal statutes. The FBI has not contacted Sallie Mae in this regard.

Sallie Mae works closely with federal regulatory and investigative bodies. We are confident they will find that our operations in Kansas fully comply with all applicable laws.

#90289p5719 10/16/1990 ~PR Newswire

DENVER (OCT. 16) PR NEWSWIRE - First Interstate Bancorp (NYSE: I) today reported third quarter net income of $155.4 million, or $2.39 per share. This compares to a loss of $15.5 million, or 57 cents per share, in the third quarter of 1989.

The 1990 third quarter results include a $90.1 million pre-tax gain ($55.7 million after taxes based on statutory federal and state income tax rates) from the sale of the corporation's wholly owned consumer finance subsidiary, NOVA Financial Services.

"We continue to make solid progress in the way we do business," said Edward M. Carson, chairman and CEO. "Of course, we are not immune to the major pressures on the banking industry today. We began addressing the challenges of a slowing economy and diminished real estate values before many believed that these factors might affect the industry nationwide."

"Management has been implementing major changes designed to enhance First Interstate's ability to provide unsurpassed products and services while maintaining prudent controls over costs and operating practices. We believe this combination, reinforced by an unsurpassed level of liquidity which allows us to be independent of more expensive commercial paper funding, is a strategy for long-term success in an uncertain market environment," Carson said.

First Interstate Bank of Denver today reported a loss of $5 million for the third quarter of 1990 compared to net income of $2 million reported a year ago.

The bank's loss was the result of an increase in the provision for loan losses which now stands in excess of 100 percent of non-accrual loans and 3.41 percent of total loans.

James Curran, chairman and CEO, said that in adding the additional reserves for possible loan loss, the bank continues its conservative posture of recent months.

He noted that, "Although the Denver economy is growing slowly, many borrowers who have been able to manage through several tough years are finding they have few resources left. We are fortunate to have the financial strength to

address these loan problems in such an aggressive manner."

DES PLAINES, ILL. (OCT. 16) PR NEWSWIRE - DeSoto, Inc. (NYSE: DSO) today issued a supplement to its proxy statement, dated Sept. 21, 1990, for the annual meeting of stockholders to be held on Wednesday, Oct. 24, 1990. Among other things, in the supplement DeSoto stated that if the budget agreement announced on Sept. 30 had become law, the secondary cash dividend would have been reduced from approximately $6.88 per share to approximately $4.97 per share. If the proposal made by the House Ways and Means Committee becomes law, the payout would be reduced to approximately $4.35 per share. The secondary dividend would be paid to stockholders in the summer of 1991 from the overfunded portions of the company's present pension plans.

The company cannot predict whether the final budget legislation will include any increase in the excise tax applicable to the reversion of the overfunding or whether such legislation will contain other provisions having the effect of preventing or reducing the company's ability to recover the overfunding. In the event of a substantial increase in the excise tax that cannot be reduced by transferring pension assets to fund other permitted corporate costs, the company may elect not to obtain a reversion of the overfunding.

The company also announced that DeSoto and Witco had extended to Nov. 5, 1990, the date after which either party could terminate the Surfactant Agreement. The original deadline date was Sept. 30, 1990. DeSoto and Witco have agreed with the FTC that the surfactants closing date will not occur before Oct. 31, 1990, however, the FTC has requested a further extension to Nov. 9, 1990.

In addition, DeSoto stated that all action by the committee on foreign investment in the United States had been concluded in connection with DeSoto's Exon-Florio filings.

According to the supplement, DeSoto and Sears Roebuck and Co. (NYSE: S) have reached agreement on the terms of detergent supply for 1991. DeSoto anticipates these terms will not have a material impact on the company's 1991 operating income from the detergent business. The company does believe, however, that higher raw material prices and lower detergent sales to Sears, will mean that pro forma net income for the detergent business for the three months ended Sept. 30, 1990, will be materially below the trend indicated by pro forma net income for the detergents business for the six months ended June 30, 1990.

Finally, the company announced that it expects to be profitable for the third quarter ended Sept. 30, 1990, after reporting a net loss for the same period of 1989. Net income for the quarter ended Sept. 30, 1990, however, will be less than one-third of its net income for the quarter ended June 30, 1990, primarily due to seasonality of sales and non-recurring expenses.

#90289p5735 10/16/1990 ~PR Newswire

PARK RIDGE, Ill. (OCT. 16) PR NEWSWIRE - The Brand Companies Inc. (NASDAQ: BRAN) today reported third quarter net income of $3.8 million, up from $3.5 million in the same quarter of 1989. Earnings per share increased to $.19 per share, compared with $.18 per share in the year-ago period. Revenue increased to $91.2 million compared with $87.4 million in last year's July - September quarter.

For the nine months ended Sept. 30, 1990, Brand earned $10.6 million, compared to $7.2 million earned the first nine months of last year. Earnings per share totaled $.52, up from $.38 in the nine-month period one year earlier. Revenue increased to $275.2 million, compared to $197.4 million achieved in the first nine months of 1989.

Earnings-per-share figures for all periods have been restated to reflect a two-for-one split in the form of a stock dividend distributed on July 9, 1990.

Brand's backlog at Sept. 30, 1990, amounted to $175.5 million, of which $70.5 million is related to fixed price asbestos abatement projects. Included in the above backlog is Brand management's estimate of approximately $85.0 million of on-hand time and material work encompassing all of Brand's businesses.

On Oct. 2, 1990, Brand and Chemical Waste Management Inc. announced that Chemical Waste Management would exercise its option to increase its ownership

in Brand to 52.5 percent on a fully diluted basis by purchasing 2,601,272 shares of Brand's common stock for approximately $21 million in cash. Brand also announced that its board of directors had authorized the repurchase by the company of up to 1,000,000 shares of its common stock in the open market or in privately-negotiated transactions over the next 24-month period.

Brand and its subsidiaries are specialty contractors concentrating in such areas as asbestos abatement, technical services, manufacturing of high performance materials and new construction.

ST. Paul, Minn. (OCT. 16) PR NEWSWIRE - Medical Devices Inc. (MDI) (NASDAQ: MDEV) today reported net sales declined 8 percent to $1,336,000 in the first quarter of fiscal 1991 ended Sept. 30. Earnings for this period totaled $68,000 or 3 cents per share, down slightly from $78,000 or 4 cents per share

in the first quarter of fiscal 1990.

MDI's first quarter results were attributable to a decline in order volume for TENS devices from a major national distributor. This customer generated significant business with MDI in last year's first half. However, MDI maintained its volume of ongoing TENS business with independent medical dealers, MDI's core customer base, in spite of intensely competitive conditions in this mature market.

Dean A. Enrooth, president and chief executive officer, said, MDI's new product line, electrotherapy devices, performed very well, reflecting the company's expansion into the growing electrotherapy device market. Sales of electrotherapy products rose to 49 percent of total first quarter sales from 19 percent a year ago. TENS devices declined to 27 percent of first quarter sales, while accessories amounted to 24 percent. Reflecting MDI's overall strategy, the contribution from electrotherapy devices, Enrooth added, should increase further during the balance of fiscal 1991.

Due to the shift in MDI's sales mix toward high-margin electrotherapy products MDI's gross margin rose to 52 percent in this year's first quarter, up substantially from 45 percent a year ago.

Since the company is still implementing new distribution strategies and expanding its electrotherapy sales team, Enrooth said MDI's second quarter results will not exceed last year's level. However, he said sales and earnings are expected to ramp up steadily in the second half, which should make fiscal 1991 a year of improved results for MDI.

Medical Devices is a leading designer and manufacturer of electrotherapy and TENS devices. The company's common stock is traded on the national over-the-counter market under the NASDAQ symbol MDEV.

RACINE, Wis. (OCT. 16) PR NEWSWIRE - Tenneco Inc. said today that its J I Case unit has promoted Gary L. Tessitore to executive vice president and general manager of the company's Agricultural Equipment Group.

Tessitore, previously senior vice president and chief financial officer, succeeds Michael A. Wolf, who resigned to pursue other opportunities. In making the announcement, James K. Ashford, Case president and chief executive officer, also noted the following promotions:

-- Richard L. Wambold, general manager of the company's

International Business Group, was promoted to executive vice president from senior vice president. In addition, Wambold was given responsibility for corporate planning and development and corporate information services. -- Edward H. McFadden was promoted to senior vice president and chief financial officer, succeeding Tessitore. McFadden had been vice president, finance. Tessitore, 45, joined Case in 1988 after 20 years of domestic and international business experience with Ford Motor Company's Tractor Operations including 3-1/2 years as controller of Ford's European Tractor Operations. Tessitore returned to the United States and held several management positions before being named vice president/controller of Ford New Holland Inc. in 1988. Tessitore earned a bachelor of science degree in economics from Villanova University and a master of business administration degree from the University of Maryland.

Wambold, 38, joined Case in 1988 as senior vice president and head of the company's International Business Group, responsible for the company's business activities in markets outside of North America and Europe. He joined Tenneco, Case's Houston-based parent company, in 1977, and after holding positions in corporate systems and planning, became vice president, corporate planning and development in January 1988. Wambold received a bachelor's degree and a master of business administration degree from the University of Texas.

McFadden, 47, came to Case in 1989 after 19 years with Ford Motor Co. At Ford McFadden held a number of management positions both in the U.S. and Europe including director, manufacturing and supply financial analysis for Ford New Holland Inc. in New Holland, Pa. McFadden holds a bachelor of science degree in economics and a master's degree in international economics from Penn State University.

Headquartered in Racine, Wis., Case is a leading worldwide maker of agricultural and construction equipment. Case is a subsidiary of Tenneco Inc. Houston.

Tenneco is a diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

DES PLAINES, Ill. (OCT. 16) PR NEWSWIRE - DeSoto, Inc. (NYSE: DSO) today issued a supplement to its proxy statement, dated Sept. 21, 1990, for the annual meeting of stockholders to be held on Wednesday, Oct. 24, 1990. Among other things, in the supplement DeSoto stated that if the budget agreement announced on Sept. 30 had become law, the secondary cash dividend would have been reduced from approximately $6.88 per share to approximately $4.97 per share. If the proposal made by the House Ways and Means Committee becomes law, the payout would be reduced to approximately $4.35 per share. The secondary dividend would be paid to stockholders in the summer of 1991 from the overfunded portions of the company's present pension plans.

The company cannot predict whether the final budget legislation will include any increase in the excise tax applicable to the reversion of the overfunding or whether such legislation will contain other provisions having the effect of preventing or reducing the company's ability to recover the overfunding. In the event of a substantial increase in the excise tax that cannot be reduced by transferring pension assets to fund other permitted corporate costs, the company may elect not to obtain a reversion of the overfunding.

The company also announced that DeSoto and Witco had extended to Nov. 5, 1990, the date after which either party could terminate the Surfactant Agreement. The original deadline date was Sept. 30, 1990. DeSoto and Witco have agreed with the FTC that the surfactants closing date will not occur before Oct. 31, 1990, however, the FTC has requested a further extension to Nov. 9, 1990.

In addition, DeSoto stated that all action by the committee on foreign investment in the United States had been concluded in connection with DeSoto's Exon-Florio filings.

According to the supplement, DeSoto and Sears Roebuck and Co. (NYSE: S) have reached agreement on the terms of detergent supply for 1991. DeSoto anticipates these terms will not have a material impact on the company's 1991 operating income from the detergent business. The company does believe, however, that higher raw material prices and lower detergent sales to Sears, will mean that pro forma net income for the detergent business for the three months ended Sept. 30, 1990, will be materially below the trend indicated by pro forma net income for the detergents business for the six months ended June 30, 1990.
